

23-45 Eng(503) Final term

Q#1

VU Manu

Ways Deductive Approach is Criticized by Adamson?

Criticism of DA (Adamson)

- 1 Teachers grammar in an isolated way.
- 2 Little attention is paid to meaning.
- 3 Practice is often mechanical.

Q#2

Three Assumptions of Critical discourse? CDA

- Language use is always social.
- Discourse both reflects and constructs the social world.
- Power relations are discursive.
- Discourse does ideological work.
- Discourse is historical.
- The link between text and society is mediated. Discourse is form of social action.

Q#3

What do you understand by the phrase "Controlled practice" in the classroom? Enlist two examples:-

It focuses only the target language giving students many opportunities to

use it. Here are few examples:

- Drills and gap-fill
- Sentence Completion
- Quizzes and tests
- Games, Information search, dictation etc.

Q#4 Elements of CA.

CA introduced a Continuing major theme of Search: 'the influence of L1 on L2?'. It involves predicting and explaining learner problems based on the comparison of L1 and L2 to determine similarities and differences. It is influenced by the theories of Structuralism and Behaviorism. The focus of CA is on the surface forms of both L1 and L2 systems and on describing and comparing the languages one level at a time - generally contrasting the phonology of L1 and L2 first, then morphology, and then syntax. Lexicon and discourse usually receive little attention. Following behaviourist view, CA assumed that language acquisition essentially involves habit formation in a process of

Language and Society may influence each other (Marxist view).

- There is no relationship between at all linguistic structure and social structure (Chomsky).

Q#6

Cheating affects on individual and group learning?

Students do not remember when they copy from others when they do their own work. Students are aware when cheating is allowed to occur - the teacher's credibility is diminished, honest students are disadvantaged, and they may feel compelled to cheat just to keep up. Unchecked cheating can erode student's motivation to learn.

Q#7

Approaches of need analysis?

- Target Situation analysis (TSA) - focuses on the learners needs at the end of the course and Target level performance.

Manu

5

Present-Situation analysis (PSA)-focuses on the learner's Competence Concerning skills and language at the beginning of the Course.

- Learning-Centered Approaches is a process of negotiation between individuals and Society, the latter including Syllabus, materials, teaching method, etc. and divide needs into necessities, lack and Wants
- Strategy Analysis focuses on methods of learning i.e. preferred learning styles and strategies.

Q#8

Two benefits of describing 'Objectives'?

- They facilitate planning: Once objectives have been agreed on, Course/Planning, materials preparation, textbooks selection, and related processes can begin.
- They "Provide measurable outcomes and thus provide accountability: given a set of objectives, The Success or failure of a program.

Q#9:

Define the term "Face" in the Context of pragmatics.

It is defined as "The public self-image that every members wants to claim for himself", and the efforts made by interlocutors to "maintain each other's face." Under politeness theory, there is a positive and a negative face.

- Positive face reflects the desire to have one's self-image approved of by others.
- Negative face is a part of personality that desires not to be imposed upon.

Q# 10

Benefits of Bilingualism.

Bilingualism strengthens Cognitive abilities. Bilingual people tend to be more Creative and flexible.

They Can be more open-minded, and they also find it easier to focus on a variety of tasks simultaneously. And being able to speak two

Manu

⑦

languages help in other ways Too.

Q# 11

What kind of educational learning material do Computer Technologies promote?

To Levy it is, 'the Search for and study of applications of the Computer in the language teaching and learning.'

To find ways for using Computers for the purpose of teaching and learning the language.

Computer technologies promote educational learning, including:

Word processing, presentation packages, guided drill and practice, tutor, Simulation, problem solving, games, multimedia CD-ROM, and internet applications Such as e-mail, chat and the World Wide Web (WWW) for learning purposes.

Q# 12

Relationship between language and identify with reference to ELT.

Language can be defined as a shared set of verbal codes and as a genetic

(8)

Communicative phenomenon especially in descriptions of instructions. In ELT, teachers and students use both Spoken and written language to communicate. Students learn to read and write - learn the discourse of academic disciplines (academic literacies). When it comes to the discussion of language and education, both definitions are important.

Relationship between language and Education:-

Halliday divided language learning into three heuristic categories relevant to ELT:

- Language learning
- Learning through Language
- Learning About language

Q# 13

Define plot?

The primary threads of your story form the plot. The plot is moved forward through the actions of the characters. It is derived from

the inciting incident or ordinary world, through the changes that lead to the Conclusion and denouement. Plot is not the story. plot is a series of events you have devised, and these events may not even occur linearly.

Q # 14

Define preparing?

The Creative process begins in preparation, which includes active reading, imitation, research, play and reflection: all conscious actions.

The time when you are settling your project, deciding exactly what you are going to do. In this stage, you are also researching ways to help you achieve it, including researching history and other factual data for fiction and Creative non-fiction.

Ask yourself two questions.

- What am I preparing for?
- How shall I do this?

Q# 15

Guess work in Vocabulary:

It is to infer meaning from the Context in the same way as native speakers do. It can be more efficient in the long run. It gives them confidence that many words can just be ignored. Encourage students to adopt a positive attitude towards new words instead of the negative one (Help!!).

Q# 16

Importance of Vocabulary in Learning Language.

The more words a learner knows, the more they will be able to understand what they hear and read, and the better they will become at expressing what they want to when speaking or writing. Motivational impact raises achievement and confidence in L2 learning. Vocabulary helps students in becoming independent learners. Without words to express a wide range of meanings,

(11)

Memo

Communication in an L2 just happen in a meaningful way.

Q #17

Define Call?

The acronym CALL appears to have been coined at the beginning of the 1980s. To Levy it is, 'the Search for and study of applications of the Computer in language teaching and learning.' To find ways for using Computers for the purpose of teaching and learning the language. Computer technologies promote educational learning, including word processing, presentation packages, guided drill and practice, tutor, Simulation, problem solving, games, multimedia CD-ROM, and internet applications such as e-mail, chat and the World Wide Web (WWW) for language learning purposes.

Q #18

COHERENCE types:

- Referential Coherence (Consistency in who or what is being talked about)

- Temporal Coherence (~~where~~^{when} the events occur)
- Locational Coherence (where the events occur)
- Causal Coherence (why events happen).

Q # 19

Discuss 'Incubation' as a process of writing Creativity.

It is about planning and preparation, may overlap with the incubation stage. In evolution stage, dreams, daydreams, unconsciousness, and random writing play an important role. Incubation creates an incoming wave of the subconscious that washes over the pages you will write.

Q # 20

Write about use of 'Generic Nouns and pronouns' as a salient features of African English.

Use of generic nouns or pronouns in regionally characteristic ways.

E.g. he is a real/whole person [i.e. an adult]
Other examples includes the use of "boy" by girls for their friends and 'footing' to mean 'walking' in Zambia (Tsipathi, 1996).

Q#21

Manu

Define Parallel Corpus:

It is a Corpus consisting of the same text in two languages. The texts are aligned (matching segments, usually sentences are linked). The Corpus allows searches in one or both languages to look up translations. The user can then observe how the search word or phrase is translated.

Q#22

Language and Culture:-

Language is formed by culture, while culture is influenced by language. Without language, culture cannot be completely acquired nor it can be effectively expressed and transmitted and without culture language can't exist. Thus, culture shapes languages and language is also formed by it. Language is the medium of culture.

~~that is~~ Thanasoulas (2001) stated: "Language does not exist apart from culture, that is, from the socially inherited assemblage

of practices and beliefs that determine the texture of our lives. In a sense, it is 'a key to the culture past of a society' - a guide to 'social ~~go~~ reality' (Sapir, 1929, Cited in Salzman, 1998)

Example:-

This is clearly seen in immigrant societies, for example, in America. These immigrants are accustomed to a certain language, and therefore, despite the assimilation, will continue to use it and keep it alive, creating different and cultured societies in this foreign land to keep the language alive.

Q#23

Background CDA:-

Backgrounding:- What is chosen to de-emphasize or leave out of the text. It can easily be identified in newspaper reporting.

Presupposition:- Background knowledge, assumptions, attitudes and points of view that the text presuppose.

Q# 24:

Manu

Limitations of Conversational Analysis?

- Lack of Systematicity - list of all adjacency pairs is not exhaustive.
- Does not take into account pragmatic or sociolinguistic aspects of interaction.
- May be Coupled with discourse analysis and Cultural approaches.

Q# 25

5 points regarding difference Aspects of Discourse Analysis?

- Discourse as the Social Construction of reality.
- Discourse and Socially situated identities.
- Discourse and performance: 'a Discourse is a dance'. (Gee, 2005,)

While we say something, we also do it.

- Discourse and Intertextuality.
- Difference between Spoken and written discourse: Writing is more structurally complex; Spoken discourse has its own complexity.
- Grammatical intricacy.

Q#26

Types of References:-

Major Forms of Reference:-

Endophoric Reference:- (Endophora)

Where the interpretive source lies in Co-text. An Endophoric Reference can be divided into sub-types:

- Anaphoric Reference (Anaphora):

Where the referent lies in a prior text, eg. respect a man, he will do the more

- Cataphoric Reference (Cataphora):

Where the referent lies in the text to come, e.g. When I met her, Mary looked ill.

Exophoric Reference (Exophora):

Where the interpretive source lies in the context, e.g. (Mary is standing there) I like her.

Q#27

Course Rationale:-

- Developing a Course rationale
- Describing entry and exit levels
- Choosing Course Content
- Sequencing Course Content

Manu

- planning the Course Content
- preparing a Scope and Sequence plan
- Course Rationale -- starting point in Course development

Q #28

Usage of Corpus:-

1. The insights derived from native-speaker Corpora contribute to a more accurate language description, which then feeds into the compilation of pedagogical grammars and dictionaries.
2. The analysis of learner language provides insights into learner's needs in different contexts, which then form learner dictionaries and grammars.
3. Corpora of language teaching course books enable the examination of the language to which learners are exposed.
4. Facilitate the development of more effective pedagogical materials.
5. Corpus-based research has also revealed the inadequacy of many of the rules that still dominate ELT materials.

(B.)

Q#29:

How to prevent cheating any 3 ways?

- Make Sure that your test accurately represents what you have taught.
- Define what cheating is before the first quiz or examination.
- Discuss what you consider cheating, what is unacceptable, and what you expect from your students.

Q#30

Six Sub-genres of Umbrella under non-fiction?

Under the Umbrella, it is called "Creative Notification" we might find a long list of Sub-genres Such as: memoirs, personal essays, meditations on ideas, nature writing, travel writing, journals or letters, Cultural Commentary, hybrid forms, and even, Sometimes, autobiographical fiction. In Creative non-fiction, reality must be transformed into literature but remains recognizable. It is grounded in life and vivid detail.

Q#31

Main

Activities for teaching Vocabulary

- Semantic Map
- Word cards
- Reading Technique
- Venn diagram Technique
- Cross Word Puzzle
- Finish the Sentence
- Anagrams
- Linking words.
- Word definition
- One Word Substitution

Q#32

Teaching Pronunciation to Beginners:

A teacher can decide the resources, lesson plans and activities to improve student's pronunciation skills according to their level. For the beginners the teacher may follow these areas.

- Syllable stress
- Voiced and Voiceless Consonants
- Silent letters.

Pronunciation activities:

- Slap That word!
- Fun game for learners asking them to associate words that are posted on the wall of the classroom - reinforce

(25)

pronunciation patterns.

- Read and Rhyme - asking students to come up with words that rhyme with others presented on cards.
- Encourage them to speak as much as they can.

Q # 33

Diglossia:-

Diglossic Situation exists in a Society when it has two distinct languages which show clear functional

separation; that is, one is employed in one set of circumstances and the other is entirely different set.

"High" Versus "Low" Variety of a language.

~~Monological Corpus~~: Q # 34

Monolingual Corpus

Monolingual Corpus is texts in one language only. Usually tagged for parts of speech and is used by a wide range of users for various tasks from highly practical ones, eg, checking the correct usage of a word.

or natural word combinations, to scientific use, e.g., identifying frequent patterns or new trends in language.

Q #35:

Teacher as tutor:

- Reads interesting materials aloud to students on the consistent basis
- Visits the School library regularly and set aside time for browsing and reading.
- Explains to students, how to make a choice of what to read according to genre, level of understanding and interest
- Tells them what s/he expect over a period.

Q #36

Define Pidgin and Creole.

Pidgin is a variety of language without native speakers which arises in a language contact situation and operates as a lingua franca. Pidgin language, later on, can have native speakers, but that pidgin is called Creole.

Q# 37

Explain Rhythm:

English Speech resembles music as it has a beat. There are groups of syllables, within each group there are strong and weak beats.

Our Sense of self and Community are bound up in the Speech-rhythms of our first language (L1). Therefore;

It is Common for students to feel uneasy when they hear themselves speak with the Rhythm of a Second Language (L2). They "Sound foreign" to themselves usually unconsciously. Teachers and students can overcome the difficulties and boredom often associated with pronunciation by focusing their attention on the development of pronunciation that is "Listener friendly".

Q# 38

Coherence type:

- Referential Coherence (Consistency into who or what is being talked about)
- Temporal Coherence (When the

(23)

events occurs • Locational Coherence

(where the events occur)

Causal Coherence (why events happen).

Q#39

Teaching Vocabulary at elementary level

- Useful for teaching vocabulary at the elementary level.
- Help teachers to establish a link between a word and its meaning.
- Realia - Objects in the class.
- Mime, gesture, actions, facial expressions, etc.
- Interesting, direct and makes an impression on the class

Q#39

Any Six trends of research in ELT?

- 1 English Language Curriculum, Assessment and Reform
- 2 Individual difference:
- 3 Learners Autonomy and Self-Efficacy
- 4 Course and material development
- 5 Learning and teaching strategies.
- 6 ERROR Analysis

Q#46

Functional Notational Approach:

People who study and use a language are mainly interested in how they can do things with language - how they can make meanings, get attention to their problems and interests. They are only interested in the grammatical structure of a language as a means to getting things done.

Objectives:

- To explain language in terms of how people use it to live.
- Adopts a semantic and pragmatic orientation inside the grammar.
- It does not see semantic and pragmatics as extra level of organization but sees them as integral to the organization of the grammar.
- Communication meanings that learners would need in order to express themselves and to understand others effectively.

Q#42

Manu

Curriculum vs syllabus

While Curriculum is a theoretical policy document, a syllabus is a guide for teachers and learners that indicate what is to be achieved. A Curriculum is concerned with making general statements about language learner, learning purpose, and experience, and the relationship between teacher and learners. A syllabus is more localized and is based on the accounts and records of what actually happens at the classroom level as teachers and students apply a Curriculum.

Q#43:

CDA 5 tools discuss:

CDA and framing:

The way in which the Content of the text is presented to its audience, and the sort of perspective, angle and slant the writers or speaker is taking.

Foregrounding:

What is the chosen to emphasize

Backgrounding:

What is Chosen to de-emphasize or leave out of the text. It can easily be identified in newspaper reporting.

Presupposition:

Background knowledge, assumptions, attitude and points of view that the text presuppose.

Topicalization:

What has been put at the front of each sentence to indicate what it is about.

Agency:

Who initiates the action, agent patient relationship- who does what to whom? Who has the most authority and power in the course? What agents have been left out of sentences?

Q44:

(27)

Relationship between language and Education Halliday?

Relationship between language and Education Halliday divided languages learning into three heuristic Categories relevant to ELT:

- Language Learning
- Learning through language
- Learning about language, education and development are interrelated in language acquisition.

Q#45:

Types of dialect?

Idiolect-

The speech variety of an individual speaker.

Sociolect-

A variety or lect which is thought of as being related to its speaker's background rather than geographical background. E.g. in india, Social system "Cast" determines which variety of the language a speaker uses. Factors that contribute to bring variation

(56)
in a language: There are many factors to cause variation like Social situation, Occupation, age, geography, education, gender, Social status/class, and ethnicity.

Q#46

Explain Narrative Viewpoint---

Narrative Viewpoint:

It relates to who is telling the story. Sometimes this is the character in the story and sometimes it is an anonymous voice in the abstract that can be presumed.

Narrative Voice:

It is unique characters of the narrator that make him distinguishable from other narrators.

Q#47

Intonation:

Speech uses changes in pitch. Speakers change their voice by making it higher or lower in pitch at their will. It is called intonation. The rise and fall of voice may be

Very Sudden or gradual and can be put together in various combinations (rise-fall-rise, fall rise fall, etc). Speaker uses pitch to send various messages. Sentence stress or intonation work together to help speakers send precise messages.

486

Factors affecting L2 motivation?

There are multiple factors interfering learning L2 motivation:

Attitudinal Factors:

Cultural Interest L2 learners are represented important aspects of the socio-cultural attributes of L2 Community. It was observed that awareness about the cultural items of an L2 Community influenced L2 attitude of the learners. Even where direct contact with the native speakers TL is the case, cultural products such as books, media and music provide L2 learners with the opportunity to be familiar

With L2 Community.

Attitudes toward L2 Community:

Successful L2 learning is largely driven by learner's attitudes toward L2 Community. It focuses not only on learner's attitude towards L2 Community and its ethno-linguistic variety but also on their desire to meet with the Community and travel to the Countries that belong to it.

Integrativeness: Learners may want to integrate into the L2 Culture and become similar to the L2 Speakers (Dörnyei et al. 2006).

Instrumentality (Promotion and prevention):

It is one of the most important and widely accepted aspects of motivational research in L2 Settings. A significant motivational factor in the previous Pakistani studies. Utilitarian value of the target language serve as an important incentive for the learners.

International posture:

A tendency to see oneself as connected to the international community. It concerns for international affairs. The readiness to interact with the people other than those from the local context (Yashima, 2009.)

Q # 49

Factors language knowledge and awareness.

1. Linguistics Factors: • Teacher needs to understand the system and function of the second language and the difference between L1 and L2 of the learner. • A teacher should know how to speak and understand a language. He/she should attain the technical knowledge required to understand and explain the system of that language. Its phonemes, words, sentences and discourses structures.

2. Learning process • how can a person ensure success in language learning?

• What cognitive process are utilized?

32

- What kinds of strategies are available to a learner and which ones are optimal?

3. Age and Acquisition • To know about differences between children and adult's learning process. It is a common observation that children are better language learners than adults.

4. Instructional Variables

What are the effects of varying methodological approaches, textbook, materials teacher styles and institutional factors?

Q#50

View of the Critical Period Hypothesis about age factor in language learning?

Some linguistic support the idea, known as the Critical period Hypothesis that a learner needs to begin learning the language before age 7 in order to develop native-like pronunciation. However, more recent research such

(33)

Suggest that the factors (environment, motivation, etc.) may be more important factors in the development of native-like pronunciation (Schaetzal, 2009). We do not yet have clear-cut evidence for a simple and straightforward link between age and the ability to pronounce a new language. The primary aim is that students be understood. Good pronunciation is needed for this, but a "perfect accent" is not (Harmer, 1991).

Q#51

What question does the Curriculum address?

1. What is the purpose of educating students in this particular institution/ educational level?
2. What kinds of knowledge should students be taught?
3. What kinds of learning experiences do the students need to go through in order to acquire the knowledge and achieve our purposes?

(34)

4. How should these learning experiences be organized?

By answering these question a Curriculum provides information on: the goals of education, Subjects to be taught, activities learners should be engaged in (how), methods and materials, allocation of time and resources and assessment of students and of the Curriculum itself.

Q#52

How does one gain Cultural intelligence?

First - Increase your awareness of your own Cultural values, beliefs, traditions, and norms and how they affect your behaviour.

Next - Appreciatively observe everyday School life and ask non-judgemental questions. Make tentative assumptions about the Culture. Check your assumptions through additional observations and discussions with

35

individuals familiar with the Culture.
Learn from your mistakes. Study and
practice the language. Finally- Adapt
Some behaviours that enable you
to function in the Culture.

An activity to gain insight into a
School Culture: A Cultural interview
activity..

Encourage students or teachers
to think about School Culture and
share their thoughts with the teacher.
Following question is helpful in such
interviews:

- Who is a hero at this school? Why?
- What is your friend's favorite thing about this school?
- What would your friends tell a new student about this school?

Q#53

Common Communicative Methodologies:

There are some basic ideas which
are common in modern Communicative
methodology such as:

1. Use of the Mother tongue:

(36)

Everyone has a different opinion about when, how and how often a teacher should use the mother tongue of her students. You may find it necessary to give instructions or explain certain items of grammar in the mother tongue.

2. Eliciting: By adding drawing on the board or use pictures to elicit something as rooms, methods of transport etc.

- To use to mime to elicit such things as sports, everyday activities, etc.
- To work backwards from answers to elicit question forms; e.g., ~~try~~ to write 'she's a doctor' on the board to elicit.

3. Board Work: When writing new vocabulary, try to make it clear what part of speech the words in form. • If you only write single words, students may not remember whether it's a verb or a noun.

- Write 'a house' instead of just 'house'.

(57)

Manu

4. **Drilling:** The opportunity to practice saying a new word, phrase or structure in a highly controlled environment.

5. **pronunciation:**

It involves modeling the pronunciation of new language for students to imitate. The modeling can either be done by the teacher or by planning the course book cassette.

Q#54

Factors of fiction Writing?

Meriam Webster defines fiction as, "literature in the form of prose, especially novels, that describes imaginary events and people." The key elements of writing fiction are character, plot, setting, structure, issues narrative voice, narrative viewpoint, action, dialogue, language and style or genre (Griffith University, 2012,17).

Q#55

Scope of research in ELT?

In recent years, there has been a dramatic change in the scope of English language teaching worldwide. and as increasing

③

demand for Competent English language teaching teachers as well as for language programmes. Its focus is on English language skills and competencies, needed by today's global citizens. The teaching of English consumes a considerable portion of available educational resources in many countries. English is not necessarily a neutral commodity offering equal opportunities for all. English teachers need to appreciate the special status English has in modern life. Research has gained significance in ELT and the facade of research has also changed tremendously over the last decade. It is subject to numerous changes, innovations and perspectives. The global spread of English and its impact, is a major reason of increasing research trends in ELT.

Q#56:

Six Sub-genres of Umbrella under non-fiction?

Q#56

(37)

Strategies for teaching pronunciation?

Instructional strategies for teaching pronunciation that can help students to meet their personal and professional needs.

1. Cultivate positive attitude toward Accuracy:
2. Identify specific Features that pose problem for ^{learners}
3. Make learner aware of prosodic Features:
4. Focus on developing learner's Communicative Competence.

Q#57

Six sub-genres of Umbrella Under non-fiction?

Under the Umbrella, it is called "Creative Nonfiction". We might find a long list of sub-genres such as memoirs, personal analysis, personal essays, meditation on ideas, nature writing, travel writing, journals or letters, Cultural Commentary, hybrid forms, and even, sometimes, autobiographical fiction. In Creative nonfiction, reality must be transformed into literature but remains recognizable. It is grounded

in life and vivid detail.

Q#58

Disadvantages of IA?

It may make learning process slow. The time taken to work out a rule may be at the expense of time spent in putting the rule to some sort of productive practice. Students may hypothesize the wrong rule - a danger where there is no overt testing of their hypotheses. It can place heavy demands on teachers in planning a lesson; need to select and organize the data carefully so as to guide learners to an accurate formulation of the rule. Some language areas (e.g., aspect and modality) resist easy rule formulation. It may frustrate those students who prefer simply to be told the rule.

Q#59

Word stress Rules?

To communicate clearly when you are speaking in English, it's

important to stress the correct syllables in each word. This is called word stress, which means pronouncing one syllable of a multisyllabic word with greater emphasis than the other syllables in the word stress as you practice pronunciation:

1. Stress the first syllable of:

- o Most two-syllable nouns (examples: CLImate, KNOWledge)
- o Most two-syllable adjectives (Example: ~~reQUIRE, deCIDE~~ FLIPpan, SPACious)

2. Stress the last syllable of:

- o Most two-syllable verbs (examples: ~~reQUIRE, deCIDE~~)

3. Stress the second-to-last syllable of:

- o Words that end in -ic (examples: ecSTATIC, geoGRAPHic)
- o Words endings in -sion and -tion (examples: exTENSION, retriBution)

4. Stress the third-from-last syllable of:

- o Words that end in -cy, -ty, phy and -gy (examples: deMoCracy, unCERTainty, geOGraphy, radiOLogy).

(42)

o Words that end in -al (Examples: exCEptional, CRITICAL)

Q#60

Importance of Writing poetry...

Poems are made up of lines of words that do not usually reach the far side of the page. Words themselves possess a small amount of music because they are made up of syllables, which are themselves made up of short and long speech sounds, and gradation between, just like birdsong. It is hearing your own nature. Poetry is more natural and art form, than you might have been led to believe. Lines in your poetry are units of your time. Those units of time operate with the rhythm of language, the beat of your species and of you.

Hugo suggests, how we feel about ourselves may color how we write poems.

Inside Poetry: In writing poems, you hear, see and feel very word, space and punctuation. marks intimately.

(43)

Some poets write to preserve moments of significance, often small and apparently trifling instants or perceptions

Observation and Memory: are as talismanic to poetry as character and story are the fiction. Poems try to create a small and clear world that goes on recreating itself everytime somebody reads it - perceptual and temporal clarity.

Awakening Language: Language is made to live through poems, but the living language of poetry does not simply begin and end with the meaning of your words, and those words combed into lines and stanzas. Words are sticky with meaning, history and association, and these elements are brought to life through the choice and combination - and by chance created by meter, rhyme and form.

Q#61

**Vocabulary and disruptive
Vocabulary?**

Vocabulary (the knowledge of words and word meanings) is one of the key building blocks in learning a new language. Majority of meaning is carried lexically. Vocabulary is the total numbers of words in a language one knows.

It largely consist of 'Content' words as opposed to 'Structure' words. The term 'word', in Vocabulary teaching, refers to expression made up of one or more terms which form units of meaning (Campillo). Therefore, idioms, and multi-word verbs such as phrases and prepositional verbs (e.g. give up, to put up with) will be considered words in the same way as single words (e.g. fan).

Q# 62

Novel as Communication?

According to Helton, Asamani and Thomas (1998), the benefit of novels are:

- Stimulate imagination
- Help students to identify the emotions of the character so that they can learn how others cope with situations

(45)

Manu

and problems. Similar to their own experiences.

- Examination of moral attitude, while developing communication skills.
- Motivate students to become a life-long readers.
- Help them master the skills that will enable them to acquire information, process this knowledge, identify problems, formulate alternatives, and arrive at meaningful, thoughtful, effective decision and solutions.

Q#63

Define Motivation?

Motivation involves the factors behind human actions; Why the people think and behave as they do' (Dörnyei, 2005) further elaborate that motivation deals with 'the direction and magnitude of Human action, that is, the choice of the particular action, the persistence with it and the effort expended on it'. It arises from a purpose and then guides human actions. The Concept of motivation

Cub

Seems to be a difficult and complex area to define. The multi-dimensional nature and wide range of motives for human behaviour make it ^{im}possible to develop a comprehensive theory of motivation. A kind of Cognitive stimulation, which encourages somebody to make 'Sustained intellectual and phrase effort' in order to achieve a goal (Williams and Burden, 1997,) Similar to its important contribution in influencing human behaviour, motivation also plays a key role in successful educational learning.
