

EDU430

Educational Foundations

1. **Pedagogy:** The art and science of teaching, focusing on how educators facilitate learning effectively.
 2. **Learning:** The process of acquiring knowledge or skills through study, experience, or teaching.
 3. **Comprehension:** Understanding information by relating it to prior knowledge.
 4. **Memorization:** Retaining facts or information without necessarily understanding them.
 5. **Experiential Learning:** Acquiring knowledge through direct experience and personal engagement.
 6. **Differentiated Instruction:** Tailoring teaching strategies to cater to diverse learning needs.
 7. **Social Presence:** The sense of connectedness and interaction among learners in educational settings.
 8. **Intrinsic Motivation:** The drive to learn or accomplish tasks driven by internal satisfaction.
 9. **Extrinsic Motivation:** Learning motivated by external rewards or pressures.
 10. **Generative Learning:** The active process of selecting, organizing, and integrating information to create meaningful knowledge.
-

Technological Integration in Education

11. **ICT (Information and Communication Technology):** Tools and resources for managing, storing, and transmitting digital data.
12. **CAI (Computer-Assisted Instruction):** Using computers to provide interactive educational materials.
13. **Teaching Aids:** Physical tools or resources that enhance learning experiences.
14. **Web Browser:** Software to access and interact with information on the World Wide Web.
15. **Search Engines:** Tools like Google and Bing for finding specific information online.
16. **Hypertext:** Text displayed on digital devices that links to other text or multimedia resources.
17. **HTML (Hypertext Markup Language):** A coding language for creating web pages and web applications.
18. **LAN (Local Area Network):** A network connecting computers within a limited area like a school or building.
19. **WAN (Wide Area Network):** A network spanning a large geographic area, like a country or continent.

20. **Cloud Computing:** Storing and accessing data over the internet instead of local devices.
-

Learning Strategies

21. **Absorb-Do-Connect:** A framework for learning involving observing, practicing, and relating concepts to experiences.
22. **Meta-Learning:** Understanding and controlling one's learning processes.
23. **Learning by Teaching:** Strengthening one's understanding by teaching others.
24. **Cognitive Presence:** The mental engagement required to process and connect information meaningfully.
25. **Problem-Based Learning:** Using real-world problems to foster critical thinking and knowledge application.
26. **Interactive Learning:** Engaging learners through dynamic and participative teaching methods.
27. **Personalized Learning:** Adapting educational content to suit individual learning styles and paces.
28. **Collaborative Learning:** Students working together to achieve educational goals.
29. **Game-Based Learning:** Using game elements to motivate and engage learners.
30. **Activity-Based Learning:** Hands-on tasks designed to enhance understanding and retention.
-

Educational Tools and Devices

31. **Tablets:** Portable devices that can store textbooks and provide interactive learning resources.
32. **Smartphones:** Multifunctional devices used for learning, communication, and accessing information.
33. **Teaching Machines:** Early devices designed for self-paced learning.
34. **Personal Computers:** Versatile tools for both educators and learners, offering applications for various educational purposes.
35. **PDA (Personal Digital Assistant):** Compact devices for managing personal and educational information.
36. **Interactive Whiteboards:** Boards that combine traditional chalkboards with digital displays to enhance teaching.
37. **Projectors:** Devices that display content from computers onto large screens for classroom viewing.
38. **E-Readers:** Devices designed to read digital books and documents, offering portability and convenience.
39. **Multimedia Tools:** Software or hardware that combines text, images, audio, and video to aid teaching.
40. **Virtual Reality (VR):** Simulated environments for immersive educational experiences.

Educational Systems and Concepts

- 41. **Standardized Education:** Uniform systems of teaching and assessment for all students.
 - 42. **Flexible Curriculum:** Adapting educational content to accommodate diverse needs and goals.
 - 43. **Assessment:** Methods used to evaluate student learning, such as quizzes and exams.
 - 44. **Feedback Mechanism:** Processes to provide constructive input to students about their performance.
 - 45. **Dropout Rate:** The proportion of students who leave education before completion.
 - 46. **Scholarship Programs:** Financial aid schemes to support academically deserving students.
 - 47. **Inclusive Education:** Ensuring equal educational opportunities for students of all abilities and backgrounds.
 - 48. **Student-Centered Learning:** Prioritizing students' needs and interests in the educational process.
 - 49. **Holistic Development:** Addressing cognitive, emotional, and social growth in students.
 - 50. **Critical Thinking:** Encouraging analytical and evaluative skills in learners.
-

Technical Foundations

- 51. **Processor (CPU):** The computer's central unit that processes instructions.
 - 52. **RAM (Random Access Memory):** Temporary memory for data being used during active processes.
 - 53. **ROM (Read-Only Memory):** Permanent memory storing essential startup information.
 - 54. **Hard Drive:** Storage devices for long-term data retention.
 - 55. **Cache Memory:** High-speed memory for storing frequently accessed data.
 - 56. **System Unit:** The main body of a desktop computer containing key hardware components.
 - 57. **Motherboard:** The primary circuit board connecting all computer components.
 - 58. **Input Devices:** Tools like keyboards and mice used to enter data into a computer.
 - 59. **Output Devices:** Tools like monitors and printers used to display or produce information.
 - 60. **Storage Media:** Devices like USB drives and external hard drives for saving data.
-

Digital and Web-Based Tools

- 61. **Intranet:** A private network for organizational communication.
- 62. **World Wide Web (WWW):** A global system of linked hypertext documents and multimedia resources.
- 63. **Uploads and Downloads:** Processes for transferring files to and from a computer or server.
- 64. **Web Server:** A system delivering web pages to users.
- 65. **Bookmarks:** Saved links to frequently visited web pages.

- 66. **Social Media Tools:** Platforms like Twitter and Facebook used for communication and education.
 - 67. **E-Libraries:** Online collections of academic and literary resources.
 - 68. **Learning Management Systems (LMS):** Platforms like Moodle for managing online courses.
 - 69. **Digital Classrooms:** Virtual spaces for real-time or asynchronous learning.
 - 70. **E-Learning:** Online education facilitated by digital tools and resources.
-

21st-Century Educational Trends

- 71. **Blended Learning:** Combining online and in-person educational methods.
 - 72. **Flipped Classroom:** Students study content at home and engage in activities during class.
 - 73. **Open Educational Resources (OERs):** Free, accessible learning materials.
 - 74. **Gamification:** Applying game-like elements to non-game contexts, such as education.
 - 75. **STEAM Education:** Incorporating arts into science, technology, engineering, and math curricula.
 - 76. **Sustainability Education:** Teaching about environmental responsibility and sustainable practices.
 - 77. **Digital Citizenship:** Responsible use of technology by students and educators.
 - 78. **Artificial Intelligence (AI) in Education:** Tools like chatbots and adaptive learning systems.
 - 79. **Virtual Learning Environments (VLEs):** Online platforms for managing and delivering education.
 - 80. **Massive Open Online Courses (MOOCs):** Accessible, large-scale online courses.
-

Teaching Philosophies and Practices

- 81. **Constructivism:** Learning as an active, student-driven process.
 - 82. **Behaviorism:** Focus on observable behavior and reinforcement in learning.
 - 83. **Cognitive Learning Theory:** Emphasizes mental processes like memory and problem-solving.
 - 84. **Bloom's Taxonomy:** A hierarchy of learning objectives from basic recall to critical thinking.
 - 85. **Scaffolding:** Providing temporary support to help students achieve learning goals.
 - 86. **Reflective Practice:** Educators evaluating their methods for improvement.
 - 87. **Professional Development:** Ongoing training for teachers to enhance skills.
 - 88. **Learning Communities:** Groups of students and educators collaborating for mutual growth.
 - 89. **Global Competency:** Preparing students for global interconnectedness and challenges.
 - 90. **Equity in Education:** Ensuring fairness in educational access and resources.
-

Technological Skills

91. **Coding:** Writing instructions for computers to perform tasks.
92. **Data Literacy:** The ability to interpret and use data effectively.
93. **Digital Literacy:** Skills for effectively using digital tools and media.
94. **Cybersecurity:** Protecting systems and data from unauthorized access or damage.
95. **Networking Basics:** Understanding how devices connect and communicate.
96. **Software Applications:** Programs like MS Office or Google Suite for educational tasks.
97. **Video Conferencing Tools:** Platforms like Zoom for virtual communication.
98. **Augmented Reality (AR):** Enhancing real-world experiences with digital overlays.
99. **3D Printing:** Creating physical models from digital designs for educational purposes.
100. **Robotics in Education:** Using robots to teach programming and engineering.
