Question No:1 **(Marks:1)** **Vu-Topper RM**

The total weight assigned to actual occurrences should be equal to:

A. 2
B. 0
C. 3
D. **1**

For which of the following approaches, the forecast of any period equals the previous period's forecast?

A. Delphi method
B. Associative model
C. Judgmental forecast
D. **Naïve forecast**

The method that considers several variables related to the variable being predicted is:

A. **Multiple regressions**
B. Moving average
C. Weighted moving average
D. Exponential smoothing

Which of the following statements describes an order-qualifier characteristic?

A. A factor which directly and significantly contribute to winning business
B. A factor which increases the profitability of the organization
C. A competitive dimension used to make final decision among competitors
D. **A factor perceived as a minimum standard as a potential for purchase**

Which one of the following refers to a decision environment in which relevant parameters have known values?

A. Uncertainty

Vu Topper RM

بری صحبت سے تنہائی بہتر ہے اور تنہائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

B. **Certainty**
C. Bounded rationality
D. Risk

Which one of the following is NOT a key internal factor in formulating operations strategy?
A. Financial resources
B. Products and services
C. **Competition**
D. Human resources

"What business are we in?" This statement will come under:
A. Strategies
B. **Mission Statement**
C. Goals
D. Tactics

Under which of the following decision environments it is impossible to assess the likelihood of various future events?
A. Bounded rationality
B. Risk
C. **Uncertainty**
D. Certainty

In exponential smoothing model, a denotes:
A. Forecast error
B. **Smoothing constant**
C. Previous forecast
D. Actual forecast

According to Total Quality Management approach, _____ is responsible for process design.

Design department
Operations department
Logistic department

VU Topper RM

For More Help Contact What's app 03224021365

Logistic department
Operations Dept: A Design process that facilitates doing the job right the first time.

Identify the time span covered by aggregate planning.

3-7 months
2-10 months
2-12 months
4-8 months
Aggregate planning: Intermediate-range capacity planning, usually covering 2 to 12 months.

ISO 14000 is a series of how many standards?

Three
Five
Seven
Ten
(Reference by Umeed-e-Subh)
ISO 14000 is a series of five standards that cover a number of areas.

www.vuzs.info

Which one of the following is a characteristic of a continuous process?

High lead times
Short process times
The ability to handle high variety
The ability to handle high volumes
In manufacturing, a continuous process is a method that is used by manufacturing or production companies to churn out the greatest quantity of a product over the least time.

As preventive measures improve quality, _____ costs decreases.

Failure
Appraisal
Operating
Opportunity

An organization has described its distinctive characteristics. So, what is the next step in formulating the strategy?

Productivity Measures
Environmental scanning
Selecting the market segment
Competitor's distinctiveness
Strategy Formulation: Service Organizations are no exceptions and work diligently to identify, nurture and protect their distinctive competencies.

بری صحبت سے تنہائی بہتر ہے اور تنہائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

Service Organizations are busy carrying out detailed environmental scanning and also periodically carryout SWOT Analysis.

www.vuzs.info

Which of the following department is responsible for measuring costs of poor quality?

Accounting department
Finance department
Quality control department
Operations department

Cost Of Poor Quality (COPQ): Cost of Poor Quality (COPQ) in Quality Control.

Which of the following forecasting techniques induce personal bias in a forecast?

Qualitative
Quantitative
Associative
Trend forecast

As a quantitative measure, the "forecast bias" can be specified as a probabilistic or statistical property of the forecast error. A typical measure of bias of forecasting procedure is the arithmetic mean or expected value of the forecast errors, but other measures of bias are possible.

Which one of the following is an example of an intermediate range plan?

Machine loading
Backorder
Facilities layout
Product design

Intermediate plans (General levels)
1. Employment
2. Finished Good inventories
3. Subcontracting, Backorders
4. Output

www.vuzs.info

Capacity options are usually of _____ range in nature

Short
Long
Intermediate
Periodical

بری صحبت سے تنہائی بہتر ہے اور تنہائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

Long-range plans
1. Long term capacity
2. Location / layout

Which one of the following formula can be used to compute break even point?

Q = FC / (R + VC)
Q = VC / (R + FC)
Q = VC / (R - VC)
Q = FC / (R - VC)
QBEP = FC/ R-VC

www.vuzs.info

Which of the following contributes in customer's perception of Expected Service?

Service features
Past experience
Reliability of service
After service guarantee

All of the following are dimensions of service quality Except:

Assurance
Responsiveness
Intangibles
Reliability
Service Quality Dimensions

- Reliability
- Responsiveness
- Assurance
- Empathy
- Tangibles

G.S.Radford demonstrated the connections between:

High quality, decreased quality and higher cost
High quality, increased quality and higher cost
High quality, decreased quality and lower cost
High quality, increased quality and lower cost
G.S. Radford introduced the concept of quality in the product design stage and linked high quality with increased productivity and lower costs.

Reliability and safety of service is ensured through which of the following?

Quality in design
Quality in system
Quality in equipment
Quality in training
The thing to remember here is that Quality in design ensures the safe as well as reliable operations of the service.

Averages of accepted and rejected batches in operating curve is known as_____.

Average lot tolerance percent defective
Average outgoing quality
Average outgoing quality limit
Average acceptance quality level

Question # 1
Which ONE of the following forms a bridge between two islands of Engineering and Management?

Production Engineering
Operations Management
Industrial Management
Operations Engineering

Question # 2
Which of the following forecasting techniques induce personal bias in a forecast?

Qualitative
Quantitative
Associative
Trend forecast

Question # 3
Which of the following is NOT an attribute to classify services?

Tangibility
Perishability
Simultaneity
Degree of customer contact

Which of the following forecasting technique is used when introducing new products, services, new features and new packaging?

Quantitative technique

بری صحبت سے تنہائی بہتر ہے اور تنہائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

Associative model
Focus group
Judgmental forecast

Question # 5
Services differ from manufacturing in all the following ways EXCEPT:

Customers typically interact directly with the service delivery process
Consumption and production take place simultaneously.
Services are intangible.
Services can be stored

REF:production and consumption takes place at about the same time. This is a characteristic of Service Sector.

Question # 6
Organizational strategy is different from operations strategy because it is;

Prepared by middle managers
Narrower in scope
Longer in time horizon
All of the above

Question # 8
Which one of the following forms of productivity has units of output per dollar input?

Capital
Energy
Labor
Machine

Question # 9
Which one of the following refers to a decision environment in which relevant parameters have known values?

Certainty
Uncertainty
Risk
Bounded rationality

Question # 10
Which one the following formula or function can be used to measure the performance?

بری صحبت سے تنہائی بہتر ہے اور تنہائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

Flexibility + profit+ operations
Work + profit + value
Quality + speed + flexibility
Profit + Incentives + standards
www.vuzs.info

Question # 11
All of the following are examples of Qualitative forecasting except:

Judgmental
Delphi Method
Consumer Survey
Naïve Forecasting

Question # 12
Characteristics like taste, feel, expertise, image or reputation relates to ----------.

Subjective inputs
Objective inputs
Quantitative technique
None of the given options

Question # 13
Materials, land, energy and human and capital resources are the examples of:

Inputs
Transformation
Outputs
Productivity

Question # 14
Forecasts help managers by reducing the degree of:

Accuracy
Precision
Uncertainty
Reliability
www.vuzs.info

Question # 1
Techniques having numerical data include which of the following?

Subjective inputs
Qualitative technique

بری صحبت سے تنہائی بہتر ہے اور تنہائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

Quantitative technique
Delphi method

Question # 2
To make operations strategy effective it should be:

Independent of the organization's strategy
Consistent with the organization's strategy
Developed by a first line manager
Independent of time dimension

Question # 3
Which one of the following forecasting techniques is used to identify a trend when data is neither growing nor declining rapidly and has no seasonal characteristics.

Simple moving average
Delphi method
Trend adjusted forecast
Naïve forecast

Ref:The Moving Average model takes the average of several periods of data; the result is a dampened or smoothed data set; use this model when demand is stable and there is no evidence of a trend or seasonal pattern. www.shmula.com

Question # 7
All of the following are examples of transformation process EXCEPT:

Cutting
Packing
Facilitating
Labeling
Question # 8

A tool to measure effective use of resources and usually expressed as the ratio of output to input is known as;

Production ratio
Productivity
Reliability
Operations ratio

Question # 9
Following are all examples of distinctive competencies EXCEPT;

Price

بری صحبت سے تنہائی بہتر ہے اور تنہائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

Quality
Planning
Flexibility

Question # 10
Which of the following statements corresponds to an order-winning characteristic?

A factor which may be significant in other parts of the organization
A factor which gives an organization a competitive edge
A factor which serves as a minimum standard for purchase
A factor which increases the profitability of the organization

Question # 12
Which one of the following is NOT used for decision making under uncertainty?

Maximax
Mmaximin
Mminimax regret
EMV criterion

Question # 1
Which one of the following formulae can be used to compute value?

(Quality + Speed – Flexibility) / Cost
(Quality + Speed+ Flexibility) / Cost
(Quality + Speed - Cost) / Flexibility
(Quality + Speed+ Cost) / Flexibility

Question # 2
The role of a ---------- manager is to sustain, protect, and project the company's operations side.

Project Manager
Operations Manager
Finance Manager
Marketing Manager

Question # 3
Which of the following provide guidance and directions for carrying out operations?

Tactics
Strategies
Policies

بری صحبت سے تنہائی بہتر ہے اور تنہائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

Mission

Question # 4
Techniques having numerical data include which of the following?

Subjective inputs
Qualitative technique
Quantitative technique
Delphi method

Question # 5
Which one of the following factors makes a forecast LESS perfect?

Randomness
Non serious attitude
Non availability of data
Un qualified personnel

Question # 6
Within the operations function, which one of the following is a long-term management decision?

Control decision
Non-operational decision
Strategic decision
Tactical decision

Question # 10
Which one of the following is NOT a business application of forecasting?

Budgeting
Capacity planning
Inventory management
Quality control

Question # 11
Which one of the following forecasts is quick and easy to prepare?

Time series
Delphi
Naïve
Associative

Question # 15

بری صحبت سے تنہائی بہتر ہے اور تنہائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

Which one of the following reasons account for using moving average in forecasting?

It eliminates the trend
It smoothes the random fluctuations
It counteracts the seasonal variations
It approximates the period average
Reference:

Question # 1
In which one of the following decision environments it is impossible to assess the likelihood of various future events?

Certainty
Uncertainty
Risk
Bounded rationality

Question # 2
Which one of the following correctly represents a set of time series forecats?

Averaging, cycle, seasonality, random variations
Trend, seasonality, exponential smoothing
Trend, cycle, seasonality, moving average
Trend, cycle, seasonality, random variations

Question # 3
Which one of the following is an implication of laplace approach of decision making?

The best of the worst possible payoff
The best possible payoff
The best average payoff
The least of the worst regrets
