MUHAMMAD IMRAN

BIF501-Bioinformatics-II

Quiz No.1

1. Which one is the basic step _____ **Transcription**
2. Exonic region contain only .....of total DNA_____ **2%**
3. RNA –DNA—RNA –protein is process occur in _____ **Retroviruses**
4. Motif facilitate for binding_____ **Transcription Factors**
5. Median string problem in one of the ways to find _____ **Motif**
6. Simple Motif Search Algorithm is based on_____ **Branch and Bound**
7. Protein is extracted from_____ **mRNA**
8. Bypass is a type of .....algorithm _____ **Branch and Bound**
9. Systic fibrosis gene is found on chromosome number_____ **7**
10. Consensus score is defined as _____ **Score (s,DNA)**
11. Exception to the central dogma comes after the discovery of _____ **Retroviruses**
12. We get the best and more occurring residual sequence called as_____ **Consensus sequence**
13. Next vertex algorthim provides as an output_____ **Efficient**
14. Chimera is used for_____ **Visualization and Editing**
15. Gene rearrangement result in change of gene _____ **order**
16. Regulatory motif are generally found in _____ **Promoter region of DNA**
17. Gel electrophoresis may be used to measured .....of restriction fragment _____ **Size**
18. Restriction enzyme break DNA molecule at _____ **Specific location**
19. Motifs are found in _____ **Protein**
20. Pre order algorithm is a _____ **Recursive**
21. Genome rearrangement results in change of gene _____ **order**
22. Warrensburg's syndrome is a genetic disorder in _____ **Human**
