## **CS301 Current Final Term Papers 2018 To 2020**

**2020**

### **Paper 1**

85% mcqs past se thee

Heap ke bare me questions thee

Hashing algorithm

Work of heap sorting data

But mostly tree bnana thee

45 leacture me se 2 questions the

Ek 43 the me se tha

Ek question binary search algorithm me se tha means 39 leacture

Collision kiya leacture No 41 me se tha

And leacture 43 me LogN2 wale question 1 tha r 5 mcqs thee

### **Paper 2**

Mcqs are mostly from past papers and some of 'em are conceptual

Subjective

Delete from min heap

Huffman coding find the value the given bit values

A code is given we have to find the output

A question from insertion sort

Three uses of Hash function

Equivalence property

Two questions are related to this

Get() and update() syntax

**For More Visit: [VUStudents.pk](http://VUStudents.pk)**

**For More Visit: [VUStudents.pk](http://VUStudents.pk)**

### **Paper 3**

Mcqs

25 waqqr siddu file

Subjective long me

1-question build heap program code likhna?

2 -question program me mistake mention kary?

3 - Tree dya tha expression likhna ?

Short question

1- lef or non leaf child btana?

2- algorithm ke 2 elementary charters ?

3--dept thi thi nodes btana 7

Sorting algorithms

Delete min()function

Mcqs 25 waqaar file past papers

Subjective me kuch ni aaya past file se.....

### **Paper 4**

Mcq moaz and waqar past papers sy 65% the

Code diya h array ka valid invalid btana tha 3 mrks

Hashing and example 3 mrks

Stack ka push or pop code write

Disjoint and boolean konsa batter h 5mrks

Array ki value di thi uska max heap diagram bnani thi 5mrks

Diagram di thi

A,b,c,d,e

uska Huffman code likhna tha 5mrks

**For More Visit: [VUStudents.pk](http://VUStudents.pk)**

**For More Visit: [VUStudents.pk](http://VUStudents.pk)**

### **Paper 5**

Q1. biner tree bnawa tha OS k levels btao.

Q2. carictrics of avl tree.

Q3. if node leaf and non leafe in binry tree then what the hight of tree of its depth is 7?

Q4. hight of nodes if hight is 5?

Q6. [2 9 7 5 8] sort it.

Q7. ik tree tha osko array mn conert krna tha.

Q8. crictristics of union method

Mostly mcqs and questions are from moazz files.

**2019**

### **Paper 1**

Cs301 Today paper

Q1. biner tree bnawa tha OS k levels btao.

Q2. carictrics of avl tree.

Q3. if node leaf and non leafe in binry tree then what the hight of tree of its depth is 7?

Q4. hight of nodes if hight is 5?

Q6. [2 9 7 5 8] sort it.

Q7. ik tree tha osko array mn conert krna tha.

Q8. crictristics of union method

Mostly mcqs and questions are from moazz files.

### **Paper 2**

Cs301 today papr

Maze generation

Parse tree of givn expression

Insertion of 4 nodes in the min heap

Insertion of givn values in the hash table using expression

Weight method

**For More Visit: [VUStudents.pk](http://VUStudents.pk)**

**For More Visit: [VUStudents.pk](http://VUStudents.pk)**

Worst time of insertion & Bubble sort

Code for deleting any value in the linked list

.

Msqs from moaz file

### **Paper 3**

Cs301 today paper Maze generation Parse tree of given expression Insertion of 4 nodes in the min heap Insertion of given values in the hash table using expression Weight method Worst time of insertion & Bubble sort Code for deleting any value in the linked list . Msqs from moaz file

**2018**

### **Paper 1**

cs301 current paper .mcqs waqar and moaz file sa ay kuch handouts sa ay mcqs

Q41. Three characteristics of union by weight method

42. Three characteristics of hashing function

43. Heapify the given Array

44. What is function length() method used for also build a complete bst from 5 nodes ?

45. Use buildheap to insert 14 into min heap

46. Build expression tree from this postorder 6561+-\*231///

47. Use insertion sort to given elements

48. AVL tree which case is easy for deletion

49.

50.

51.

52. List 4 pixel inclusion criteria

**For More Visit: [VUStudents.pk](http://VUStudents.pk)**

**For More Visit: [VUStudents.pk](http://VUStudents.pk)**

## **Paper 2**

cs301 today current paper

AVL tree mn sy node del krna tha (5 marks)

huffman code (3 marks)

Create min heap with given array (5 marks)

void quicksort(int\*arr,intN) is ka baki code likhna tha.

$(A-B)+C/D$  postfix expression mein convert krna tha or sary steps ko

Stack k through Show Krna tha.(5 marks)

what is threaded binary tree

what is hashing give example.

85% Mcq's from past papers.

bs itna hi yaad h

## **Paper 3**

Today cs301 paper (11:00)

Almost All mcqs from moaaz file

Subjective 3,4 question from moaaz file

frequency create krna tha "data structure " ka 3 marks

"the cat in the cat" ka b frequency table create krna tha 5 marks ka

ak program aya tha

tree diya tha us ka pre order or post order find krna tha 5 marks

ak tree ka post order find krna tha 3 marks

## **Paper 4**

Mcqs mostly from moaz file

Question of 3 marks

1. 3 trees were given we have to tell whether they fulfil the property of heap or not
2. Union pairs were given and we have to make tree
3. Skip list properties
4. Tree was given and have to tell level of each node

**For More Visit: [VUStudents.pk](http://VUStudents.pk)**

**For More Visit: [VUStudents.pk](http://VUStudents.pk)**

5. Data was given and have to make frequency table

Questions of 5 marks

6. Bubble sort data was given

7. 3,4,5,7,9,10,13,17 data was given and was asked what is the characteristic of this tree AVL tree

What will be solution to solve this tree and why?

8. Data was given and have to make thread tree

9. Same data but thread with dummy

10. Union by height properties

**The End**

**For More Visit: [VUStudents.pk](http://VUStudents.pk)**
