1. **What is the primary purpose of a database management system (DBMS)?**

- a) To store and manage data efficiently.
- b) To process data into reports.
- c) To provide networking services.
- d) To create programming languages.

Answer: a) To store and manage data efficiently.

2. **Which of the following best describes cloud computing?**

- a) Storing data on local servers.
- b) Delivering computing services over the internet.
- c) Using a single computer for all tasks.
- d) Only storing data in physical storage devices.

Answer: b) Delivering computing services over the internet.

3. **What is the main role of the CPU in a computer system?**

- a) To store data temporarily.
- b) To execute instructions from programs.
- c) To display information to the user.
- d) To handle input and output devices.

Answer: b) To execute instructions from programs.

4. **Which of the following is NOT a type of database model?**

- a) Hierarchical model
- b) Relational model
- c) Object-oriented model
- d) Quantum model

Answer: d) Quantum model.

5. **In object-oriented programming, what does "inheritance" refer to?**

- a) Creating a new object from a class.
- b) Sharing properties and behaviors between classes.

- c) Deleting an object after use.
- d) Encrypting data for security.

Answer: b) Sharing properties and behaviors between classes.

6. **What is the purpose of an operating system (OS)?**

- a) To perform mathematical calculations.
- b) To manage hardware and software resources.
- c) To provide security against cyberattacks.
- d) To create web pages.

Answer: b) To manage hardware and software resources.

7. **What does HTTP stand for in web technology?**

- a) HyperText Transfer Protocol
- b) HyperText Technical Protocol
- c) Hyper Transfer Text Protocol
- d) High-Tech Transfer Protocol

Answer: a) HyperText Transfer Protocol.

8. **Which of the following is a feature of the Agile development methodology?**

- a) Long-term planning before development begins.
- b) Iterative development with frequent feedback.
- c) One large release after development is completed.
- d) Centralized decision-making with minimal collaboration.

Answer: b) Iterative development with frequent feedback.

9. **In the context of networking, what does VPN stand for?**

- a) Virtual Protocol Network
- b) Variable Private Network
- c) Virtual Private Network
- d) Visible Private Network

Answer: c) Virtual Private Network.

10. **What is the primary function of a router in a network?**

- a) To process and execute instructions.
- b) To route data packets between different networks.
- c) To store data on local devices.
