Select correct option:
border top style, border right style, border bottom style, border left style
border top style, border left style, border bottom style, border right style
border bottom style, border right style, border top style, border left style
border top style, border bottom style, border bottom right, border left style
Question # 4 of 10 (Start time: 02:55:26 AM) Total Marks: 1
_____ is an invalid JavaScript variable.
Select correct option:
3rd_name
first_name
secondName
$myName
Question # 5 of 10 (Start time: 02:55:33 AM) Total Marks: 1
Which of the following is NOT an advantage of CSS?

Select correct option:

Define the look of your pages in one place

Works on version 4 browsers or newer

Easily change the look

Implement same formatting each time tag is used.

Question # 6 of 10 (Start time: 02:55:43 AM) Total Marks: 1

What is the correct JavaScript syntax to insert a comment that has more than one line?

Select correct option:

/*This comment has more than one line*/

/#This comment has more than one line#/

<!–This comment has more than one line–>

none of the given

Question # 7 of 10 (Start time: 02:56:42 AM) Total Marks: 1

var txt=”Hello World!” document.write(txt.length), it would return the length as.

Select correct option:

13

12

11

10

Question # 8 of 10 (Start time: 02:56:53 AM) Total Marks: 1

In Java script , New key word is used to create:

Select correct option:

Instance of method

Instance of Object

Initialize the Variable

Assign the vale of object

Question # 9 of 10 (Start time: 02:57:04 AM) Total Marks: 1

The second control statement in a for loop usually

Select correct option:

increments a counter

sets the termination condition

creates a control variable

none of the given

Question # 10 of 10 (Start time: 02:57:16 AM) Total Marks: 1

border-color: specifies the color of all borders in the order_____.

Select correct option:

border right color, border bottom color, border left color, border top color

border top color, border right color, border bottom color, border left color

border top color, border bottom color, border right color, border left color

border bottom color, border top color, border left color, border right color

Question # 1 of 10 (Start time: 03:10:09 AM) Total Marks: 1

document.write(str.replace(/Microsoft/,"W3Schools"))

Select correct option:

This string object is deleting Microsoft word

This string object is concatenating the Microsoft with W3schools

This string object is replacing Microsoft with W3schools

None of these

Question # 2 of 10 (Start time: 03:10:20 AM) Total Marks: 1

The conditional statement "i is not equal to 5" can be written as _____.

Select correct option:

if (i<>5)

if (i != 5)

if (i not equal to 5)

if (i ! 5)

Question # 3 of 10 (Start time: 03:10:27 AM) Total Marks: 1

_____ will display the border having top border = 10 pixels, bottom border = 5 pixels, left border = 20 pixels and right border = 1 pixel.

Select correct option:

border-width:10px 1px 5px 20px

border-width:5px 1px 10px 20px

border-width:10px 20px 5px 1px

border-width:5px 20px 10px 1px

Question # 4 of 10 (Start time: 03:10:34 AM) Total Marks: 1

What does XML stand for?

Select correct option:

eXtra Modern Link

X-Markup Language

eXtensible Markup Language

Example Markup Language

Question # 5 of 10 (Start time: 03:10:40 AM) Total Marks: 1

charAt() is the function/method of

Select correct option:

String object

Date object

Time object

Array object

Question # 6 of 10 (Start time: 03:10:46 AM) Total Marks: 1

border-color: specifies the color of all borders in the order_____.

Select correct option:

border right color, border bottom color, border left color, border top color

border top color, border right color, border bottom color, border left color

border top color, border bottom color, border right color, border left color

border bottom color, border top color, border left color, border right color

Question # 7 of 10 (Start time: 03:10:53 AM) Total Marks: 1

_____ is an invalid JavaScript variable.

Select correct option:

3rd_name

first_name

secondName

$myName

Question # 8 of 10 (Start time: 03:10:59 AM) Total Marks: 1

Which loop type always runs the enclosed code at least once

Select correct option:

do while

for

while

none of them

Question # 1 of 10 (Start time: 04:29:14 AM) Total Marks: 1

In what form style rules are presented?

Select correct option:

selector { property= value }

selector (property: value)

selector { property: value }

selector (property= value)

of 10 (Start time: 10:29:02 PM) Total Marks: 1

Code: JavaScript var a = [“v”,”i”,”r”,”t”, “u”, “a”, “l”]; document.write(a.join(“-“));

What would be the output of the above code fragment?

Select correct option:

virtual

virtual-

v:i:r:t:u:a:l

v-i-r-t-u-a-l

of 10 (Start time: 10:28:12 PM) Total Marks: 1

_____ object’s properties and functions are accessible every where.

Select correct option:

Local

Global

Predefined

All of the given

Border-style: specifies the style of all borders in the order_____.

Select correct option:

border top style, border right style, border bottom style, border left style

border top style, border left style, border bottom style, border right style

border bottom style, border right style, border top style, border left style

border top style, border bottom style, border bottom right, border left style

Question # 1 of 10 (Start time: 08:08:20 PM) Total Marks: 1

var txt=”Hello World!” document.write(txt.length), it would return the length as.

Select correct option:

13

12

11

10

Question # 2 of 10 (Start time: 08:09:20 PM) Total Marks: 1

_____ is an event handler in JavaScript.

Select correct option:

None of the given

onloading

onpress

onbuttondown

Question # 3 of 10 (Start time: 08:10:48 PM) Total Marks: 1

In Java script , New key word is used to create:

Select correct option:

Instance of method

Instance of Object

Initialize the Variable

Assign the vale of object

Question # 4 of 10 (Start time: 08:11:57 PM) Total Marks: 1

Border-style: specifies the style of all borders in the order _____.

Select correct option:

border top style, border right style, border bottom style, border left style

border top style, border left style, border bottom style, border right style

border bottom style, border right style, border top style, border left style

border top style, border bottom style, border bottom right, border left style

Question # 5 of 10 (Start time: 08:12:59 PM) Total Marks: 1

Which is NOT a correct name for an XML element?

Select correct option:

<Note>

<1dollar>

All 3 tags are incorrect

<h1>

Question # 6 of 10 (Start time: 08:15:31 PM) Total Marks: 1

_____ is a valid JavaScript variable.

Select correct option:

first_name

2nd_name

third name

lastname

Question # 7 of 10 (Start time: 08:16:58 PM) Total Marks: 1

_____ is not a comparison operator.

Select correct option:

>

<

!=

=

Question # 8 of 10 (Start time: 08:17:47 PM) Total Marks: 1

In CSS, how do you make the text bold?

Select correct option:

font:b

font-style:bold

font-size:bold

font-weight:bold

Question # 9 of 10 (Start time: 08:19:16 PM) Total Marks: 1

_____ will display the border having top border = 10 pixels, bottom border = 5 pixels, left border = 20 pixels and right border = 1 pixel.

Select correct option:

border-width:10px 1px 5px 20px

border-width:5px 1px 10px 20px

border-width:10px 20px 5px 1px

border-width:5px 20px 10px 1px

Question # 10 of 10 (Start time: 08:20:26 PM) Total Marks: 1

The control statement on a while loop is tested

Select correct option:

once at the start

after each time through the loop

once at the end

before each time through the loop

Question # 1 of 10 (Start time: 08:52:04 PM) Total Marks: 1

The first control statement in a for loop usually

Select correct option:

increments a counter

sets the termination condition

creates a control variable

All of the given

Question # 2 of 10 (Start time: 08:53:33 PM) Total Marks: 1

How does a “for” loop start?

Select correct option:

for i = 1 to 8

for (i = 0; i <= 8)

for (i = 0; i <= 8; i++)

for (i <= 8; i++)

Question # 3 of 10 (Start time: 08:54:42 PM) Total Marks: 1

_____ will refer to an external script called “xyz.js”.

Select correct option:

<script file=”xyz.js”>

<script link=”xyz.js”>

<script src=”xyz.js”>

<script name=”xyz.js”>

Question # 4 of 10 (Start time: 08:56:49 PM) Total Marks: 1

For which of the following, XSL is the recommended as style sheet language?

Select correct option:

HTML

XML

HTML and XML

XSLT

Question # 5 of 10 (Start time: 08:58:16 PM) Total Marks: 1

border-color: specifies the color of all borders in the order_____.

Select correct option:

border right color, border bottom color, border left color, border top color

border top color, border right color, border bottom color, border left color

Select correct option:

<?xml-stylesheet type=”text/xsl” href=”mystyle.xsl” ?>

<link type=”text/xsl” href=”mystyle.xsl” />

<stylesheet type=”text/xsl” href=”mystyle.xsl” />

<?stylesheet type=”text/xsl” href=”mystyle.xsl” ?>

Question # 2 of 10 (Start time: 10:17:04 PM) Total Marks: 1

We put the JavaScript in the following _____ html element.

Select correct option:

<script>

<javascript>

<js>

<java_script>

Question # 3 of 10 (Start time: 10:17:43 PM) Total Marks: 1

Date () is the ——————– of the date object which provides current date of the system.

Select correct option:

method

property

constructor

Destructor

Question # 4 of 10 (Start time: 10:17:56 PM) Total Marks: 1

What is the correct HTML for making a text input field?

Select correct option:

<input type=”textfield”>

<input type=”text”>

<textfield>

<textinput type=”text”>

Question # 5 of 10 (Start time: 10:18:42 PM) Total Marks: 1

i++ means _____.

Select correct option:

i=i+i

i=i+1

i=i+2

i=1+1

Question # 6 of 10 (Start time: 10:19:13 PM) Total Marks: 1

Border-width: specifies the width of all borders in the order _____.

Select correct option:

border right width, border bottom width, border left width, border top width

border top width, border right width, border bottom width, border left width

border bottom width, border left width, border top width, border right width

border bottom width, border top width, border left width, border right width

Question # 7 of 10 (Start time: 10:20:01 PM) Total Marks: 1

What is the correct JavaScript syntax to insert a comment that has more than one line?

Select correct option:

/*This comment has more than one line*/

/#This comment has more than one line#/

<!–This comment has more than one line–>

none of the given

Question # 8 of 10 (Start time: 10:21:46 PM) Total Marks: 1

In what form style rules are presented?

Select correct option:

selector { property= value }

selector (property: value)

selector { property: value }

selector (property= value)

Question # 9 of 10 (Start time: 10:23:05 PM) Total Marks: 1

_____ is an invalid JavaScript variable.

Select correct option:

3rd_name

first_name

secondName

$myName

Question # 10 of 10 (Start time: 10:24:28 PM) Total Marks: 1

!= comparison operator means _____.

Select correct option:

Equal to

Not equal to

Greater than

None of the given

Question # 1 of 10 (Start time: 10:40:07 PM) Total Marks: 1

In case mouse moves over a link, _____ event will be detected.

Select correct option:

onMouseOver

onRollOver

overMouse

All of the given

Question # 2 of 10 (Start time: 10:40:45 PM) Total Marks: 1

Actions that can be detected by javascript are called _____. (Chose best suitable option)

Select correct option:

Events

Functions

Methods

Hyper links

Question # 3 of 10 (Start time: 10:41:48 PM) Total Marks: 1

Which statement is true?

Select correct option:

All XML documents must have a DTD

All XML elements must be lower case

All the statements are true

All XML elements must be properly closed

Question # 4 of 10 (Start time: 10:43:13 PM) Total Marks: 1

charAt() is the function/method of

Select correct option:

String object

Date object

Time object

Array object

Question # 5 of 10 (Start time: 10:44:43 PM) Total Marks: 1

For which of the following, XSL is the recommended as style sheet language?

Select correct option:

HTML

XML

HTML and XML

XSLT

Question # 6 of 10 (Start time: 10:45:55 PM) Total Marks: 1

Constructor is defined as the initializing function used to create…….

Select correct option:

Instance / copy of object

copy of object

Instance of object

shallow copy of object

Question # 7 of 10 (Start time: 10:46:16 PM) Total Marks: 1

 is used to apply style to _____.

Select correct option:

text

image

frames

webpage

Question # 8 of 10 (Start time: 10:47:46 PM) Total Marks: 1

How does a “for” loop start?

Select correct option:

for i = 1 to 8

for (i = 0; i <= 8)

for (i = 0; i <= 8; i++)

for (i <= 8; i++)

Question # 9 of 10 (Start time: 10:48:19 PM) Total Marks: 1

!= comparison operator means _____.

Select correct option:

Equal to

Not equal to

Greater than

None of the given

Question # 10 of 10 (Start time: 10:48:42 PM) Total Marks: 1

Which loop type always runs the enclosed code at least once

Select correct option:

do while

for

while

none of them

Question # 1 of 10 (Start time: 12:04:50 AM) Total Marks: 1

The first control statement in a for loop usually

Select correct option:

increments a counter

sets the termination condition

creates a control variable

All of the given

Question # 2 of 10 (Start time: 12:05:16 AM) Total Marks: 1

Constructor is defined as the initializing function used to create……..

Select correct option:

Instance / copy of object

copy of object

Instance of object

shallow copy of object

Question # 3 of 10 (Start time: 12:05:26 AM) Total Marks: 1

charAt() is the function/method of

Select correct option:

String object

Date object

Time object

Array object

Question # 4 of 10 (Start time: 12:05:38 AM) Total Marks: 1

The conditional statement “i is not equal to 5” can be written as _____.

Select correct option:

if (i<>5)

if (i != 5)

if (i not equal to 5)

if (i ! 5)

Question # 5 of 10 (Start time: 12:06:17 AM) Total Marks: 1

!= comparison operator means _____.

Select correct option:

Equal to

Not equal to

Greater than

None of the given

Question # 6 of 10 (Start time: 12:06:34 AM) Total Marks: 1

_____ is not a data type in java script.

Select correct option:

int

float

string

null

Question # 7 of 10 (Start time: 12:08:03 AM) Total Marks: 1

Border-style: specifies the style of all borders in the order _____.

Select correct option:

border top style, border right style, border bottom style, border left style

border top style, border left style, border bottom style, border right style

Two borders

Content and border

Border and window

Question # 10 of 10 (Start time: 02:31:13 AM) Total Marks: 1

The second control statement in a for loop usually

Select correct option:

increments a counter

sets the termination condition

creates a control variable

none of the given

Question # 1 of 10 (Start time: 02:34:20 AM) Total Marks: 1

_____ is not a comparison operator.

Select correct option:

>

<

!=

=

Question # 2 of 10 (Start time: 02:34:33 AM) Total Marks: 1

In java script “alert” function displays _____.(Chose best suitable answer)

Select correct option:

Popup window

Web page

Task bar

Menu bar

Question # 3 of 10 (Start time: 02:34:48 AM) Total Marks: 1

_____ is not a data type in java script.

Select correct option:

int

float

string

null

Question # 4 of 10 (Start time: 02:34:59 AM) Total Marks: 1

What is the correct HTML for making a text input field?

Select correct option:

<input type=”textfield”>

<input type=”text”>

<textfield>

<textinput type=”text”>

Question # 5 of 10 (Start time: 02:35:20 AM) Total Marks: 1

_____ is a Java script comment.

Select correct option:

//comment

%comment

$comment

comment

Question # 6 of 10 (Start time: 02:35:34 AM) Total Marks: 1

Code: JavaScript var a = [“v”,”i”,”r”,”t”, “u”, “a”, “l”]; document.write(a.join(“-“)); What would be the output of the above code fragment?

Select correct option:

virtual

virtual-

v:i:r:t:u:a:l

v-i-r-t-u-a-l

Question # 7 of 10 (Start time: 02:35:49 AM) Total Marks: 1

_____ will refer to an external script called “xyz.js”.

Select correct option:

<script file=”xyz.js”>

<script link=”xyz.js”>

<script src=”xyz.js”>

<script name=”xyz.js”>

Question # 8 of 10 (Start time: 02:36:13 AM) Total Marks: 1

Variables in java script can begin with _____.

Select correct option:

dolloar sign

lower case letter

under score character

All of the given

Question # 9 of 10 (Start time: 02:36:26 AM) Total Marks: 1

Which loop type always runs the enclosed code at least once

Select correct option:

do while

for

while

none of them

Question # 10 of 10 (Start time: 02:36:38 AM) Total Marks: 1

The conditional statement “i is not equal to 5” can be written as _____.

Select correct option:

if (i<>5)

if (i != 5)

if (i not equal to 5)

if (i ! 5)

Question # 1 of 10 (Start time: 02:39:30 AM) Total Marks: 1

 is used to apply style to _____.

Select correct option:

text

image

frames

webpage

Question # 2 of 10 (Start time: 02:39:41 AM) Total Marks: 1

Which one of the following is the correct HTML tag for making a drop-down list?

Select correct option:

<input type=”list”>

<input type=”dropdown”>

<select>

<list>

Question # 3 of 10 (Start time: 02:41:36 AM) Total Marks: 1

In case mouse moves over a link, _____ event will be detected.

Select correct option:

onMouseOver

onRollOver

overMouse

All of the given

Question # 4 of 10 (Start time: 02:41:53 AM) Total Marks: 1

_____ is a Java script comment.

Select correct option:

//comment

%comment

$comment

comment

Question # 5 of 10 (Start time: 02:42:03 AM) Total Marks: 1

In what form style rules are presented?

Select correct option:

selector { property= value }

selector (property: value)

selector { property: value }

selector (property= value)

Question # 6 of 10 (Start time: 02:42:14 AM) Total Marks: 1

i++ means _____.

Select correct option:

i=i+i

i=i+1

i=i+2

i=1+1

Question # 7 of 10 (Start time: 02:42:24 AM) Total Marks: 1

Font of an element can be changed in style sheets using _____.

Select correct option:

font-face

font-type

font-family

font

Question # 8 of 10 (Start time: 02:42:34 AM) Total Marks: 1

_____ is a valid JavaScript variable.

Select correct option:

first_name

2nd_name

third name

lastname

Question # 9 of 10 (Start time: 02:42:45 AM) Total Marks: 1

Which of the following is NOT an advantage of CSS?

Select correct option:

Define the look of your pages in one place

Works on version 4 browsers or newer

Easily change the look

Implement same formatting each time tag is used.

Question # 10 of 10 (Start time: 02:43:00 AM) Total Marks: 1

The second control statement in a for loop usually

Select correct option:

increments a counter

sets the termination condition

creates a control variable

none of the given

Question # 1 of 10 (Start time: 02:45:31 AM) Total Marks: 1

_____ will refer to an external script called “xyz.js”.

Select correct option:

<script file=”xyz.js”>

<script link=”xyz.js”>

<script src=”xyz.js”>

<script name=”xyz.js”>

Question # 2 of 10 (Start time: 02:45:51 AM) Total Marks: 1

In CSS, how do you make the text bold?

Select correct option:

font:b

font-style:bold

font-size:bold

font-weight:bold

Question # 3 of 10 (Start time: 02:46:02 AM) Total Marks: 1

Which you will NOT be able to do with CSS?

Select correct option:

Add text

Position the content

Define the look of your pages in one place

Change the background color

Question # 4 of 10 (Start time: 02:47:18 AM) Total Marks: 1

_____ is an event handler in JavaScript.

Select correct option:

None of the given

onloading

onpress

onbuttondown

Question # 5 of 10 (Start time: 02:47:32 AM) Total Marks: 1

Actions that can be detected by javascript are called _____. (Chose best suitable option)

Select correct option:

Events

Functions

Methods

Hyper links

Question # 6 of 10 (Start time: 02:47:56 AM) Total Marks: 1

Which loop type always runs the enclosed code at least once

Select correct option:

do while

for

while

none of them

Question # 7 of 10 (Start time: 02:48:08 AM) Total Marks: 1

 is used to apply style to _____.

Select correct option:

text

image

frames

webpage

Question # 8 of 10 (Start time: 02:48:19 AM) Total Marks: 1

Border-style: specifies the style of all borders in the order _____.

Select correct option:

border top style, border right style, border bottom style, border left style

border top style, border left style, border bottom style, border right style

border bottom style, border right style, border top style, border left style

border top style, border bottom style, border bottom right, border left style

Question # 9 of 10 (Start time: 02:48:34 AM) Total Marks: 1

Which of the following is HTML tag could not be used as CSS tag?

Select correct option:

<h1>
<style>
<a>
<p>
Question # 10 of 10 (Start time: 02:48:55 AM) Total Marks: 1
Correct javascript code for writing “hello world” is _____.
Select correct option:
document.write(“hello world”)
write(“hello world”)
response.write(“hello world”)
None of the given
Question # 9 of 10 (Start time: 03:11:04 AM) Total Marks: 1
What is the correct HTML for adding a background color?
Select correct option:
<background>yellow</background>
<body color=”yellow”>
<body bgcolor=”yellow”>
<bgcolor>yellow</bgcolor>
Question # 10 of 10 (Start time: 03:11:19 AM) Total Marks: 1
The conditional statement “i is equal to 5” can be written as _____.
Select correct option:
if (i == 5)
if (i = 5)
if (i is equal to 5)
if (i <> 5)
Question # 2 of 10 (Start time: 03:15:14 AM) Total Marks: 1
What is the correct HTML for making a hyperlink?
Select correct option:
 W3Schools
 W3Schools.com
** W3Schools.com **
<a>http://www.w3schools.com
Question # 1 of 10 (Start time: 04:28:17 AM) Total Marks: 1
Date () is the ————— of the date object which provides current date of the system.
Select correct option:
method
property

constructor

Destructor

Question # 2 of 10 (Start time: 04:28:24 AM) Total Marks: 1

_____ is an invalid JavaScript variable.

Select correct option:

3rd_name

first_name

secondName

$myName

Question # 3 of 10 (Start time: 04:28:30 AM) Total Marks: 1

In CSS, how do you make the text bold?

Select correct option:

font:b

font-style:bold

font-size:bold

font-weight:bold

Question # 4 of 10 (Start time: 04:28:36 AM) Total Marks: 1

Border-width: specifies the width of all borders in the order _____.

Select correct option:

border right width, border bottom width, border left width, border top width

border top width, border right width, border bottom width, border left width

border bottom width, border left width, border top width, border right width

border bottom width, border top width, border left width, border right width

Question # 5 of 10 (Start time: 04:28:44 AM) Total Marks: 1

_____ object's properties and functions are accessible every where.

Select correct option:

Local

Global

Predefined

All of the given

Question # 6 of 10 (Start time: 04:28:49 AM) Total Marks: 1

What does XML stand for?

Select correct option:

eXtra Modern Link

X-Markup Language

eXtensible Markup Language

Example Markup Language

Question # 7 of 10 (Start time: 04:28:56 AM) Total Marks: 1

Left margin of an element can be changed using _____.

Select correct option:

padding:

margin:

margin-left: not Sure

text-indent:

Question # 8 of 10 (Start time: 04:29:01 AM) Total Marks: 1

_____ is a valid JavaScript variable.

Select correct option:

first_name

2nd_name

third name

lastname

Question # 9 of 10 (Start time: 04:29:08 AM) Total Marks: 1

Padding is the space between _____.

Select correct option:

Two tables

Two borders

Content and border

Border and window

Question # 10 of 10 (Start time: 04:29:14 AM) Total Marks: 1

Which of the following is HTML tag could not be used as CSS tag?

Select correct option:

<h1>

<style>

<a>

<p>

obj.method[]

obj.method()
obj-method

Which of the following is a valid variable name?

6th_student_CGPA

first_student_CGPA
last student CGPA

*any_student_CGPA

PKI stands for _____.

Public Key Instrument

Public Key Information

Public Key Instruction

Public Key Infrastructure

Which of the following payment system does not involve the use of encryption?

Electronic check

Electronic cash

Virtual PIN
None of above

What is the right sequence of steps in Electronic Check process?

Payee s bank Payer s bank Payee Payer.

Payer Payee Payee s bank Payer s bank.

Payer s bank Payee Payee s bank Payer.

Payer s bank Payee s bank Payer Payee.

The basic difference between Virtual PIN System and Electronic Check is _____.

Use of encryption

Registration with bank

No. of participants

No difference between them

In E-Cash Payment system, merchant deposits the coins in the bank to check the _____ of coins.

Number

Validity

Private key

Sender

SSL doesn t require special software on the client or merchant side.

True

False

Which e-business helps to improve policies, procedures, customer services, and general operations of other businesses?

Online shopping malls.

Selling intellectual property online.

Online service providers.
Online automotive sites and energy online.

Which of the following is an advantage of electronic catalogue?

Large fix cost if used for small no. of products.

Ability of updating product information.
Need for customer skill of computers and browsers.

Difficult to develop catalogue.

Which of the following is an advantage of paper catalogue?

Easy to create catalogue without high technology

Reader is able to look at catalogue without computer system

More portable than electronic catalogue

All of above

In online business, market research becomes slower than offline business.

True.

False.

Identity that machine which services the internet request?

Web Client

Web Server

Browser

Mozilla

What does ETO stands for

Electronic Transactions Ordinance

Electric Transport ordinance

Electronic Treaty Organization

All

In which type of data mining, ID3 algorithms is used?

Classification

Association

Characterization

Clustering

Which one of the following algorithms does not include in symmetric key algorithms

DES

RC2

RC4

RSA

Choose the correct HTML code line which left-align the content inside a table cell.

<td leftalign>

<td valign=”left”>

Security Service Layer

Sub Secured Length

None of these

What is basic advantage of symmetric algorithms?

Symmetric key does not use any encryption

Symmetric algorithms are faster

Symmetric algorithms are easy to understand

All of above

Which of these keys can be used for encryption instead of using pair of private and public keys?

Systematic key

Asymmetric key

Symmetric key

All of above

Using SSL, we type in URL as :

https

httpc

httpc

httpi

In Virtual Payment system , Four kinds of information is provided to e-bank. Identify which one is NOT included:

Buyer Accounts identifier

Buyer password

Address of Merchant

Actual amount of money in favor of merchant

A unique large number, generated as a result of applying hash function on a message is called _____.

Hash message

Message digest

Digitally singed message

Secret message

FVIPSS stands for _____.

First Virtual Internet Payment System Server

First Virtual International Payment System Server

First Virtual International Payment System Services

First Virtual Internal Payment System Services

Virtual PIN Payment system is considered suitable for _____.

Low-cost items

High-cost items

Very expensive items

Every kind of items

Which of these is a primary participant in E-Cash Payment system?

Buyer

Bank

Merchant

All

Most of the electronic payment systems on internet use cryptography.

True

False

Symmetric algorithms are faster than asymmetric.

True

False

Which entity does not include in SET(secure Electronic Transaction)?

Seller

Buyer

Payment gateway

Bank

A paper signature is believed to be more reliable than a digital signature.

True

False

If a key is 4 bit in length, how many unique key values are possible?

4

8

16

32

Hash function is a _____

Communication protocol

Hardware device

Encryption mechanism

Log file

Which of these attacks have been reported on symmetric key algorithms?

Key Search Attacks

Cryptanalysis

System-Based Attacks

All

Payment gateway is an organization which connects those entities to the internet which are offline.

True

False

How many elements an e-coin has?

1

2

3

4

EFT stands for _____.

Electronic Film Transmission

Electronic Funds Transfer

Electronic File Translation

None of above

_____ is used to interpret and show contents of the webpage.

HTML

Notepad

Browser

Computer

What is identified by the tag ?

Horizontal frame

Bottom Frame

Top Frame

Vertical Frame

Which of the following is NOT an advantage of CSS?

Define the look of your pages in one place

Works on version 4 browsers or newer

Easily change the look

Implement same formatting each time tag is used.

Links are used to connect _____.

Images

Text

Images and web documents

All of the given

Which of the following are correct tags used for frames,

<Frame></Frame>

<Frameset><Frame></Frame></Frameset>

<Frameset><Frame></Frameset>

<Frameset><Frame></Frame>

If you have a less space for e-mails on internet then _____ protocol is used.

SMTP

IMAP

POP

POP3

A _____ is a web page populated with text boxes,drop-down lists and commands buttons to get information from the user.

Hypertext Link

Form

Table

Button

Default web page background color is _____.

Green

Red

White

Blue

_____ are normally used to get yes/no or true/falseinformation from a reader.

Check Boxes

Radio buttons

Submit Buttons

Selection List

Which of the following is NOT valid HTML code line?

<frameset rows="16%,84%">

<frameset columns="16%,84%">

<frameset cols="100,150">

<frameset cols="50%,50%" rows="16%,84%">

The attributes used by depend on the type of?

Plug-in being used

Browser being used

ISP being used

Sound/movie being used

When a visitor clicks a _____, the entries in form areset to the default values.

Button

Radio Button

Submit Button

Reset Button

What is the meaning of SRC in frame tag?

Source for image saved on your disk

Source for images saved on your disk

Source of page saved on your disk

Source of Pages saved on your disk

In what form style rules are presented?

selector { property= value }

selector (property: value)

selector { property: value }

selector (property= value)

www.amzon.com as you all familiar with it. Which of the following loyalty stages its customers are:: Detail about amzon.com Amazon was one of the first major companies to sell goods by Internet, and was an iconic "stock in which to invest" of the late 1990s dot-com bubble. Jeff Bezos founded Amazon.com, Inc. in 1994, and launched it online in 1995. Amazon.com started as an on-line bookstore, but soon diversified to product lines of VHS, DVD, music CDs, MP3 format,

computer software, , etc. Amazon has established separate websites in Canada, the United Kingdom, Germany, France, China, and Japan.

Affiliation

Awareness

Separation

committment

Which of following marketing campaigns are cheap an effective way to target potential customers?

Sale forces

E-mail

Media promotion

Marketing software

Which of the following is cheapest and quickest marketing technique to reach distant customers?

E-Mail marketing

Telephone marketing

SMS marketing

Advertisement letters marketing

In Frequent-Flyer Miles marketing, customer of the business earns specific miles free of charge from _____.

Bus service

Train service

Airline

None of above

Question No: 1

Key version represents public key by

Buyer

Seller
E-Bank

Certification Authority
Ref: PAGE # 116

E-cash Coins

The currency used in this payment system is called an e-cash coin or simply coin. A coin consists of three elements or parts - serial #, key version and serial no. signed by the secret or private key of a certain denomination of the e-cash bank. In other words, a coin of one dollar would consist of the following:

Coin = Serial#, key version, {Serial #} SK bank's $1 key

Each coin has a unique value, partly minted by the client and partly by the **e-cash bank**.

Question No: 2
SSL stands for

Secure Socket Layer

Security Service Layer
Sub Secured Length
None of these
Ref: PAGE # 121

SECURE SOCKET LAYER (SSL)

SSL is a protocol developed by Netscape Communications. SSL is built into many browsers. It operates at the TCP/IP layer of the OSI model, and uses a combination of symmetric and asymmetric cryptography.

Question No: 3
How many kinds of Web Portals are?

3
2
5
6
Ref: PAGE # 129

Portal Model

Portals are the web sites which provide chance to the visitors to find almost everything in one place. **Horizontalportals** provide information about a very broad range of topics. Search engine is the example of a horizontal portal. **Vertical portals**provide information pertaining to a single area of interest. Community Portals such as those related to medical or legal profession are the examples of a vertical portal.

Question No: 4
Brick and Mortar refers to

Offline business

Online business

Transport

Building

Ref: PAGE # 129

Brick-and-Mortar vs. Click-and-Mortar businesses

These two terms refer to the **offline** and the **online businesses**, respectively. Where a company is doing its business both online and offline, there is often the problem of lack of proper integration between the two different channels of business.

Note: Offline business = Brick-and-Mortar

And Online Business = Click-and-Mortar businesses

Question No: 5
Digital Content Revenue Model Includes

Legal information services

Online journals

Online Libraries

All of the above

Ref: PAGE # 130

Digital Content Revenue Model

Web serves as a very efficient distribution mechanism of content. Therefore, one finds many e-businesses that offer different types of information services such as **legal information**, corporate information, government information, news and resources for academic libraries etc. These services can be customized by an e-business for different firm sizes depending upon their needs and usage pattern. Normally, a customer has to subscribe to such services by paying certain amount as subscription fee. This fee becomes the main source of generating revenue for the e-business. Instead of subscription fee, a credit card charge option can be made available for infrequent users. **Online journals**, newspapers, **libraries** fall under this category

Question No: 6
Which of following marketing campaigns are cheap an effective way to target potential customers?

Sale forces

E-mail

Media promotion

Marketing software

Ref: PAGE # 133

E-MAIL MARKETING

E-mailmarketing campaigns are cheap and effective way to target potential customers.

Question No: 7
What does Telemarketing means?

Marketing through charting

Marketing through telephone

Marketing through email

Marketing through web casting

Ref: PAGE # 133

Telemarketing

Live interaction through telephone

Question No: 8
Which of following services build a strong customer loyalty towards company and its products?

Customer services

Public relations(PR)

Bulletin board

Exhibitions.

Ref: PAGE # 136

One major goal of CRM is to establish a long-lasting relationship between a company and its customers. Good **customer** services can help in building a sense of **loyalty** towards company and its **products or services**.

Question No: 9
Track the customers online and do personalization is only possible through which of the following file(s) analysis.

log files

cookie

data mining

log files and cookies.

Ref: PAGE # 136

You know that **cookies** allow e-commerce sites to record visitor behavior. They can be used to **track customers online** and do personalization. Many customers do not know that their information is being collected and used by the e-business site.

Question No: 10
Which of the following is true for Class A:

Network 01 byte and 03 hosts

Network 02 bytes and 02 hosts

Network 03 bytes and 01 host

None of these

Ref: PAGE # 10

By rule, in class A networks **first byte** would refer to the network address and the remaining **three bytes** to the host machines on that network providing a very large network.

http://www.vuzs.info/

http://groups.google.com/group/vuZs

Question No: 11
What is the correct HTML for making a text input field?

<textinput type="text">

<input type="text">

<input type="textfield">

<textfield>

Ref: PAGE # 27

First Name: **<INPUT TYPE="TEXT" NAME="First">**

Question No: 12
IIS stands for:

International Information Service

Internet Information Server

Internet Information standards

All of these

Ref: PAGE# 85

ASP

We can discuss ASP a little more in detail. It runs best on **IIS (Internet Information Server)** which is freely available with Windows NT and Windows 2000.

Question No: 13
The payer and the payee are issued digital certificates in …… standard format by their respective banks.

X. 509
F. 609

L.8999

N.586

Ref: PAGE # 101

Digital certificates

These are the certificates in electronic form which establish whether or not a public key belongs to the purported owner. **A digital certificate** at least comprises a public key, certification information (name, ID etc.) and electronic signatures of a certification authority. **Digital certificates are prepared according to a generally accepted format called X.509 standard format**.

Question No: 14
What is a E-Cash wallet ?

Hardware

Agent

Software
All of the above

Ref: PAGE # 116

Buyers and merchants, both, have accounts in the **E-cash bank**. **Buyers withdraw** coins against their account and store them in **e-cash wallet software (Cyber wallet)** on their computer. Cyber wallet stores and manages coins and records every transaction.

Question No: 15
An E-cash coin consists of element (s) like:

Serial # provided by client

Key version

Serial# signed by E-cash bank

All of the above
Ref: PAGE # 116

Coin = Serial#, key version, {Serial #} SK bank's $1 key

Question No: 16
What is Ultimate consumer orientation?

Primary objective of supply chain is to help each company to meet needs of the consumer at the end of supply chain.

Secondary Primary objective of supply chain is to help each company to meet needs of the consumer at the end of supply chain.

Supply chain is to help each company to meet needs of the supplier, seller and buyer at the end of supply chain.

None of them

Ref: PAGE # 156

Supply chain and ultimate consumer orientation:

Primary objective of supply chain is to help each company to meet needs of the consumer at the end of supply chain.

This approach is called ultimate consumer orientation. In 1995, a company dealing in the business of production of tiers in America adopted a different approach by shifting its focus on tire dealers from ultimate customers.

Question No: 17
Customer data can be gathered and analyzing it customers can be served in a better Manner according to their needs, which is best option?

Customization
Customer orientation
Customer satisfaction
Focus
Ref: PAGE # 157

Customization:

With the help of **EC**, customer **data can be gathered and analyzing it customers can be served in a better manner according to their needs**. One can, thus, implement differentiation and focus strategy.

Question No: 18
A company ABC web page divided into four segments can be unpleasant to a Japanese visitor because no. four is a symbol of death in that culture. Which is the international barrier it is having?

Culture
Language
Lack of trust
Infrastructure
Ref: PAGE # 162

A web page divided into four segments can be unpleasant to a Japanese visitor because no. four is a symbol of death in that culture.

Question No: 19
Exclusive right granted by law to make, use and sell an invention. What is called?

Parasites
Trade mark
Patent infringement
Copyright
Ref: PAGE # 181

Patent infringement:

A patent is an exclusive right **granted by law to make**, use and **sell an invention**. In order to be patentable, the invention must be unique, genuine, and useful according to the prevalent technological standards.

Question No: 20
Suppose, someone circulates a news item in the media about the reputation of a doctor, alleging him to be professionally incompetent and negligent. This doctor may then file a lawsuit against that person claiming that his reputation has been injured due to such an act. Which legal issue arises due to such acts?

Cyber Crimes
Online Defamation
Cyber squatting
None
Ref: PAGE # 182

Online Defamation:

A defamatory statement is a false statement that injures the reputation of on another person or company. If a statement injures the reputation of a product or service instead of a person, it is called product disparagement. **Suppose, someone circulates a news item in the media about the reputation of a doctor, alleging him to be professionally incompetent and negligent**. This doctor may then file a lawsuit against that person claiming that his reputation has been injured due to such an act.

Question No: 21
How can you reference part of a string?

text.substr(5,6);
text.part(5,6)
text.piece(5,6)
text.split(5,6);
Ref: PAGE # 70

String Object:

In the following example, 'str' and 'myArray' are the instances of string and array objects, respectively. The size of the array is 10. Here, charAt() is the function/method of string object. So, charAt(3) would provide the value of the element at the index three. Different other functions of string object have also been used. In the example, **str.Split(' ')**splits the string on the basis of blank space. After splitting, **we assign parts of the string as values for the array.**

Question No: 22
One Tier Architecture _____.
Select correct option:

The entire processing may take place at individual terminal.
The entire processing may take place at different terminal.
The entire processing may not take place at individual terminal.
None of Above
Ref: PAGE # 88

Client server architecture:

Note that we may have different tiers in client server architecture depending on where the processing of data takes place. In **1-tier architecture, the entire processing takes place at a single place/zone**.

Question No: 23
Following are the names of some well known e-commerce software, EXCEPT ---------- . Intershop
IBM's WebSphere Commerce Professional Edition
Microsoft Commerce Server 2002
Microsoft SQL Server 2005
Ref: PAGE # 93

E-commerce Software:

Following are the names of some well-known e-commerce software:

Intershop Enfinity

IBM's WebSphere Commerce Professional Edition

Question No: 25
A paper signature is believed to be more reliable than a digital signature.
► True
► False
Ref: PAGE # 106

A digital or electronic signature is believed to be more reliable as compared to paper signatures because it is not ordinarily possible to copy or forge an electronic/digital signature. But, that is very much possible in case of paper signatures.

Question No: 26
The serial # generated by the cyber wallet gets multiplied by blinding factor 'r' which is known only to the _____.
Client
Bank
Merchant
None of above
Ref: PAGE # 116

Cyberwallet generates a serial # and a blinding factor 'r'. This blinding factor "r" is only **known to the client**. It is used in the following mathematical expression which is sent to the bank for signatures. Serial # . re2 (mod m)

Question No: 27
SET doesn't require special software on the client or merchant side.
True
False
Ref: PAGE # 122

Merchants must have special SET software to process transactions. Customers must have digital wallet software that stores certificates and card information.

Question No: 28
The result of OLAP is displayed in the form of a _____.
Data square
Data Triangle
Data cube
Data circle
Ref: PAGE # 145

Online Analytical Processing (OLAP):

OLAP makes use of background knowledge regarding the domain of the data being studied in order to allow the presentation of data at different levels of abstraction. It is different form data mining in the sense that it does not provide any patterns for making predictions; rather the information stored in databases can be presented/ viewed in a convenient format in case of OLAP at different levels that facilitates decision makers or managers. **The result of OLAP is displayed in the form of a data cube**

Question No: 29
Classification and Association belong to which of the following types of Data Mining?

Selective

Predictive

Descriptive

Additive

Ref: PAGE # 145

Online Analytical Processing (OLAP):

OLAP makes use of background knowledge regarding the domain of the data being studied in order to allow the presentation of data at different levels of abstraction. It is different form data mining in the sense that it does not provide any patterns for making **predictions**

Question No: 30
Which one of the following algorithms does not include in public key algorithms?

DSS
RSA
Elliptic Curves
RC4
Ref: PAGE # 108

Public Key Algorithms:

Following is the list some popular public key algorithms:

- DSS – Digital Signature Standard based on DSA (Digital Standard Algorithm) – key length is between 512-1024 bits
- RSA
- Elliptic Curves

Question No: 31

Four P's in Marketing Mix are:

Product, price, place, promotion (Sure)

Price, person, place, problem

Place, product, property, promotion

Promotion, place, product, planning

Question No: 32

JIT Stands for

Just In Time

Joint investigation Technique

Join in Training

Just In Total

Ref: PAGE # 147

For instance, packaging material should only be ordered for **just in time** (JIT) delivery

Question No: 33

Advertising Supported Revenue Model includes

Yahoo portal

Employment sites

Newspaper Publishers

All of the above

Ref: PAGE # 130

Advertising-Supported Revenue Model:

In this model service/information is provided free of any charge to certain audience and the advertising revenue is sufficient to support the operation of the business and its cost. For example, **Yahoo portal** provides useful information and a search engine free of cost, but earns revenue through advertisements on its portal web site to bear the operational cost.

Question No: 34

Which of the following is true for Class A:

Network 01 byte and 03 hosts

Network 02 bytes and 02 hosts

Network 03 bytes and 01 host

None of these

Ref: PAGE # 10

By rule, in class A networks **first byte** would refer to the network address and the remaining **three bytes** to the host machines on that network providing a very large network.

Question No: 35

Which of the following needs human action to execute?

Virus

Worm

Trojan Horse

All of these

Ref: PAGE # 94

Viruses, on the other hand, **need to be activated through a human action**.

Question No: 36

In the digital signature technique, the sender of the message uses _____ to create cipher text

His or Her own symmetric key

His or her own private key

His or her own public key

The receiver's private key

Ref: PAGE # 103

Then the sender adds his private key in the obtained message digest to create his digital signatures. This digitally singed message is received by the receiver, who applies the pubic key of the sender to decrypt the digital signature and reveal the message digest.

Question No: 37

PIN stands for:

Payment investigation Number

Password Identification Number

Personal Identification Number

Personal Identification Numeric

Ref: http://www.wsu.edu/~brians/errors/pin.html

Those who object to "PIN number" on the grounds that the N in "PIN" stands for "number" in the phrase **"personal identification number"** are quite right, but it may be difficult to get people to say anything else. "PIN" was invented to meet the objection that a "password" consisting of nothing but numbers is not a word

Question No: 38

An electronic check contains a(n)…… to the payer's bank to make a specified payment to the payee

Serial#

Private key

Instruction

All of the above

Ref: PAGE # 113

Electronic Checks:

Financial Services Technology Consortium (FSTC) is a group of U.S banks, research agencies and government organizations formed in 1993. It has introduced the concept of electronic checks. **An electronic check contains an instruction to the payer's bank to make a specified payment to a payee**.

Question No: 40

It is the ability to sell the goods or provide the service at a price that is lower than that of competitors, and thus attract more customers. What is called?

Cost leadership

Price leadership

Focus

Differentiation

Ref: PAGE # 157

Cost leadership:

It is the ability to sell the goods or provide the service at a price that is lower than that of competitors, and thus attract more customers.

Question No: 41

E-commerce is a combination of three different areas of study, namely, --------, ---------- and ----------

Internal, external support, Support

Technology, business and law/policy

Primary, Secondary, R&D

Sale, purchase, feed back

Ref: PAGE # 161

E-commerce is a combination of three different areas of study, namely, **technology**, **business and law/policy**. We have studied the technology and business side of e-commerce to a reasonably good extent.

Question No: 42

GM Celebes manufacturing electronic goods and FryChips co selling French fries. Under the traditional trade mark law both these companies can have the same trade mark/trade name such as 'frys'. The problem arises when both apply for the registration of a domain name containing the word 'frys'. Here, both are legitimate claimants of this domain name but due to the element of uniqueness of domain names only one of them can be assigned the desired domain name. Which legal issue arises in this situation?

Domain name conflict

Cyber squatting

Concurrent use

None

Ref: PAGE # 181

Concurrent use

This problem arises when two organizations have apparently legitimate claim to use the same domain name but cannot do so due to the uniqueness of domain names. Suppose, there is a company manufacturing electronic goods and another company selling french fries. Under the traditional trade mark law both these companies can have the same trade mark/trade name such as **'frys'**. The problem arises when both apply for the registration of a domain name containing the word **'frys'**. Here, both are legitimate claimants of this domain name but due to the element of uniqueness of domain names only one of them can be assigned the desired domain name.

Question No: 43

Which type of Data Mining contains the elements as Support and confidence?

Classification

Association

Characterization

Clustering

Ref: PAGE # 144

CONFIDENCE AND SUPPORT:

There are two terms/measures used in **association**, that is, **support and confidence**. Confidence' is a measure of how often the relationship holds true e.g, what percentage of time did people who bought milk also bought eggs.

Question No: 44

OLAP stands for……

Online Analytical Program

Online Analytical Processing

Online Application Program

Online Analysis Performance

Ref: PAGE # 145

Online Analytical Processing (OLAP):

OLAP makes use of background knowledge regarding the domain of the data being studied in order to allow the presentation of data at different levels of abstraction.

Question No: 45

Support activities in Value Chain model includes

Finance and Administration

Human Resources

Technology Development

All of these

Ref: PAGE # 152

Question No: 46

Which of the following is NOT processed on the client side?

Cookies

JavaScript

CGI scripts

Applets

Ref: PAGE # 82

CGI scripts:

Term Common Gateway Interface (CGI) is defined as a standard method/protocol that allows data from forms to be used by programs **on the server**.

Question No: 47

Due to which characteristics, ATM network are covered under E-commerce ?

Exchange of information through computer networks (Doubt)

Internet.

Exchanging of products, services.

None of the above.

Basically ATM works to Exchange of information through computer networks so in my point of view it will held in definition of e-commerce.

Ref: PAGE # 2

E-Commerce definition:

Electronic commerce is an emerging concept that describes the process of buying and selling or exchanging of products, services and information via computer networks including the internet

Question No: 48

SET is better than SSL.

True

False

Ref: PAGE # 122

Secure Electronic Transaction (SET):

The drawback in SSL that the credit card/debit card information remains with the merchant led to the development of a more sophisticated protocol called SET.

Question No: 49

Dividing market, with respect to people having income level greater than Rs 30000, is geographic segmentation.

True.

False.

Ref: PAGE # 131

Segments are defined in terms of **demographic characteristics** such as age, gender, marital status**, income level**

Question No: 50

Which of the following is NOT an identified behavioral mode of customers on the web?

Browsers

Buyers

Shoppers

Seller

Ref: PAGE # 132

Behavioral segmentation

Creation of separate experiences for customers based on their behavior is called behavioral segmentation. Three identified behavioral modes of the customers on the web are:

Browsers – customers who just browse through the site with no intention of buying

Buyers – customers who are ready to buy right away

Shoppers – customers who are motivated to buy but want more information

Question No: 51

Which of these is a way of conducting market research?

Phone.

Interviews.

Questionnaires.

All of above.

Ref: PAGE # 132

Marketing Research:

It consists of **interviews, paper and phone surveys, questionnaires**, findings based on previous investigations etc. to find strengths and weaknesses of your business and the business of your competitors. It also includes the analysis of opportunities and threats to your business.

Question No: 52

Which of these is NOT a stage of knowledge discovery process?

Transformation

Data mining

Pattern evaluation

Process evaluation

Ref: PAGE # 140

Knowledge discovery:

A knowledge discovery process includes **data cleaning, data integration, data selection, data transformation, data mining, pattern evaluation** and knowledge presentation.

Question No: 53

According to Michael Porter, “test marketing” is an example of primary activity in a strategic business unit. Identify the area in which this task is performed.

Design

Market and sell

Deliver’ activities relate to storage

Purchase materials and supplies

Ref: PAGE # 152

Design’ activities take a product form concept stage to manufacturing stage. They include concept research, engineering, drawings preparation, **test marketing**etc.

Question No: 54

Electronic banking is also known as _____.

Cyber banking

Virtual banking

Online banking

All of above

Ref: PAGE # 150

Electronic Banking:

Electronic banking, also known as **cyber banking, virtual banking, home banking and online banking**, includes various banking activities conducted from home, business, or on the road, instead of at a physical bank location.

Question No: 55

Civil law deals with the private rights of the parties, whereas the object of criminal law is to punish the wrong-doer. Is it?

True

False

Ref: PAGE # 176

Civil law and criminal law. **Civil law deals with the private rights of the parties, whereas the object of criminal law is to punish the wrong-doer.** Civil wrongs such as breach of contract are deemed to violate only the rights of individuals and not the society in general.

Question No: 56

In datalink layer, data packets are placed inside

Data frames

Data boxes

Data streams

None of these

Ref: PAGE # 6

Data link layer:

It **places data packets into data frames**. Network Interface Card Drivers/Protocols operate at this layer. It is used to identify MAC or hardware address of computer machines.

Question No: 57

At deposit stage, the serial number is ……..by E-Cashbank

Known

Unknown

Kept Secret

Informed

Ref: PAGE # 118

Deposit Stage

Serial no. (Known) Client (unknown)

Question No: 58

Let us, suppose that you have hosted your e-commerce website,

When you provide "**opt-in e-mail**" option to your customers on your website and customer opt for it , what does it mean to receive ?

Information about product through advertisement

Information about product through e-mail

Information about services available on it

Information about News through e-mail.

Ref: PAGE # 133

Internet mailing lists can also be conveniently used to send targeted personalized emails. You can also provide the **"opt-in e-mail"** option to your customers on your web site. If they opt for it, this means that **they want to receive through email any product information**, offers or promotions etc.

Question No: 59

Track the customers online and do personalization is only possible through which of the following file(s) analysis.

log files

cookie

data mining

log files and cookies.

Ref: PAGE # 136

You know that cookies allow e-commerce sites to record visitor behavior. **They can be used to track customers online and do personalization**. Many customers do not know that their information is being collected and used by the e-business site. Thus, informational privacy rights of customers can be breached in cases where cookies are used.

Question No: 60
When customer life cycle is used to create different groups of customers, it is called?

Targeting Customers

Dynamic groups

Customer Life Cycle Segmentation

Group Development

Ref: PAGE #137

Life Cycle Segmentation:

These five stages are also called customer life cycle. Using them to create **groups of customers is called customer life-cycle segmentation**. Segment information is useful for companies to develop better relationship with the customers. Companies, thus, know about their customers and their level of relationship with the company, and can customize their product/service.

http://www.vuzs.info/

http://groups.google.com/group/vuZs

Question No: 61

Network addresses 128--- 191 range belongs to which of the following class networks?

A
B
C
E
Ref: PAGE # 11

Examples

Class A: 255.0.0.0

Class B: 255.255.0.0

Class C: 255.255.255.0

NOTE: in McQ 128--- 191 is not written after one dot it means they are separate from each other so it belong to A class.

Question No: 62

Which of the following property falls in HTTP?

Stateless

Stateful

Temporary

All of these

Ref: PAGE # 3

HTTP is stateless because in the fourth step the server breaks the connection. We can say, therefore:

- Each operation or transaction makes a new connection
- Each operation is unaware of any other connection
- Each click is a new connection

Question No: 63

FSTC stands for:

Financial Services Technology Consortium

Financial Secrets Technology Consortium

Final Security threats control

First Service Technology Consortium

Ref: PAGE # 113

Financial Services Technology Consortium (FSTC) is a group of U.S banks, research agencies and government organizations formed in 1993. It has introduced the concept of electronic checks. An electronic check contains an instruction to the payer's bank to make a specified payment to a payee.

Question No: 64

Supply chain can be broken into three parts, that is ---------- , ---------- and ---------- activities.

Internal, external support
Upstream, internal ,downstream
Primary, Secondary, R&D
None of them

Ref: PAGE # 155

SUPPLY CHAIN:

Supply chain includes all the activities associated with the flow and transformation of goods from the raw materials stage all the way to the end user. Supply chain can be broken into three parts, that is, upstream activities, internal activities and downstream activities…

- **Upstream** activities relate to materials/services or the input from suppliers
- **Internal** activities relate to manufacturing and packaging of goods
- **Downstream** activities relate to distribution and sale of goods to distributors/customers

Question No: 65
The process of taking active role in working with suppliers to improve products and processes is called?

Value chain management
Supply chain management
Supply chain management software
Porter Model
Ref: PAGE # 155

Supply chain management:

Engaging and negotiating with suppliers can be extremely beneficial. **The process of taking active role in working with suppliers to improve products and processes is called supply chain management**.

Question No: 66

Many search engines rank the site by using a program called

Spider

Scorpion

Moon

Cobweb

Ref: PAGE # 138

Some search engines search the entire internet each time. **Many search engines rank the site by using a program called 'spider'** which inspects the site before ranking.

Question No: 67

In which type of data mining, Apriori algorithms is used?

Classification

Association

Characterization

Clustering

Ref: PAGE # 143

Association:

Association analysis is the discovery of association rules showing attribute-value conditions that occur frequently together in a given set of data. It is widely used for market basket analysis. For example, where we are recording sales of a big shopping store in databases, then by applying association mining we may discover that certain items have a strong bondage or affinity with each other such that when one item is purchased the other is purchased, too. **Apriori algorithm is used for association mining**.

Question No: 68

EDI has the key feature(s)

No paper work

No human intervention

Exchange of information takes place in seconds

All of these
Ref: PAGE # 147

EDI include:

- No paper work
- No human intervention
- Exchange of information takes place in seconds

Question No: 69
Addresses are tied to the device itself and give no clue to it's location on a global scale. This is the characteristics of

IP
RIP
MAC
None of the given
Ref: PAGE # 13

Media access control (MAC) address:

Data to be delivered on a network has to be converted first into serial transmission. **This is done through a device** called Network Interface Card (NIC) that must be installed in a computer on the network. NIC has also got printed on it a 48 bits unique address called the MAC or hardware address of the computer machine. In other words, it consists of 12 hexadecimal characters and can have different format as shown

Below:

090017A9B2EF

09:00:17:A9:B2:EF

09-00-17-A9-B2-EF

Whereas the IP address of a computer may change from time to time, its MAC address would remain the same unless the existing NIC is replaced with another. It can easily be inferred that there are 248 unique MAC addresses possible (which is an unimaginably high number). An organization called Institute of Electrical and Electronic Engineers (IEEE) administers the allocation of MAC addresses, **worldwide**. **It ensures that there is no duplication of MAC addresses by the manufacturers of NICs.**

Question No: 70
When two or more intranets are connected to each other they form a/an ---------- .

intranet
internet
extranet
VPN
Ref: PAGE # 98

VPN is the example of an extranet. You know that **when two or more intranets are connected to each other they form an extranet**. A manufacturing company thus can be connected to its suppliers of raw material and its distributors through VPN.

http://www.vuzs.info/

http://groups.google.com/group/vuZs

Question No: 71 (M - 1) .
Which attribute can be used to make a region non-clickable?

none of the given
target
alt
nohref
Ref: PAGE # 37

<Area> tag attributes:

'alt' attribute is used to label the clickable region. 'Target' attribute can be used to display result in a given frame. **'Nohref'** attribute can be **used to make a region non-clickable**. For example, <Area shape="circle" coords="70,45,25" href="a.htm" alt="a.htm" target="upper" nohref>

Question No: 72
Which of the following payment mode does not require customer to pay interest to the bank on each transaction?

Credit card
Debit card
Electronic check
All of the above
Ref: PAGE # 110

In case of a credit card the issuer bank charges interest from the client at a specified rate on the amount lent. On the other hand, **in case of a debit card no such interest is payable since the customer uses his/her own money in that case**.

Question No: 73
Cyber wallet can automatically assemble the correct payment and pay it too.

True
False
Ref: PAGE # 118

E-cash Purchase:

Having received an order the merchant sends a payment request to the client in the following format: Payreq={currency,amount,timestamp,merchant_bank ID, merchant_accID, order description}

Cyber wallet automatically assembles the correct payment amount and pays.

Question No:
74
SET doesn't require special software on the client or merchant side.

True
False
Ref: PAGE # 122

Merchants must have special SET software to process transactions. Customers must have digital wallet software that stores certificates and card information.

Question No: 75
Which model allows the users to log-on on a website and assume the role of bidder or seller?

Online Banking.
Storefront Model.
E-Learning.

Auction Model
Ref: PAGE # 128

Auction Model:

In this model there are auction sites to which the users can **log-on** and assume the role of a **bidder or seller**.

Question No: 76
Civil law deals with the private rights of the parties, whereas the object of criminal law is to punish the wrong-doer. Is it?

True
False
Ref: PAGE # 176

Civil law and criminal law. **Civil law deals with the private rights of the parties, whereas the object of criminal law is to punish the wrong-doer.** Civil wrongs such as breach of contract are deemed to violate only the rights of individuals and not the society in general.

Question No: 77
In the physical world three elements must be satisfied in order to make a valid contract, namely, offer, ---------- and ----------

Acceptance and consideration
Acceptance and Rejection
Approval and consideration
None
Ref: PAGE # 178

Online contracts:

In the physical world three elements must be satisfied in order to make a valid contract, namely, **offer, acceptance and consideration**. The same three elements must also be present in case of a valid online contract.

Question No: 78
In online environment acceptances may be issued by an imposter/cheater that has authority to bind the online business

True
False
Ref: PAGE # 178

In online environment acceptances may be issued by an imposter/cheater that does not have authority to bind the online business. To overcome this problem companies and individuals can use digital signatures to establish identity in online transactions.

Question No: 79
#00ff00 in HTML indicates

Pure green color
Pure blue color
Pure red color
Pure yellow color
Ref: PAGE # 23

<BODY bgcolor="Green" text="white" link="red"> Instead of giving the color name as value of 'bgcolor' one can also provide value in terms of a six digit code based on hexadecimal numbers called RGB values, e.g, **#00FF00 refers to pure green color**.

Question No: 80
Virtual PIN Payment System requires both merchant and buyer to register with _____.

Auto Clearing House (ACH)
First Virtual (FV)
DSS (Digital Signature Standard)
DES (Data Encryption Standard)
Ref: PAGE # 110

Both merchants and buyers are required to register with First Virtual (FV). A buyer registering with FV forwards his or her credit card details and email address to FV and in exchange receives a pass phrase called, Virtual PIN.

http://www.vuzs.info/

http://groups.google.com/group/vuZs

Question No: 81
Identity that machine which services the internet request?

Web Client
Web Server
Browser
Mozilla
Ref: PAGE # 2

Basic Definitions:

Web client- machine that initiates internet request

Web server – machine that services internet request

Browser - software at the client side to interact with web data

Intranet – an internal network of computers confined to a single place

Extranet – when two or more intranets are connected with each other, they form an Extranet – e.g, Virtual Private Network

Internet – a global network of networks is defined as internet

Question No: 82
What does ETO stands for

Electronic Transactions Ordinance
Electric Transport ordinance
Electronic Treaty Organization
All
Ref: PAGE # 163

Electronic Transactions Ordinance, 2002 (ETO):

ETO is the law introduced in 2002 which extends to the whole of Pakistan. It basically provides legal recognition to documents in electronic form and to electronic signatures. To understand this law, it would be useful to revise the concept related to the working of digital signature technology (refer to Lecture no. 23). We shall look at salient provisions/features of this law as it directly deals with e

commerce in Pakistan. Section 2 of the ETO defines different terms used in it. For convenience these terms have been reproduced here (you do not need to memorize these for exam).

Question No: 83
Which one of the following algorithms does not include in symmetric key algorithms

DES
RC2
RC4
RSA
Ref: PAGE # 108

Following is the list of some popular symmetric key algorithms:

DES (Data Encryption Standard) – 56 bits

IDEA (International Data Encryption Algorithm (IDEA) – 128 bits

RC2 – (block cipher) 1-2048 bits

RC4 (stream cipher) – 1-2048 bits

Rinjdael – 128-256 bits

Question No: 84
EFT stands for

Electronic Funds Transfer
Electronic Finance Transfer
Easy Funds Transfer
Early Funds Transaction
Ref: PAGE # 114

EFT stands for 'electronic funds transfer'.

Question No: 85
Television, radio and print media are in a (n) …… Mode

Passive
Active
Static
Dynamic
Ref: PAGE # 139

Emotional branding vs. rational branding:

In case of **television, radio or print media people are normally in a passive mode**. To a greater extent they do not control the communication channel and thus have to listen or view the advertisement about a brand.

Question No: 86
Cipher suite is a combination of

Cryptographic Algorithm
Authentication methods
Security layers
Cryptographic Algorithm And Authentication methods
Ref: PAGE # 121

SSL Handshake:

SSL supports a variety of **encryption algorithm and authentication methods**. The combination of algorithms and methods is called a **cipher suite**. When a client connects to an SSL server, the SSL handshake begins, which means that the two negotiate a cipher suite selecting the strongest suite the two have in common.

Question No: 87
Which device uses the MAC address

Switch
Router
Repeater
None of these
Ref: PAGE # 15 & 16

A switch would **read the MAC address** on a data packet and match it with the list of MAC addresses of the user machines contained in it. It then sends data packets only to that machine on a VLAN to which these packets relate. **But on PAGE 16 about router see below line**

Routers:

Routers use a combination of hardware and software to forward data packets to their destination on the internet. **They are more efficient and sophisticated than bridges and switches**.

So my answer is Router

Question No: 88
Choose the correct HTML code line which left-align the content inside a tablecell.

<td leftalign>
<td valign="left">
<td align="left">
<tdleft>
Ref: PAGE # 26

Attributes for <TD> tag:

Width - <td width="50%"> specifies width of a cell with reference to the table width. Align - **<td align="center">** is used to align the text in a cell accordingly **(you can also use left and right as values of 'align')**. Valign- <td valign="top"> is used to vertically align the text in a cell (you can also use bottom or middle as values of 'valign').

Question No: 89
Which one of following illustrates relationship between "<! -->" and // ?

Closely related
Hide the code
Different
Hide the tags

Question No: 90
We can divide the Client Server architecture up to:

1 Tier
2 Tier
3 Tier
N –Tier
Ref: PAGE # 89

We can divide the client server architecture into n – tiers.

http://www.vuzs.info/

http://groups.google.com/group/vuZs

Question No: 91
DSS stands for

Digital Signature Standards
Digital Support Standards
Decision support system
Digital Sign System
Ref: PAGE # 108

Following is the list some popular public key algorithms:

DSS – Digital Signature Standard based on DSA (Digital Standard Algorithm) – key length is between 512-1024 bits

Question No: 92
Which one of the followings is an example of Banner advertising?

Branding
Affiliate programs
Partnership
All of these
Ref: PAGE # 138

Affiliate Programs:

An affiliate program is an agreement between two parties that one will pay the other a commission based on a specified customer action. It is not a strategic union as is partnership. Rather, it is for limited purpose and time. **Banner advertising is the example of an affiliate program.**

Question No: 93
A firm Glory Enterprise and it wants to have its web site. It also wants to have the word glory as a part of its domain name because for years it has been recognized in the physical world through this word. However, at the time of registration of its domain name it finds that a person Mr. A. who has nothing to do with the business of the firm or the word glory have already registered a domain name containing this word as a part of it. Since there cannot be two similar domain names, the firm is forced to request Mr. A to transfer that domain name to it. In response, if Mr. A blackmails or claims ransom from the said firm,
He would be said to have committed ----------.

Cyber squatting
Parasites
Patent infringement
Trade mark and domain name conflicts
Ref: PAGE # 181

Cyber squatting:

The act of intentionally registering domain names containing trademarks/trade names of prominent Companies to later blackmail or demand ransom from those companies is called cyber squatting. It is Regarded as an offence in most countries. Assume there is a firm 'Glory Enterprise' and it wants to have its web site. It also wants to have the word 'glory' as a part of its domain name because for years it has been recognized in the physical world through this word. However, at the time of registration of its domain name it finds that a person Mr. 'A' who has nothing to do with the business of the firm or the word 'glory' has already registered a domain name containing this word as a part of it. Since there cannot be two similar domain names, the firm is forced to request Mr. 'A' to transfer

that domain name to it. In response, if Mr. 'A' blackmails or claims ransom from the said firm, he would be said to have committed cyber squatting.

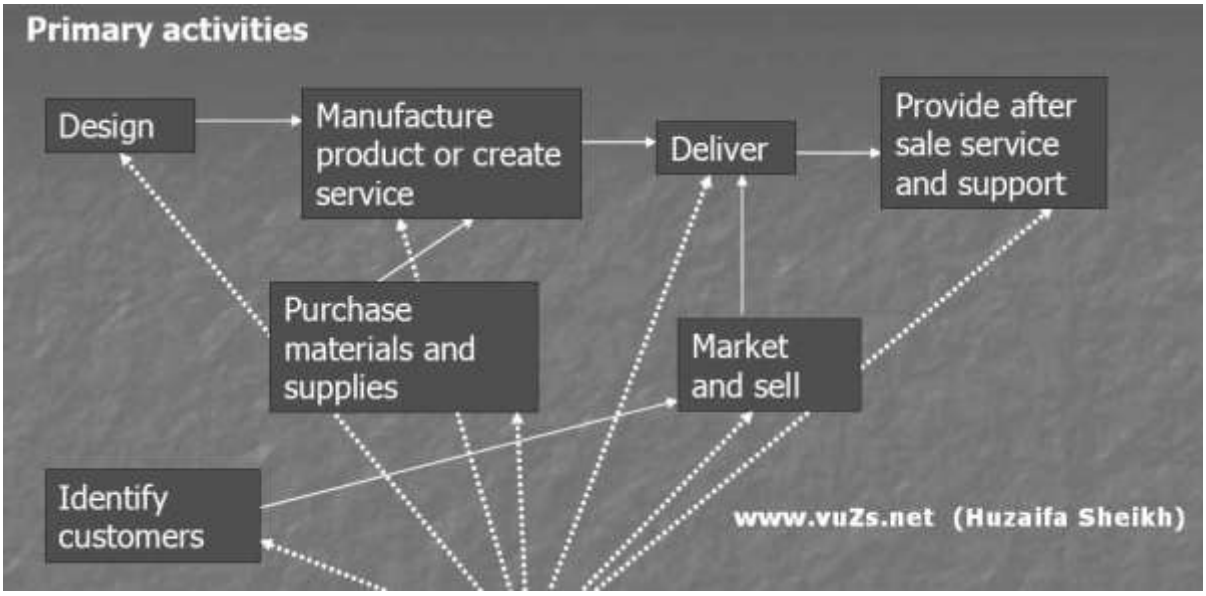

Question No: 94
In which type of approach, we further dig the data for retrieving information from data warehouse?

Slice
Dice
Drill down
Roll up
Ref: PAGE # 146

Using **drill-down we can further dig the data to receive some specific information**. For example using that I can find the sale of furniture in a specific month of the first quarter, say, February. Roll-up is the reverse of drill-down.

Question No: 95
Which activity does not include in Primary

Identify Customers
Design
Delivery
Administration
Ref: PAGE # 152

Question No: 96
What of the following is the correct HTML tag for making a drop-down list?

<input type="list">
<input type="dropdown">
<select>
<list>
Ref: PAGE # 29

Selection lists:

General format <select name="field name" size="no. of items"> between
the **<select>** and **</select>** tags are the <option> and </option> tags which define the list items.

If you omit "size" the list becomes a **drop-down list**. If size is two or more, the list becomes a rectangle with scroll bars for navigating the choices. Using 'Selected' attribute an item is selected by default.

Question No: 97
What does HTML stand for?

Hyperlinks and Text Markup Language
Home Tool Markup Language
Hyper Text Markup Language
Homepage Text Making Language
Ref: PAGE # 18

Hypertext markup language:

Web documents are defined by the **Hypertext Markup Language** (HTML). It is a language of tags. A tag is a special letter or key word enclosed in angular brackets.

Question No: 98
JavaScript variables can begin with ---------- .

a lower case letter
an underscore character
a dollar sign
all of the above
Ref: PAGE # 54

Rules for variables:

Variable names can begin with an **uppercase letter** (A-Z), **lower case letter** (a-z), an **underscore character** (_), or **dollar sign** ($).

Question No: 99
A unique large number, generated as a result of applying hash function on a message is called _____.

Hash message
Message digest
Digitally singed message
Secret message
Ref: PAGE # 124

SET software on the customer side splits the order information from the account information. **MDI is the message digest obtained by applying hash function on the order information**.

Question No: 100
FVIPSS stands for _____.

First Virtual Internet Payment System Server
First Virtual International Payment System Server
First Virtual International Payment System Services
First Virtual Internal Payment System Services
Ref: PAGE # 110

Merchant queries the **FV Internet Payment System Server** (FVIPSS) to confirm Virtual PIN

http://www.vuzs.info/

http://groups.google.com/group/vuZs

Question No: 101

Which currency is used in e-cash Payment system?
Dollar
Coin
Penny
Cent
Ref: PAGE # 116

Buyers and merchants, both, have accounts in the E-cash bank. Buyers withdraw **coins** against their account and store them in e-cash wallet software (Cyber wallet) on their computer.

Question No: 102
Web browser and client wallet are installed on _____.

Client's computer
Bank's computer
Merchant's computer
None of above

Ref: PAGE # 120

Client wallet and web browser are installed on the client machine.

Question No: 103
Job searchers can search for jobs and employers can hire effectively using.....

Online recruiting web sites.
Online banking web sites.
Online trading and lending web sites.
Online news services web sites.
Ref: PAGE # 128

Online Recruiting:

Employers can recruit and job searchers can search for jobs effectively through online recruiting web sites.

Question No: 104
According to Michael Porter, material handling is an example of primary activity in a strategic business unit. Identify the area in which this task is performed.

Identify customers
Market and sell
Deliver activities relate to storage
Purchase materials and supplies
Ref: PAGE # 105

'Deliver' activities relate to storage, distribution and shipment of final product, e.g, warehousing, selecting shippers, material handling, timely delivery to customers etc.

Question No: 105
IT/EC can reduce the overall ---------- and afford to keep the price of the product relatively low

Production cost
Marketing cost
Distribution cost
None
Ref: PAGE # 159

A business using IT/EC can reduce the overall **production cost** and afford to keep the price of the product relatively low.

Question No: 106

Law is broadly divided into two classes on the basis of nature of wrong, namely, --------- and ----------

Civil law and criminal law
ETO and criminal law
Supreme and Civil Law
None
Ref: PAGE # 176

Law is broadly divided into two classes on the basis of nature of wrong, namely, **civil law and criminal law**. Civil law deals with the private rights of the parties, whereas the object of criminal law is to punish the wrong-doer.

Question No: 107

Browser is installed at :

Client side machine

Web server machine

none

both Client and Server Machines

Ref: PAGE # 120

Web browser are installed on the client machine.

Question No: 108

In Virtual Payment system, four kinds of information are provided to e-bank. Identify which one is NOT included:

Buyer Accounts identifier

Buyer password

Address of Merchant

Actual amount of money in favor of merchant

Ref: PAGE # 112

To make payment an account holder is authenticated using an **account identifier** and a **password**, **account identifier** of the payee and the **payment amount**.

Question No: 109

To overcome the lack of physical proximity appearance problem in e-business, which technology is going to be used

Biometrics

Video conferencing

Cryptography

Biometrics and Video conferencing

Ref: PAGE # 134

Video conferencing is an example of web casting. For example, using this **technique**, doctors sitting in China, England and Pakistan etc. can, in real time, **exchange and benefit from each other's ideas as if they are physically holding a meeting.**

Question No: 110

Dividing the potential customers into groups is called

Market Segmentation

Market Promotion

Market Research

Market Survey

Ref: PAGE # 131

Market Segmentation:

Businesses need to identify specific portions of their markets in order to target them with specific advertising messages. The practice called market segmentation **divides the potential customers into segments or groups**.

http://www.vuzs.info/

http://groups.google.com/group/vuZs

Question No: 111

Traditionally Marketer use the market segmentation(s) like

Geo-graphic Segmentation

Demographic Segmentation

Psychographic Segmentation

All of the above

Ref: PAGE # 131

Traditionally, marketers have used three types of variables to define three different market segmentations, namely, **geographic segmentation, demographic segmentation and psychographic segmentation.**

Question No: 112

In……, there is no direct contact with the end users.

B2B

B2C

C2C

All above options

Ref: PAGE # 137

Key difference between B2C and **B2B is that in case of B2B there is no direct contact with the end users**, whereas this contact exists in B2C. Thus, an e-business can have direct response or feedback from its customers in B2C as compared to B2B.

Question No: 113

Allocation of MAC addresses is administered by ----------

ICAAN

ISO

IEEE

None

Ref: PAGE # 13

It can easily be inferred that there are 248 unique MAC addresses possible (which is an unimaginably high number). An organization called **Institute of Electrical and Electronic Engineers** (IEEE) administers the allocation of MAC addresses, worldwide. It ensures that there is no duplication of MAC addresses by the manufacturers of NICs.

Question No: 114

As a Web developer you can define a style sheet for?

HTML elements and apply to many Web pages.

A HTML element and apply to single Web page.

A HTML element and apply to many Web pages.

HTML elements and apply to one Web page.

Ref: PAGE # 38

Style sheets:

Style sheet instructions can be embedded in the HTML document. An advantage of applying style sheets is that definition of the **style's formatting is created once and the browser applies that formatting each time** the tag is used. Secondly, pages are easier to modify, that is, edit the style definition and all the places where the style is used within the page get updated automatically. Most popular type of style sheets is Cascading Style Sheets.

Question No: 115

What shall come in blanks for proper result,

Here blanks are numbered with 1,2 and 3

```
<html>
<head>
<SCRIPT language="JavaScript">
Var num1,       var num2
Document.container .result.value=parseFloat(num1)-parseFloat(num2)
</script>
```

</head>

<body>

<FORM name="---------1----------">

<input type="----------2-------" name="-------3---------" maxlength="5">

</form>

</body>

</html>

container, text and result

result, value and container

container , button and value

result, container and text

Question No: 116

What does XML stand for?

eXtra Modern Link

X-Markup Language

eXtensible Markup Language

Example Markup Language

Ref: PAGE # 74

Extensible markup language:

World Wide Web Consortium (W3C), a non-profit organization that maintains standards for the web presented the draft of **XML** in late 1990's.

Question No: 117

Cryptographic Algorithms are measured in terms of

Key length

Complexity

Simplicity

All of the above

Ref: PAGE # 107 & 108

Key Length:

A cryptographic key is represented as a string of binary digits – 0's & 1's- inside a computer.

&

Cryptographic algorithms are measured in terms of key length.

Question No: 118

----------means that your product/service has certain quality that makes it more attractive than the one offered by your competitor, despite the price of your competitor's product/service is somewhat lower

Differentiation

Focus

Cost leadership

None of them

Ref: PAGE # 157

Differentiation:

Differentiation means that your product/service has certain quality that makes it more attractive than the one offered by your competitor, despite the price of your competitor's product/service is somewhat lower.

Question No: 119

Characterization and Clustering belong to which of the following types of Data Mining?

Additive

Predictive

Selective

Descriptive

Ref: PAGE # 141

Classification and association are predictive types of data mining while **characterization and clustering represent the descriptive type**.

Question No: 120

In which type of data mining, ID3 algorithms is used?

Classification

Association

Characterization

Clustering

Ref: PAGE # 141

Classification:

It allows you to have a predictive model labeling different samples to different classes. The results of this type of mining/model are represented as (if-then) rules, decision trees, neural networks etc. Two important algorithms used for this type are **ID3 Algorithm**, and Bayesian **classification**.

http://www.vuzs.info/

http://groups.google.com/group/vuZs

Question No: 121

ANSI stands for …….

American National Standards Institute

All Network Standards Institute

American New standards Institute

Australia National standards Institute

Ref: PAGE # 147

ANSI (**American National Standards Institute**)

Question No: 122

Who is making the Web standards?

International Standard Organization

ANSI

Microsoft

The World Wide Web Consortium

Ref: PAGE # 74

World Wide Web Consortium (W3C), a non-profit organization that **maintains standards for the web** presented

Question No: 123

Which of following is NOT an attribute of <AREA> tag?

shape

circle

href

cords

Ref: PAGE # 37

<Area shape="circle" coords="70,45,25" href="a.htm" alt="a.htm" target="upper" nohref>

Question No: 124

Which of the following is an advantage of symmetric algorithms?

Symmetric algorithms are faster

Symmetric algorithms don't include any encryption

Symmetric algorithms are slow in nature

None of above

Ref: PAGE # 105

A symmetric key can also be used for encrypting a message instead of using the pair of public and private keys. The advantage of using symmetric key is that since **symmetric algorithms are faster as compared to asymmetric**, therefore, the encryption of a message with the symmetric key takes place quickly.

Question No: 125

What is the right sequence of steps in?

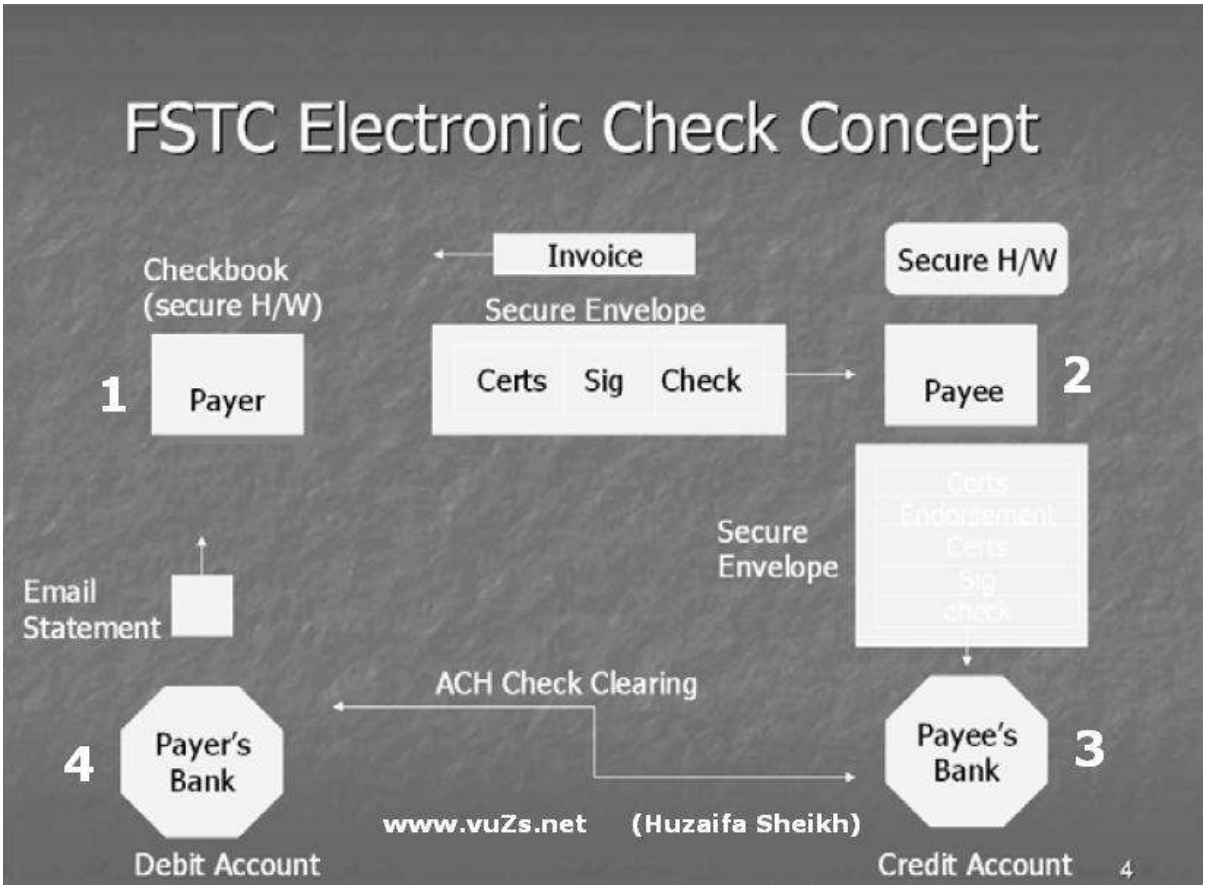

Payee's bank → Payer's bank → Payee → Payer.

Payer's bank → Payee → Payee's bank → Payer.

Payer's bank → Payee's bank → Payer → Payee.

Payer → Payee → Payee's bank → Payer's bank.

Ref: PAGE # 113

Question No: 126

The key feature of E-Cash Payment system is _____.

Simplicity

Anonymity

Availability

Connectivity

Ref: PAGE # 116
