

STA630

Quiz for Mid-Term

ABSTRACT

This comprehensive collection of notes is accurately crafted to empower students to excel academically, ensuring they achieve a minimum of 80% marks in their examinations. The content is organized with clarity and precision, focusing on key concepts, critical analyses, and practical applications tailored to the syllabus. These notes serve as a reliable resource for both thorough preparation and last-minute revision. Designed to inspire confidence and mastery, this guide is an essential tool for students striving for academic excellence.

STA630_RESEARCH METHODS

Quiz for Mid-Term

- _____ is the abstract idea, underlying theme, or subject matter that one wishes to measure using survey questions. **Construct**
- It is a statement about the concept that may be judged as true or false if it refers to observable phenomena. **Proposition**
- _____ reviews are focused on examining research throughout a period, often starting with the first time an issue, concept, theory, phenomena emerged in the literature, then tracing its evolution within the scholarship of a discipline. **Historical**
- Which of the following can be referred to as a 'Concept'? **a key idea/ a key word**
- Which of the following variables may have some effects upon a dependent variable but yet is not an independent variable? **Extraneous variable**
- Literature reviews must be searched with the help of: **keywords**
- Which of the following can be referred to as a concept? **A key idea about any object**
- The elaboration of the variables in the theoretical framework addresses which type of questions? **Both of the given options**
- The main purpose of _____ is to link theoretical and empirical elements of a research project. **Conceptual framework**
- The first step in development of theoretical framework is: **to make an inventory of variables**
- If the researchers use findings to generate theories and models to understand human behavior at societal level, which of the following levels it relates? **Macro level**
- How do the scientific method maintain ethical and ideological neutrality? **By ensuring conclusions are based solely on objective data**
- A statement about an expected relationship between variables, or an explanation of an occurrence, that is clear, specific, testable, and falsifiable. **Hypothesis**
- The independent variable is: **the variable manipulated in order to observe its effects**
- "Higher the level of job satisfaction, higher will be the employees' performance." Which type of relationship the movement of variables determines? **Positive relationship**
- While conducting a literature review, the researcher engage in: **An evaluation of the literature**
- An investigation into the ways of improvement of quality of customer services within the hospitality sector in Pakistan is an example of: **Exploratory research**
- Which of the following options can be a reason to conduct research? **To generate theories**
- To measure the impact of customer satisfaction on customer loyalty is an example of which of the following options? **Explanatory research**
- If a researcher is studying the effect of using laptops in his classroom to ascertain its merit and worth, which type of n applied research he is conducting? **Evaluation research**
- Which of the following option is used to find out he literature? **All of the given options**
- Nestle launched a new product which may not be paying off as anticipated. _____ will help managers to understand, predict and control an environment. **Research**
- Researcher is supposed to develop a _____ after starting the specific problem to be studied in an experiment: **Hypothesis**
- Identify the option that can be a disadvantage of cross-sectional research. **It cannot capture the change process**
- Integrative review helps to: **Summarizes what is known at a point in time**

STA630_RESEARCH METHODS

Quiz for Mid-Term

26. Job satisfaction, job performance, decision making, turnover and personal characteristics. All these variables are used to develop which of the following options? **Theoretical framework**
27. EEE reviews are focused on examining research throughout a period, often starting with the first time an issue, concept, theory, phenomenon emerged in the literature, then tracing its evolution within the scholarship of ac: **Historical**
28. Which of the following is also refereed to as writing definition? **Operational definition**
29. Moving up the _____, the basic concept becomes more abstract, wider in scope, and less amenable to measurement. **Ladder of abstraction**
30. Variable that is manipulated by the researcher in an experiment is called _____. **independent variable**
31. The unemployment among arts students is high is an example of which type of hypothesis? **Descriptive hypothesis**
32. A _____ hypothesis is a statement about the existence, size, form, or distribution of a variable. **Descriptive**
33. The increase in sales promotion is positively associated with the customer satisfaction is an example of which type of hypothesis? **Relational hypothesis**
34. The major concern of individuals engaged in action research is: **improvement in condition**
35. If there are multiple pizza trucks in the area and each one has a different jingle, we would memorize it all and relate the jingle to its pizza truck. This is what __ "distance of the truck" in this example. Research precisely is, establishing an association between two variables, "jingle" and _____. **Correlational**
36. The unemployment among arts student is high is an example of which type of hypothesis? **Descriptive hypothesis**
37. Literature review must be searched with the help of: **Keywords**
38. Methodological review helps to: **point out how methodology varies by study**
39. What is the significance of statistical "generalization" in scientific research? **It enhances the usefulness of findings across different settings**
40. The research which is conducted at societal level is the type of _____ research. **Macro**
41. The main purpose of _____ is to link theoretical and empirical elements of a research project. **Conceptual framework**
42. A research can develop a theoretical framework on the basis of _____. **Both A & B**
43. The _____ is only useful if the concepts, ideas, questions, etc. to be investigated are both testable and falsifiable. **Scientific Method**
44. Which of the following is/are the objectives of the literature review? **All of the above**
45. The total number of types of the literature review are: **5**
46. Which of the following often focuses on generating new theories? **Deductive method**
47. The purpose of reviewing existing literature is: **To find out what is already known about your area of interest**
48. If a researcher aims at exploring a new topic, he is conducting _____ research. **A formulative**
49. A theory is a coherent set of _____ used as principles of explanations of the apparent relationship of certain observed phenomena. **Propositions**

STA630_RESEARCH METHODS

Quiz for Mid-Term

50. Which of the following is NOT a purpose of a literature review? **Helps you in getting response from the respondents**
51. logical relationship between two or more variables, expressed in the form of a testable statement is known as: **Hypothesis**
52. _____ is a statement about an expected relationship between variables, or explanation of an occurrence, that is clear, specific, testable and falsifiable. **Hypothesis**
53. A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program is which type of review? **Self-study review**
54. Context review helps to: **Place a specific project in the big picture**
55. Unethical activities include: **All of the above**
56. The elaboration of the variables in the theoretical framework addresses which type of questions? **Both of the given questions**
57. To provide the true information is _____ of respondent. **Obligation**
58. Moving up the , the basic concept becomes more abstract, wider in scope, and less amenable to measurement: **Ladder of abstraction**
59. A research studies generally use data at the national level. **Fundamental**
60. Rationalism is the application of: **Logic and arguments**
61. There is no relationship between job satisfaction and the employees' turnover rate is an example of which of the following hypothesis: **Null hypothesis**
62. "The extensive use of chocolate causes pimples". The given hypothesis is a (an): **Explanatory hypothesis**
63. Statistical generalizability refers to: **How the result is useful for broader group**
64. While conducting a literature review, the researcher engages in: **An evaluation of the literature**
65. All of the following options are the characteristics of a good hypothesis, EXCEPT: **Indistinct**
66. The more successful new product in the market the higher will be the stock market price. Here
67. success of new product is _____ and stock market price is _____. **Independent, dependent**
68. It is a statement about the concepts that may be judged as true or false if it refers to observable phenomena. **Proposition**
69. Which of the following option is NOT the role of theory? **Theory as memorization**
70. What is the most basic skill required by any researcher? **The ability to generate ideas for research projects**
71. Research on world census regarding covid-19 is a type of: **Basic**
72. How the researcher decides to measure the study variables is called? **Operational definition**
73. Hypothesis refers to _____: **A tentative statement about the relationship**
74. To analyze the effects of re-branding on the level of customer loyalty is an example of which of the following options? **Explanatory research**
75. Which of the following is an example of a 'Concept'? **Democracy**
76. The first step in development of theoretical framework is: **To make an inventory of variables**
77. Concepts, created and developed for conducting any research study, are: **The building blocks of theory**
78. A master plan which specifies the methods and procedures for collecting and analyzing the data is called: **Research design**

STA630_RESEARCH METHODS

Quiz for Mid-Term

79. Which of the following is/are the objectives of the literature review? **All of the above**
80. All of the following are the principles of asking interview questions, Except: **ask questions exactly as they are worded in the questionnaire**
81. How a particular issue or theory has evolved over time is studied in: **Historical literature review**
82. _____ Is not an example of non-probability sampling technique **Cluster**
83. It is a variable that has distinct, discrete values but no precise numerical flow. For example, gender can be thought of as a discontinuous variable with two possible values, male or female. What is it? **Discrete variable**
84. _____ Is the list of elements from which the sample is drawn. **Sampling frame**
85. Which of the following types of processes, research falls in? **A process to discover the truth**
86. Quantitative data is _____. **Expressed in numerical form**
87. A literature review requires a/an: **All of the given options**
88. _____ May be necessary in situations in which the respondent begins to lose track of the question. **Probing**
89. The selection of a method for data collection depends on which of the following factors: **All of the above**
90. The small scale trial run of a particular item is called _____. **Pilot test**
91. Which of the following is also referred to as working definition? **Operational definition**
92. "Have you ever had or been treated for skin allergy?"
- Yes
- No"
- Which type of question it is? **Double barreled question**
93. Which of the following can be referred to as a concept? **A key idea about any object**
94. Which of the following is an example of an issue that would be checked in a pilot testing? **Logical answers between questions (i.e. attributes should be rated high if purchases interest is high)**
95. Which of the following is NOT an Applied Research? **Formulative Research**
96. Which of the following is not a data collection method? **Correlational method**
97. A good review of the literature increases a reader's confidence in the researcher's: **All of the above**
98. Which of the following options can be a reason to conduct research? **To generate theories**
99. Which of the following is the least obtrusive and most accurate method for recording data in an interview? **Audiotaping**
100. Theoretical framework provides the logical base for developing: **Analysis**
101. "How much time is needed to locate the respondents?" is a part of _____ aspect which needs to be evaluated during pilot testing. **Sampling procedure can be checked**
102. A researcher should practice which of the following guideline while conducting a research project? **All of the given option**
103. Pilot study is _____. **A small scale study**
104. In the statement 'an examination of the effects of discretionary behaviour on employee performance' employee performance is the: **Dependent variable**

STA630_RESEARCH METHODS

Quiz for Mid-Term

105. The faculty members of a university consist of 85% staff with masters as highest qualification..... **Quota Sampling**
106. _____ is the philosophical stance according to which the senses are the ultimate source of human knowledge. **Empiricism**
107. A sample can be defined as: **some selected elements from a population through which we can draw conclusions about all population**
108. Stipulation of logical relationship between any two variables means: Formulation of a **proposition**
109. A numerical value calculated from population is called **Parameter**
110. Unilever launched a new product line but the revenues are not increasing, the company will undergo _____ that help managers to understand, predict and control an environment. **Research**
111. Which of the following is/are principles(s) of questionnaire construction? **All of the given options**
112. According to Empiricism, _____ is the ultimate source of all our concepts and knowledge. **Sensory experience**
113. An expectant pause is a part of: **Verbal communication**
114. Identify the option that explains the idea that knowledge is verifiable by experience or observation. **Empiricism**
115. The list of all units in a population is called **sampling frame**
116. What does 'verifiable' mean in the context of scientific research? **Results can be duplicated or confirmed by others**
117. Which of the following is pivotal in capturing accurate variables researcher wants to study? **Question design and development**
118. Problem statement is a _____ statement of the question or issue that is to be investigated with the goal of finding an answer or solution: **All of the above**
119. The purpose of reviewing existing literature is: **To find out what is already known about your area of interest**
120. Which of the following is the focus of scientific research? **Objectivity**
121. Which of the following is NOT a method of narrowing a topic? **Pilot testing**
122. The unemployment among arts students is high is an example of which type of hypothesis? **Descriptive hypothesis**
123. Methodological review helps to: **Point out how methodology varies by study**
124. Debriefing involves: **All of the given options**
125. A ____ Hypothesis states no relationship between two variables: **Null hypothesis**
126. Null hypothesis states: **Absence of relationship**
127. A study conducted when no information is available on how similar problems have been solved in the past is known as: **Exploratory research**
128. Which type of the review tells the reader how a project fits into the big picture and its implications for a field of knowledge? **Context review**
129. "The extensive use of chocolate causes pimples". The given hypothesis is a (an): **Explanatory hypothesis**

STA630_RESEARCH METHODS

Quiz for Mid-Term

130. Basic and Applied Research are the classifications of research on the basis of: **Use of the research**
131. If a researcher is studying the effect of using laptops in his classroom to ascertain its merit and worth. Which type of an applied research he is conducting? **Evaluation research**
132. "Higher the job satisfaction, lower will be the rate of turnover". What is the direction of relationship does this proposition present? **Negative relationship**
133. Historical review helps to: **Traces the development of an issue over time**
134. What is opposite of a variable? **A concept**
135. "The higher the motivation, the higher the efficiency" is an example of: **Relational Hypothesis**
136. Which of the following describes a primary purpose of conducting research? **To find answers or solutions to specific problems**
137. While discussing about ethics in research, which of the following is not considered as a concerned party? **Government**
138. It is a variable that has distinct, discrete values but no precise numerical flow. For example, gender can be thought of as a discontinuous variable with two possible values, male or female. What is it? **Discrete variable**
139. Traces the development of an issue over time: **Historical review**
140. Identify the option that can be a disadvantage of cross-sectional research. **It cannot capture the change process**
141. A good review of the literature increases a reader's confidence in the researcher's _____. **All of the above**
142. _____ is an example of a concrete concept. **Family dissolution**
143. The introduction section of a research proposal contains information about all of the following except **Design of the study**
144. Theoretical review helps to: **Compare how different theories address an issue**
145. Research on world census regarding covid-19 is a type of _____ research. **Macro**
146. _____ variable is a name used to describe the dependent variable in a variety of statistical modeling contexts, including multiple regression, discriminant analysis, and canonical correlation. **Criterion**
147. Statistical generalizability refers to: **How the result is useful for a broader group**
148. Which of the following option is NOT the role of theory? **Theory as memorization**
149. To analyze the effects of re-branding on the level of customer loyalty is an example of which of the following options? **Explanatory research**
150. If there is no theory yet, you cannot conduct: **Inductive**
151. "Higher the level of job satisfaction, higher will be the employees' performance." Which type of relationship the movement of variables determines? **Direct relationship**
152. Hypothesis is also called: **Testable proposition**
153. A reader can easily see and comprehend the theorized relationships through: **Schematic Diagram**
154. What does the term "deterministic" imply in scientific research? **All events are assumed to have identifiable causes**

STA630_RESEARCH METHODS
Quiz for Mid-Term

155. Which of the following cannot be done through pilot testing? **Structuring open ended questions**

156. An expectant pause is a part of: **Verbal communication**
