#### **What is necessary for the reflective practitioner to become a teacher?**

For a reflective practitioner to become a teacher, they must develop a combination of knowledge, skills, and attitudes that foster continuous growth and improvement. Here are the key components:

- 1)** Deep Subject Knowledge
- 2)** Pedagogical Skills
- 3)** Reflective Practice
- 4)** Emotional and Social Intelligence
- 5)** Commitment to Professional Development
- 6)** Ethical and Reflective Decision-Making
- 7)** Adaptability and Innovation

#### **Name six phases of Dewey extension model?**

### **Dewey suggests aspects (phases) of reflective thought:**

- ❖ Suggestions
- ❖ Intellectualization
- ❖ Hypothesis Forming
- ❖ Clarity
- ❖ Imaginative action
- ❖ Testing the hypothesis

### **Components of Supervision?**

Supervision is a crucial aspect of professional development, and it involves several key components. Here are the main components of supervision:

- ❖ Instructional Supervision
- ❖ Clinical Supervision
- ❖ Developmental Supervision
- ❖ Professional Development
- ❖ Supportive Supervision
- ❖ Leadership and Support
- ❖ Ethical and Legal Considerations
- ❖ Educational Supervision

### **Write key components of Socratic method?**

The Socratic method is a powerful teaching and learning approach that encourages critical thinking, reflection, and intellectual exploration. Here are the key components of the Socratic method:

- ❖ Questioning (Dialectical Method)
- ❖ Critical Thinking
- ❖ Active Participation
- ❖ Inquiry and Reflection
- ❖ Collaborative Dialogue
- ❖ Inductive Reasoning
- ❖ Continuous Learning
- ❖ Intellectual Humility

### **Inter-professional learning?**

**Inter-professional learning (IPL)** refers to an educational approach where individuals from different professional backgrounds learn together to foster collaboration, improve teamwork, and enhance service delivery, particularly in healthcare, education, and social services.

### **Key Components of Inter-Professional Learning:**

- 1)** Collaborative Learning
- 2)** Teamwork and Communication
- 3)** Role Awareness
- 4)** Problem-Solving and Critical Thinking
- 5)** Patient/Client-Centered Approach (for healthcare and social services)
- 6)** Ethical and Professional Responsibility

#### **4d cycle name and briefly explain?**

- 1) Discover:** The identification of organizational processes that work well
- 2) Dream:** The envisioning of processes that would work well in the future
- 3) Design:** Planning and prioritizing process that work well
- 4) Destiny:** The implementation of the proposed design

#### **Components of appreciative inquiry AI?**

Appreciative Inquiry (AI) is the study and exploration of what gives life to human systems when they function at their best

It consists of the following key components:

- 1) The 4D Cycle (Core Process of AI)
- 2) Positive Core (Strength-Based Focus)
- 3) Generative Questions
- 4) Collaboration and Inclusivity
- 5) Constructivist Approach

#### **What is the importance of self-regulated learning in teaching?**

Self-Regulated Learning (SRL) is essential in teaching because it empowers students to take control of their own learning process, leading to better academic performance, motivation, and lifelong learning skills. Here's why SRL is important in teaching:

- 1)** Enhances Student Autonomy
- 2)** Improves Academic Performance
- 3)** Develops Critical Thinking and Problem-Solving Skills
- 4)** Boosts Motivation and Engagement
- 5)** Supports Lifelong Learning
- 6)** Enhances Teaching Effectiveness
- 7)** Promotes Autonomy and Independence

### **lowest level of Bloom's Taxonomy?**

The lowest level of Bloom's Taxonomy is:

#### **Remembering (Knowledge)**

This level involves recalling or remembering previously learned information, such as facts, definitions, or concepts.

### **What is higher-order learning?**

Higher-order learning refers to complex cognitive processes that involve critical thinking, problem-solving, and creativity. It goes beyond basic recall and memorization, requiring students to analyze, evaluate, and synthesize information to create new knowledge and understanding.

#### **Key Aspects of Higher-Order Learning:**

- ❖ Critical Thinking
- ❖ Problem-Solving
- ❖ Creative Thinking
- ❖ Application & Transfer
- ❖ Metacognition
- ❖ Evaluation

### **Why establish a community of practice in school?**

Establishing a Community of Practice (CoP) in a school fosters collaborative learning, professional growth, and a shared sense of purpose among educators and students. A CoP is a group of individuals who share a common interest and engage in collective learning to improve their practice.

Key Reasons for Establishing a Community of Practice in Schools:

- ❖ Enhances Teacher Collaboration & Professional Growth
- ❖ Improves Student Learning Outcomes
- ❖ Encourages a Culture of Continuous Learning
- ❖ Supports School Improvement & Innovation
- ❖ Builds a Sense of Community & Shared Purpose

### **3 stages of dialogic diary?**

A **dialogic diary** is a reflective writing tool that fosters deep thinking, critical analysis, and meaningful dialogue between learners and educators or peers. It involves **writing, responding, and engaging in dialogue** over time.

#### **Stages:**

- 1) Uncertainty
- 2) Enthusiasm
- 3) Lack of Enthusiasm
- 4) Habit and Learning

### **What are benefits to employ "Community of practice" in classrooms?**

Employing a **Community of Practice (CoP)** in classrooms benefits both teachers and students by fostering **collaboration, shared learning, and continuous improvement**. It creates a **supportive learning environment** where individuals engage in meaningful discussions and develop deeper understanding.

### **Benefits of Using a Community of Practice in Classrooms**

- 1) Enhances Collaborative Learning
- 2) Improves Critical Thinking & Reflection
- 3) Strengthens Teacher-Student & Peer Relationships
- 4) Encourages Lifelong Learning & Professional Development
- 5) Supports Diverse Learning Needs
- 6) Fosters Innovation & Problem-Solving
- 7) Deeper understanding and engagement

### **Write Four Basic Processes for the Creation of an Academic Portfolio?**

#### **1) Collection:**

Firstly, we must consider what we are collecting in terms of material to include should enable us to explore and to reflect not just inclusions for the sake of putting them in academic portfolio.

#### **2) Select:**

we need to select those materials quite carefully because part of creating of portfolio is to consider who will read it and who will benefit from it and purposes for which they will be reading.

#### **3) Reflection:**

we need to understand that the academic portfolio is a tool for reflection and therefore we need to make sure that the inclusions are there to help us learn until develop our teaching and we are simply part of research of experience that we engage with.

#### **4) Connections:**

Finally, the academic portfolio a mechanism that contains materials that enable us to make connections between different aspects of our professional role.

### **Write core components of community of practice?**

A Community of Practice (CoP) is a group of individuals who share a common interest, goal, or profession, and work together to achieve a common objective. The core components of a Community of Practice are:

- 1) Domain (Shared Interest & Purpose)
- 2) Community (Group Interaction & Collaboration)
- 3) Practice (Knowledge, Skills & Resources)
- 4) Cycle of Engagement

### **Explain Teachers as lifelong learners?**

To develop teacher identity, reflective practitioner needs to connect with lifelong learning. It's important for us to consider teacher as a lifelong learner. For reflective practitioners there are certain areas of learning that we need to engage with as a lifelong learner. There are certain proficiencies within these domains that we need to develop as reflective practitioners because they really guide us as lifelong learners. We can see here that the reflective practitioner is working with three domains of learning. Knowledge, skills and dispositions.

Teachers as lifelong learners refer to the idea that teachers should continually update their knowledge, skills, and practices to provide the best possible education for their students. This concept recognizes that teaching is a complex and ever-evolving profession that requires ongoing learning and professional development.

### **Key Characteristics of Teachers as Lifelong Learners:**

- 1) Commitment to ongoing learning
- 2) Reflective practice
- 3) Openness to new ideas and perspectives
- 4) Collaboration and sharing
- 5) Student-centered approach

### **Types of Grounded Theory Design?**

- ❖ Emergent Design
- ❖ Grounded theory exists at the most abstract conceptual level rather than the least abstract level as found in visual data presentations such as a coding paradigm.
- ❖ Emergent Design
- ❖ A theory is grounded in the data and not forced into categories
- ❖ Four essential criteria: fit, work, relevance, modifiability.
- ❖ Constructivist Design
- ❖ Philosophical position between positivist and post-modern researchers
- ❖ Theorist explains feelings of individuals as they experience a phenomenon or process.

- ❖ Constructivist Design
- ❖ Study mentions beliefs and values of the researcher and ignores predetermined categories
- ❖ Narrative is more explanatory, discursive, and probing the assumptions and meanings for the individuals in the study.

### **Three stages of grounded theory?**

- 1) **Open coding** - a procedure for developing categories of information
- 2) **Axial coding** - a procedure for interconnecting the categories
- 3) **Selective coding** - a procedure for building a story that connects the categories producing a discursive set of theoretical propositions.

### **Difference between writing and dialogic reflection?**

Dialogic reflection is different to written reflection.

- ❖ Written reflection is **quite static** and ordered because it is written down whereas dialogic reflection is much **more flexible** and multi-layered because of level of interaction.
- ❖ Written reflection is simply **about writing reflectively** and we know about professional development journals and the structure of those whereas dialogic reflection is much easier to reflect compared to **formality of written reflection**.
- ❖ In written reflection the values we hold will **tend to emerge** over time whereas in dialogic reflection it is **much easier to engage** and explore values or assumptions with some immediacy.
- ❖ With written reflection there is certain **word limit** there is only so much that you can write on an ongoing basis and but with dialogue reflection because it is so **quick and easy** it provides opportunity to really question and to probe in detail certain aspects.
- ❖ Written reflection is **limited in terms of that ability** to explore and therefore can be quite limiting in terms of the depth of learning and **depth of learning is one positive attribute to dialogic reflection** because of the level of questioning by other people.

### **Teacher growth model?**

The Teacher Growth Model is therefore manifested it comes from many perspectives from it in terms of knowledge creation and knowledge generation through the system, also in terms of becoming experts in pedagogy and the subject pedagogies which will move the profession forward in the 21st century. The Teacher Growth Model that we can talk about therefore is significant for teachers now to engage with because it's through this process of multiple mode of

learning that the reflective practitioner actually through research through capacity building through knowledge acquisition becomes a true professional in the 21st century.

A **Teacher Growth Model** ensures that educators continuously evolve, enhancing student learning, adapting to changes, and becoming leaders in education. Effective teacher development fosters lifelong learning, professional excellence, and positive classroom impact.

### **Key Stages in the Teacher Growth Model**

1. Novice Teacher (Beginning Stage)
2. Developing Teacher (Competency-Building Stage)
3. Proficient Teacher (Mastery Stage)
4. Expert Teacher (Leadership & Mentorship Stage)
5. Transformational Teacher (Innovator & Change Agent Stage)

### **What is action research?**

**Action Research** is a **systematic, reflective process** conducted by educators and practitioners to improve their teaching, classroom practices, or educational environments. It involves identifying a problem, implementing a solution, collecting data, and analyzing the results to enhance learning outcomes.

### **Three particular characteristics of action research are that it:**

- ❖ Arises from practical questions
- ❖ Is participatory in nature
- ❖ Its validity is strengthened through peer examination and discussion.

Action research is a valuable method for reflective practitioners, focusing on real problems in teaching. It involves active participation, collaboration with colleagues and students to collect data, and gains strength through validation and reflection with others.

### **Action research engages teachers in a cycle of:**

- ❖ Experience
- ❖ Critical reflection
- ❖ Action

### **Benefits of Action Research**

- ✓ Improves teaching effectiveness.
- ✓ Promotes evidence-based decision-making.
- ✓ Enhances student learning outcomes.
- ✓ Encourages teacher collaboration and professional growth.

### **What is the professional relationship of teacher and pupil in the class room of reflection?**

In a reflective classroom, the teacher-pupil relationship is based on mutual respect, dialogue, and continuous learning. Instead of a traditional top-down approach, the teacher acts as a facilitator, mentor, and co-learner, encouraging students to engage in critical thinking and self-reflection.

#### **Key Aspects of the Teacher-Pupil Relationship in a Reflective Classroom**

- 1)** Mutual Respect & Trust
- 2)** Dialogue & Open Communication
- 3)** Encouraging Self-Reflection
- 4)** Role of the Teacher as a Facilitator
- 5)** Shared Responsibility for Learning
- 6)** Collaborative Partnership
- 7)** Focus on Metacognition and Self-Regulation

### **Active learning process?**

The **active learning process** engages students in meaningful, hands-on learning experiences rather than passive listening. It requires students to **think critically, solve problems, discuss ideas, and apply knowledge** in real-world contexts.

#### **Benefits of Active Learning:**

- ✓ Enhances critical thinking and problem-solving skills
- ✓ Increases engagement, motivation, and knowledge retention
- ✓ Develops collaboration and communication abilities
- ✓ Encourages self-directed and lifelong learning

### **What is meant by "being reflexive" Using John's Dewey Model?**

Being reflexive refers to the ability to critically examine one's thoughts, actions, and experiences to improve future decision-making and learning. In education, John Dewey's model of reflective thinking provides a framework for systematic reflection, helping teachers and students develop deeper understanding and problem-solving skills.

#### **John Dewey's Model of Reflection:**

- ❖ John Dewey's Model of Reflection
- ❖ Defining the Problem
- ❖ Generating Possible Solutions
- ❖ Testing Ideas Through Action
- ❖ Evaluating the Outcome

### **Benefits of Peer Mentoring?**

Peer mentoring is a learning approach where students or teachers support each other's personal, academic, or professional growth. It fosters collaboration, skill development, and confidence in both mentors and mentees.

#### **1. Academic Benefits**

- ✓ Enhances Learning & Understanding
- ✓ Encourages Active Learning
- ✓ Improves Study Skills

#### **2. Personal Growth & Confidence**

- ✓ Boosts Self-Esteem
- ✓ Encourages Self-Reflection
- ✓ Develops Leadership & Responsibility

#### **3. Social & Emotional Support**

- ✓ Reduces Stress & Anxiety
- ✓ Promotes a Sense of Belonging
- ✓ Encourages Constructive Feedback

### **Important outcomes of community of practice?**

A Community of Practice (CoP) is a group of individuals who share a common interest, profession, or goal and learn together through collaboration, discussion, and shared experiences. In an educational setting, CoPs help teachers and students grow professionally and academically.

#### **Key Outcomes of a Community of Practice**

- Knowledge Sharing & Collective Learning
- Professional & Skill Development
- Improved Teaching & Learning Practices
- Strengthened Social & Emotional Support
- Organizational & Institutional Growth
- Sustainable Learning & Lifelong Engagement

### **Stages of John reflective model?**

There are certain stages five stages of John's model of reflection.

- 1)** Describe the event/ experience
- 2)** Thinking and feeling
- 3)** Evaluation
- 4)** Analysis
- 5)** Conclusion and Action Plan

### **What relation a professional should have with students?**

A **professional relationship** between a teacher and students is built on **respect, trust, and ethical responsibility**. The teacher acts as a **mentor, facilitator, and role model**, ensuring a positive learning environment while maintaining appropriate boundaries.

### **Key Aspects of a Professional Teacher-Student Relationship**

1. Mutual Respect & Trust
2. Ethical & Professional Boundaries
3. Support & Guidance
4. Role as a Mentor & Facilitator
5. Balanced Authority & Empathy
6. Culturally Responsive and Inclusive

### **steps of appreciative inquiry?**

- Discover
- Dream
- Design
- Destiny

### **Steps of Socratic method of reflection?**

- ELICIT
- CLARIFY
- TEST
- DECIDE

### **stages of Socratic method of reflection?**

- ❖ Questioning
- ❖ Dialogue
- ❖ Critical thinking
- ❖ Reflection
- ❖ Irony
- ❖ Inductive reasoning

❖ Refutation

**Principles of supervision?**

- Be clear about why there is a need for supervision and who has asked for it.
- Set a time frame for the supervision session; even a few minutes of focused time can be worthwhile.
- Protect the time and space where possible and appropriate; try to ensure there will be no interruptions and that there is privacy.
- Ensure that there is confidentiality.
- Be transparent about the extent to which the supervision is about development or performance; this may need to be renegotiated or stated during the session.

**What is 7C's?**

- ❖ Conversation
- ❖ Curiosity
- ❖ Context
- ❖ Creativity
- ❖ Caution
- ❖ Care
- ❖ Collaborating

**How Socrates method helps teachers in development critical thinking?**

The **Socratic method** is a teaching approach that encourages **critical thinking** through questioning, dialogue, and reasoning. It can be highly beneficial for teachers in fostering students' analytical and reflective skills. Here's how it helps in developing critical thinking:

- Encourages Deep Inquiry
- Promotes Active Learning
- Develops Logical Reasoning
- Encourages Self-Reflection
- Fosters Open-Mindedness
- Enhances Problem-Solving Skills
- Fosters Analytical Reasoning
- Promotes Metacognition

**Stages of team development?**

- forming (getting to know each other)
- storming (potential conflict over goals)
- norming (clear roles, efficient support)
- performing (high-level teamwork)

### **Teaching seems as an art rather than science?**

Teaching is often considered **both an art and a science** because it requires a blend of **creativity, intuition, and systematic methods**. However, many argue that **teaching is more of an art** because of its dynamic, human-centered nature.

#### **1) Artistic Elements:**

- ❖ Creativity and improvisation
- ❖ Emotional intelligence and empathy
- ❖ Personalized approach
- ❖ Adaptability and Intuition
- ❖ Expression and Performance

#### **2) Scientific Elements:**

- ❖ Research-based practices
- ❖ Data-driven decision making
- ❖ Systematic planning and organization
- ❖ evidence-based methods

### **What was good or bad about the experience?" This question belongs to which stage of Gibbs reflective cycle?**

The question "What was good or bad about the experience?" belongs to the **Evaluation** stage of Gibbs' Reflective Cycle.

In the Evaluation stage, the focus is on identifying the **positive and negative** aspects of the experience, helping to assess its effectiveness and impact.

### **What type of skills reflective practitioner needs to Develop?**

A **reflective practitioner** needs to develop a range of skills to continuously improve their practice and adapt to new challenges. These skills help in **critical thinking, self-awareness, and professional growth**. Here are the key skills:

- Self-Awareness 🧐
- Critical Thinking 🔍
- Open-Mindedness 🌐
- Self-Assessment & Evaluation ✅
- Problem-Solving Skills 🛠️
- Communication & Active Listening 🗣️💡
- Emotional Intelligence 💡
- Research & Inquiry Skills 📖

- Adaptability & Flexibility 
- Goal-Setting & Action Planning 

### **Explain "Gibb's reflective cycle"?**

Gibb's model of reflection is a very popular model. And we need to remind ourselves of the six stages of reflection in the model. The Gibbs' reflective model is a framework giving structure into the process of learning from experiential learning through:

- Description (what happened)
- Feelings (what were you thinking and feeling)
- Evaluation (what was good and bad about the experience)
- Analysis (what sense can you make of the situation)
- Conclusion (what else could you have done)
- Action Plan (if it arose again, what would you do)

### **RP teacher dimension and proficiency?**

A Reflective Practitioner (RP) Teacher demonstrates specific dimensions and proficiencies that enable continuous learning, self-improvement, and enhanced teaching effectiveness.

#### **Dimensions of a Reflective Practitioner (RP) Teacher**

- Self-Reflection & Awareness
- Critical Thinking & Analysis
- Open-Mindedness & Adaptability
- Lifelong Learning & Professional Growth
- Collaborative Engagement
- Ethical & Culturally Responsive Teaching
- Problem-Solving & Decision-Making

#### **Proficiency Levels of a Reflective Practitioner Teacher**

- Basic Proficiency
- Developing Proficiency
- Proficient Reflective Practitioner
- Expert/Master Reflective Practitioner

## Consequences of reflective practice?

Reflective practice has both positive and challenging consequences, as it influences personal growth, professional development, and decision-making. Here's a breakdown of its effects:

### Positive Consequences of Reflective Practice ✨

- Improved Teaching & Learning Outcomes 📖
- Enhanced Self-Awareness & Professional Growth 🧠
- Better Problem-Solving & Decision-Making 🔍
- Increased Confidence & Professional Identity 💡
- Stronger Student-Teacher Relationships 🤝
- Promotes Open-Mindedness & Flexibility 🔄

### Challenges & Negative Consequences of Reflective Practice ⚠️

1. Time-Consuming ⌚
2. Emotional Discomfort 😞
3. Risk of Overthinking 🔄
4. Resistance to Change ❌
5. Lack of Support & Institutional Barriers 🚧

## What is an Academic Portfolio? 📁

An academic portfolio is a structured collection of documents that showcase an educator's or researcher's teaching, research, professional development, and service contributions. It serves as evidence of academic achievements, skills, and reflections over time.

### Types of Academic Portfolios 📁

- ◆ Summative Portfolio
- ◆ Formative Portfolio
- ◆ Digital Portfolio

### **What is peer observation?**

Peer observation is a professional development practice where teachers or educators observe each other's teaching to provide constructive feedback and improve instructional methods. It is a collaborative, non-evaluative process aimed at fostering reflection, sharing best practices, and enhancing teaching effectiveness.

### **four key focus areas for peer observation:**

- ❖ Planning/Organization/ content
- ❖ Teaching Strategies/resources
- ❖ Presentation/management
- ❖ Assessment/monitoring

### **The Process of Peer Observation?**

For the Reflective practitioner process has four main stages:

- **Briefing session**-before observation where a focus is given to the observation then the observation followed by post observation.
- **Observation Session**-there is reflection and feedback from the observer and then there needs to some recording of the observer.
- **Post-Observation session:** this is a collaboration reflection and will involve appraisal of the session by the teacher who was observed and comments from the observer
- **Production of joint statement**

### **Benefits of Peer Observation ❁**

- ✓ Improves Teaching Quality
- ✓ Encourages Self-Reflection
- ✓ Fosters Collaboration
- ✓ Shares Best Practices
- ✓ Enhances Student Learning

### **differences between written reflection and dialogic reflection?**

**Written reflection:** Use for personal reflection, journaling, or when you need to process your thoughts and feelings individually. Written reflection helps with self-analysis and organization.

**Dialogic reflection:** Use for team-building, collaborative problem-solving, or when you need to gain diverse perspectives and insights from others. dialogic reflection deepens understanding through peer engagement and discussion.

### **what difficulties teachers face without critical reflection?**

- ❖ Stagnation & Lack of Growth  
- ❖ Poor Student Engagement & Learning Outcomes  
- ❖ Ineffective Classroom Management  
- ❖ Resistance to Change & New Teaching Strategies  
- ❖ Lack of Self-Awareness & Bias in Teaching  
- ❖ Weak Problem-Solving & Decision-Making Skills  
- ❖ Limited Collaboration & Professional Isolation  

### **5 Principles of AI appreciative inquiry?**

- 1) Constructionist: The way we know is fateful
- 2) Simultaneity: Change begins the moment you ask the question
- 3) Poetic: People in organizations are an open book
- 4) Anticipatory: Deep change = change in active images of the future
- 5) Positive: The more positive the question = greater/longer lasting change

### **Principles of Inter-Professional Practices?**

- ❖ Improves the quality of teaching
- ❖ Focus on the needs of students
- ❖ Encourages professionals to learn with, from and about each other.
- ❖ Respect the integrity and contributions of each professional
- ❖ Improves personal satisfaction

### **principles of theocratic sensitivity?**

Theoretical Sensitivity refers to a researcher's awareness, insight, and ability to recognize meaningful patterns in data during qualitative research. It is a key concept in Grounded Theory (developed by Glaser & Strauss) and helps researchers interpret data without bias while allowing emerging theories to develop naturally.

### **Principles of Theoretical Sensitivity**

- Personal Experience & Background 
- Literature Awareness 
- Openness to Emerging Data 

- Conceptual Thinking 
- Comparative Analysis 
- Sensitivity to Context 

### **Sources of Theoretical Sensitivity?**

- Professional experience
- Personal experience of an event Theoretical Sensitivity
- Analysis process itself: become sensitive to concepts, meanings and relationships
- Theoretical sensitivity is a good thing in that it helps us connect what we know to what we do not know about what we are studying (awareness of our biases)
- Forces us to step back and make sure what we are truly seeing is FOUND in the data. Think of it as a grounding tool for conducting grounded theory

### **four knowledge conversion stages (SECI)?**

- ❖ **Socialization (S)** between individuals using tacit knowledge.
- ❖ **Externalizing (E)** it in individual reflections in an organizational context that builds collaborative knowledge
- ❖ **Combination (C)** facilitates bringing tacit individual knowledge into explicit organizational knowledge
- ❖ Making knowledge reusable for individual learning in **internalization (I)**

### **according to John's structural model what is being reflective?**

there's reflexivity. This is part of the process where the individual teacher is not so much being reflective, but actually being reflexive in other words looking at their response to a particular situation and how they are making connections with their actions and with knowledge and their actions. And what would be the consequences therefore of changing actions and applying other knowledge new knowledge to our processes to our approaches and how this creates new experiences. Of course, we feel about this those experiences that we are having. In terms of being reflexive within the model, what we're looking to do is seeing whether we can continue to support this ongoing process. So, we need to consider asking questions of ourselves about the consequences of these particular actions. We can also consider how much we're being responsive to people's needs, how much we're interacting with people, what's availability for the students and for the parents of students that we are working with.

### **particular patterns of knowing?**

- Aesthetics
- Personal
- Ethics
- Empirics

- Reflexivity

### **Explain The Socratic method?**

The Socratic method is a philosophical technique used to encourage critical thinking and expose underlying assumptions. The key components of the Socratic method are:

- 1) Questioning:** Asking a series of questions to clarify and challenge assumptions.
- 2) Dialogue:** Engaging in a conversation, often between two individuals, to explore ideas.
- 3) Critical thinking:** Encouraging the examination and evaluation of ideas.
- 4) Reflection:** Pausing to consider and analyze one's own thoughts and assumptions.
- 5) Irony:** Using rhetorical questions and irony to challenge and provoke thought.
- 6) Inductive reasoning:** Drawing general conclusions from specific observations.
- 7) Refutation:** Challenging and disproving assumptions through logical argumentation.

By employing these components, the Socratic method aims to:

- ❖ Expose underlying assumptions
- ❖ Encourage critical thinking
- ❖ Develop philosophical understanding
- ❖ Foster intellectual humility

The Socratic method is named after the ancient Greek philosopher Socrates, who used this technique to engage with others and explore complex ideas.

### **Dewey's model of five stage cyclical process?**

- 1) Ask:** The starting point is to ask a question about practice, asking what could be improved, asking what needs to change in order for things to improve.
- 2) Investigate:** And through this then investigating, in some sort of detail, how to make those improvements and investigating or to understand the components of those change needs.
- 3) Create:** From this, the reflective practitioner creates a new approach to teaching a new technique to try out and puts this into practice in order to make the reflective process meaningful for themselves.
- 4) Discuss and reflect:** And then to discuss with others, the outcomes of that action that they've engaged with helps the reflection process. Because it's from this deeper level of reflection, that the practitioner can ask further questions, and so engage in this continuous cycle.
- 5) Pattern of reflective thinking**
  - Problem identification
  - Problem analysis
  - Solutions

- Criteria
- Implementation

### **Types of Knowledge?**

- **What is known** (the knowledge from theory, research and best practice)
- **What we know** (the knowledge of those involved what practitioner know)
- **New Knowledge** (the new knowledge that we create together through collaborative work).

### **Goals of Self-Directed learning?**

Self-directed learning is a process of learning which the learner takes ownership, takes responsibility for their learning, takes responsibility, takes ownership of planning their learning implementing their learning and evaluating their learning.

- It enhances the ability of teachers to be more self-directed in learning (humanistic approach)
- Fosters transformational learning
- Promotes social action
- Reflective Practitioners can use SDL to develop both skills and attributes as learners which support lifelong development
- Better plan, carry out and evaluate their own learning
- The Reflective Practitioner who is a self-directed learner can participate fully and freely in the dialogue through which we test our interests and perspectives against those of others and accordingly modify them and our learning goals.

### **Aspects of Self-Directed learning?**

Self-Directed Learning (SDL) is a **learner-centered approach** where individuals take responsibility for their own learning process. It involves **planning, executing, and evaluating** their learning journey.

### **Key Aspects of Self-Directed Learning** 🧠💡

- ❖ Self-Motivation & Initiative 🔥
- ❖ Goal Setting & Planning 🎯
- ❖ Resource Identification & Management 📖🔍
- ❖ Time Management & Discipline ⌚
- ❖ Critical Thinking & Problem-Solving 🤔💡
- ❖ Self-Assessment & Reflection 🔄
- ❖ Seeking Feedback & Collaboration 🤝

## **Purposes of establishing COP in schools?**

### **Key Purposes of CoP in Schools**

- Enhancing Professional Development  
- Improving Teaching & Learning Quality 
- Encouraging Collaboration & Peer Support 
- Developing Reflective Practice  
- Fostering a Culture of Innovation 
- Bridging the Gap Between Theory & Practice   
- Enhancing Student Outcomes  
- Building a Supportive School Community
