EDU301 – Mid Term Past Papers File 2 by Tanveer Online Academy

(Subjective)

Question: Reflection in and reflection on

Answer: Reflection in action is thinking during an activity to adjust and improve. Reflection on action occurs after the activity to analyze and learn from the experience.

Question: Task analysis

Answer: Task analysis involves breaking down a complex task into smaller, manageable steps to understand the skills needed to complete it.

Question: Misconceptions of learning in isolation

Answer: Learning in isolation can be ineffective as it overlooks the importance of social interaction, collaboration, and real-world context in the learning process.

Question: Define learning

Answer: Learning is the process of acquiring knowledge, skills, attitudes, or behaviors through study, experience, or teaching.

Question: Unqualified profession

Answer: An unqualified profession refers to individuals working without the necessary credentials or expertise, often leading to lower standards and effectiveness.

Question: Bloom's taxonomy

Answer: Bloom's taxonomy is a hierarchical model used to classify educational learning objectives into cognitive levels, including knowledge, comprehension, application, analysis, synthesis, and evaluation.

Question: Instructional and curriculum difference

Answer: Instruction refers to the methods and strategies used to teach, while the curriculum is the content and structure of what is being taught.

Question: Why inductive mode is important

Answer: The inductive mode is important because it encourages learners to discover patterns and principles on their own, fostering critical thinking and deeper understanding.

Question: Why we should prevent unqualified in organizations

Answer: Preventing unqualified individuals in organizations ensures the quality of work, professionalism, and trust in the services provided, leading to better outcomes.

Question: Elements of plans

Answer: Key elements of a plan include objectives, resources, strategies, timeline, and evaluation methods.

Question: Write 3 areas that are required to convert novice teachers into expert teachers

Answer:

1. Continuous professional development
2. Classroom management skills
3. Reflective teaching practices

Question: What prerequisites for essay writing should teachers adapt

Answer: Teachers should ensure students understand the essay structure, thesis development, and coherence of arguments before starting the writing process.

Question: Mention synthesis level question

Answer: A synthesis level question might be: "How would you combine different theories to create a new approach to solving this problem?"

Question: Techniques to avoid gender-biased discrimination

Answer:

1. Use gender-neutral language
2. Ensure equal participation opportunities
3. Provide diverse role models

Question: Unit plan vs. lesson plan

Answer: A unit plan outlines the goals, content, and assessments for an entire unit, while a lesson plan details the objectives, materials, and activities for a single class session.

Question: Learning system

Answer: A learning system encompasses the methods, resources, and environments used to support learning processes.

Question: Planning

Answer: Planning in education refers to organizing lessons, activities, and assessments to achieve specific learning objectives.

Question: Instructions and curriculum: its importance

Answer: Instructions are important for guiding learning processes, while the curriculum provides the content and framework, ensuring that educational goals are met.

Question: IEP define

Answer: An Individualized Education Plan (IEP) is a personalized educational program designed to meet the unique needs of students with disabilities.

Question: Two components of unit planning

Answer:

1. Learning objectives
2. Assessment methods

Question: Why resources are included in planning

Answer: Resources are included in planning to ensure the necessary tools, materials, and support are available for successful teaching and learning.

Question: Analysis level

Answer: The analysis level in Bloom's taxonomy involves breaking information into parts to understand its structure and relationships.

Question: Five points for teachers becoming professional

Answer:

1. Continuous learning
2. Reflective practice
3. Adhering to ethical standards
4. Collaboration with peers
5. Effective classroom management

Question: Rationale

Answer: A rationale is the reasoning or justification behind a particular decision or approach, explaining why it is necessary or beneficial.

Question: Teaching as a social activity

Answer: Teaching is a social activity because it involves interaction, communication, and relationships between teachers and learners to facilitate knowledge transfer.

Question: Incentives for teachers

Answer: Incentives for teachers can include professional development opportunities, recognition, salary increases, and better working conditions.

Question: Elements of lesson plan

Answer: Key elements of a lesson plan include objectives, materials, procedures, assessment, and differentiation strategies.

Question: Inductive reasoning

Answer: Inductive reasoning involves drawing general conclusions from specific examples or observations.

Question: Forms of content

Answer: Content can be presented in various forms, including text, audio, video, images, and interactive media.

Question: Analysis level of cognitive domain

Answer: The analysis level involves examining and breaking down information into parts to understand it, such as identifying cause-and-effect relationships.

Question: Synthesis level Q's of cognitive domain

Answer: Synthesis questions ask students to combine elements to form a new whole, such as "How can you create a new solution by integrating these concepts?"

Question: Total sequencing time

Answer: Total sequencing time refers to the amount of time allocated to teach a sequence of lessons or tasks in a logical order.

Question: Social cognitivism

Answer: Social cognitivism is a theory that emphasizes learning through observation, imitation, and modeling, with a focus on social interactions.

Question: Horizontal dimension of planning

Answer: The horizontal dimension of planning refers to how different subjects or activities are organized and integrated across a curriculum.

Question: Can students' learning abilities be checked by tests?

Answer: Yes, tests can assess students' learning abilities by measuring their knowledge, skills, and understanding of the subject matter.

Question: Elements of lesson planning

Answer: Elements include objectives, instructional methods, materials, assessments, and strategies for differentiation.

Question: Sequencing

Answer: Sequencing in education refers to arranging content or activities in a logical order to facilitate effective learning.

Question: What is an inferential statement?

Answer: An inferential statement is a conclusion drawn from evidence and reasoning, rather than direct observation.

Question: What is informal education?

Answer: Informal education refers to learning that occurs outside of a formal school system, often through experiences, social interactions, or self-directed activities.

Question: Guidance to student

Answer: Guidance involves offering advice, support, and direction to students in academic, personal, or career matters.

Question: Maintenance rehearsal

Answer: Maintenance rehearsal is a memory technique that involves repeating information to keep it active in short-term memory.

Question: Forms of content

Answer: Content can take various forms, such as written text, audio recordings, videos, images, and hands-on activities.

Question: What are teaching guidelines?

Answer: Teaching guidelines provide educators with strategies, methods, and standards to ensure effective instruction and student learning.

Question: Elaboration and maintenance rehearsal

Answer: Elaboration rehearsal involves connecting new information to existing knowledge for better retention, while maintenance rehearsal focuses on simple repetition.

Question: Dimension of planning

Answer: Planning dimensions include the scope of content, sequence of lessons, timing, and alignment with learning objectives.

Question: IEP abbreviation

Answer: IEP stands for Individualized Education Plan, which outlines specialized support for students with disabilities.

Question: ZPD theory Kis ke Hy

Answer: ZPD (Zone of Proximal Development) theory was developed by Lev Vygotsky and refers to the range of tasks a learner can perform with guidance but not independently.

Question: How many types of teaching

Answer: There are various types of teaching, including direct instruction, inquiry-based learning, collaborative learning, and differentiated instruction.

Question: How planning is essential for successful learning

Answer: Planning is essential for organizing content, ensuring that objectives are met, and providing a structured learning environment that promotes student success.

Question: Informal education

Answer: Informal education occurs outside formal institutions, involving experiences, activities, and interactions that promote learning without structured curricula.

Question: E. Learning

Answer: E-learning refers to learning conducted via electronic media, typically the internet, allowing for flexible, accessible, and interactive education.

Question: Define motivation

Answer: Motivation is the internal drive or external stimuli that encourage individuals to take action or achieve goals.

Question: Task analysis model

Answer: A task analysis model breaks down tasks into smaller steps or components to identify the necessary skills and knowledge for successful completion.

Question: Content differentiation

Answer: Content differentiation is tailoring instructional content to meet the diverse learning needs, interests, and abilities of students.

Question: Assumption in Performance

Answer: Assumptions in performance refer to the expectations or beliefs about how an individual or group will perform under certain conditions, often based on prior knowledge or stereotypes.

Question: Difference between lesson plan and unit plan

Answer: A lesson plan focuses on objectives, activities, and assessments for a single class, while a unit plan covers multiple lessons within a broader topic, detailing goals for the entire unit.

Question: Why to prevent unqualified teachers

Answer: Preventing unqualified teachers is important to ensure high educational standards, effective teaching, and positive learning outcomes for students.

Question: Instructional objectives of lesson plan

Answer: Instructional objectives define what students are expected to learn and achieve by the end of a lesson, guiding the focus and assessment of learning.

Question: Why to start inductive reasoning

Answer: Inductive reasoning helps students develop critical thinking by allowing them to observe patterns and make generalizations, leading to deeper understanding.

Question: Assumptions of teaching in learning

Answer: Teaching assumes that learners are capable of growth, benefit from instruction, and can construct knowledge through interaction with content and others.

Question: Considerations teachers should make before starting instructional planning

Answer: Teachers should consider students' needs, prior knowledge, learning objectives, available resources, and assessment methods before planning instruction.

Question: What is notes keeping in teaching

Answer: Notes keeping in teaching refers to the practice of recording observations, insights, and student progress to inform instruction and reflect on teaching strategies.

Question: What is project learning? Write its example from daily life

Answer: Project learning is a hands-on, student-centered approach where learners engage in real-world tasks. An example is creating a community garden to learn about science and teamwork.

Question: Why teachers take into consideration students' characteristics while planning

Answer: Teachers consider students' characteristics, such as learning styles, interests, and abilities, to tailor instruction and make learning more effective and inclusive.

Question: How does the teaching profession play a social function?

Answer: Teaching serves a social function by transmitting knowledge, values, and skills, shaping individuals who contribute positively to society.

Question: Difference between deductive and inductive reasoning

Answer: Deductive reasoning starts with a general principle and applies it to specific cases, while inductive reasoning starts with specific observations and leads to broader generalizations.

Question: How to avoid gender bias

Answer: Gender bias can be avoided by using gender-neutral language, promoting equal participation, and offering diverse perspectives in teaching materials.

Question: What is the role of benchmark and standards in curriculum

Answer: Benchmarks and standards guide curriculum development by providing clear expectations for student learning and ensuring consistency in education.

Question: What are instructional objectives

Answer: Instructional objectives are specific, measurable goals that outline what students are expected to learn during a lesson or course.

Question: Instructional objectives

Answer: Instructional objectives focus on what students will learn and how they will demonstrate their understanding by the end of instruction.

Question: Curriculum planning

Answer: Curriculum planning involves designing the content, structure, and sequence of instruction to achieve educational goals.

Question: Education importance

Answer: Education is essential for personal development, social progress, and economic growth, providing individuals with the skills and knowledge to succeed in life.

Question: Pedagogical knowledge

Answer: Pedagogical knowledge refers to the understanding of teaching methods, learning processes, and strategies to facilitate effective education.

Question: Why sequencing is important?

Answer: Sequencing is important because it organizes learning activities in a logical order, building on prior knowledge and ensuring coherent progression of concepts.

Question: Education serves as an agent of transmitting culture? Explain

Answer: Education transmits culture by teaching societal values, traditions, language, and knowledge, helping individuals integrate into their communities.

Question: Importance of IEP

Answer: IEPs (Individualized Education Plans) are important for providing tailored support to students with special needs, ensuring they receive appropriate resources and accommodations for their learning.

Question: Considerations of teachers while planning

Answer: Teachers should consider students' abilities, curriculum requirements, available resources, time constraints, and assessment strategies while planning.

Question: Write a note on auditory learning style

Answer: Auditory learners learn best through listening, preferring lectures, discussions, and verbal instructions. They benefit from auditory tools like podcasts and spoken explanations.

Question: Write the characteristics of good books

Answer: Good books are engaging, informative, well-organized, relevant to the reader's needs, and written clearly with accurate information.

Question: How students can improve skills by interpersonal

Answer: Students can improve skills through interpersonal interactions by participating in group activities, engaging in discussions, and practicing effective communication.

Question: Definition of concept

Answer: A concept is a general idea or understanding of something, formed by combining specific instances or observations into a broader category.

Question: Teaching profession has social functions?

Answer: Yes, the teaching profession fulfills social functions by educating individuals, promoting societal values, and fostering community development.

Question: Why feedback is important?

Answer: Feedback is important because it helps learners understand their progress, identify areas for improvement, and refine their skills or knowledge.

Question: What is the purpose of curriculum guidance?

Answer: Curriculum guidance provides direction on what to teach, ensuring that educational content aligns with standards and objectives for student learning.

Question: Three considerations in IEP

Answer:

1. Student's current performance level
2. Specific learning goals

3. Necessary accommodations and support

Question: What is the first step of the task analysis model?

Answer: The first step of task analysis is identifying the task or skill to be analyzed and defining the desired outcome.

Question: Why is it necessary to focus on content and process while planning?

Answer: Focusing on both content and process ensures that students not only learn the material but also develop the skills to understand and apply it effectively.

Question: Write five skills that future teachers need to learn to become professional teachers

Answer:

1. Classroom management
2. Assessment strategies
3. Differentiation techniques
4. Technological proficiency
5. Reflective practice

Question: Why prevent unqualified teachers?

Answer: Preventing unqualified teachers ensures high-quality education, protecting students from ineffective teaching and fostering a productive learning environment.

Question: What is brainstorming?

Answer: Brainstorming is a creative problem-solving technique where individuals or groups generate ideas freely to find solutions or explore new concepts.

Question: Difference between instructional and curriculum planning

Answer: Instructional planning focuses on day-to-day teaching methods, while curriculum planning is the broader design of content and learning goals over time.

Question: Discuss learners learn best by working alone

Answer: Some learners may benefit from working alone as it allows for self-paced learning and concentration, but collaborative activities can enhance understanding through peer interaction.

Question: How elaboration is different from maintenance rehearsal

Answer: Elaboration involves connecting new information with existing knowledge for deeper understanding, while maintenance rehearsal involves simple repetition to retain information.

Question: Analysis level of teaching

Answer: The analysis level in teaching involves breaking down concepts into components and understanding relationships between them, often through higher-order questioning.

Question: Incentives for teachers

Answer: Incentives for teachers include salary raises, professional development opportunities, recognition, and improved working conditions to motivate and retain skilled educators.

Question: Why is image important to our memory?

Answer: Images enhance memory by creating vivid visual representations, making information easier to recall and relate to.

Question: Interpersonal knowledge

Answer: Interpersonal knowledge refers to the understanding of how to interact effectively with others, fostering communication, collaboration, and social skills.

Question: What is Observational Learning?

Answer: Observational learning is acquiring knowledge or skills by watching others perform tasks or behaviors, often leading to imitation.

Question: Give Example of Inductive Mode of Learning.

Answer: An example of inductive learning is when students observe multiple examples of plants that grow in sunlight and then conclude that sunlight is essential for plant growth.

Question: Give Questioning Cues of Application Level.

Answer: Application level cues include: "How would you use...?", "Can you apply this concept to...?", and "In what ways can this be implemented in real life?"

Question: What is Synthesis Level with Example?

Answer: Synthesis level involves combining elements to form a new whole or create something new. An example is writing a research paper that integrates different sources of information to develop a new argument.

Question: Can there be Professional Growth without Reflection? Discuss.

Answer: Professional growth without reflection is limited because reflection allows individuals to evaluate their experiences, identify strengths and weaknesses, and make informed improvements to their practice.

Question: What are Forms of Content?

Answer: Forms of content include facts, concepts, procedures, principles, and processes, each representing different ways of organizing and delivering knowledge.

Question: What is Actiqious Knowledge in Classroom?

Answer: Actiqious knowledge may refer to tacit knowledge, which is unspoken, experiential knowledge gained through practice, often shared through interaction rather than direct instruction.

Question: What are Planning for Introduction?

Answer: Planning for introduction involves setting clear learning objectives, establishing relevance, engaging students' prior knowledge, and creating curiosity to introduce a new topic effectively.

Question: What are Teachers' Assumptions in Learning?

Answer: Teachers often assume that students are motivated to learn, can build on prior knowledge, and benefit from a structured learning environment.

Question: Planning Curriculum?

Answer: Planning curriculum involves designing the overall structure of a course or subject, aligning content with learning goals, assessments, and instructional methods to ensure coherence and effectiveness.
