Midterm preparation file 2024

SHORT & LONG VERY IMPORTANT QUESTION

LINGUIST STUDY ZONE

OBJECTIVE

- ❖ English for Specific Purposes (**ESP**).
- ❖ internationally with multinationals and **TNCs**,
- ❖ English Language Teaching (**ELT**)
- ❖ **EST** (English for Science and Technology).
- ❖ The differences in **written and spoken language**.
- ❖ The difference between the language of **commerce** and the language of engineering.
- ❖ The development and growth of **ESP** started in **1960s** and has undergone five main phases of development:
 - ❖ Skills: **Four areas** have always stood out in management: **planning, leading, organizing and controlling**.
- ❖ **EMP** (English for Medical Purposes)
- ❖ **EST** (English for Science and Technology)
- ❖ **EBE** (English for Business and Economics)
- ❖ **ESS** (English for Social Sciences)
- ❖ **ERPP** (English for Research Publication Purposes)
- ❖ **EAP** (English for Academic Purposes)
- ❖ **EGAP** (English for General Academic Purposes)
- ❖ **EGP** (English for General Purposes)

- ❖ **EAL** (English as an Additional Language)
- ❖ **ESAP** (English for Visual Arts Study)
- ❖ **EOP** (English for Occupational Purposes)
- ❖ **EVP** (English for Vocational Purposes)
- ❖ **VESL** (Vocational English as a Second Language)
- ❖ **(ESBP)** English for Specific Business Purpose
- ❖ **(EGBP)** English for General Business Purposes
- ❖ **EST** (English for Science and Technology)
- ❖ **EBE** (English for Business and Economics)
- ❖ **ESS** (English for Social Sciences).
- ❖ for Academic Purposes (**EAP**)
- ❖ Vocational Purposes (**EVP**)
- ❖ **VESL** (Vocational English as a Second Language).
- ❖ In the context of bussiness english teaching training is ,,,,,,, job oriented
- ❖ **Millions** of people use **English** for their business activities.
- ❖ **learning English** in order to move into a new job or for a **specific** purpose.
- ❖ Business English, the relationship can be more **symbiotic**
- ❖ Training is job-oriented, while teaching is **person-oriented**.
- ❖ **English** as a **lingua franca** by almost all nations of the world.
- ❖ **Hymes** in the 1960s, **Canale and Swain** in the **70s**, and Bachman and Palmer in the **80s**.
- ❖ **Lexical** (nouns, verbs, adjectives, adverbs)
- ❖ **Functional words** (determiners, pronouns, modals, prepositions, coordinators)
- ❖ **Inserts** (yeah, well, ouch)
- ❖ **Multi-words**: sentence headers
- ❖ **Phrasal words**: start off, bring up
- ❖ **Collocations**: small print, black and white. They collocate with words as well as adjectives.
- ❖ Bc has to be seen as an approach not a product since bussiness communication is not the teaching of a**particular**
- ❖ Which of the following is used to discribe how people interact with each other with context .
discourse
- ❖ following the factor / that helps a culture become what is it **all of the given**
- ❖ The oldest of teaching english and other language is **Method grammer translation.**
- ❖ In bussiness world english become the accepted..... **Language and non native worker** students. **International** .
- ❖ Grammer is the rules and conventions of a language shared by a group of **native**
- ❖ Which of the following holds the most important place in the modern work place?
Communication
- ❖ In task based learning a form of communicative language teaching focus on how learning takes place . **strong**
- ❖ **Scientific education** and development of the worker.
- ❖ **Leadership** is not a new concept.
- ❖ **Management** science is an **evolving** field.
- ❖ hypothesis and experiment (**OHE**).
- ❖ **NLP** (Neuro-Linguistic Programming),

- ❖ Business English (BE)
- ❖ General English (GE)
- ❖ communicative language teaching (CLT),
- ❖ **Face validity** is to be credible to the learner,
- ❖ **CEF** (Common European Framework)
- ❖ **ACTFL** (American Council for the Teaching of Foreign Languages).
- ❖ **Idioms**: 'We've missed the boat', 'pulling someone's leg'
- ❖ **Colligation**: Words occur in particular grammatical patterns, e.g. letter of application, letter of complaint, but not market of Europe, or market of France.
- ❖ **Discourse competence**, on the other and, deals with language in use, although it is important to note that the word discourse can be used in a variety of ways by language professionals.
- ❖ **Linguistic competence** deals with elements of language at a basic level, and tends to focus on
- ❖ **language out of context**, focusing on isolated chunks of language.
- ❖ They are graded courses and affect students **CGPA**.
- ❖ **Delegating tasks** involves appropriate communication to delegate tasks by explaining tasks, listening for reservations, concerns and feedback, getting their agreement and commitment, sharing feedback on **delegated**.
- ❖ Business Communication teaching is not **different** in kind from any other form of language teaching.
- ❖ In an 'in company teaching context', the teacher mostly uses **company's material for best results**.
- ❖ Which of the following represents the main building blocks of functional meaning in language? **vocabulary**.
- ❖ The example /s of content words is/are **all of the given**
- ❖ In the context of business English teaching, training is **Oriented job**
- ❖ Which of the following holds the most important place in the modern work place.
Communication
- ❖ **Management Skills**: Four areas have always stood out in management: planning, leading, organizing and controlling.
- ❖ **Communication** takes an important place in the modern workplace.
- ❖ **Dudley Evans and John's (2000)**, definition for English for specific Purposes,
- ❖ **three** key components in particular: linguistic competence, discourse competence, and intercultural competence.
- ❖ **English** is a necessary part of their jobs,
- ❖ The language needs of different groups are **different**.

What is Business Communication?

The communication which takes place at the workplace, in the educational setting, corporate office, or in a government job is called business communication and is basically carried out in the English language. It is taught under various names Business English and Business Communication or Business Communication Workshop. We will be using the terms Business Communication and Business English interchangeably during the course of these lectures.

Communication takes an important place in the modern workplace. Business companies and government departments have to carry out internal communication and external communication. The

globalized nature of modern businesses makes it imperative to communicate internationally with multinationals and TNCs, for various purposes like selling, persuading, negotiating, informing and presenting. So a successful business today, depends for its success on individuals who are good and effective communicators. The teaching of business English has therefore attracted increasing interest and awareness in the last two or three decades. As the realization about its importance grows, business English course books and other teaching and learning materials are proliferating and almost all the undergraduates who study business, trade, finance, IT, commerce engineering, or medicine have to take some courses in business English communication. The term Business English/Communication is used to cover the English taught to a wide range of in-service, professional people, and pre-service students in full-time educational programs preparing for a business career.

Origin of Business Communication?

The teaching of business communication is not a coherent movement but grew out of the converging of a number of trends, which are as follows:

- a. The post WW-II world has been dominated by two trends the importance of commerce and Technology, which generated the demand for a unifying language and because of various factors, one being the power of the USA, this role fell to English. As English became the accepted international language, non-native workers and students needed it for functional and academic purposes.
- b. Oil crisis of 1970s resulted in a massive flow of funds and Western expertise into the oil-rich countries. English language became a big business and commercial pressures began to exert their influence, and demand on the English teaching profession for cost effective courses.

The differences in written and spoken language.?

- 1.The difference between the language of commerce and the language of engineering.
- 2The language needs of different groups are different.
3. Developments in educational psychology also influenced the rise of ESP, by focusing on the learner, and by emphasizing the central importance of the learners and their attitude towards language. Learners were seen to have different needs and interests, which influenced their motivation and effectiveness of learning and the need to develop courses in which relevance to the needs and demands of the learners were kept paramount. The assumption underlying of this was that the clear relevance of the English course to their needs would improve the learners' motivation and thereby make learning better and faster.

Communication in social discussions and listening.

The professional content provides a theme or setting related to professional functions, such as Marketing, or financial dealings. Business English teaching needs contexts to develop language .Knowledge and communication skills of learners. If the theme is marketing, then the purpose is to use the Content to activate learning, not to teach about marketing which is the job of the management consultant

Management Skills: Four areas

Management: planning, leading.

Organizing and controlling. Leadership and 10 of 211ls of management skills and they Require effective communication skills.

Cultural Awareness: Culture defined as a set of shared values can be seen at the level of a

Company, department and a team. Shared values are an important factor in enhancing the togethernes.

EGBP) English for General Business Purposes: targets those learners who have lack of working experience (pre-experienced or low-experience)

EMP (English for Medical Purposes)

EST (English for Science and Technology)

EBE (English for Business and Economics)

ESS (English for Social Sciences)

ERPP (English for Research Publication Purposes)

EAP (English for Academic Purposes)

EGAP (English for General Academic Purposes)

EGP (English for General Purposes)

EAL (English as an Additional Language)

ESAP (English for Visual Arts Study)

EOP (English for Occupational Purposes)

EVP (English for Vocational Purposes)

VESL (Vocational English as a Second Language)

Language in Context

The language of business English includes what some people might call everyday English. But if it is used by a business person within a business context, it becomes business English. So the exchanges might be a business person visiting a supplier's factory, and they might be between two colleagues discussing an important deadline.

But some groups of people use language in other ways too, ways that are not as familiar outsiders. They use specialist words to make communication, within the group, easier and more efficient Every profession does this (indeed, one defining feature of a profession is that it has its own linguistic identity). People use specific language to communicate in specific contexts. Business communities are not different. Accountants use the language of accounting (specific lexis) to talk about accounting matters (specific context). Sales engineers use specific language to discuss their product specifications

with their customers. These are both business communities, but they probably wouldn't understand each other's specialist vocabulary. English for Specific Purposes (ESP) is a term often used to describe language that is inaccessible to people who are not members of a particular language community.

Words can be divided into three types:

1. Lexical (nouns, verbs, adjectives, adverbs)

2. Functional words (determiners, pronouns, modals, prepositions, coordinators)

3. Inserts (yeah, well, ouch)

4. Multi-words: sentence headers

5. Phrasal words: start off, bring up

6. Collocations: small print, black and white. They collocate with words as well as adjectives.

7. Idioms: "We've missed the boat", 'pulling someone's leg'

8. Colligation: Words occur in particular grammatical patterns, e.g. letter of application, letter of complaint, but not market of Europe, or market of France, etc.

Discourse Competence

Linguistic competence deals with elements of language at a basic level, and tends to focus on Language out of context, focusing on isolated chunks of language. Discourse competence, on the other Hand, deals with language in use, although it is important to note that the word discourse can be used in a Variety of ways by language professionals.

Intercultural Competence

The Business Communication learner will have to be familiarized to the intercultural aspect of communication. In the globalized world of today where international education, business and tourism has been made easier through cheaper and faster means of communication, there is need for the business communicator to be culturally sensitive. Businesses are carried out with multinational companies and TNCs. At the computer interface as well, culturally sensitive language is required. Culture has to do with attitudes, behaviors, beliefs, and values. It is influenced by a multitude of factors including environment society, gender, family, age, and ethics. It is learned, not inherited through genes. It manifests itself in interaction between people, and is continually changing. Some cultural differences are superficial, and are relatively simple to deal with. It is easy to see that people may dress or eat differently, for example cultural differences are not always so obvious. The iceberg model is often used to demonstrate how much of culture is hidden. Like an iceberg with most of its bulk unseen below the surface of the water, these hidden aspects can cause problems if we are not aware of them and don't know how to deal with them.

Communicative Language Teaching

Teachers have used models of real-world communication and perspectives on society to inform what happens in the classroom. The theorists' emphasis on communication has led to a widespread enthusiasm for the approach known as communicative language teaching (CLT), which aims to develop

learners' ability to use language to communicate. CLT is not a precise term and can mean different things to different people. However, there are some underlying principles commonly shared. First of all, language is seen not just as a set of linguistic items to be learned, like words or grammar, but it also involves language in use via functions such as interrupting, or agreeing and disagreeing (functions are ways of describing what a speaker is trying to achieve at each stage in a communication activity). When considering functions, we are focusing on how we use a language, as opposed to what we know about a language. Another key aspect of CLT is that languages are learned while using them,.

Q. in which business English what is the first thing that make the English distinctive ?

The distinction between general and business English is not so clear. Although the objectives of both are the same, that is, developing the accuracy, fluency and effectiveness of the target language in the students; however, the context is different. In general English, one learns the basics, the mechanics of grammar, composition and vocabulary. In business English you build upon what you learned in general English, focusing on business situations, which require clarity, logic and presentation styles that are dominant in business communication.

Q. Briefly describe the two components of Business English course.

The two components of a Business English course are language knowledge which reflect the formal aspects of grammar, vocabulary and sound system and communication skills in which we activate this knowledge to transmit messages through different channels, for example, oral channels like presentations, meetings, telephoning or in written documents such as letters and reports.

Q. 2 dominant trends of WW.

The importance of commerce and technology, which generated the demand for a unifying language and because of various factors, one being the power of the USA, this role fell to English. As English became the accepted international language, non-native workers and students needed it for functional and academic purposes.

Q. Phase 1 of development business communication.

The Concept of Special Language: Register Analysis. In 1960s and early 1970s, the basic principle was that each field has its own particular register. Specific registers were to be analyzed to identify their grammatical and lexical features to be used in teaching materials. The aim was to make the syllabus as relevant as possible to learners' needs, giving high priority to language forms that students were likely to meet in Science studies. However, there was very little that was distinctive in the sentence grammar of

Science English, except a tendency to favor certain grammatical forms, like the simple present tense, passive voice and nominal compounds. This meant that there was nothing which was not present in General English (Ewer and Latorre 1969).

Q. Phase 2 developments in BC?

Rhetorical or Discourse Analysis. In this phase, attention was given to language above the sentence level, how sentences were combined in discourse to produce meaning. The aim was to identify organizational patterns in texts, to specify the linguistic means by which these patterns were signaled, and used to make the ESP syllabus.

Q. What is BC?

Business communication teaching, like all ESP teaching, then is an approach to language teaching in which all decisions as to content and method are based on the learner's reason for learning. Dudley Evans and John's (2000), definition for English for specific Purposes, can be applied to BC teaching as well. They say that it is related to specific disciplines, and is designed to meet specific needs of the learner. The tree of ELT has shown that all language teaching is primarily concerned with communication and learning. So, BC should be seen not as a particular language product but as an approach to language teaching which is directed by specific and apparent reasons for learning.

Q. Pre-experienced learner?

A Pre-experienced learner, with no experience of the world, who is learning Business English to follow a business career; a university student, or even a secondary school student. Because of their lack of experience they would often need the teacher to provide a window on the business world.

Q. First way to be learnt in the BC course

Firstly, business people do a variety of things with language; they socialize, predict, analyze, negotiate, buy, write, persuade, compromise, telephone, compete, market, sell, produce, interview, train, travel, plan, investigate, deal, advertise, explain - the list is endless. These are done in a specific business context, and for business aims. But skill in using business English is not limited to the words and the language used. Presenters use certain techniques to get their message across as do negotiators and telephone operators. Business English users need to know the words, but they also need the skills in order to do their job. So business English is used together with business communication skills.

Q. task based learning approach .

The task-based approach aims at providing opportunities for learners to experiment with and explore both spoken and written language through learning activities which are designed to engage learners in the authentic, practical and functional use of language for meaningful purposes. Learners are encouraged to activate and use whatever language they already have in the process of completing a task. The use of tasks will also give a clear and purposeful context for the teaching and learning of grammar and other language features as well as skills. Taskbased learning stimulates a natural desire in learners to improve their language competence by challenging them to complete meaningful tasks.

Q. 3 roles of a business teacher

At one end of the continuum are courses which focus on language teaching (focusing on language development within a framework of business oriented vocabulary). On the other end, programs which combine content, language and communication to develop learners' language knowledge and communication skills. The BC teacher is not a management, financial expert but rather a knowledgeable generalist, able to tap into learner's expertise and use it as a resource in the development of the course. For a course for finance managers who need to develop their language knowledge and communication skills for handling communication and exchanges on professional matters, the content may include balance sheets and profit and loss statements.

Q. enlists 5 skills a manager should have.....5

Planning

Organizing

CommandinG

Coordinating Controlling

Q. What are the key issues of management which a business teacher must be aware?

The structure of business organizations, the hierarchy, and working are areas about which the business English teacher should know. It is also useful for the business communication teacher to know something about the key issues which managers and their teams have to face, which depend on the functions which it has to perform.

The following areas are helpful starting points to explore different management interests and concerns:

General Management

Administration

Customer Service

Distribution Finance

Q. Specialist----non-specialist/Non-specialist---Specialist

To be effective, today's multi-faceted manager needs to be able to operate in own team and multi-disciplinary workgroups and contexts, needs business vocabulary of own area but others as well.

Q. Generalist---- Generalist

Wider context in which professionals communicate outside the strict confines of corporate offices and board rooms. Successful business depends on successful relationships. So the social side of business communication must not be ignored – the ability to converse about economic, social, environment and personal issues. This requires its own set of vocabulary. So besides context-driven and topic driven vocabulary, there is need for general purpose vocabulary. Long lists might be daunting for the learner, so should be served in reasonable chunks.

Q. communication skills in Business.

General English courses tend to develop the accuracy as well as effectiveness of communication in learners. Factors which influence effectiveness are: impact of delivery, variety of media, and conciseness of communication, but there are no absolute rules of effectiveness which can be measured. They include behavioral features, gestures, eye contact, use of local variety, etc.

So we have listed the objectives – accuracy, fluency and effectiveness of Business Communication and these require different knowledge and skills. We will look in more detail at the professional communication skills listed below. All learners will agree that these skills are central to the communication of today's business profession. And many trainees will see the usefulness of attending BC courses to improve these skills

Q. Delegation and communication

At the core of delegation are what to delegate and to whom. However the conceptual elements involved in what and who to delegate to need to be matched by communication skills if the delegation itself is to be effectively communicated. For the business English teacher, it is useful to note the importance attributed to delegation in large organizations, and to think about the skills required to communicate the delegation and to ensure the feedback system for information is well carried out. Effective

communication is central to the process involved in explaining the tasks to the people to whom you are delegating, understanding their reservations and concerns, getting their agreement and commitment and sharing feedback on the progress of delegated tasks.

Q. Define team building

Team building involves the combining and integrating the talents, skills and energies of individual employees to solve problems and achieve goals and objectives which might be difficult or impossible to achieve by management and individual efforts alone.

Q. Enlist the 5 factors involved in delegation

1. Policy,
2. Organization,
3. Procedures and techniques,
4. Technology and leadership,
5. Effectiveness and motivation

Q. explain need analysis

Needs analysis, carried out to establish the “what” and the “how” of a course, is the first stage in Business Communication course development, followed by curriculum design, materials selection, methodology, assessment, and evaluation. However, these stages should not be seen as separate, but as proceeding in a linear fashion. They come at the pre-course stage. The teacher needs to know the needs of the learners so that the objectives of the course may be decided. Business English learners have more precisely defined needs than general English learners and these needs should be incorporated in the course objectives.

Q. Three element of need analysis?

The range of communication and language required in the learner’s present of future profession.
The current ability of the learner in terms of language and communication. The actual objective of the training program

Q. how much scopes English business communication?

General Language Knowledge
Specialist Language Knowledge
General Communication Skills

Professional Communication Skills

Q. Five ethical questions that should be consider.

1. Is all the information gathered really necessary?
2. Who has access to the information?
3. What will the department head be told about their employee?
4. Was the employee made aware of this at the time the data was collected?
5. Is the teacher competent enough to use this information in order to make decisions which could affect people's careers?

Q. How learning needs are analyzed...

Learning needs can be analyzed by using different tools to collect a series of snapshots which allow them to compare a target situation with the current situation, thus leading to a focused course. After gathering information through forms, questionnaires, interviews, observation tests etc. the teacher has to analyze learners' needs. The data acquired does not produce a sharply defined list of things to do, so it becomes more difficult as the course progresses. A needs analysis provides a series of snapshots which contribute to our understanding. It differentiates a General English course from ESP course and provides a justification for what happens during the course. It also provides provision for modifying the course as it progresses, and can be used for subsequent courses.

Q. What is a face-validity and authenticity of a placement test?

Face validity: Face validity is to be credible to the learner, if we give a grammar test to a learner who is interested to improve presentation skills, the prospective learner may start to question our judgment.

Authenticity: Tied with this is the question of authenticity, that the test should reflect the target language, and the way it is used (this is why a placement test should, ideally, follow the target situation analysis).

Q. what is diagnostic test.

Diagnostic tests are used where the intention is to diagnose any weaknesses. Sometimes, they may be specifically drawn up for the company or organization involved. The results can be checked against a list of proficiency or cando statements, such as those used by the CEF or ACTFL. Such tests are available to test the proficient, independent and basic user. They allow teachers to compare their subjects' current

communicative ability, target needs, and find the gap, to help in placing learners in the most appropriate group.

Q. Teacher needs under pedagogical needs?

Pedagogical needs, which exist as a result of the teaching situation based on three main aspects.

These are teacher's needs, needs of learning situation or the learning environment and learning needs or learning styles of learners. Teacher's Needs: What happens in the classroom is influenced to a very great extent by the trainer's own style, experience, and needs. An important part of a needs analysis depends on teachers' basic assumptions about teaching and learning. The BE teacher is basically a language expert, not a specialist in the core area, having experience in teaching general English. When teaching business English, the teacher has to adapt his/her learning style, and use strategies which can be passed on to learners. Being a reflective practitioner and having self-knowledge about own learning style is important. Teachers' role can be of trainer, coach and consultant.

Q. What do you know about Nuero linguistic program?

Learning styles are related to NLP (Neuro-Linguistic Programming), which is a collection of techniques, models, and theories based on how the mind works and how people behave and communicate. NLP has been useful to some business English teachers because of the insight it gives into various communication skills such as building rapport, non-verbal communication, Active listening, and so on, but it can also help our learners understand how they perceive the world, and what affects that perception.

Q. Difference between left brain and right brain learner .

Learning success depends on a number of factors. There are a number of different ways to look at learning styles. One is based on the findings of research into brain function, that the right and left sides of the brain play different roles in how we process information. Depending on which side of their brain is dominant, there are the 'left-brain' learners who tend to analyze, and to be logical and objective. They may prefer traditional lectures, reading, and clearly structured classroom activities and 'Right-brain' learners tend to be more impulsive and informal, and may appreciate the use of graphics and role-play activities to enhance their learning.

Q. Enlist any five types of intelligence as suggested by Howard Gardner.

1. Bodily-Kina-esthetic,
2. Intrapersonal,

3. Interpersonal,
4. Verbal-Linguistic,
5. Logical-Mathematical

Q. Why understanding of business needs is important-

Understanding business needs is of critical importance for a BE teacher. A provider of language training must consider the needs of the sponsor, who may be a company, or a head of department, or the HR (Human Resources) manager. All of these have certain perspectives on what the learners will need to cover on a course. It is important to make it clear to sponsors and heads that their needs are recognized and will be addressed, while remaining realistic about what is promised. Businesses are interested in getting something worthwhile for their money. A company pays for training or an institution hires a teacher because it feels that the investment will lead to some sort of profit, be it more motivated workers, more effective negotiators, better presenters, managers, or high achieving students.

Q. measureable objectives

Measureable objectives measure whether objectives are met or not. They establish concrete criteria for measuring progress toward the attainment of each objective you set. When you measure your progress, you stay on track, reach your target dates, and experience the feeling of achievement that drives you on to continued effort required to reach your objective. To determine if your objective is measurable, ask questions such how much? How many? How will I know when it is accomplished? If the objective is measurable, it means that the measurement source is identified and we are able to track the actions as we progress towards the objective.

Q. time bound objective .

Time-bound Objectives are concerned with timely completion: When do you want to achieve the set objectives? When will we accomplish/ complete this objective? In the objective somewhere, there has to be a date (Day/Month/Year) for when the task has to be started (if it's ongoing) and/or completed (if it's short term or project related). Time-bound means setting deadlines for the achievement of the objective. Deadlines need to be both achievable and realistic. If you don't set a time, you will reduce the motivation and urgency required to execute the tasks. Agreed time frames create the necessary urgency and prompts action.

Q. When syllabus is negotiated?

Teachers should be aware that adult learners want their learning to be relevant to them, pay attention to things that will benefit them, learn best when they know why they should learn, and find it easier to learn when you start with what they know before moving to the unknown and when you move from simple to complex. As a result, the syllabus is usually negotiated with the students and the organization. By discussing these issues with them, the main priorities can be decided together, you can identify what activities could be done to foster learner autonomy, you can agree on how progress will be assessed and how you will be giving feedback. The syllabus states the actions to be taken in order to achieve the aims and objectives. It lists what is to be covered during the course and states an order.

Q. Write down the Components in the syllabus which are important

Dealing with numbers and figures

Describing trends

Corporate finance vocabulary

Understanding and producing financial reports Giving

Task based Learning

The task-based approach aims at providing opportunities for learners to experiment with and explore both spoken and written language through learning activities which are designed to engage learners in the authentic, practical and functional use of language for meaningful purposes. Learners are encouraged to activate and use whatever language they already have in the process of completing a task. The use of tasks will also give a clear and purposeful context for the teaching and learning of grammar and other language features as well as skills. Task-based learning stimulates a natural desire in learners to improve their language competence by challenging them to complete meaningful tasks.

Scientific Management: (Taylor 1856-1915) is based on the following principles:

Management as a science, best method Scientific selection of workers, so that each worker would be given responsibility for which he/she is best suited .Scientific education and development of the worker Intimate, friendly relations between the worker and management

2. Classical Organization Theory (Henri Fayol 1841-1925) is based on the recognition of the human factor in management and on managerial behavior. He believed that management is not an inborn talent but a learnt skill.

He divided business operations into six interdependent and related functional areas:

Technical

Commercial

Financial

Security

Accounting

Managerial

These skills are:

Planning

Organizing

Commanding

Coordinating

Controlling

The following areas are helpful starting points to explore different management interests and concerns:

General Management

Administration

Customer Service

Distribution

Finance

Legal

Personnel

Production

Marketing

Purchasing

Research and development

Sales

The Business

Vocabulary represents the main building blocks of functional meaning in language.

Business English has its own vocabulary shown as the following:

Specialist Specialist

Specialist—non-specialist

Non-specialist Specialist

Generalist Generalist

The scope of Business English has been summarized as developing language knowledge and communication skills:

General Language Knowledge

Specialist Language Knowledge

General Communication Skills

Professional Communication Skills

Necessities:

We call necessities the type of need determined by the demands of the target situation. Necessities are needs determined by the target situation, what the learner has to know in order to function. Effectively in the target situation, e.g. a business person may need to understand business letters to communicate effectively at sales conferences, to get the necessary information from sales catalogues and so on. S/he will also need to know the linguistic features discorsal, functional, structural, and lexical- which are commonly used in the situations identified. To get this information is easy, i.e., by observing

These situations.

Lacks: You also need to know what the learner knows already, so that you can then decide which of the necessities the learner lacks. One target need would be to read texts in a particular subject area. Whether or not the learners need instruction in this will depend on how they can do it already. The target proficiency in other words needs to be matched against the existing proficiency of the learners. The gap Between the two can be referred to as the learner's lacks. Wants: So far we have looked at target needs objectively with no active role by the learners. But Learners too have a view of what their needs are their wants. We have stressed that it is the awareness of

Steps for designing a course of Business English helps your students bridge the English skills gap.

Identify students' needs.

Define program goals and objectives of the instruction.

Syllabus design.

Identify topics, themes, situations,

Design learning activities and tasks.

Define types of assessments. Select suitable material.

Course delivery.

Program evaluation.

Using a Grid

A useful technique is to use a grid or framework in making a syllabus. A grid or framework sets out the aims and objectives, followed by all the elements that we believe are necessary for someone to be able to meet those objectives. The main components of this framework are based on the competencies identified as: Linguistic competence (Language based), Discourse competence (identification of possible discourse learners will encounter, specialist knowledge) and Intercultural competence (communication. Needs in international business/educational environment). Grammar (e.g. tenses, word order, verb patterns, relative clauses) Lexis (e.g. vocabulary, idioms, expressions, collocations) Pronunciation (e.g. intonation, rhythm, stress, chunking)

Reading Skills

Reading is a process in which readers combine information from a text with their background knowledge to build meaning. Teaching objectives focus on strategic reading and fluent reading. Various principles of teaching reading skills can be used. Exploiting learners' background knowledge includes all experiences learner brings to understand the text. These include life experiences, education, knowledge of how texts work, knowledge of first language and second language working and culture.

Writing Skills

Writing can be said to be a series of the following contrasts:

It is a physical as well as mental act the physical act of committing words to some medium as Well as a mental act of inventing ideas, thinking about how to express them, and organizing them into Statements and paragraphs. Purpose to express and impress – In writing, we serve two masters, themselves And their own desire to express themselves and readers also called the audience. Both a process and a product The writer imagines, writes, rewrites, organizes, drafts and so on. The process of writing is cyclic. Ultimately, what the audience sees whether it is the teacher, thInstructor or a wider audience is the product a letter, a report, a dissertation.

Principles for teaching writing:

Understand your students' reasons for writing.

Provide opportunities for students to write.

Make feedback helpful and meaningful.

Clarify evaluation criteria.

Techniques for teaching writing skill

Word mapping, and quick writing. Writing

Listening Skills

Listening effectively is crucial to communication. No communication can take place if messages are not heard. Listening is a receptive skill which is as important as speaking. Listening is a conscious selective process, unlike hearing which is involuntary, depends on non-verbal signals. It is a taught behavior. Untrained people hear only 25% time. Listening effectively is crucial to communication. No communication can take place if messages are not heard. Collaboration demands that all voices be heard.

There are various barriers to listening, which the Business English teacher should be aware of:

Physical barriers

Psychological barriers

Language problems

Non-verbal distractions

Multitasking

Focusing on your own response

Preconceived notions

Interrupting the speaker

Noise

Unfamiliar words

Keys to effective listening:

Stop what you are doing.

Do not talk

Make eye contact

Take notes

Be objective

Ask questions

Control your reactions

Principles for teaching listening are as follows:

Expose students to different ways of processing information

“Bottom-up versus top-down”

Expose students to different types of listening

What they listen for Specific information

Global of gist: main ideas

Inference: implied meaning

Teach a variety of tasks:

Tasks which can be done as they listen

Task should not be too demanding

Avoiding tasks which demand too much production

Organization

Successful technical communication must be well organized. If the text rambles the reader will not be able to follow the meaning of the text. Organization can be done in various ways. Spatial organization is used to describe something as it appears. It helps the reader to visualize, envision a place or a piece of equipment. It might describe something from left to right, top to bottom, inside out or by giving directions (east, west, north, and south) to understand the physical qualities of the subject matter.

Text might be organized by placement of important information. The location of information is important. Important information will be missed if it is buried in a long text. It should be preferably in the first 1/3 of page, which is at eye level. The same holds for bullet points which are used to organize information. Only the first few would get the attention of the reader. Placing of important points first helps the reader to retrieve crucial information.

Accuracy

Accuracy in technical communication refers to grammatical and contextual correctness. If your communication is clear and concise, but incorrect, it will mislead the audience and destroy your credibility. To be effective it must be accurate. If it contains errors, it will make the writer look incompetent.

The most effective way to achieve accuracy is to proofread your writing. The following guidelines are useful:

Get someone else to read the text

Use gestation approach

Read backwards

Read one line at a time, or print it out

Use dictionary Guidelines:

Read long words syllable by syllable

Use technology

Check figures, scientific and technical abbreviations,

Read aloud

Try scattershot proofreading

The Listener

Prefers trainee talks more than the trainer.

Wants trainee to be self-directed and autonomous.

Appears relaxed and unhurried.

The Director:

Takes charge, gives directions, and appears self-confident.

Is well organized, tells students what to do.

Is final judge of everything

The Interpreter:

Separates self from learners and observes.

Uses theory as a foundation.

Presents well-constructed interpretations.

The Coach:

Allows learners to evaluate their own progress.

Involves trainees in discussions,

Draws on the strengths of the group.

Uses trainees as a resource.

The Consultant:

Is an expert.

Is bought in to give advice, analyze, and carry out assessment of courses.

See whether objectives are met are not.

Metacognitive Strategies:

Planning: Previewing paying attention main ideas, seeking

Monitoring: Self-checking one's comprehension

Evaluating: Developing ability to evaluating own task

Cognitive Strategies:

Summarizing: Main idea

Induction: Figuring out rules samples

Imagery: Visualize

Auditory representation: Repeating words

Making inference: Guess meaning

Using resources: Ability to use reference material

Grouping: Classifying words, concepts

Note-taking: Writing key words, concepts

Elaborating prior knowledge: Relating

Social/Affective Strategies:

Cooperating: Learning how to work with peers

Clarifying: Asking questions.

Self-talk: Reducing anxiety by talking positively to oneself

As educators we are familiar with categorization of learners according to the following categories of

Perceptual learners:

Auditory Learners

Visual Learners

Tactile Learners

Kinesthetic Learners

Presentations:

Opening a presentation

Linking ideas in presentations

Delivering effectively to an international audience, in terms of tempo, volume, visual

Aids, etc.

Summarizing and concluding a presentation Meetings:

Chairing a meeting

Controlling a meeting

Inviting contributions to a meeting
