

Q.1 Which type of plastid is the largest among the three subtypes of leucoplasts?

- A. Amyloplasts
- B. Proteinoplasts
- C. Gerontoplasts
- D. Elaioplasts

Q.2 During which phase of interphase does the cell duplicate its DNA in its nucleus?

- A. G1
- B. G2
- C. M
- D. S

Q.3 Choose the correct option that represents the stage of mitosis in the below given diagram of an animal cell?

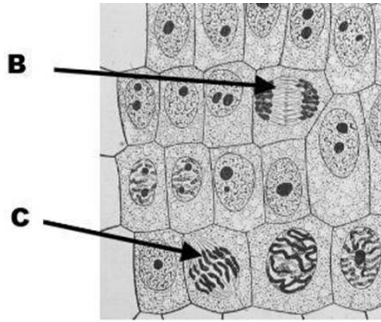

- A. Telophase
- B. Anaphase
- C. Metaphase
- D. Prophase

Q.4 What is the main function of leucoplasts?

- A. Protein synthesis
- B. Storage of lipids, starch, and proteins
- C. Photosynthesis
- D. Synthesis of pigments

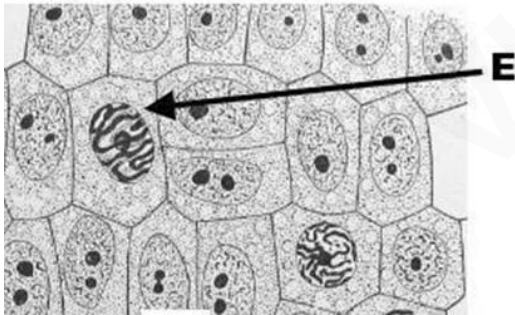

Q.5 The diagram below represents plant meristem tissue, where cells are undergoing different stages of mitosis. Choose the correct option that is true with reference to cell 'B' and 'C' respectively?

- A. Telophase, Anaphase
- B. Metaphase, Prophase
- C. Telophase, Metaphase
- D. Metaphase, Anaphase

Q.6 The diagram given below represents a plant tissue. Identify the correct stage of mitosis going on in the cell labelled as 'E'?

- A. Telophase
- B. Metaphase
- C. Prophase
- D. Anaphase

Q.7 To perform experiment of squash preparation of onion roots, for how many minimum numbers of hours should the onion base be submerged in water?

- A. 36
- B. 48
- C. 24
- D. 12

Q.8 What is the main characteristic of gerontoplasts?

- A. They are non-pigmented plastids
- B. They store lipids, starch, and proteins
- C. They are responsible for protein synthesis
- D. They are chloroplasts going through the aging process

Q.9 Which of the following statement truly represents the cytokinesis?

- A. The cytoplasm of the cell is split in two, making two new cells
 - B. The cell makes more proteins and organelles
 - C. The cell duplicates its DNA
 - D. The cell increases in size physically and copies organelles
-

Q.10 What is the purpose of the mitotic phase?

- A. The cell divides its copied DNA and cytoplasm to make two new cells
 - B. The cell makes more proteins and organelles
 - C. The cell increases in size physically and copies organelles
 - D. The cell duplicates its DNA
-
