Total 27 questionzz

22 were mcqzz and 5 long questionzz

3 questionz of 3 marxx and 2 question of 5 marxx

1. According to Kahneman, define the monetary intention with the example World trade centre? 3 marx
2. How you differentiate b/w the automatic and controlled process. Define criteria of the automaticity? 3 marx
3. Define these gestalt principles Closure, Good form, Symmetry with the help of example? 3 marx
4. How so far we can say the certain task required minimal concentration. Enlist at least your 4 daily life examplzz. And also pros and cons? 5 marx
5. Keep in mind Neural networks and define. Describe the nodes and its connection? 5 marx

## Cognitive Psychology 2017 Midterm

Psy504

1. Parts Of Neuron
2. Symmetry , Good Form, Proximity
3. Automaticity , Names Of 2 Psychologist Who Contributed Towards It
4. Gestalt Law Of Perception
5. Enduring Dispositions And Monetary .

### MCQs

Capacity Model , Gestalt Law Definition , Perception , Biederman's Sub-Obj , Automaticity , Technology Improved Vision And Hearing , Pattern Word , Pipe-Like , Adaptation Theory , Activatory Stimulus ,

Psy504 Current Midterm Paper

1. By Keeping In Mind The Experiments Aimed At Measuring Multimodal Theory, Explain What Were The Results Of Subsidiary Tasks? (3)
2. What Are The Main Problems With Template Matching Model? (3)
3. Does Parallel Distributed Processing Have Some Significance, Explain Your View Point. (3)
4. What Did Gopher And Kahneman (1971) Found About Flight Attendants And How? (5)
5. By Keeping In Mind The Neural Networks, Write Down What Do You Know About Nodes And Their Connections With Each Other? (5)
