Lecture: 23

Strategies to Maintain Discipline

- Creating a seating chart
- Assigning roles to advanced students
- Showing Respect
- Set classroom rules
- Establish routines
- Making groups

Lecture: 24

Dictogloss - a replacement for writing notes on chalkboard

- Students listen twice to a passage read at normal speed, taking notes during the second reading
- They then work with a partner to try to reconstruct the text.
- When a pair thinks they have the information, they write the passage on the board and the class works together to make it as close to the original as possible.
- The teacher makes the final connections and the students correct their work.

Motivating students

- Set the tone
- Supplementary Materials
- Ensure the students speak loud
- Adaptation of the material
- Use higher level students as assistant teachers or monitors

Lecture: 25

Procedures for behavioral record keeping

- Make checklists of the desired behavior
- Communicate with all stakeholders about the checklist

Setting benchmarks for behavioral expectations

Benchmarks are specific points of reference connected to levels of performance against which students are monitored.

Development of Benchmarks

- Benchmarking can be done for:
- Communication with teacher
- Communication with peers
- Interpersonal relationships
- Material safety
- Following rules

Behavioral portfolios can be maintained as a way to see a gradual and systematic development of student behaviors.

Portfolios can have:

- Records of behavioral progress
- Observation checklists of specific behavior
- Benchmarks that students achieve at the end of each term

Faculty professional development

Teachers get adequate training in classroom pedagogy but few training sessions are held for the behavioral development of students

Faculty training

Training must be imparted to teachers on:

a) Behavioral development of students at different age levels
b) Behavioral management
c) Classroom discipline
d) Positive reinforcement

Lecture: 26

Qualities that influence student success

- **Empathy** is extending help to students and showing concern towards them
- **Self-efficacy** is facilitated by a person's beliefs and expectations about his/her ability to achieve certain tasks successfully
- **Caring and Efficacy** - Both qualities affect students' sense of motivation, achievement and value

Vicarious learning

- Beliefs are often required through observation and interpretation.
- In observing the modeling behavior of others, the learner is able to reflect on past experiences with such behavior and make meaning of its relevance in a new situation.

Development of caring attitudes

- Show and prove that you care
- It is good to say "thank you" and "please" when we talk to students
- Give individual attention to students
- Listen to their problems sincerely
- Avoid using red pen-use green instead

Lecture: 27

Affective rules

In order to establish caring classroom, it is important to frame rules that are socially-emotionally driven.

Examples

- Be emotionally supportive
- Be helpful to peers
- Be respectful
- Do not shout
- Do not snatch or spoil the material

Cognitive-affective curriculum

- Embed affective objectives in the curriculum
- Spread the affective objectives evenly throughout the curriculum
- Assess students on affective elements of the curriculum as well

Lecture: 28

Teachers' attributes in teaching social skills

- **Social attractiveness**
  - A cheerful disposition
  - Friendliness
  - Emotional maturity
  - Sincerity
- **Ego strength**
  - Self-confidence that allows teachers to be claim in a crisis.
  - Active listeners without being defensive.
  - Avoidance of win-lose conflicts.
  - Problem solving orientation
- **Realistic perception of self and students**
- **Enjoyment of students' presence**

Pro-social activities

- Role taking exercises
- Intergroup dialogues
- Group discussion
- Jigsaw grouping
- Storytelling
- Self-awareness and self-regulation

Lecture: 29

Intrinsic Motivation

- Intrinsic motivation is a desire to attain targets for the sake of learning.
- The urge for a true desire for mastery is driven by intrinsic motivation.
- Students are rewarded for showing keen interest in the tasks
- An intrinsic motivated reward further put faith in students' ability

Extrinsic motivation occurs when a student is driven to perform behavior in order to win a reward or avoid a punishment

Problems in getting incentives

Despite teachers efforts to present lessons in creative ways, for some students mastering educational tasks may require a great deal of skill and instruction. Students may have problems in areas such as:

a) Motor coordination
b) Recognition of sounds and symbols
c) Sensory processing
d) Learning rules for social interaction
e) Controlling impulsive behaviors

Lecture: 30

Value of Reward Plans

A reward plan is prepared at the beginning of the school year and is clearly communicated to the students. A reward plan has three steps:

1. First, a teacher decides on one or more specific goals for a student.
2. The teacher spells out the goals concretely either on a chart or in conversation.
3. In discussing the reward plan, the teacher offers a modest reward for success in meeting goals.

Extrinsic Reward

- Money
- Grades
- Career
- Praise
- Exams

Intrinsic Reward

- Interest
- Curiosity
- Pride
- Sense of achievement

Reward Components

- Choose incentives
- Interpersonal rewards
- Ownership rewards
- Emphasis on positive behavior

Lecture: 31

Effective Behavioral Support (EBS) refers to a system of school-wide processes and individualized instruction designed to prevent and decrease problem behavior and to maintain appropriate behavior.

Processes of Effective Behavioral Support Systems (EBSS)

1. Clarify the need for effective behavioral support
2. Priority of this should be reflected in the school improvement plan
3. Develop a team focus with shared ownership

Features of Effective Behavioral Support Systems (EBSS)

- There is total staff commitment to managing behavior
- There should be clearly defined and communicated expectations
- Have an instructional component for teaching students self-control
- Prepare a support plan to address the needs of students

School Wide Code of Conduct

1. **Safety:** Are my actions safe for myself and for others?
2. **Respect:** Do my actions show respect for myself and for others?
3. **Honesty:** do my words and actions represent truth?
4. **Responsibility:** Do my actions meet the expectations to take care of myself
5. **Courtesy:** Do my actions help make this a nice place

Unified Discipline

Teachers and school personnel believe that:

a) Instruction can improve behavior
b) Behavioral instruction is part of teaching
c) Personalizing misbehavior makes matters worse
d) Emotional poise underlies discipline methods that work

Unified expectations: Consistent and fair expectations for behavioral instruction are a key to successful discipline plans.

Lecture: 32

Goals of School Discipline

1. To ensure the safety of staff and students
2. To create an environment conducive to learning

Why do Discipline Problems Arise?

Discipline problems arise because rules are:

- Unclear
- Perceived as unfairly or inconsistently enforced
- Students do not believe in rules
- Teacher-administration cooperation is poor
- Misconduct is ignored

Lecture: 33

Warm School Climate

A warm social climate, categorized by a concern for students as individuals, is typical of well-disciplined schools. Teachers and administrators should take interest in the:

- Personal goals
- Achievements
- Problems of students

Lecture: 34

Rewards in the Classroom - A reward is s desirable consequence of suitable behaviour, effort or achievement.

Penalties in the Classroom - Penalty is an undesirable consequence of inappropriate behaviour

Penalties might include:

- Reduction of grades
- Loss of privileges
- Referral to an administrator

Teacher Syndrome

Do not fall into the trap that imprisons many beginning teachers. Avoid the nice teacher syndrome. These teachers want their students to like them and thus give them unnecessary allowance. Thus disruptive behaviour is encouraged and sometimes becomes difficult to handle

Lecture: 35

Caution with Disciplining Students

1. Stay in control
2. Never over react
3. Never attack the personal worth of the individual
4. Keep your ego out when dealing with students disruptions

Lecture: 36

<u>Specific Discipline Programmes</u>

1) Reality Therapy

It involves teachers, helping students make positive choices by making clear the connection between student behaviour and consequences. Its features are:

- Class meetings
- Clearly communicated rules

2) Positive Approach to Discipline

This programme is grounded in teachers' respect for students and instilling in them a sense of responsibility. Components include:

- Developing and sharing clear rules
- Providing daily opportunities for success
- In-school suspension for noncompliant students

3) Transactional Analysis

Students with behaviour problems need to be analyzed within their particular contexts for the identification of issues.

4) Adlerian Approaches

It is an umbrella term for a variety of methods which emphasize understanding the individual's reason for maladaptive behaviour and helping misbehaving students to alter their behaviour.

5) Student Team Learning

Student Team Learning is a cooperative learning structure and is an instructional rather than a disciplinary strategy.

Lecture: 37

Bullying occurs when a person willfully and repeatedly exercises power over another with hostile or malicious intent.

Bullying includes:

- Insulting
- Humiliating
- Harassing
- Teasing
- Threatening
- Mobbing
- Abusing verbally & physically

Types of Bullying

1. Direct Bullying: is used when verbal and physical aggression is used to harm a student.
2. Indirect bullying includes:
   - Threats
   - Insults
   - Name calling

Consequences of Bullying

Students who are targeted by bullies face:

- Anxious
- Difficulty in concentrating on their school work
- Rate of absenteeism are higher

Lecture: 38

Ineffective Bullying Prevention programmes

1. Conflict resolution
2. Peer mediation strategies
3. Group therapy

Whole School Approach in Bullying Prevention

Bullying prevention programmes are more likely to be successful if the entire school community is engaged, committed and involved. Whenever we talk about whole school approach, the following strategies must kept in mind.

- Progressive discipline
- Restorative practice
- Character education

Lecture: 39

School Level Intervention to Control Bullying

- Clarifying and communicating behavioral norms
- Promoting adult modeling of respectful and nonviolent behavior
- A written bullying prevention policy can send a clear message
- The policy could include a clear definition of bullying
- A confidential reporting system may encourage students to report if they are victimized or have witnessed bullying

Classroom Level Intervention to Control Bullying

- Teachers can be encouraged to integrate bullying prevention material into their curriculum.
- This can be accomplished by holding regular classroom meetings to discuss bullying
- Establishing and enforcing class rules against bullying

Student Level Interventions to Control Bullying

Student-level interventions are designed to develop social competence by changing students':

- Knowledge
- Skills
- Attitudes
- Beliefs

Social structure of a classroom determines the kind of social or anti-social incidents that may take place in a classroom. It includes the informal relationships among the students and associated friendship, support, attraction, isolation, power relations between subgroups

Relational Matrix components

1. Teacher management
2. Bullying
3. Social structure

Lecture: 40

Parent-Teacher Partnerships

Parents' Attributes

Following are the parents' attributes that support meaningful partnerships:

- Nurturance
- The ability to listen
- A positive self-image
- A sense of efficacy and personal competence
- Effective interpersonal skills

Teachers' Attributes

- Model respect
- Good communication skills
- Show a genuine interest in the children
- Respond constructively to parents' concerns
- Be sensitive to parent & family needs

Parent-teacher partnership Roles

Parents and teachers can engage in:

- Joint learning activities
- Supporting each other in their respective roles
- Conducting collaborative curriculum projects in the classroom
- Participating together in various decision-making activities
- Participating together in classroom and school improvement activities

Elements of Parent-teacher partnership strategies

- Needs assessment
- Goal statements
- Prioritization of activities
- Strategy development
- Implementation plans
- Evaluation tools

Parent-teacher partnership Strategies

Strategies for effective parent-teacher collaborative roles:

- Conferences
- Parent centers
- Participatory decision-making
- Home visits
- Home learning activities
- Telecommunication involvement in the classroom

Caring Curriculum (school-family curriculum) should focus on:

- The caring elements of self-image
- Pro-social relationships with others
- Sensitive and empathetic relationships
- Development of multicultural understandings
- Nurturing and positive discipline

Lecture: 41

Aggressive Students

Aggressive students often:

- Exhibit deficits in social information processing
- Are likely to misinterpret social clues
- Mis-assign hostile intent to others, especially during stress

They are more likely than others to have some **social skills deficits** such as:

- Poor impulse control
- Low tolerance
- Limited ability to generate alternative responses to stress

Sources of Frustration among Aggressive Students

- Failure
- Boredom
- Overexposure to punishment
- Feelings of powerlessness
- Lack of positive reinforcement
- Lack of maintenance of social relationships

Stages of Frustration & Responses

1. **Stage: Anxiety -** Student sighs or uses other nonverbal cues
2. **Stage: Stress -** Student exhibit minor behavior problems
3. **Stage: Defensiveness -** Student argues and complaints
4. **Stage: Physical Aggression -** Student has lost control and may hit
5. **Stage: Tension Reduction -** Student releases tension through crying

Lecture: 42

Intervention to Control Violence

- **Primary Prevention** - It aims at keeping problems from emerging.
- **Secondary Prevention** - It requires individually tailored interventions applied to students who show at risk status.
- **Tertiary Prevention** - It involves intensive "wraparound" services that extend beyond the school building to encompass family and social support services.

Planning to Control Violence

- Practice for a Crisis
- Train all staff to respond to student aggression
- Dress Appropriately
- Move items of value out of reach
- Establish trust and rapport with students

Lecture: 43

Developing pro-social behavior

- Taking turns
- Following directions
- Working with partner
- Working in a group or with others
- Displaying appropriate behavior towards peers and adults
- Increasing positive relationships

Performance deficit

If the student can give the correct response but does not display the behavior outside the testing situation, the social skill problem is probably due to a performance deficit.

Skill deficit

If the student cannot produce the socially correct response, the social skill problem may be due to a skill deficit.

A social skill group lesson should focus on three things:

1. Why the group is meeting
2. What social skills are
3. What is expected of each student during the group

Lecture: 44

Social Competence - the ability to act in a caring and helpful manner towards others.

It is a skill that helps to:

- Establish good social interactions among peers.
- Establish caring connections
- Establish warm attitudes
- Downplay violence and aggression among students

Family Role In The Development of Social Competence

Methods Used In Controlling Children

- Authoritarian (high control)
- Authoritative (authority through having knowledge and providing direction)
- Permissive (low control or direction)
- Combinations of the above

Lecture: 45

School-wide behavioral expectations:

- Be respectful
- Be responsible
- Follow directions
- Hands and feet to self

School-Wide Behavioral expectations typically:

- Address the most frequently observed problem behaviors
- Are age appropriate
- Are positively stated

.....
