bt102 quiz 2 100% correct Solution

by vu expert zoologist

file Maker :. MeRRy

1. Time (minimum) during which all cells in a culture are killed at a given temperature.....**Thermal Death Time**
2. Which of the following use for microbial control with chemicals..... **phenols**
3. Antigen-antibody reaction is known as.... **Agglutination**
4. Structure containing DNA that physically carries hereditary information is called..... **chromosome**
5. Zinc chloride Commonly used in **mouthwashes.**
6. Halogen which impairs protein synthesis and alters cell membranes. **Iodine**
7. soluble antigen. Interact with a soluble antibodies **Precipitation test**
8. Primary stain of grams method is.....**crystal 🔮 violet**
9. Which of the following is use in inhibition of protein synthesis..... **both iodine and chlorine**
10. Which of the following is not a Bacterial gene transfer method..... **transfection**
11. Proteins From microbes are separated by...**gel electrophoresis**
12. Which of following is moist heat sterilization ....**All**
13. Which of the following is use for Gene mapping.... **Conjugation**
14. Phenol and phenolic compound was first widely used antiseptic for disruption ..... **Plasma membrane**

15. It is the lowest temperature at which all cells in a culture are killed in 10 min. **Thermal Death Point**
16. Gram staining falls into which of the following category..... **differential staining**
17. .....are bactericidal , denature proteins, distrupts plasma membrane....**Quaternary Ammonium Compounds**
18. Which of the following is not a characteristic of an ideal chemical.... **High temperature**
19. A DNA segment which encode proteins..... **Gene**
20. Alcohol..... proteins and dissolve lipids. **Denature**
21. Antibiotic which prevent spoilage of cheese **Natamycin**
22. The alcohol ethanol and propanol are use for denaturation of..... **proteins**
23. Transfer of DNA through a virus Called bacteriophage..... **transduction**
24. Which of the following is known as antimicrobial agents.... **all**
25. The halogen iodine and chlorine inhibit.... Function. **Protein**
26. Pasteurization is done by.....**both of them**
27. Use for inhibition of protein synthesis..... **iodine and chlorine**
28. Antibody antigen reaction is a..... method for microbial identification 🔍 **Serological**
29. Transformation is the horizontal gene transfer two..... **bacterias**
