| MUHAMMAD ZAHID | BT401 Genetic Resources & Conservation |
|---|---|
| Quiz 1 | Fall 2020 (December 2020) |

1. Conservation of plant genetic resource is necessary for ____food security and agrobiodiversity.....**Both A&B**
2. A concrete plan of action especially designed to achieve concrete goals is called.....**strategy**
3. PGRFA stands for ..... **plant genetic resource for food and agriculture**
4. PGRA stands for ..... **plant genetic resource for food and agriculture**
5. NCCP stands for .....**Natural cultural collection of Pakistan**
6. IBPGR stand for ..... **international board of plant genetic resource**
7. gene bank is the type of ..... **Ex Situ conservation**
8. According to FAQ species of mollusk are .....**85000**
9. Conservation of plant genetic resource is necessary for.....**All of them**
10. The global strategy for plant conservation GSPC is a program to save the world plant founded in ..... **1999**
11. The plant that grows spontaneously in self-maintaining populations in natural or semi-natural ecosystems and can exist independently." Are called ..... **wild plant**
12. Total area of major pulse crop in Pakistan.....**1.5m hectares**
13. Plant diversity is urgently & effectively conserved is an objective of .....**GSPC**
14. which disease spread due to consuming mercury poisoned fishes by people ..... **MINAMATA disease**
15. _____is an interdisciplinary subfield that aims to understand the dynamics..... **Genetic conservation**
16. Ex-Hepatin an _____is used to control clots in blood, is obtained from Ox lungs..... **anti-coagulant**
17. Tiger's claw is another name for .....**Coral tree plant**
18. The combination of all the genes present in a given population is called the .....**Gene pool**

Muhammad Zahid (Haveli Lakha)

19._____are plant or population having unique valuable germplasm which are generated…… **Genetic stocks**

20.Genetic material is ……..**functional units of heredity**

21.Increasing genetic diversity interprets daughter chromosomes contain genes from …… **both parents**

22.Resources have to be maintained in such a state that it minimize the risk of loss and allow either its …… **plants genetic resources conservation**

23.Domesticated animals' resources are important due to ____ reasons…. **all of them**

24.PGR is abbreviation of …… **plant genetic resources**

25.Crossing over is ___..... **Exchange of segments between chromosomes section**

26.The activity of keeping animals or plants in order to produce animals or plants is called …….. **Breeding**

27.Genetic resources for food, agriculture and forestry include…… **Both wild species and domesticated forms**

28. Maintenance of ecosystem is main goal of conserve ------ resources……**Genetic**

29. _____is the process of protecting an endangered species by placing in an artificial environment…….. **Ex situ**

30. _____ lines/ populations developed in breeding programs have narrow genetic base and often contain valuable gene combination…… **Breeding**

31.A phenomenon occurring during prophase | of meiosis is…… **Crossing over**

32.The varieties which were developed by systematic breeding effort. were once commercially cultivated but are no more grown are called…… **obsolete**

33._____ is used for plant varieties that usually breed through self-pollination…….. **Line breeding**

34.The areas of great genetic diversity are protected from human interference are known as…….. **Gene Sanctuary**

35.Sum total of all hereditary material that can be used to maintain plant and animal breeding is called……**Germplasm**

36.Scientific name of house cat is…….. **Felis catus**

Muhammad Zahid (Haveli Lakha)

37. The article no says that “The Contracting parties shall develop and maintain appropriate policy and legal measures to promote the sustainable use of plant genetic resources for food and agriculture” …… **Article 6**

38. Animal genetic resources refereed as…… **All**

39. _____ % of the total land of Pakistan is covered by covering vegetables is…….**75%**

40. Sharp lowering of population gene pool is called?..... **Bottleneck effect**

41. ‘The Global Strategy for Plant Conservation (GSPC) is a program of the UN's Convention on -----diversity founded in 1999…….. **Biological**

42. National parks are the examples of _____ conservation…… **In Situ**

43. Genetic stocks can be divided into ___ general groups……**3**

44. Out of total global population of Markhor_____ number is found in Pakistan…. **1500**

45. The term mycorrhiza refers to the role of the _____in the plant’s rhizosphere, its root system…….. **Fungus**

46. Scientific name of wild horse is _____**Equus ferus**

47. _____ conservation means the conservation of ecosystems and natural habitats and the maintenance and recovery of viable populations of species in their natural surroundings…… **In situ**

48. ABSA is abbreviation of …… **access and benefit sharing agreement.**

49. The diversity of life on earth is essential to ……..**the survival of humanity**

50. A phenomenon occurring during prophase | of meiosis is:…… **Crossing over**

51. _____ could be called as genetic resource…….. **Germplasm**

52. Resources are classified into _____ Types……..**3**

53. The term animal genetic resources (AnGR) is used to include…….. **all animal species, breeds and strains**

54. What is the consequence of a change in the genetic diversity?..... **Loss of biological diversity**

55. Aquatic genetic resources include all genetic resources living in:…… **water**

56. A species of plant or animal that is in immediate danger of becoming extinct and needs protection to survive is called_____.....**Endangered species**

Muhammad Zahid (Haveli Larka)

57. Plant genetic resources are used by farmers and scientists as the raw material for…….. **Breeding new plant varieties and in biotechnology**

58. _____ broadly defined as plants or population generated and/or selected for gene…….. **Genetic stocks**

59. GSPC was founded in ……..**1999**

60. Peste des petits ruminants also known as…….. **Sheep & goat plague**

61. Woody plants like trees have a _____ genetic diversity than vascular plants like grasses……..**High**

62. In ecosystem microorganisms are important for the reason…….. **All given**

63. _____ are the link from generation to generation of all living matter……..**Genes**

64. The strategy of GSPC seeks to half the continuing loss of ____ diversity…….. **Plant**

65. _____ are the areas of terrestrial and coastal ecosystems promoting solution to resolve …… **Biosphere reserve**

66. Other species of crops are derived from ……**Wild crops**

67. Natural and cultural heritage protected permanently by …… **In Situ conservation**

68. MINAMATA disease was spread due to consuming ___ poisoned fishes by people…….. **Mercury**

69. The special about agricultural genetic resources are …… **All of them**

70. The transfer of genes from parents to offspring is called ……. **Vertical genetic transfer**

71. The global strategy for plant conservation (GSPC) is …… **useful for plant conservation**

72. Living genetic resources such as seed or tissue that are maintained for the purpose off animal and plant breeding are called ……..**germplasm**

73. Issues such as predation and hunting can be monitored and managed more easily by _____ conservation……..**Ex Situ**

74. Alarming situation of the earth can be measured by _____ species…….. **endangered**

75. Direct and indirect impact of human on environment is termed as ……**Anthropogenic effect**

76. _____ is the process whereby wild plants have been evolved into crop plants through artificial selection…….. **plant domestication**

Muhammad Zahid (Hafeth Lakha)

**77.**A goat is hoofed mammal in the genus ……..**capra**

Muhammad Zahid (Haveli Lakha)
