MUHAMMAD ZAHID	BT401 Genetic Resources & Conservation
MCQs	Fall 2020 (February 2020)
Quiz 2	Final Term

1. Sarus Crane is one of --------species at Runn of Kutch Wildlife sanctuary.....**Threatened**
2. Eggs frozen for cryopreservation at _____ age are more useable.....**Age 35**
3. Ramsar convention was negotiated in ____ by countries and NGOs.....**1960s**
4. To date semen of ------- species of fresh water and marine fish have been cryopreserved..... **Over 200 species**
5. The disadvantages of egg preservation are____..... **All of them**
6. Jungle world is ---------- located in Pakistan..... **Zoological park**
7. Abdul Wali Khan University Botanical Garden is in ---.....**Mardan**
8. Sir Sadiq Muhammad Khan Abbasi established ----- ..... **Bahawalpur Zoo**
9. Cell division and metabolism of bacteria is_____ during storage of culture.....**Incompletely arrested**
10. The objective of protected landscapes is ---------- ..... **All of them**
11. Ramsar agreement came into force in —-———.....**1975**
12. Suitable light intensity range for most of the plant cultures is ___ µmol.....**10-1000**
13. In ____ Spallanzani was the first to report the maintenance of motility of human spermatozoa after exposure to low temperatures.....**1776**
14. In human visitation is strictly controlled for protection of conserve values.....**Protected areas**
15. _____is the secure, long term storage of an individual's genetic material.....**Genetic conservation**
16. What is Callus?.....**An unorganized actively dividing the mass of cells maintained in a culture**
17. The Bulmer's fruit bat is listed as ____ on the IUCN Red List.....**Critically endangered**
18. Ramsar convention mission is _____ .....**All of the above**

Muhammad Zahid (Haveli Lakha)

19. To protect the degradation of wetland _____ was signed……**Ramsar convention**

20. The first genomic libraries were cloned in……**Plasmid**

21. Distinguished features of protected areas are……**All of them**

22. An International Board for Plant Genetic Resource (IBPGR) was established in __…..**1972**

23. _____is not generally seen in biodiversity hotspots……**Lesser interspecific competition**

24. Gene banks are also known as……**Germplasm banks**

25. Which species has been reintroduced in Lal Suhanra National Park……**Black buck**

26. Bahawalpur Zoo was established in. _____ ……**1942**

27. Cryogene facilities help for _____ ……**All of above**

28. In 2013, ——-- Ramsar sites has been declared in Pakistan……19

29. In Ramasr convention meeting - -—- — nations participated……18

30. Desert Wolf is —— in cholistan wildlife sanctuary……Rare

31. The _____ Ramsar sites……All options are correct

32. The first Un list of national parks and equivalent reserves was produces in ……1962

33. Main objective of habitat-species management area is ……All of them

34. Features of national parks is……all of them

35. Toxicity of high concentration of cry protectants used and microbial contamination of liquid nitrogen are concern for ……vitrification

36. Gene bank is also called ……..cryogenic facilities

37. In ____ convention of habitats rich in genetic diversity was recommended in the UN conference……1972

38. Primary objective of habitat-species management area is ___ species and habitats……All of them

39. Meeting of different nations for Ramsar conservation was conducted in …….Iranian city

40. If hunting is prohibited, in a particular area it may be consider a _____ nature reserve

41. Botanical gardens include……All of them

42. In IUCN management category _____ vegetation pattern is protected……4

Muhammad Zahid (Haveli Lakha)

43._____ **a**n example of an ex-situ conservation……..Seed bank

44. In category _____ protected areas are small sites to conserve……..3

45. Margalla hills national parks have ___ animals……All of them

46. Protection of Natural ecosystem and ecological process comes under --------- category……category II

47. Features of national park is……All of above

48.lyophilisation during DNA storage process helps to the DNA……preserve

49. Characteristics of wildlife sanctuaries are ……..All of above

50. The removal of the medium and transfer of cells from a previous culture into fresh growth medium. For further propagation of the cell line or cell strain is called…….Subculturing

51. Ex-suito conservation is also known as……Static conservation

52. Low temperature is used for ……All of them

53. Natural Monument Feature's protection is supported by ___All of them

54. Astola island is _____ Ramsar site

55. The ____ is a space used for conservation of nature through legal means……protected areas

56. Yellowstone National Park was designated as park in……. 1872

57. The quality of DNA extracted from plant specimens is dependent on _____.....All of the given

58. Blaxter (1953) reported …… fish sperm cryopreservation

59. Criteria to develop protected areas are dependent on ……all of them

60._____is defined as the number of species represented in a specific region, landscape or an ecological community……Population density

61.WCPA stands for _____ World Commission on Protected Areas

62. Habitat -species management areas come in ____ category of protected area…..4

63. In IUCN management category ____ vegetation pattern is protected……4

64.

Muhammad Zahid (Haveli Larka)
