Contracts

27. If the -----are too harsh or unfair causing any issue between parties to be unresolved

Contracts

28. There is almost never disputes over----- which run perfectly.

Contracts

29. Appropriate ways to terminate the -----required.

Contract-notice

30. Contract should be clear, concise and-----.

Consistent

31. -----must include any document stated like SRS.

Annexes

32. Annexes must include any document stated like-----.

SRS

33. There are ----- of contractual arrangement which are widely used in connection with the provision of software services.

Four types

34. There are four types of contractual arrangement which are widely used in connection with the provision of software services are as following.

Fixed price ♣ contract hire ♣ time and materials ♣ consultancy

35. The ----- agrees to provide the services of one or more staff to work for the client.

Supplier

36. The -----work under the direction of the client.

Staff

37. ----- is on the basis of a fixed rate for each man day worked.

Payment

38. ----- are typically used to assess some aspect of an organization and to make proposals for improvements.

Consultants

39. ----- are usually undertaken for a fixed price but the form of contract is very much simpler.

Consultancy projects

40. It is somewhere between a ----- and a fixed price contract.

Contract hire agreement

41. Use of appropriate----- is both a familiar and traditional technique for regulating hazardous activities.

Standards

42. -----requires that either the product or the practitioner conforms to some specified standard.

Certification

43. -----means that the product cannot go on the market at all, or the practitioner operate.

Licensing

44. Professional and -----associations should devise codes of practice to govern their members.

Trade

45. The law may exert a regulatory effect either directly or by requiring -----with other forms of regulation.

Compliance

46. -----and software engineers may have legal responsibilities under statutes such as the Health and Safety.

System designers

47. Product liability and the Consumer Protection Act -----.

1987

48. -----is the area of law in which manufacturers, distributors, suppliers and retailers are held responsible for any injuries products cause.

Product liability

49. if a product or any of its component parts are defective its manufacturer may be liable for damage under the -----or the common law of negligence.

Consumer Protection Act (CPA)

50. -----means “knowledge and the ability to apply that knowledge”

Competence

51. Modern business process is done through utilizing computer ----- and -----
---?

Software and hardware

52. Under the study of the English criminal law, the Law Commission highlighted a number of categories of -----?

Misuse of computers

53. Under the study of the -----, the Law Commission highlighted a number of categories of misuse of computers

English criminal law

54. ----- Or destruction of information stored on a computer.

Unauthorized alteration

55. The Law Commission defined ----- as conduct which involves the manipulation of a
Computer or internet.

Computer fraud

56. ----- Intentionally entering false data or amending data into the computer?

Input frauds

57. ----- involves stealing or misusing system output?

Output fraud

58. ----- involves the dishonest alteration of a computer program?

Program fraud

59. The second form of misuse identified by the Law Commission was ----- of
Information from a computer.

Unauthorized obtaining

60. Accessing a computer without the authorization of the owner.

Computer hacking

61. The person accesses the computer secretly for stealing information, data or manipulation of data for diverse purposes is called -----?

Computer hacking

62. Literal meaning listening or spying secretly is-----?

Eavesdropping

63. ----- refers to how your personal information is used by the organization or being an Organization.

Data protection

64. ----- refers to the privilege provided to an individual by law or by the organization policy where the individual can keep the information secret to or from a specific group.

Privacy

65. The process of attempting to gain or successfully gaining, unauthorized access to computer resources is called-----.

Hacking

66. The process of modifying the features of a system, in order to accomplish a goal outside of the creator's original purpose-----.

Hacking

67. A -----is someone who develops, changes or attempts to circumvent computer security hardware or software.

Computer hacker

68. -----develop computer malware or spyware to gain access to confidential information.

Criminal hackers

69. How many types of hackers are-----?

7(Website Hacking, Net Hacking, Password Hacking, Software Hacking, Ethical Hacking, Email Hacking, Computer Hacking)

70. -----means taking control from the website owner to a person who hacks the website.

Hacking a website

71. Gathering information about the domain is called ----- hacker?

Net

72. It is -----on your computer which hacker can use to enter in the system

Logical port

73. -----is the process of recovering secret passwords from data that has been stored in or transmitted by a computer system.

Password hacking or Password cracking

74. Hackers try out all the combination of all keyboard letters is called -----force?

Brute force

75. Hackers use predefined passwords. It is unsuccessful -----method ?

Dictionary based

76. -----that hackers changes the look & execution way of that software. For example change the demo version into the full version of that software.

Software Hacking

77. The process in which a person hacks to find weakness in a system and then usually patches them.

Ethical Hacking

78. ----- Also called white hat computer hacking.

Ethical Hacking

79. -----is unauthorized access to an email account or email correspondence..

Email hacking

80. -----is when files on computer are viewed, created, edited or deleted without authorization.

Computer Hacking

81. A program that automatically detects security weakness in remote host by using ----- tool?

Scanners

82. ----- net It is terminal emulation program that allows us to connect to remote system

Telnet

83. ----- is one type of protocol but some time it is used as hacking tool, port 21 for the ftp.

FTP

84. FTP is one type of protocol but some time it is used as hacking tool, port ----- for the ftp

21

85. For connecting ftp we need some ftp s/w known as -----?

Ftp client

86. For connecting ftp server you have to -----that server.

Hammer

87. Being ----- is not necessarily following one's feelings; "feelings frequently deviate from what is ethical".

Ethical

88. -----is not confined to religion nor is the same as religion.

Ethics

89. ----- is the Performs most of the same activities but with owner's permission such as penetration tests

Ethical hacker

90. -----Legal attempt to break into a company's network to find its weakest link
Tester only reports findings

Penetration test mean

91. Tester is told everything about the network topology and technology is called -----
----model?

White box

92. Company staff does not know about the test is called -----model?

Black box

93. In which model tester is not given detail about the network so the burden is on the tester to find out the details.

Black box

94. -----mode of test is combination of both white and black box models.

Gray Model

95. In which model the company provides the tester with partial information about the network.

Gray Model

96. (Steven Levy's "Hackers: Heroes of Computer Revolution" in -----year.

1984

97. Certified Ethical Hackers Developed by the-----?

International Council of Electronic Commerce Consultants (EC-Council)

98. Based on -----domains (subject areas)

21

99. ----- Composed of people with varied skills.

Red team

100. -----sometimes shortened to InfoSec.

Information security

101. ----- is the practice of defending information from unauthorized access, use, disclosure, disruption, modification, inspection, recording or destruction.

Information security

102. **The CIA principle**

Confidentiality ♣ Integrity ♣ Availability

1. Risk Management is ----- risk organization.

- identifying,
- evaluating,
- mitigating
- All of above

2. A systematic process of evaluating the ----- that may be involved in a projected activity.

- Potential risk

3. Risk management is a ----- process.

- Cyclic, Continuous

Important definition:

Overview of Risk Management:

Risk is
The **likelihood** of the occurrence of a vulnerability
Multiplied by
The **value** of the information asset
Minus
The percentage of risk mitigated by **current controls**
Plus
The **uncertainty** of current knowledge of the vulnerability

4. : What are the three components of risk identification?

- . **Assets, threats, and vulnerabilities**
- Assets, threats, and controls.
- Threats, vulnerabilities, and controls Assets, threats,
- vulnerabilities, and controls

5. What are the two types of threat-sources?

- -made and natural
- . Internal and external
- Intentional and unintentional
- **All of the above**

6. What is a weakness?

- . **A flaw in an asset that could be exploited by a threat**
- A control that is not effective in preventing or mitigating a risk
- A threat that is not likely to occur.
- A vulnerability that is not known to the organization

7. What is a safeguard?

- . **A control that is designed to prevent or mitigate a risk**
- A weakness that is known to the organization
- A threat that is not likely to occur
- A vulnerability that is not known to the organization

8. What is the purpose of risk assessment?

- . To identify and assess the risks to an organization's assets
- . To determine the likelihood and consequences of a risk occurring
- To prioritize risks for mitigation
- All of the above

9. What is the difference between likelihood and consequences?

- Likelihood is the probability that a risk will occur, while consequences are the impact of a risk if it does occur.
- . Likelihood is the impact of a risk if it does occur, while consequences are the probability that a risk will occur.
- Likelihood and consequences are two different ways of measuring the same thing.
- There is no difference between likelihood and consequences.

10. What is uncertainty?

- The degree to which the likelihood and consequences of a risk are known.
- The degree to which the likelihood and consequences of a risk are not known.
- The degree to which the likelihood and consequences of a risk are both known and not known.
- There is no such thing as uncertainty.

11. What is risk determination?

- The process of assessing the likelihood and consequences of a risk.
- The process of prioritizing risks for mitigation.
- The process of implementing controls to mitigate risks.
- All of the above.

12. What are the three general categories of controls?

- Policies, programs, and technical controls
- . Policies, procedures, and technical controls
- . Programs, procedures, and technical controls
- Policies, procedures, and training

13. What is a policy?

- . A set of rules or guidelines that govern how an organization operates
- A set of procedures that describe how to implement a policy
- A set of technical controls that are used to protect an organization's assets
- All of the above

14. What is a program?

- A set of policies and procedures that are used to mitigate a specific risk
- A set of technical controls that are used to protect an organization's assets

- A set of training materials that are used to educate employees about risk management
- . All of the above

15. What is a technical control?

- A set of rules or guidelines that govern how an organization operates
- A set of procedures that describe how to implement a policy
- A set of software or hardware that is used to protect an organization's assets
- All of the above

16. What is a social network?

- A set of machines connected by a set of cables
- A set of people (or organizations or other social entities) connected by a set of social relationships
- A set of people who are friends on Facebook
- All of the above

17. What are some examples of social relationships?

- Friendship, coworking, information exchange
- Marriage, family, employment
- All of the above

18. How are social networks used?

- To connect people with similar interests
- To share information
- To collaborate on projects
- All of the above

19. : What are the benefits of using social networks?

- Increased connectivity
- Improved communication
- Enhanced collaboration
- All of the above

20. What is Web 2.0?

- A new generation of internet-based services that emphasize user-generated content and collaboration
- A set of social networking websites
- A type of blog
- A way to download audio broadcasts

21. What are some examples of Web 2.0 services?

- Facebook, Twitter, YouTube, Flickr
- Blog, podcast, social networking websites
- All of the above

- None of the above

22. What are the benefits of using Web 2.0 services?

- . Increased connectivity
- Improved communication
- Enhanced collaboration
- All of the above

23. What are the challenges of using Web 2.0 services?

- Security and privacy concerns
- The spread of misinformation
- The addictive nature of these services
- All of the above

:

24. What is the most important thing you can do to protect your privacy on social media? *

- Keep your private information private.
- Use caution when you click links.
- Be wary of unknown friends (strangers).
- All of the above.

25. What are some pieces of private information that you should not post on social media?

- Your address, social security number, phone number, financial information, your schedule, and full birth date.
- Your favorite pet and your mother's maiden name.
- . All of the above.
- None of the above.

26. What should you do if you receive a friend request from someone you don't know?

- Accept the friend request immediately.
- Ignore the friend request.
- Google the person's name to see if you can find any information about them.
- All of the above.

27. What is the best way to protect your account from being hacked?

- Use a strong password and don't use the same password for multiple accounts.
- Enable two-factor authentication.
- Keep your anti-virus software up to date.
- All of the above.

28. What should you do if you think that your account has been hacked?

- Change your password immediately.
- Report the hack to the social media site.
- Monitor your account for suspicious activity.
- All of the above.

29. What is the most important thing you can do to protect your children online?

- Talk to them about the risks of online predators and cyberbullying.
- Set limits on their screen time.

- . Monitor their online activity.

- **All of the above.**

30. The Use of -----by individuals and organizations has raised a number of issues that need to be considered.

- **Internet**

31. Setting up websites containing ----- . People may rely on and use this information thinking it is correct.

- Incorrect information

32. Using ----- to give bad news when explaining face to face would have been better.

- **E-mail**

33. Moral issues are:

- Plagiarism
- Sending spam.
- People waste time deleting spam if the spam filter allows it through
- Companies monitoring staff use of the internet and e-mail
- Using someone's wireless internet connection without permission
- Using photo editing software to distort realite.

- **All of above.**

34. The Internet has a lot of ----- materials?

- **Illicit**

35. The availability of ----- on the Internet.

- **illegal or unethical material**

36. The same service can be provided ----- using the internet and internet phone links.

- **Cheaply**

37. ----- Moving call centre abroad.

- Organization

38. Don't use the same ----- for a social networking site and for your email

- **Password**

39. There is a ----- that able to filter out this material but we're not completely that sure.

- **Special Software**

40. The material is ----- in other countries, so we can't really stop it.

- **Perfectly legal**

41. There are laws covering the ----- of this material.

- Production and distributions

42. The disadvantages of internet is ?

- - Lack of social interaction - social networking, computer games etc.
- - Local shops shutting - more orders for goods are placed using the internet so local shops close FIN

- All of above

43. -----t is for everybody and no one actually owns it:

- Internet

44. ----- have started to control what can be seen on it?

- Governments

45. The lack of policing of the internet means that -----to make sure that it is accurate.

- information is not checked

46. The lack of -----means that information is not checked to make sure that it is accurate

- policing of the internet

47. What are some of the issues raised by the use of the internet?

- A. The spread of misinformation.
- Cyberbullying.
- Access to inappropriate content.
- The use of email to give bad news.
- The spread of rumors.
- All of the above.

48. What are some of the advantages of the internet for communities?

- Blogs and chats for communities to discuss local issues. *
- . Housebound members of the community are less isolated as people contact them to check everything is okay. *
- . Employment opportunities. *
- All of the above.

49. What are some of the disadvantages of the internet for communities? *

- . The spread of misinformation. *
- The availability of offensive, illegal, or unethical material. *
- The potential for cyberbullying. *
- . All of the above.

50. What are some of the ways to address the negative effects of the internet on communities? *

- . Education about the risks of the internet. *
- Use of parental controls. *
- Support for victims of cyberbullying. *
- All of the above.

51. What are some of the disadvantages of the internet for individuals? *

- . Lack of social interaction.
- Increased risk of cyberbullying.
- . Exposure to offensive, illegal, or unethical material.

- . All of the above

52. What are some of the disadvantages of the internet for society?

- . The spread of misinformation.
- The availability of offensive, illegal, or unethical material.
- . The potential for cyberbullying.

- All of the above.

53. What are some of the ways to address the negative effects of the internet on individuals and society?

- Education about the risks of the internet.
- . Use of parental controls.
- . Support for victims of cyberbullying.

- All of the above

54. What are some of the disadvantages of the internet for individuals in terms of social interaction?

- People may become isolated from others and lose touch with their social networks.
- People may become addicted to social networking sites and computer game
- People may be exposed to offensive or harmful content online.
- . All of the above.

55. What are some of the ways to protect yourself from cyberbullying?

- . Be careful about what information you share online.
- Don't respond to cyberbullying messages.
- Report cyberbullying to the website or app where it is happening.
- Talk to a trusted adult about cyberbullying.

- All of above

56. What are some of the risks that children face online?

- Online predators
- Cyberbullying
- Sexting
- Exposure to inappropriate content

- All of the above.

Important Basic Points :

Question 1: What is the most important thing you can do to protect your children online?

A. Talk to them about the risks of online predators and cyberbullying.

B. Set limits on their screen time.

C. Monitor their online activity.

Question 2: What are some of the risks that children face online?

- * Online predators
- * Cyberbullying
- * Sexting
- * Exposure to inappropriate content

Question 3: What are some tips for talking to your children about the risks of online predators?

- * Be open and honest with them about the dangers.
- * Use age-appropriate language.
- * Talk to them about how to stay safe online.
- * Answer their questions honestly.

Question 4: What are some tips for setting limits on your children's screen time?

- Set a specific amount of time that they are allowed to spend online each day.
- Make sure that they are using their time wisely.
- Monitor their online activity to make sure that they are not accessing inappropriate content.

Question 5: What are some tips for monitoring your children's online activity?

- Talk to them about what they are doing online.
- Look at their online profiles. *
- Check their text messages and emails. *
- Use parental controls to monitor their online activity.

Question 6 : What are some tips for monitoring your children's online activity?

- Talk to them about what they are doing online.
- Look at their online profiles.
- Check their text messages and emails.
- Use parental controls to monitor their online activity.
