

QUIZ NO 2 __ 25th of January, 2021

QUIZ NO 1

1. social constructivism is present by _____ **Lev Vygotsky**
2. The domain encompasses objectives that deal with recall or recognition of knowledge. _____ **cognitive**
3. Which of the following is not metaphor for teacher? _____ **teacher Is a guider**
4.is not appropriate, if both sides of brain are not working appropriately. _____ **Learning**
5. Learning is there when teachers try to help learners change their -----instead of focusing on their own teaching. _____ **cognitive structures**
6. - is to teach certain content to the students. _____ **METHOD**
7. Teachers' complaint for shortage of time can be resolved through ----- . _____ **Unit planning**
8.are much economical and take less space in our working memory _____ **Images**
9. ----- is a short term planning. _____ **Lesson plan**
10. Holistic development means _____ **Complete development**
11. In this state of functioning, a teacher does not invite people to give you suggestions. There is no sharing of ideas _____ **Intentionally Disinviting**
12. A person with ----- need not have specialized knowledge of his trade. _____ **occupation**
13. How many key context are there in schooling? _____ **3**
14. Teaching is an activity to __ knowledge. _____ **Impart**
15. teachers want _____ **career growth**
16. complete formula for teacher growth . **Knowledge ++ Reflection = Growth** _____ **Experience**
17. Schools follow a certain ----- . _____ **curriculum**
18. ____ means that students may get any change in their behavior. **_behavioral perspective**
19. "Society for Pakistani English Language Teachers" organize different workshops for ----- . _____ **teachers**
20. ----- education has no regular curriculum. _____ **Informal**
21. Reflective Practice was introduced by ----- . _____ **Jean piaget**
22. Teaching has a ----- function. _____ **social**
23. What is the highest level of teaching development ? _____ **Intentionally Inviting**
24. Pedagogy is a study of _____ **teaching methods**
25.can lead development _____ **Learning**
26. Learning can lead ----- . _____ **development**
27. Vygotsky's theory about prior learning and social context included ____ major ideas. _____ **4**
28. Who believe that knowledge is actively constructed by learners? _____ **Nolan and francis**
29. ----- is not restricted to the schools. _____ **Collegial context**
30. Knowledge about different facts is ----- . _____ **stratified knowledge**
31. The warmth, respect and appreciation in the eyes of the ----- for the teacher are the actual recognition. _____ **students**
32. ____ is an ability to recall or recognize what has been learned or experienced _____ **Retention**
33. In this state of functioning teacher realize that you didn't know everything and they need development. help and advice from your colleagues _____ **Intentionally inviting**
34. Paulo freire was born in _____ **Brazil**
35. Teaching is a way of development certain ____ behaviors among students. _____ **desirable**
36. ____ is an organized body of knowledge. _____ **Science**

37. Teacher must give _____ for every students. _____ **feedback**
38. Schooling is not about a single person, it is a ----- . _____ **Group orientation**
39. stratified knowledge is the Knowledge about _____ **facts**
40. Knowledge is something that is learnt by reflecting, acting on something is called? _____ **"Subjective knowledge"**
41. Educators work to stimute _____. _____ **Spirit of inquiry**
42. To ----- is to change. _____ **Learn**
43. Teacher must give _____ given from the teachers maximizes students learning. _____ **Constructive feedback**
44. performance objectives are also known as objectives _____ **behavioral**
45. A is worth a thousand words _____ **picture**
46. Teacher has the autonomy of how to teach in a _____ **class**
47. A ----- needs extensive training and specialized knowledge. _____ **profession**
48. The level of to the profession must be to the range of every student _____ **commitment**
49. Teacher must share ideas with the students so that they can work for a change in --- _____ **society**
50. ----- is created when we act and reflect. _____ **knowledge**
51. Teacher is more interested in instead of conceptual change _____ **covering the syllabus**
52. Reflection is of ----- types. _____ **2**
53. At second stage of zone of proximal development, a child gets assistance from ----- _____ **self**
54. The reflection on every action at the same moment when the action is being taken is ----- _____ **reflection in action**
55. A ----- education comprises of a basic education that a person receives at school. _____ **formal**
56. Different cultures have different perceptions about ----- . _____ **education**
57. Precise statements written in the lesson plans about expectations from students are called _____ **Performance objectives**
58. If teacher play role like a gardener, and use the teaching strategies as a fertilizer than students grows like a: _____ **Seed**
59. Where there is silence, there is no ----- . _____ **learning**
60. At ----- stage of zone of proximal development, a child gets assistance from more knowledgeable other. _____
61. A teacher make education attractive for students by using teacher learning strategies _____
62. One will have more chance of being successful as a teacher if _____
63. Which of the following competency should be the most focused by Good teachers? _____
64. Which of the following is responsible for curriculum planning? _____
65. Curriculum guides actually give us a guideline about what to be taught in different --- _____ **grade levels**

MID TERM GRAND QUIZ/ 2020

1. Demonstration method is a very good method for learners _____ **visual**
2. Knowledge may be simply divided into forms _____ **two**
3. Nolan and Francis (1992) says Knowledge is actively by learners _____ **constructed**
4. Which of the following is based on Gagne's model. _____ **Hunter's model**
5. it means that whatever you teach the students, the students get it well _____ **Literal level**
6. When teacher provide feedback, the students their learning in mind _____ **reinforce**
7. are those which are prerequisite actually _____ **Independent enabling skills**
8. Holistic vision and detailed implementation are two main important component of which type of planning _____ **instructional**
9. Initial level of Psychomotor domain is _____ **Perception**
10. Gagne's plan include a sequence of particular "Instructional events". _____ **nine**

11. Which of the following is a commonly used teaching strategy which helps in developing space in working memory _____ **elaboration**
12. Students' tests indicate their _____ **learning.**
13. When teacher provides guidance to the students, this process is called _ **semantic encoding.**
14. an inferential statement that expresses a relationship between two or more concepts. _ **Generalization**
15. is a learning disorder that is characterized by a disturbances in rate of educational development _____ **Autism**
16. which domain is concerned with physical and motor domain _____ **Psychomotor**
17.is basically intuition _____ **Guessing**
18. ----- means that the disposition or learning you are talking about, you must value that disposition. _____ **valuing**
19. ----- policy is to cover the content. _____ **school**
20. Schools not only teach the students but alsothem. (Sausa,2003) _____ **raise**
21. Educators work to stimulate the _____ **spirit of inquiry**
22.is actually detailed form of unit plan. _____ **Lesson plan**
23. The objects through which light could not past are ----- objects. _____ **opaque**
24.helps to make learning more manageable. _____ **Sequence**
25. ____ means that students may get any change in their behavior. ____ **behavioral perspective**
26. The ----- focuses on what the learner will experience, rather than what the instructor will share or do. _____ **objective**
27. The statement "Write an appropriate title for the text" comes in the ----- level of cognitive domain. _____ **synthesis**
28. Every educational activity should have a ----- . _____ **goal**
29.is the gurantee of effective instruction and effective learning _____ **unit planning**
30. ____ is an organized body of knowledge. _____ **Science**
31. Much human behavior is learnt by observing the behavior of others _____ **Bandura**
32. There are ----- types of education in our society. _____ **two**
33. Every student has different ----- of learning. _____ **Potential**
34. ----- is a condition of partial or total impairment of sight or vision that even with correction affects educational performance adversely. _____ **Blind and Low Vision**
35. A ----- education comprises of a basic education that a person receives at school. _____ **formal**
36. There are ----- modeling processes. _____ **Four**
37. The statement " Summarize the story including its main idea" comes in ----- level of cognitive domain. _____ **Synthesis**
38. ----- cannot be separated from the social context in which it occur. _____ **Learning**
39. ----- are skill oriented things where our motor muscles are involved. _____ **Psychomotor domain**
40. Mechanism indicates that a child is -- to do a task by following its mechanics ____ **independent**
41. ----- is a readiness for action. _____ **Set**
42. At ----- stage of zone of proximal development, a child gets assistance from more knowledgeable other. _____ **second**
43. Research shows that teachers mostly focus on ----- hemisphere. _____ **left**
44. A teacher is responsible in the ----- development of a child. _____ **cognitive**
45. ----- thinking is outside the box thinking. _____ **Divergent**
46. ----- is also a conceptual change. _____ **Teacher growth**
47. In ----- education, no formal certification is given at the end. _____ **non-formal**
48. Dyslexia does not affect the ----- of a person. _____ **intelligence**
49. ----- activities are different from teaching activities. _____ **Learning**

50. The ----- domain encompasses objectives that deal with the recall or recognition of knowledge. _____ **cognitive**
51. ----- perform poor in mathematics and science. _____ **Girls**
52. Teaching is a ----- . _____ **profession**
53. Which type of diversity is related to Parental education, occupation and social status in the community? _____ **Socio economic**
54. Girls are less committed to ----. _____ **careers**
55. Learning that changes an existing conception is called ---- _____ **conceptual change**
56. The fast and foremost is consideration of a teacher being an/aof change. _____ **Agent**
57. Which is the broader term? _____ **curriculum**
58. Altering motor activities to meet demands of problematic situation is - _____ **Adaptation**
59. Objectives that represent the purposes of instruction of a teacher are called: _____ **Instructional Objective**
60. Different cultures have different perceptions about ----- . _____ **education**
61. Affective domain was developed by Bloom and Krathwohl in ----- . _____ **1964**
62. Schools follow a certain ----- . _____ **curriculum**
63. Lev Vygotsky's was born in ----- . _____ **Russia**
64. ----- is the name of degree that a person must get to join teaching profession. _ **B.ED/M.ED**
65. You will organize the ----- in such a way that you will ask them to first observe and then record. _____ **assessment**
66. The objective “The student will judge the effectiveness of writing objectives using Bloom's taxonomy” is an example of ----- level of cognitive domain. _____ **Analysis**
67. Good curriculum planning has two major components holistic vision and _____ **Detailed implementation**
68. ----- is not restricted to the schools. _____ **Collegial context**
69. IEP is the abbreviation of ----- . _____ **Individual Education Plan**
70. ----- is the domain where our body movements are involved. _____ **Psychomotor**
71. Teaching has a ----- function. _____ **social**
72. The term ----- is used while explaining multiple diversity among people. _____ **dyslexia**
73. ----- is the title of the whole unit. _____ **Unit/ subject**
74. The best teachers apply planning ----- . _____ **flexibly**
75. ----- plays an important role in child's learning. _____ **Language**
76. Vygotsky's theory of social constructivism includes ----- major ideas. _____ **Three**
77. Methods are also identified in ----- . _____ **instructional planning**
78. What we do in schools, we never focus on the ----- level of learning. _____ **higher**
79. To write performance objectives is ----- . _____ **necessary**
80. The process of sequencing of concept should be from: _____ **Simple to complex**
81. In this state of functioning, a teacher does not invite people to give you suggestions. There is no sharing of ideas. _____ **Intentionally Disinviting**
82. The action verbs that used for evaluation level questions are: _____ **Judge, verify, conclude**
83. ----- is basically an extended adaptation of a lesson plan. _____ **IEP**
84. The interesting thing is that our emphasis is on ----- . _____ **working memory**
85. It is important for the broader curriculum to identify educational ----- . _____ **experiences**
86. ----- is a fixed capacity. _____ **Intelligence**
87. Master teachers are ----- in their planning. _____ **well-organize**
88. You have to create a check list for assessing----- skills. _____ **communication**
89. ----- is not appropriate, if both sides of brain are not working appropriately. _____ **Learning**
90. You must tell the students about the ----- processes they are learning. _____ **thought**
91. ----- is one of the famous models of curriculum development. _____ **Tyler's model**
92. Teacher must come up with at least ----- so that the students can understand the concept easily. _____ **one example**
93. Vygotsky was a ----- psychologist. _____ **Russian**

94. ----- is an ability to recall or recognize what has been learned or experienced. **Retention**
95. The warmth, respect and appreciation in the eyes of the ----- for the teacher are the actual recognition. ----- **students**
96. in -----, Bloom developed the taxonomy of cognitive domain. ----- **1956**
97. Individual educational plans are usually opposite to which of the following? ----- **Inclusion**
98. Detailed implementation comes from ----- planning. ----- **lesson**
99. The ----- of our colleagues is the foundation of power. ----- **esteem**
100. "Write an appropriate title for the text" is an example of ----- level of cognitive domain. ----- **Synthesis**
101. The concept of "Teaching is an Art", was developed by ----- in 1891. ----- **William James**
102. At second stage of zone of proximal development, a child gets assistance from -----
----- **more knowledgeable other**
103. Which of the following is the art of developing logical plan for instructional activities and has integrated steps? ----- **Sequencing**
104. Learning is a ----- process. ----- **social**
105. Age is the element of ----- diversity. ----- **physical**
106. ----- is change in behavior. ----- **Learning**
107. ----- is a teaching method where a teacher presents concepts and procedures. ----- **Presentation**
108. Teacher should remain relaxed while doing -----. ----- **brainstorming**
109. Paulo Friere was born in -----, ----- **1921**
110. Children construct their own -----, ----- **knowledge**
111. First level of Affective Domain is -----, ----- **Receiving**
112. Post lesson activities are related to -----, ----- **evaluation**
113. Deductive and inductive are not only the modes of presentation but modes of -----
also, ----- **experiments**
114. It was ----- century in which perceptions about teaching, learning and education were developed. ----- **16th**
115. Curriculum guidelines are consists of -----, ----- **Learning outcomes**
116. ----- are those skills which are required to achieve a certain goal. ----- **Enabling skills**
117. Idea of "teaching is an art" was developed by -----, ----- **William James**
118. Sequencing steps are in progression, they start from simple to -----, ----- **Complex**
119. Ministry of education has planned curriculum document till grade level: ----- **12**
120. The individualized part of IEP means that the plan has to be tailored specifically to your child's -----, ----- **special needs**
121. Immersion model was developed for ----- diversity. ----- **Language**
122. Procedural knowledge is gained through -----, ----- **direct instruction**
123. Learning is there when teachers try to help learners change their ----- instead of focusing on their own teaching. ----- **cognitive structures**
124. In ----- level of cognitive domain, students recall their knowledge. ----- **Synthesis**
125. Hierarchy of Affective domain was developed by Bloom and Krathwohl in -----, ----- **1964**
126. Who gave this statement" Less planning leads to less learning" ----- **Walsh**
127. While writing performance objectives, we have to use an action word that exactly shows the ---
-----, ----- **Behavior**
128. In information processing theory working memory is also termed as which type of memory? ----- **Short term**
129. Teachers have to identify the ----- to monitor the progress of the students. ----- **methods**
130. ----- is also known as concept map. ----- **Graphic organizer**
131. instructional objective are ----- than goal -----
132. Which of the following is the focus of the Individual Educational Plan (IEP)? -----
133. The knowledge that consists of facts, concepts and generalization is termed as -----
134. In art class a student paints a new and original painting. Which will be cognitive level of this outcome according to Bloom's taxonomy? -----

135. Whenever there is evaluation, there must be -----.
136. A ----- is a figure of speech describing something with implied terms. -
137. The thinking process which requires focused attention as compared to others: ____

QUIZ NO 2

66. Educators work to stimulate the spirit of **inquiry** and acquisition of knowledge.
67. **Facts or principles** that he has memorized by learning.
68. Every student has different **potential** of learning.
69. **Reflective practice** is a way of studying your own experiences to improve the way you work.
70. Zone of proximal concept was also established by **Vygotsky**.
71. This professional standard demands from us to create a climate that promotes **the Professional judgment**.
72. Teacher has the autonomy of how to teach in a **class**.
73. **Task analysis** model is a very important model of learning.
74. Idea of "Teaching is an Art", was developed by **William James in 1891**.
75. Knowledge about different facts is **stratified knowledge**.
76. Teaching has a very important **social function**.
77. Planning is important as there are three characteristics of **master teachers**.
78. **Intentionally inviting:** This is the highest level of your teaching development.
79. Knowledge is created, when we **act and reflect**.
80. Modes of presentation are **two** i.e. Inductive and deductive.
81. Nothing is learnt unless it is in **long term memory**.
82. To achieve the learning outcomes of every unit, we have to construct **some instructional objectives**.
83. While **writing performance** objectives, we have to use an action word that exactly shows the behavior.
84. In **horizontal level**, planning includes selection of activities, resources, assessment and homework.
85. In **vertical level**, it includes link between standards, benchmarks, learning outcomes and instructional objectives
86. **Intellectual growth** cannot take place unless we do not provide opportunities to our students to think at high level.
87. There are **three** foundations of curriculum: sociological, philosophical and psychological.
88. **"Analysis level** questions are higher-order questions that require students to think critically and in depth.
89. The art of developing logical plan for instructional activities is called '**sequencing**'. Such a plan consists of interlink steps.
90. **The taxonomy** has been widely used in curriculum and test construction. From google
91. **Learn skill of observation** then actually inductive mode of presentation is better than deductive mode of presentation.
92. Sequence helps to make learning more **manageable**.
93. **Comprehension level** of cognitive "Describe two nation theory".
94. **Holistic vision** comes from curriculum planning while detailed implementation comes from lesson planning.
95. **In curriculum planning**, assessment is taken into consideration.
96. Asking question is **a skill**.
97. Questions of students are **more important than the questions** of teachers.
98. **Curriculum documents** are not available in all schools.
99. Individual Education Plans (**IEP**)

100. The common thing in Tyler's model and Bloom's taxonomy is that the teachers observe the behaviors
101. Content knowledge is a very important competency of a teacher.
102. Processes are also very important in teachers' considerations.
103. Sequencing has different principles; these principles are the introduction of simple concepts then concrete examples.
104. Writing Standards and benchmarks in a sequence in Curriculum Planning.
105. Action research is very effective research for teachers, because it aims at improvement.
106. Origination is the highest level of Simpson's hierarchy.
107. Lesson plan starts with the subject.
108. There are different mechanics to do different things.
109. Good textbooks provide a structured sequence of lessons.
110. Working memory is our conscious memory.
111. Sequencing steps are in progression. They start from simple and go to complex.
112. Origination is the level where a child can originate things on his own.
113. Write performance objectives is necessary.
114. In order to teach a sequenced lesson teacher need to add complexity to the lesson.
115. Unit planning is the most important as well as the most time-consuming level of planning for each teacher. gave the idea by Waish
116. Sentence formation is a prerequisite for paragraph writing.
117. We have limited time to teach in a class.
118. Bloom's Taxonomy was knowledge level or recall level, where actually students recall their knowledge.
119. You will organize the experience in such a way that you will ask them to first observe and then record.
120. Teacher must come up with at least one example so that the students can understand the concept easily
121. Content forms are three: Facts, Concepts Generalizations
122. A lot of information can be communicated through a picture.
123. Lesson plan is actually detailed form of unit plan.
124. Abstract thinking is very important
125. Curriculum guides are planned by Ministry of education in Pakistan.
126. Questioning has a lot of significance value.
127. An important thing in inductive mode of presentation is Process.
128. Enabling skills are those skills which are required to achieve a certain goal.
129. The individualized part of IEP means that the plan has to be tailored specifically to your child's special needs.
130. Content and Processes are also very important in teachers' considerations.
131. Whenever we are sequencing, we need to know what a prerequisite for a particular terminal objective is.
132. The focus in IEP will be on the needs of the learners rather on the content to be taught.
133. In debriefing teacher tells the students to reflect what they have learnt through this process.
134. Elements of planning 11.
135. Simulations are done in the virtual environments and are computer based.
136. Discovery learning is a learner-centered method.
137. Group processes and the classroom goal, task, reward and participation structures are more directly under the teachers' control.
138. Classroom structures are the foundations that shape particular lessons and behaviors during those lessons. Three important structures include task, goal, and participation structure.
139. . Synthesis level Summarize the story including its main idea.

140. There are **four** steps in Taylor's model of curriculum
141. Write an appropriate title for the text.. come from **Synthesis level**.
142. We need to sequence our **learning objectives**.
143. Adding on must not be **confusing**.
144. Instructional aims: **Student-oriented**.
145. If a teacher plans to take the students for field trips, then he needs to consider **school resources**.
146. **Abstractions** are something which is not tangible.
147. Lesson is a piece of a unit NOT a **block of time**.
148. **Learning activities** are those where students are actively involved.
149. **Effective individual education plans** (IEP) have key characteristics. They are Individualized and child centered.
150. **Girls** perform poor in mathematics and science.
151. Teacher is a **person** who is making lesson plan, unit plan and term plan.
152. A lesson plan is defined as "a **systematic design** for the development, implementation and evaluation of instruction".
153. . What we do in schools, we never focus on the **higher level** of learning.
154. The common think in Tayler and Bloom taxonomy is that to teacher the **behaviors**.
155. Methods are also identified in **instructional planning**.
156. **In evaluation**, we discuss that there are two things; criteria and method.
157. Where there is silence, there **is no learning**.
158. **Metacognition**: is cognitive about cognition.
159. You have to create a check list for assessing **communication skills**.
160. The other name for Learning by reflection is **Socratic Method**.
161. **Master teacher** communicate their instructional objectives effectively to the students.
162. Linear fashion focus **on goals**.
163. Nonlinear fashion focus on **process**.
164. **Negative reinforcement** occurs when something already present is removed (taken away) as a result of a person's behavior.
165. Gagne expands the steps of introducing and organizing experience to include a sequence of nine particular "**Instructional events**".
166. Teachers have to identify the **methods to monitor** the progress of the students.
167. Whenever we are **planning a unit**, we really need to select these learning activities very carefully. And we need to make a match between processes and learning activities.
168. The interesting thing is that our emphasis is **on working memory**.
169. Lesson plan is part of the **unit plan** while activity schedule is part of the block timetable.
170. **Performance objectives**, there are the three elements present i.e. performance condition and criterion.
171. **Performance objective** we need to align our performance objectives with the curriculum.
172. **Subject/ topic** Unit subject is the title of the whole unit.
173. **Unit planning** is important because we need to know the reasons for dividing the whole thing into components. Most of the times, teachers' complaint for shortage of time.
174. There are **three** levels of plans.
175. **Collegial context** is not restricted to the schools rather now it has become web based
176. There are **6 levels** of Bloom's taxonomy of cognitive domain.
177. **Feeling of efficacy** is very important for the teachers
178. It is our assumption that independent skills are prerequisites, so students know them already.
179. Less planning leads to less learning. **(Walsh, 1992)**.

180. **Collegial context** is something that emphasizes that power and decision-making should be shared among some or all members of the organization (**Bush, 2003**).
181. **Keeping notes** is a very important type of post lesson activity because a teacher can have the record of his/her teaching.
182. Knowledge forms are **Content, Process**.
183. **Mechanism indicates** that a child is independent to do a task by following its mechanics.
184. **Unit planning** is very challenging and time consuming but the most important thing is that good unit planning is a guarantee to effective instruction and effective learning.
185. **Schools' policy** is to cover the content as much as possible.
186. Evaluate your teaching, come up with judgments but provide sufficient evidence to support your statement.
187. **Declarative knowledge**: This is the knowledge that is declared in books, research papers, and newspapers.
188. 124. According to research, the best **recognition** is got from students and not from the government or the school administrators.
189. **Blind and Low Vision** – A condition of partial or total impairment of sight or vision that even with correction affects educational performance adversely.
190. **Active learning**: Active learning is where human mind is actively involved in constructing meaning of the experience.
191. **Freire** was a Brazilian educator and philosopher who was a leading ...
192. **Freire was born on September 19, 1921** to a middle-class family in Recife, Pernambuco, **Brazil**.
193. Teacher is more interested in **covering the syllabus** instead of bringing conceptual change in the students.
194. **Science** is an organized body of knowledge.
195. Answering some key questions to create an image of the classroom teaching and learning."
Reflective practice:
196. **Reflective practice** is very important for a teacher.
197. **Nolan and Francis (1992) believe that**: Knowledge is actively constructed by learners.
198. **Learning is there when teachers try to help learners change their cognitive structures instead of focusing on their own teaching.**
199. "Much human behavior is learnt by observing the behavior of others (**Bandura 1978**)
200. **Zone of Proximal Development (ZPD)**
201. The gap between actual and potential level of a child is **Zone of Proximal Development**
202. **Cognitive perspective** is to develop students' academic and thinking skills from a novice level to a more expert level.
203. Speech is a powerful psychological tool that lays the foundation for basic structures of thinking later in one's development.
204. According to **Vygotsky's theory**, language, learning and environment is a social context.
205. Creativity is also a part of **metacognition**
206. Learning depends on **prior learning**
207. Schools not only teach the students but also raise them. (**Sausa,2003**)
208. What students are taught in schools affects the ways they will thereafter see and treat others. (**Schlesinger, 1993**)
209. **CAP**: Cognitive, Affective and Psychomotor
210. **Psychomotor domain** is the domain where your body movements are involved.
211. Perception means **attending to a stimulus**.
212. Set is a readiness for **action**.
213. **Word 'complex'** shows that here the child can do many things independently.
214. 1Adaptation comes from the word '**Adapt**' which means to set yourself in the given situation.
215. **Hierarchy of affective** domain was developed by Bloom and **Krathwohl in 1964**.

- 216. In organization, you start showing that behavior but that is not a **consistent behavior**.
- 217. "Taxonomies may be used to decide what to teach, how to teach and how to evaluate teaching." **(Marzano, Pickering, and Pollock 2001)**
- 218. Research shows that learning do not take place if presented in isolated items **(Hohn,1995)**
- 219. Taxonomies provide a **cognitive structure**.

MID TERM

- 220. Who presented the multiple intelligence theory? _____ **Harvard Gardner**
- 221. How many levels Bloom’s taxonomy? _____ **6**
- 222. What is concept map? _____ **Graphic organization**
- 223.formation is a prerequisite for paragraph. _____ **Sentence**
- 224.identifies classroom assessment criteria. _____ **Teacher**
- 225. Art of developing logical plan for instructional activities is called? _____ **“Sequencing”**
- 226. Methods are also identified in... ? _____ **“Instructional planning”**
- 227. Good Textbooks provide sequence? _____ **“Structured sequence of lessons”**
- 228. Knowledge has forms? _____ **“Two”**
- 229. Knowledge is something that is learnt by reflecting, acting on something is called? _ **“Subjective”**
- 230. A child knows about own cogitation is called? _____ **“Metacognitive knowledge”**
- 231. 12. Memorized things in? _____ **“Facts”**
- 232. Task analysis model is a very important model as it helps the teacher to identify __ **prerequisites**.
- 233. The process of setting goals, developing strategies is _____ **planning**.
- 234. We discuss criteria and method in _____ **evaluation**.
- 235. The individualized part of IEP means that the plan has to be tailored specifically to your child's _____ **special needs**.
- 236. A unit plan is aof lesson plans. _____ **hierarchy**
- 237. Methods are also identified in instructional planning _____ **Student-oriented**.
- 238. is basically an extended adaptation of a lesson plan. _____ **IEP**
- 239. We can remember those things which are connected with our _____ **prior learning**.
- 240. **Adolescence** is a time of profound brain growth.
- 241. Advance organizer model is based upon **deductive learning**.
- 242. Nonlinear fashion focus on **process**
- 243. Brainstorming is a common tool to **describe** a thing
- 244. The white hat in the De Bono’s six thinking hats signifies **information known or needed**
- 245. **Teacher** model skill in direct instruction
- 246. **Network** integration is created among group of students
- 247. Teacher role is minimized in **unguided** inquiry
- 248. In United States, pre-school is named as **pre K**
- 249. **Gatekeeper** equalizes participation

250. Generative topics actually make **connections**
251. **Divergent** thinking is outside the box thinking
252. The learning of **core concepts** is lifetime
253. Different countries have different age levels of **formal** education
254. Children can come up with different ideas and teachings must **accept** all ideas
255. **Children** construct their own knowledge
256. Our teachers do not focus on **core concept**
257. Objects must be in the form that it can be **measured**
258. **British** preschool name Nursery School or simply "nursery"
259. **United States** preschool name pre-school and pre K
260. Child is a natural discoverer. **Bruner**
261. By the **three**, a child has TWICE as many brain connections
262. In order to start working, the cells need to **communicate** with each other
263. A research was conducted and it was reported that teachers mostly focus **hemisphere** of children.
264. For creativity **divergent** thinking is very important.
265. Different types of -functions occurs in the left and right hemisphere **Mental**
266. The networked methodology of integration is **Student centered**
267. Asking question is a **Skill**
268. Brain development continues till the age of **8**
269. We can remember those things which are concerned with our **Right side memory**
270. Integration means putting things **Together**
271. Advance organizer model is based upon **Deductive learning**
272. **Case method is** a very good approach to know problem solving.
273. .Pedagogy means how to teach **Students/**
274. Core concepts are **declarative** knowledge
275. Development cannot be separated from the **social** context in which it occurs
276. Development of **gross motor** skills is very important in preschool or early childhood education
277. **Children** construct their own knowledge.
278. John dewy says that there is no such profession where **knowledge** is separable from doing or practice.
279. **Application** of core concepts in new level is important
280. In **left** hemisphere there is logical thinking. Verbal intelligence and convergent thinking
281. Teachers want to teach in **depth** but want to cover the syllabus too
282. **Curriculum** is a dead thing teacher's give life to it.
283. **Researchers** use the word discourse for discussion
284. Teachers must provide the students with opportunities to **discover** things

285. **Performance assessment** can be used to measure student's problem solving potential as well as group
286. Knowledge can be assessed through **written tests**
287. Usually we do not **question** our tradition and authority
288. Wait time is **thinking** time
289. The last level of Maslow's hierarchy of need is **Self-actualization**
290. **Socratic** Method is the example of discussion method
291. **Edison** invented the bulb
292. Projects tend to be **multidimensional**
293. Different types of **mental** functions occur in the left and right hemisphere.
294. Pedagogy means how to teach **children**.
295. Advance organizer model is based upon **Deductive learning**.
296. **Case method** is a very good approach to know problem solving.
297. Andragogy means how _ learn. **Adults**
298. Beyer says that critical thinking has **two** important dimensions.
299. The inquiry learning cannot be **rushed**
300. **Learners** are responsible for planning. Conducting and evaluating their own effort
301. Process of **assimilation** leads to consideration of new options and points of view
302. **Assimilation** leads to consideration of new options and points of view
303. According to Kolb (1984), learning is a process of a combination of grasping **experience** and transforming it.
304. Curious observation is the start of the **inductive process**
305. **Students** love integrated curriculum
306. What type of goodwill message is most likely to use an RSVP? Condolence, **invitation**, appreciation, holiday greeting,
307. Generative topics actually make ___ schemes, **connections**, procedure or assessments
308. Schooling average age.... **4/ 3**
309. we are concerned by student.... achievement. **Team**
310. Understand is in.... Level. **First/ conceptual**
311. focus discussion and disposition.
312. Scientific method.... research. **Roots/Psychology/authentic**
313. **Theory** can be falsified.
314. **Perception** means attending to a stimulus

PAST GRAND QUIZ

We have limited time to teach in a -----.

class

----- means problems with reading, writing, spelling, symbols and numbers, because the brain misinterprets what it sees (visual) and hears (auditory).	Dyslexia
To write performance objectives is -----.	necessary
Age is the element of ----- diversity.	physical
Teachers must communicate their ----- to the students.	Experiences
The term ----- is used while explaining multiple diversity among people.	dyslexia
The statement “The student will define the 6 levels of Bloom's taxonomy” is an example of ----- level of cognitive domain.	Knowledge
Who gave this statement: “Having a critical spirit is as important as thinking critically”.	niam
In -----, planning includes selection of activities.	horizontal level
in -----, Bloom developed the taxonomy of cognitive domain.	1956
A teacher needs to know the ----- level of the students.	Motivational
Objectives have a ----- purpose.	Limited
----- is a readiness for action.	Set
----- are intent of teaching.	Objectives
The prescription of a minimally acceptable level of a performance on the part of a learner is called -----.	Criterion measure
Taxonomies provide a ----- structure.	cognitive
While writing performance objectives, we focus on the -----	action words
In performance objectives, all the ----- elements must be present.	three
While writing performance objectives, we have to use an action word that exactly shows the -----.	performance
----- is the highest level of Simpson's hierarchy.	Origination
Curriculum documents are not available in all -----.	schools
----- is the guarantee of effective instruction and effective learning.	Unit planning
While -----, you have to see the curriculum framework.	yearly planning
The statement "Write an appropriate title for the text" comes in the ----- level of cognitive domain.	synthesis
Altering motor activities to meet demands of problematic situation is -----.	Adaptation

A content is consisted of -----.	Facts - Concepts - Generalizations ALL
The ----- focuses on what the learner will experience, rather than what the instructor will share or do.	objective
The term ----- is actually a teacher who has expertise on his subject and he ensures the quality learning of the students.	Master teacher
The last three levels of Bloom’s taxonomy of cognitive domain are called as ---- -----.	Higher level of learning
The statement of an observable behavior on the part of learner is -----.	performance
Methods are also identified in -----.	instructional planning
Every educational activity should have a -----.	goal
The objective “The student will compare and contrast the cognitive and affective domains.” is an example of ----- level of cognitive domain.	Comprehension
The ----- has been widely used in curriculum and test construction.	taxonomy
You must tell the students about the ----- processes they are learning.	thought
The prescription of a minimally acceptable level of a performance on the part of a learner is called -----.	Criterion measure
----- is a disorder in language formation that may be associated with neurological, psychological, sensory or physical factors.	Speech impairment
Who gave this statement: "Schools not only teach the students but also raise them."	Sausa

Who gave this statement" Less planning leads to less learning"	Walsh
"Unit planning is the most important as well as most time consuming level of planning for each teacher" who gave the above statement?	Walsh
Girls are less committed to ---	careers
----- knowledge is a very important competency of a teacher.	Content

_____ plays an important role in child’s learning.	language
Information used as evidence or as part of a report or news article is called _____	fact
Students _____ indicate their learning.	tests
Children construct their own _____.	Knowledge
A teacher is responsible in the _____ development of a child.	cognitive

Lev vygotsky’s was born in _____.	Rusia
Idea of “teaching is an art” was development by _____.	William james
Teacher can manage different _____ in school for ethical development of a child.	Activities
A profession has a body of _____.	techniques
The role of a teacher is a changed from a lecturer to _____.	An agent of transformation
Learning is a _____ process.	social
development/learning cannot be separated from _____ in which it occur.	Social context
Learning is a_____ endeavor.	social
In _____ teachers do not have autonomy or the power of decision making.	pakistan
Who gave the theory of multiple intelligence.	Howard gardner
_____ education has a structure systems of learning.	formal
A view or opinion that is incorrect because based on faulty thinking or understanding is a _____.	misconception

_____ model is an important way of learning.	Observational learning
The role of a teacher is changed from a lecturer to _____.	An agent of transformation
A profession allows_____.	autonomy
Education that is not given in proper schools is _____.	Informal education
_____ greatly influences learning.	Prior knowledge
Different cultures have different perception about _____.	education

___ knowledge is acquired, if a child gets cognition about cognition.	metacognitive
___ are something that is memorized.	Facts
Who gave this statement “knowledge is created when we act and reflect”?	friere
___ is the procedure to gain declarative knowledge.	lecturing
Lev vygotsky died at the age of ___.	37
The first process in modeling is ___.	Alternation
Howard Gardner is very famous because of his ___.	Multiple intelligence theory
___ is very important for a teacher.	Reflection in practice
___ is important but it does require time.	Conceptual change
___ context of school is “characterized by or having power and authority vested equally among colleagues.”	collegial
Paulo freire was born in ____.	1921
The idea of “teaching is an art or science “was developed in __ by william james.	1891
----- activities are different from teaching activities.	Learning activities
---- is a series of small action steps which are needed to achieve desired goals.	Objectives:
"Describe the two nation theory" comes in ----- level of cognitive domain.	Comprehension:

----- means that a behavior becomes part of your life.	Characterization
----- comes from curriculum planning.	Holistic vision
The objects through which light could not past are ----- objects.	opaque
A unit plan is a ----- of lesson plans.	Series
There are ----- steps in Taylor's model of curriculum.	four
It is important for the broader curriculum to identify educational -----.	experiences
----- is the title of the whole unit.	Unit subject

There are ----- necessary elements of planning.	11
A teacher needs to know the ----- level of the students.	motivation level
There are ----- types of communication disability.	2
Master teachers are ----- in their planning.	well-organized
Curriculum is a ----- term.	Broad
----- is essentially a nested process with horizontal and vertical dimension.	Planning
Elements of physical diversity are -----.	3
----- is a planning of one year of a school.	Long term Planning
A teacher needs to know the ----- level of the students.	Motivational
Detailed implementation comes from ----- planning.	lesson planning
Students' ----- must be considered before planning.	feedback
Terms in revised Bloom's taxonomy were changed from noun to -----.	adjectives
----- is the highest level of Simpson's hierarchy.	Origination:

Teachers must communicate their ----- to the students.	Ideas
The prescription of a minimally acceptable level of a performance on the part of a learner is called -----.	Criterion measure:
We have limited time to teach in a -----.	
There are ----- domains of learning.	three
Benchmarks and standards are written in a sequence in -----.	instructional
We have to identify the facts, concepts and generalizations while planning a ---- ----.	a unit
Bloom's taxonomy was revised by -----.	William
Teaching activities are there to teach ----- to the students.	content

----- identifies classroom assessment criteria.	teacher
----- is the gurantee of effective instruction and effective learning.	d unit planning

There are different ----- to do different things.	mechanics
The objective “The student will judge the effectiveness of writing objectives using Bloom's taxonomy” is an example of ----- level of cognitive domain.	Analysis
----- planning is very challenging and time consuming.	unit planning
"Abstract thinking leads to reasoning with symbols" this refers to ----- stage of Piaget's cognitive development.	Formal operational
----- do not have attention span.	Children
If we will use the connections our efficiency of doing any task will -----.	increase
Questions in ----- also includes in essential questions.	induction
In order to start working, the cells need to ----- with each other.	communicate
Teacher must ensure ----- development of child.	holistic I
Brain develop very fast in the ----- year after birth.	first
Learners can learn only ----- chunks of information at a time.	5-9
Remarkable changes occur in the brain during the ----- decade of life.	second
A teacher can teach higher order thinking skills through the ----- process.	
----- is a time of profound brain growth.	Adolescent
----- should be made clear to the students.	Core concepts
A ----- year old child has the vocabulary of 2000 words.	
The average weight gain of 6-12 years children in a year is -----.	5-7

Fragmentation is said to be the ----- level of integration.	primary
Core concepts are ----- knowledge.	declarative
Teaching is very exciting for ----- teachers without integration also.	young
In the context of preschool it includes ----- stages of Piaget's cognitive development.	2
Children can come up with different ideas and teachers must ----- all ideas.	accept
----- have no obvious right answer.	essential Questions
John dewy says that there is no such profession where ----- is separable from doing or practise.	knowledge
Generative topics actually make -----.	connections.
Jumping is the example of -----.	Gross motor
The networked methodology of integration is -----.	student-centered
----- always identify their intent.	Teachers
Teachers want to teach in ----- but want to cover the syllabus too.	depth
Child’s rights convention of 1989 has mentioned that “----- is basic right of every child.”	Education
Form 1 is ----- integration.	
The green hat in the De Bono’s six thinking hats symbolizes -----.	creativity
----- are those things that can be changed.	Variables
Group learning will be more efficient for developing the -----.	idea
Bruner’s first stage is -----.	Enactive”

‘Collecting data’ is the ----- step of Guided Inductive Inquiry.	
According to Kolb (1984), ----- is a process of a combination of grasping experience and transforming it.	), Learning

The word scientific was devised in the -----.	19
The black hat in the De Bono’s six thinking hats symbolizes -----.	judgment
Usually we do not ----- our tradition and authority.	question
----- invented the bulb.	Edison
Bruner’s second stage is -----.	“Iconic
The red hat in the De Bono’s six thinking hats symbolizes -----.	feelings
Problem based learning starts from -----.	Analysis
----- characteristics of critical thinking are presented by Wade (1995).	
Inquiry is NOT about -----.	memorizing facts
During guided inductive inquiry, the ----- plays the key role in asking questions.	teacher p
Problem based learning also starts from -----.	Questions
There are ----- processes of inquiry.	13
The term ‘Six Thinking hats’ was presented by -----	De Bono
The ----- is an educated guess about the relationship between the independent and dependent variables.	Hypothesis
Students will make generalizations that are too -----.	broad
The solutions, responses provided by learners are not found in -----.	textbooks

Children produce their original work after -----.	problem based learning
Inquiry may involve -----, procedure and solution.	Problem
----- are responsible for planning, conducting and evaluating their own efforts.	Learners
Scientific method can be used in ----- also.	social sciences
Roots of the ----- of all social sciences is based on scientific method.	research

In school we do not have much time to deliver information so we must know the -----.	
The most important part of integration is -----.	assessment
----- thinking is a disciplined manner of thought that a person uses to assess the validity of something.	critical thinking
----- talked about logics and he was one of the pioneers.	Aristotle
----- of information is important.	depth
Inquiry is NOT a ----- technique.	Hypothetical
----- love integrated curriculum because it provides the context for learning.	Children
Group learning develops ideas and -----.	
Learners progress from specific observations to -----.	inferences
The brain thrives on -----.	connections
During guided inductive inquiry, the ----- plays the key role in asking questions.	teacher
Inductive inquiry is of ----- types.	2
According to Kolb (1984), Learning is a process of a combination of grasping --- ----- and transforming it.	Experience
Inquiry may involve problem, ----- and solution.	procedure

In ----- , students investigate a teacher-presented question.	Guided inductive
Students must learn to modify their -----.	conclusions
----- is a permanent change in behaviour.	learning
----- are much important in scientific method.	variables
Paper pencil tests can assess the ----- of the students.	
Inquiry method requires the learner to develop ----- associated with inquiry.	various processes
----- inquiry is widely used in our classroom settings.	Information inquiry

Learners progress from ----- observations to inference or generalizations in GII.	specific observations
----- is the domain where our body movements are involved.	Psychomotor
----- is actively constructed by learners.	Knowledge
Idea of "teaching is an art" was developed by-----.	William James
is a learning style in which learning takes place by the student carrying out a physical activity.	Kinesthetic learnin

growth cannot take place unless we do not provide opportunities to our students to think at high level.	Intellectual growth
The theory of Zone of proximal development was given by -----.	Vygotsky
A child is responding in the form of action but this action is not an independent action is a -----.	Guided Response
means the knowledge about how to teach the students.	pedagogical knowledge
There are ----- types of education in our society.	2
Learning is ----- by nature.	social
----- includes all intellectual skills.	Cognativbe domaon
According to research, the best recognition teachers got is from the -----.	students
There are ----- types of intellectual disability.	
Developing questioning skills among students comes in	Higher thinking levels:
means attending to a stimulus	Perception
Who gave this statement: “Knowledge is created when we act and reflect”?	Friere:

----- is the level where a child can originate things on his own.	origination
“Write an appropriate title for the text” is an example of ----- level of cognitive domain.	Synthesis level
Teaching is a ----- profession.	noble

The objective “The student will construct an instructional objective for each level of Bloom's taxonomy” is an example of ----- level of cognitive domain.	
A teacher is a -----.	Change agent
is to teach certain content to the students	METHOD
cannot be separated from the social context in which it occur	Learning
It was ----- century in which perceptions about teaching, learning and education were developed.	16th century
education has a structured system of learning	formal
Knowledge is actively constructed by	learners
A teacher must use ----- resources in a class.	Low cost
An educator must work to stimulate the spirit of ----- among the students.	f inquiry
What we do in schools, we never focus on the ----- level of learning.	higher level
Hierarchical levels of Simpson' Psychomotor domain are	7
The level of ----- to the profession must be to the range of every student.	commitment
is the mean of creating a dialogue	reflection
----- is the knowledge that is declared in books,	Declarative knowledge

research papers or newspapers.	
----- is the level of understanding.	Comprehension
Teachers need to know the ----- level of students.	
We must plan unit before -----.	lessons.
While evaluating teaching or students’ learning, you should always come up with judgements based on -----.	t evidence
Planning serves a guide to -----.	action.
Lesson is a piece of a unit NOT a block of -----.	time

The process of setting goals, developing strategies is -----.	Planning
In evaluation we discuss --- things.	two
Process cannot be isolated from -----.	All of abouve
IEP is basically ----- adaptation of lesson plan.	extended
If a teacher plans to take the students for field trips, then he needs to consider - -----.	schools” resources
Performance objectives must be aligned with -----.	curriculum
----- research is very effective research for teachers because it aims at improvement.	Action
The learning of ----- is lifetime.	core concepts
The average height growth of 6-12 years children in a year is -----.	

Learner can process only about one new idea or concept every ----- second.	ten
In ----- books there is a lot of information than Japanese and German books.	American
A preschool child of 36 months can now hold ----- different emotions in his mind at the same time.	two
----- education is different from other education.	Pre-school and infant educations
Generative topics are generated from -----.	leant information
----- need to be interesting for the teachers as well as for students	Generative topics
----- integration method overlaps concepts as organizer.	shared
"Child is a natural discoverer" who gave this statement.	Bruner
----- are related to the lives of people.	Essential questions
In United States, pre-schooling is named as -----.	Pre-school
Learning depends upon the -----.	environment

The idea in ----- thinking is that no idea is a stupid idea.	divergent
Essential questions are related to the ---- of people.	lives
Brain development continues till the age of -----.	8
----- teacher should integrate two or three subjects so that we can save the time.	Primary school
Core concepts are central to the domain of -----.	knowledge
Integration means putting things -----.	together
Because of integration it will be easier to ask -----.	essential questions

----- are most important persons in the application of curriculum.	Teachers
In British English, pre-schooling is known as -----.	nursery
----- construct their own knowledge.	Children
There are ----- physical developmental milestones used in pre-schooling.	
----- needs to be an integral part of early years of education.	Story time
----- are unique to every individual.	Experiences
Teachers mostly concern about -----.	completion of syllabus
Form 3 focuses on the integration of subject knowledge with -----.	Student's Interest
Bigger ideas are our assumptions and -----.	belief
----- theory is very much applicable in early childhood education.	Vygotsky
The ----- curriculum is a great gift to experienced teachers.	integrated
passive rolesResearch has now determined that remarkable changes occur in the brain during the ----- decade of life.	second
Development cannot be separated from the -----context in which it occurs.	social

By the age -----, a child has TWICE as many brain connections as an adult.	
Gross motor and fine motor development is involved in -----.	Physical development
M. Markus was a ----- who gave the definition of integration.	

Which needs does a primary reinforcer satisfy?	Food oxygen warmth watre
Teachers get little assistance from ----- publishers.	textbook
The brain is not complete at -----.	birth
Essential questions require ----- thinking.	divergent
----- type of integration is related to shared integration.	sequenced
Networked integration is created between the -----.	learners
----- is a dead thing teachers give life to it.	Curriculum
We need to integrate the knowledge with ----- skills.	practical
----- is a conceptual commitment.	Essential question
Through ----- it will be easier for the children to ask essential questions.	integration
Different countries use different names for pre-schooling, but the umbrella term for it is -----.	Early Childhood Education
There are ----- stages of Piaget's cognitive development.	4
Vygotsky's theory includes ----- major ideas.	four
Our teachers do not focus on -----.	core concepts.
----- integration is created among group of students.	
----- integration takes advantage of natural combinations.	Nested integration
Development of ----- skills is very important in preschool or early childhood education.	Gross motor

Forms of integration were presented by Fogarty and Stoehr in -----.	1995
Work on scientific method was started by ----- to Galileo.	Aristotle

Cooperative learning method can help students develop ----- skills.	Communication
Piaget spend actually----- to work on constructivism.	50 years
The cooperative learning model changes the -----.	reward system
----- can be assessed through direct observation.	skills
----- is a model which requires student cooperation and interdependence in its task, goal and reward structure.	Cooperative learning
Cooperative learning methods are those in which more than ----- person work together.	one
Teachers role is minimized in ----- inquiry.	
In cooperative lessons, Students work ----- to master learning goal.	teams
Cooperative learning requires -----.	
Assigning different roles is a good thing in -----.	jigsaw technique
Kagan (1994) roles have been adapted by -----.	Arends
cooperative learning help students make the ----- from whole-class to cooperative learning groups.	transition
In cooperative learning, ----- are oriented to the group as well as the individual.	Reward system
More than ----- of the researches says that cooperative learning helps in the academic achievement of the student.	
A special challenge for cooperative learning teaching is how to ----- for both team and individual efforts.	grade
Rubrics are actually instruments -----.	

In ----- teacher talk time is more than 50% of students talk time.	Recitation
----- functions are image and inform.	Concepts
----- create productive learning communities.	Effective teachers
Extended practice leads to -----.	Overlearning
Teacher control is ----- process.	authoritative
Peer tutoring is -----.	motivational strategy
----- lose their significance after sometime.	External rewards
----- discussion is a teacher-centered discussion.	Monologic
----- is a teacher-centered method.	Presentation
Direct instruction keeps ----- in passive role.	students
Practice that is under the watchful eye of the teacher is called -----.	Guided practice
----- method is the example of discussion method.	
Teachers can obtain better classroom discourse by giving their students opportunities to think before they -----.	respond
Feedback should be appropriate and -----.	constructive
The base level of Maslow's Hierarchy of Needs is -----.	Physiological needs
Recitation is also called -----.	
Presentation is a ----- centered method.	Teacher
----- learning is a learner-centered method.	Discovery
Monologic discussion is ----- centered discussion.	teacher
Dialogic discussion promote ----- thinking.	divergent

Discovery learning is a ----- centered method.	learner

In democratic process ----- are involved.	children
How many categories did Abraham Maslow believe that needs could be classified into?	5
Crossword puzzles is an example of ----- learning.	2. Incidental learning:
----- in classrooms does not flow just from the teacher.	Influence
Direct instruction lessons require the unique classroom -----.	management
Planning, implementation and evaluation comes in -----.	Teaching cycle
In ----- there is paraphrasing.	communication
----- is basically a discussion method.	
For learning activities, ----- centered learning methods must be preferred.	students
----- is very much teacher controlled method.	Direct Instruction
Peer can be great ----- support.	
----- is the adding of an aversive stimulus to decrease a certain behavior or response.	Positive punishment
A ----- learning environment is a setting for learning that includes a controlled and often simplified copy of a real world system to be studied.	Simulation-based learning
The other name for presentation method is -----.	
Lecture only gives ----- knowledge.	declarative
----- are done in the virtual environments and are computer based.	Simulation

Presentation is also known as ----- method.	
The last level of Maslow's hierarchy of needs is -----.	Self-actualization
A lot of information is not important ----- information is important.	depth of
Measuring is a ----- process.	inquiry

----- has its intellectual roots in the Socratic Method.	Problem Based Learning
Bruner’s final stage is -----.	Symbolic
Life is not divided into little blocks of -----.	subjects
Inquiry may involve problem, procedure and -----.	Solution
Aristotle promoted -----.	deduction
----- is a condition of partial or total impairment of sight or vision that even with correction affects educational performance adversely.	Blind and Low Vision
----- knowledge is acquired, if a child only learns facts and memorizes content.	Procedural
Kinesthetic learning is also known as -----.	tactile learning
Teacher needs to have some perceptions and ideas if -----.	political activity
----- means the knowledge about how to teach the students.	Pedagogical knowledge
Where there is silence, there is no -----.	learning
Lev Vygotsky died at the age of -----.	37

----- are something that is memorized.	Procedures
Teaching is about bringing change in -----.	society
----- knowledge is acquired, if a child gets cognition about cognition.	Metacognition
Holistic development means -----.	complete development
----- means that professionals are ethically bound to follow some norms.	Self-Disciplined
Master teachers ----- instructional objectives to the students.	communicate
There are ----- stages of Zone of Proximal Development.	
----- means that students may get any change in their behavior.	Behaviour prosecutive
Learners need ----- on everything they do.	feedback
There are ----- categories of exceptionality.	27

----- is something that emphasizes that power and decision-making should be shared among some or all members of the organization.	Collegial context
----- is the procedure to gain declarative knowledge.	lecturing
Every student has different ----- of learning.	Potential
----- is also a conceptual change.	Teacher growth
----- means social interaction among the students or the other people as well.	
There are ----- types of instructional planning that are commonly used in schools.	

Vygotsky was a ----- psychologist.	Rushinan
----- is the mean of creating a dialogue.	reflection
----- are thoes objectives which need to be achieve by the end of lesson.	Instructional objective
----- is a way of studying your own experiences to improve the way you work.	Reflective practis
There are ----- kinds of diversity.	3
Teacher is more interested in ----- instead of conceptual change.	Covering sylabur
Which educationist gave the below statement; "What students are taught in schools affects the ways they will thereafter see and treat others"	sausa
----- means that students may get any change in their behavior.	Direct instrucation
----- knowledge is a step ahead of declarative knowledge.	Procedural knwliedge
Gender diversity means ---- in gender.	Difference
In -----, the student must be dissatisfied with the current understanding.	
----- is the name of degree that a person must get to join teaching profession.	B ed M ed
In ----- teachers do not have autonomy or the power of decision making.	Pakistan

----- context of school is “Characterized by or having power and authority vested equally among colleagues:"	collegial
According to Gagne, ----- knowledge is “knowing that....”	Metacognition
The gap between actual and potential level of a child is -----.	Zone orf prox dev
Theory of multiple intelligences was presented by Howard Gardener in -----.	1983
----- knowledge comes in psychomotor domain.	procedural
Different cultures have different perceptions about -----.	eduucation
Declarative knowledge is more or less equivalent to Bloom’s ----- category of learning outcomes.	
----- is very famous because of his theory of multiple intelligences.	hHoward gardner
The ----- of our colleagues is the foundation of power.	esteem
At second stage of zone of proximal development, a child gets assistance from -----.	Direct instr
----- is where human mind is actively involved in constructing meaning of the experience.	Active learning
----- perform poor in mathematics and science.	girls
-----	method
Teachers must give ----- to the students	Constructive feedback

to maximize learning.	
----- is a fixed capacity.	intellangence
The ‘basics’ of the ----- curriculum are mathematics, natural science, history, foreign language & literature.	
----- plan is actually detailed form of unit plan.	lesson
You have to create a check list for assessing----- skills.	Communication skill

Being aware of or sensitive to the existence of certain ideas or phenomena and being willing to tolerate them is called -----.	receiving
Teachers rarely plan in ----- as encouraged in textbooks.	Linear plan
Mechanism indicates that a child is ----- to do a task by following its mechanics.	independent
Precise statement means ----- statement.	An exact
There are ----- elements of performnce objectives.	3
Lesson plan starts with the -----.	subject
When teacher provides guidance to the students, then there is -----.	semantic
This is not true that if the learning cannot be ----- then there is no learning.	accessed
You will organize the ----- in such a way that you will ask them to first observe and then record.	accessment
Curriculum guides are planned by -----.	Ministray of edu
----- is one of the famous models of curriculum development.	Tyler
In curriculum planning ----- is taken into consideration.	assessment

The second name of performance objectives is -----.	behaviour
Curriculum guidelines are consists of -----.	
----- is defined as "a systematic design for the development, implementation and evaluation of instruction".	Lesson plan
In ----- level of cognitive domain, students recall their knowledge.	synthesis
While planning a unit a teacher needs to identify -----.	all
Curriculum guides actually give us a guide line about what to be taught in different -----.	Grad level
The first three levels of cognitive domain are called as -----.	lower
----- policy is to cover the content.	school

The common thing in Tyler's model and Bloom's taxonomy is that the teachers observe the -----.	
The focus in IEP will be on the ----- of the learners rather on the content to be taught.	need
To write ----- is necessary, especially when we are going to start teaching.	performance
----- is basically an extended adaptation of a lesson plan.	IEP
----- are usually assessed through analysis method or through observation.	process
----- changes were made while revising Bloom’s taxonomy.	
Good textbooks provide ----- sequence of lessons.	structured
----- means that the disposition or learning you are talking about, you must value that disposition.	valuing

IEP is the abbreviation of -----.	Indiv edu plan
Lesson plan is a part of ----- plan.	unit
The best teachers apply planning -----.	flax
The individualized part of IEP means that the plan has to be tailored specifically to your child's special -----.	need
----- is something which indicates division of time.	all
Post lesson activities are related to -----.	evelatiton
We can do classifying in ----- children also.	
Learning is a permanent change in -----.	Behaviour
In ----- inquiry, students investigate topic-related questions that are student formulated through student designed/selected procedures.	
Historical drawings and paintings are used in ----- inquiry to stimulate questions.	historical
Andragogy means how ----- learns.	Children

----- inquiry involves the processes of searching for information and applying information to answer questions.	Designing instruction
Different countries have different age levels of ----- education.	informal
The important thing in ----- is what we know we must share it with others.	Problem solving method
Pedagogy means how to teach -----.	children
By the -----, a child has TWICE as many brain connections as an adult.	three
The solutions, alternatives or responses provided by learners are not found in -- -----.	textbook
----- are those which are linked with core	
concepts.	
Piaget spend ----- years to work on constructivism.	50
Most classroom ----- proceeds at too rapid a pace.	discourse
----- keeps students in passive roles.	Direct instruction method
If projects are ----- , they allow the learners to be immersed in one big idea.	Structured
In ----- the most important thing is assigning the tasks.	management
Roots of problem based learning are in -----.	Dialogue
Inquiry is a ----- technique.	
----- is very useful learner centered teaching and learning strategy.	Problem solveing
Aristotle talks about -----.	2
In project learning, performance is assessed on ----- basis.	indivial
----- is overall pattern.	
In ----- inquiry, teachers role is minimized.	Unguided
In cooperative lessons, ----- are oriented to the group as well as the individual.	
Inquiry may involve -----, procedure and solution.	

Students work in teams to master learning -----.	
Vygotsky was a----- Psychologist.	russian
The most important thing in thinking skills is to provide the -----.	information

FINAL TERM

1. **Discourse** is overall pattern.
2. Teacher must give his **feedback** before moving on to the next student or question.
3. **Scientific** method is often used in research.
4. In **cooperative learning** teachers have to be careful about their reward structure.
5. **Question** should be directive to the whole class.
6. **Gatekeeper**: equalizes participation
7. **Cooperative learning** teaching is how to grade for both team and individual efforts.
8. We must be able to exhibit our **feeling** in the classroom.
9. **Bruner** did not clearly divide these stages he kept them merged.
10. Cooperative learning should have cooperative tasks, cooperative **goals** and cooperative rewards.
11. Piaget spend actually **50 years** to work on constructivism.
12. Burner's first stage is **enactive**.
13. In **guided inquiry**, students investigate a teacher-presented question.
14. In **pre schools** pictures and model are not sufficient way of learning.
15. Andragogy means how **adults** learn.
16. **Performance assessment** can be used to measure students' problem solving potential as well as group work.
17. **Competitive goal structure**: It occurs when students perceive that they can obtain their goal if, and only if, the other students with whom they work fail to obtain their goals.
18. The most important thing in inquiry is **evidence**.
19. The focus of project learning is **product**.
20. **Group skills** are the skills with which students participate effectively in a group. E.g. readiness for action, sequencing a task, managing tasks, negotiation skills, communication skills, assessing skills or managing skills etc.
21. **Guided inquiry** involves the processes of searching for information and applying information to answer questions.
22. Having a critical spirit is as important as thinking critically. **Norris**
23. **Problem Based Learning** has its intellectual roots in the Socratic Method

24. Inquiry may involve problem, **procedure** and solution.
25. The **hypothesis** is an educated guess about the relationship between the independent and dependent variables.
26. The blue hat in the De Bono's six thinking hats symbolizes **thinking process**.
27. The green hat in the De Bono's six thinking hats symbolizes **creativity**.
28. According to Kolb (1984), Learning is a process of a combination of grasping **experience** and transforming it.
29. **Assimilation** leads to consideration of new options and points of view.
30. In **project learning** the focus is on ultimate outcome and product.
31. Students investigate topic-related questions that are student formulated through student designed/selected procedures. **Unguided inquiry**
32. In cooperative learning, **Reward systems** are oriented to the group as well as the individual.
33. The biggest limitation of cooperative learning is the **mindset**.
34. **Objective** type of items can be scored soon after.
35. Discussion is the exchange of **ideas**.
36. U-shaped seating arrangements facilitates **classroom discussions**.
37. Adventure projects may last for **weeks**.
38. The most important thing in thinking skills is to provide the **wait time**.
39. **Researchers** use word discourse with discussion method.
40. Recitation is **teacher centered** script.
41. If projects **are structured** properly, they allow the learner or groups of learners to be immersed in one big idea,
42. Teams are made up of **high, average and low achieving students**.
43. Students work in teams to master learning **goal**.
44. Learning is a **permanent** change in behavior.
45. Learners progress from specific observations to **inferences or generalizations**.
46. **Student Teams Achievement Division (STAD):** a cooperative learning classroom technique.
47. Knowledge can be assessed through **written tests**.
48. **Generative topics** are those which are linked with core concepts.
49. Whenever a particular behaviour is __ after a behaviour and the behaviour increases as a result, positive reinforcement has occurred.
50. Assigning different roles is a good thing in **jigsaw technique**
51. **Children** do not have attention span
52. Detailed implementation comes from **lesson planning**.
53. The last three level of Bloom taxonomy cognitive domain are called as.... **higher level of learning**

54. ... is a learning style in which learning takes place by the student carrying out physical activity. **Kinesthetic learning**
55. Mechanism indicate that child a....to do task by the following its mechanism. **Independent**
56. Who gave the theory of multiple intelligence **Harvard Gardner's**
57. Is the knowledge that is declared in books, research paper or newspaper **Declarative knowledge**
58. The term Is used while explaining multiple diversity among people **dyslexia**
59. The objective students will compare and contrast the cognitive and affective domain is an example of...is the level of cognitive domain **analysis level**
60. In education no formal certification is given at the end. **Informal**
61. means problems with reading, writing spelling symbols and numbers because the brain misinteruupts what it sees (visual) and hears **Dyslexia means**
62. Teaching is aprofession. **Noble**
63. There aretypes of instructional planning that are commonly used in school. **Six**
64. ."Write an appropriate tile for the text is an example ofcognitive domain. **Synthesis level**
65. Delecrative knowledge is more or less equivalent to Bloom category of learning outcome. **compehension**
66. Teacher is more interested in.... instead of conceptual change **covering the syllabus**
67. A teacher must useresources in a class **low cast**
68. Is knowledge is a step ahead of declarative knowledge **Procedural knowledge:**

Quiz no 2

The online quiz will be opened on 25th of January, 2021 and will be closed on 26th of January, 2021

- Humans can keep only ...unrelated pieces of information in their working memory at one time. **5-9**
- Which of the following is a commonly used teaching strategy which helps in developing space in working memory **elaboration**
- Brain develop very fast in theyear after birth **first**
-love integrated curriculum **Students**
- inductive mode of presentation is from.... **Specific to general**
- Teachers get little assistance from ----- publishers. **textbook**
- type of integration is related to shared integration .
- The most important part of integration is ----- **assessment**
- Advance organizer model is based upon which approach? **Deductive**
- The ----- curriculum is a great gift to experienced teachers. **integrated**
- If we will use the connections our efficiency of doing any task will ----- **increase**
- Children can come up with different ideas and teachers must ----- all ideas. **accept**
- Deductive and inductive are the modes of ----- **presentation**
- "Child is a natural discoverer" who gave this statement. **Bruner**
- We make the groups of the students of ----- **same interest**
- The average age for school-aged children is ----- **6 to 12 years**
- integration takes advantage of natural combinations. **Nested**
- in teachers don't need to follow all the things that are followed in concept analysis model. **advance organizer**
- of information is important. **Depth**

20.----- are basically ideas._____

21.M. Markus was a ----- who gave the definition of integration._____

22.

Concepts
teacher

QUIZ NO 1

1. social constructivism is present by _____ **Lev Vygotsky**
2. The domain encompasses objectives that deal with recall or recognition of knowledge. _____ **cognitive**
3. Which of the following is not metaphor for teacher? _____ **teacher Is a guider**
4.is not appropriate, if both sides of brain are not working appropriately. _____ **Learning**
5. Learning is there when teachers try to help learners change their -----instead of focusing on their own teaching. _____ **cognitive structures**
6. - is to teach certain content to the students. _____ **METHOD**
7. Teachers' complaint for shortage of time can be resolved through ----- . _____ **Unit planning**
8.are much economical and take less space in our working memory _____ **Images**
9. ----- is a short term planning. _____ **Lesson plan**
10. Holistic development means _____ **Complete development**
11. In this state of functioning, a teacher does not invite people to give you suggestions. There is no sharing of ideas _____ **Intentionally Disinviting**
12. A person with ----- need not have specialized knowledge of his trade. _____ **occupation**
13. How many key context are there in schooling? _____ **3**
14. Teaching is an activity to __ knowledge. _____ **Impart**
15. teachers want _____ **career growth**
16. complete formula for teacher growth . **Knowledge ++ Reflection = Growth** _____ **Experience**
17. Schools follow a certain ----- . _____ **curriculum**
18. ____ means that students may get any change in their behavior. **_behavioral perspective**
19. "Society for Pakistani English Language Teachers" organize different workshops for ----- . _____ **teachers**
20. ----- education has no regular curriculum. _____ **Informal**
21. Reflective Practice was introduced by ----- . _____ **Jean piajet**
22. Teaching has a ----- function. _____ **social**
23. What is the highest level of teaching development ? _____ **Intentionally Inviting**
24. Pedagogy is a study of _____ **teaching methods**
25.can lead development _____ **Learning**
26. Learning can lead ----- . _____ **development**
27. Vygotsky's theory about prior learning and social context included ____ major ideas. _____ **4**
28. Who believe that knowledge is actively constructed by learners? _____ **Nolan and francis**
29. ----- is not restricted to the schools. _____ **Collegial context**
30. Knowledge about different facts is ----- . _____ **stratified knowledge**
31. The warmth, respect and appreciation in the eyes of the ----- for the teacher are the actual recognition. _____ **students**
32. ____ is an ability to recall or recognize what has been learned or experienced _____ **Retention**
33. In this state of functioning teacher realize that you didn't know everything and they need development. help and advice from your colleagues _____ **Intentionally inviting**
34. Paulo freire was born in _____ **Brazil**
35. Teaching is a way of development certain ____ behaviors among students. _____ **desirable**
36. ____ is an organized body of knowledge. _____ **Science**

37. Teacher must give _____ for every students. _____ **feedback**
38. Schooling is not about a single person, it is a ----- . _____ **Group orientation**
39. stratified knowledge is the Knowledge about _____ **facts**
40. Knowledge is something that is learnt by reflecting, acting on something is called? _____ **"Subjective knowledge"**
41. Educators work to stimute _____. _____ **Spirit of inquiry**
42. To ----- is to change. _____ **Learn**
43. Teacher must give _____ given from the teachers maximizes students learning. _____ **Constructive feedback**
44. performance objectives are also known as objectives _____ **behavioral**
45. A is worth a thousand words _____ **picture**
46. Teacher has the autonomy of how to teach in a _____ **class**
47. A ----- needs extensive training and specialized knowledge. _____ **profession**
48. The level of to the profession must be to the range of every student _____ **commitment**
49. Teacher must share ideas with the students so that they can work for a change in --- _____ **society**
50. ----- is created when we act and reflect. _____ **knowledge**
51. Teacher is more interested in instead of conceptual change _____ **covering the syllabus**
52. Reflection is of ----- types. _____ **2**
53. At second stage of zone of proximal development, a child gets assistance from ----- _____ **self**
54. The reflection on every action at the same moment when the action is being taken is ----- _____ **reflection in action**
55. A ----- education comprises of a basic education that a person receives at school. _____ **formal**
56. Different cultures have different perceptions about ----- . _____ **education**
57. Precise statements written in the lesson plans about expectations from students are called _____ **Performance objectives**
58. If teacher play role like a gardener, and use the teaching strategies as a fertilizer than students grows like a: _____ **Seed**
59. Where there is silence, there is no ----- . _____ **learning**
60. At ----- stage of zone of proximal development, a child gets assistance from more knowledgeable other. _____
61. A teacher make education attractive for students by using teacher learning strategies _____
62. One will have more chance of being successful as a teacher if _____
63. Which of the following competency should be the most focused by Good teachers? _____
64. Which of the following is responsible for curriculum planning? _____
65. Curriculum guides actually give us a guideline about what to be taught in different --- _____ **grade levels**

MID TERM GRAND QUIZ/ 2020

1. Demonstration method is a very good method for learners _____ **visual**
2. Knowledge may be simply divided into forms _____ **two**
3. Nolan and Francis (1992) says Knowledge is actively by learners _____ **constructed**
4. Which of the following is based on Gagne's model. _____ **Hunter's model**
5. it means that whatever you teach the students, the students get it well _____ **Literal level**
6. When teacher provide feedback, the students their learning in mind _____ **reinforce**
7. are those which are prerequisite actually _____ **Independent enabling skills**
8. Holistic vision and detailed implementation are two main important component of which type of planning _____ **instructional**
9. Initial level of Psychomotor domain is _____ **Perception**
10. Gagne's plan include a sequence of particular "Instructional events". _____ **nine**

11. Which of the following is a commonly used teaching strategy which helps in developing space in working memory _____ **elaboration**
12. Students' tests indicate their _____ **learning.**
13. When teacher provides guidance to the students, this process is called _ **semantic encoding.**
14. an inferential statement that expresses a relationship between two or more concepts. _ **Generalization**
15. is a learning disorder that is characterized by a disturbances in rate of educational development _____ **Autism**
16. which domain is concerned with physical and motor domain _____ **Psychomotor**
17.is basically intuition _____ **Guessing**
18. ----- means that the disposition or learning you are talking about, you must value that disposition. _____ **valuing**
19. ----- policy is to cover the content. _____ **school**
20. Schools not only teach the students but alsothem. (Sausa,2003) _____ **raise**
21. Educators work to stimulate the _____ **spirit of inquiry**
22.is actually detailed form of unit plan. _____ **Lesson plan**
23. The objects through which light could not past are ----- objects. _____ **opaque**
24.helps to make learning more manageable. _____ **Sequence**
25. ____ means that students may get any change in their behavior. ____ **behavioral perspective**
26. The ----- focuses on what the learner will experience, rather than what the instructor will share or do. _____ **objective**
27. The statement "Write an appropriate title for the text" comes in the ----- level of cognitive domain. _____ **synthesis**
28. Every educational activity should have a ----- . _____ **goal**
29.is the gurantee of effective instruction and effective learning _____ **unit planning**
30. ____ is an organized body of knowledge. _____ **Science**
31. Much human behavior is learnt by observing the behavior of others _____ **Bandura**
32. There are ----- types of education in our society. _____ **two**
33. Every student has different ----- of learning. _____ **Potential**
34. ----- is a condition of partial or total impairment of sight or vision that even with correction affects educational performance adversely. _____ **Blind and Low Vision**
35. A ----- education comprises of a basic education that a person receives at school. _____ **formal**
36. There are ----- modeling processes. _____ **Four**
37. The statement " Summarize the story including its main idea" comes in ----- level of cognitive domain. _____ **Synthesis**
38. ----- cannot be separated from the social context in which it occur. _____ **Learning**
39. ----- are skill oriented things where our motor muscles are involved. _____ **Psychomotor domain**
40. Mechanism indicates that a child is -- to do a task by following its mechanics ____ **independent**
41. ----- is a readiness for action. _____ **Set**
42. At ----- stage of zone of proximal development, a child gets assistance from more knowledgeable other. _____ **second**
43. Research shows that teachers mostly focus on ----- hemisphere. _____ **left**
44. A teacher is responsible in the ----- development of a child. _____ **cognitive**
45. ----- thinking is outside the box thinking. _____ **Divergent**
46. ----- is also a conceptual change. _____ **Teacher growth**
47. In ----- education, no formal certification is given at the end. _____ **non-formal**
48. Dyslexia does not affect the ----- of a person. _____ **intelligence**
49. ----- activities are different from teaching activities. _____ **Learning**

50. The ----- domain encompasses objectives that deal with the recall or recognition of knowledge. _____ **cognitive**
51. ----- perform poor in mathematics and science. _____ **Girls**
52. Teaching is a ----- . _____ **profession**
53. Which type of diversity is related to Parental education, occupation and social status in the community? _____ **Socio economic**
54. Girls are less committed to ----. _____ **careers**
55. Learning that changes an existing conception is called ---- _____ **conceptual change**
56. The fast and foremost is consideration of a teacher being an/aof change. _____ **Agent**
57. Which is the broader term? _____ **curriculum**
58. Altering motor activities to meet demands of problematic situation is - _____ **Adaptation**
59. Objectives that represent the purposes of instruction of a teacher are called: _____ **Instructional Objective**
60. Different cultures have different perceptions about ----- . _____ **education**
61. Affective domain was developed by Bloom and Krathwohl in ----- . _____ **1964**
62. Schools follow a certain ----- . _____ **curriculum**
63. Lev Vygotsky's was born in ----- . _____ **Russia**
64. ----- is the name of degree that a person must get to join teaching profession. _ **B.ED/M.ED**
65. You will organize the ----- in such a way that you will ask them to first observe and then record. _____ **assessment**
66. The objective “The student will judge the effectiveness of writing objectives using Bloom's taxonomy” is an example of ----- level of cognitive domain. _____ **Analysis**
67. Good curriculum planning has two major components holistic vision and _____ **Detailed implementation**
68. ----- is not restricted to the schools. _____ **Collegial context**
69. IEP is the abbreviation of ----- . _____ **Individual Education Plan**
70. ----- is the domain where our body movements are involved. _____ **Psychomotor**
71. Teaching has a ----- function. _____ **social**
72. The term ----- is used while explaining multiple diversity among people. _____ **dyslexia**
73. ----- is the title of the whole unit. _____ **Unit/ subject**
74. The best teachers apply planning ----- . _____ **flexibly**
75. ----- plays an important role in child's learning. _____ **Language**
76. Vygotsky's theory of social constructivism includes ----- major ideas. _____ **Three**
77. Methods are also identified in ----- . _____ **instructional planning**
78. What we do in schools, we never focus on the ----- level of learning. _____ **higher**
79. To write performance objectives is ----- . _____ **necessary**
80. The process of sequencing of concept should be from: _____ **Simple to complex**
81. In this state of functioning, a teacher does not invite people to give you suggestions. There is no sharing of ideas. _____ **Intentionally Disinviting**
82. The action verbs that used for evaluation level questions are: _____ **Judge, verify, conclude**
83. ----- is basically an extended adaptation of a lesson plan. _____ **IEP**
84. The interesting thing is that our emphasis is on ----- . _____ **working memory**
85. It is important for the broader curriculum to identify educational ----- . _____ **experiences**
86. ----- is a fixed capacity. _____ **Intelligence**
87. Master teachers are ----- in their planning. _____ **well-organize**
88. You have to create a check list for assessing ----- skills. _____ **communication**
89. ----- is not appropriate, if both sides of brain are not working appropriately. _____ **Learning**
90. You must tell the students about the ----- processes they are learning. _____ **thought**
91. ----- is one of the famous models of curriculum development. _____ **Tyler's model**
92. Teacher must come up with at least ----- so that the students can understand the concept easily. _____ **one example**
93. Vygotsky was a ----- psychologist. _____ **Russian**

94. ----- is an ability to recall or recognize what has been learned or experienced. **Retention**
95. The warmth, respect and appreciation in the eyes of the ----- for the teacher are the actual recognition. ----- **students**
96. in -----, Bloom developed the taxonomy of cognitive domain. ----- **1956**
97. Individual educational plans are usually opposite to which of the following? ----- **Inclusion**
98. Detailed implementation comes from ----- planning. ----- **lesson**
99. The ----- of our colleagues is the foundation of power. ----- **esteem**
100. "Write an appropriate title for the text" is an example of ----- level of cognitive domain. ----- **Synthesis**
101. The concept of "Teaching is an Art", was developed by ----- in 1891. ----- **William James**
102. At second stage of zone of proximal development, a child gets assistance from -----
----- **more knowledgeable other**
103. Which of the following is the art of developing logical plan for instructional activities and has integrated steps? ----- **Sequencing**
104. Learning is a ----- process. ----- **social**
105. Age is the element of ----- diversity. ----- **physical**
106. ----- is change in behavior. ----- **Learning**
107. ----- is a teaching method where a teacher presents concepts and procedures. ----- **Presentation**
108. Teacher should remain relaxed while doing ----- **brainstorming**
109. Paulo Friere was born in ----- **1921**
110. Children construct their own ----- **knowledge**
111. First level of Affective Domain is ----- **Receiving**
112. Post lesson activities are related to ----- **evaluation**
113. Deductive and inductive are not only the modes of presentation but modes of -----
also. ----- **experiments**
114. It was ----- century in which perceptions about teaching, learning and education were developed. ----- **16th**
115. Curriculum guidelines are consists of ----- **Learning outcomes**
116. ----- are those skills which are required to achieve a certain goal. ----- **Enabling skills**
117. Idea of "teaching is an art" was developed by ----- **William James**
118. Sequencing steps are in progression, they start from simple to ----- **Complex**
119. Ministry of education has planned curriculum document till grade level: ----- **12**
120. The individualized part of IEP means that the plan has to be tailored specifically to your child's ----- **special needs**
121. Immersion model was developed for ----- diversity. ----- **Language**
122. Procedural knowledge is gained through ----- **direct instruction**
123. Learning is there when teachers try to help learners change their ----- instead of focusing on their own teaching. ----- **cognitive structures**
124. In ----- level of cognitive domain, students recall their knowledge. ----- **Synthesis**
125. Hierarchy of Affective domain was developed by Bloom and Krathwohl in ----- **1964**
126. Who gave this statement" Less planning leads to less learning" ----- **Walsh**
127. While writing performance objectives, we have to use an action word that exactly shows the ---
----- **Behavior**
128. In information processing theory working memory is also termed as which type of memory? ----- **Short term**
129. Teachers have to identify the ----- to monitor the progress of the students. ----- **methods**
130. ----- is also known as concept map. ----- **Graphic organizer**
131. instructional objective are ----- than goal -----
132. Which of the following is the focus of the Individual Educational Plan (IEP)? -----
133. The knowledge that consists of facts, concepts and generalization is termed as -----
134. In art class a student paints a new and original painting. Which will be cognitive level of this outcome according to Bloom's taxonomy? -----

135. Whenever there is evaluation, there must be -----.
136. A ----- is a figure of speech describing something with implied terms. -
137. The thinking process which requires focused attention as compared to others: ____

QUIZ NO 2

66. Educators work to stimulate the spirit of **inquiry** and acquisition of knowledge.
67. **Facts or principles** that he has memorized by learning.
68. Every student has different **potential** of learning.
69. **Reflective practice** is a way of studying your own experiences to improve the way you work.
70. Zone of proximal concept was also established by **Vygotsky**.
71. This professional standard demands from us to create a climate that promotes **the Professional judgment**.
72. Teacher has the autonomy of how to teach in a **class**.
73. **Task analysis** model is a very important model of learning.
74. Idea of "Teaching is an Art", was developed by **William James in 1891**.
75. Knowledge about different facts is **stratified knowledge**.
76. Teaching has a very important **social function**.
77. Planning is important as there are three characteristics of **master teachers**.
78. **Intentionally inviting:** This is the highest level of your teaching development.
79. Knowledge is created, when we **act and reflect**.
80. Modes of presentation are **two** i.e. Inductive and deductive.
81. Nothing is learnt unless it is in **long term memory**.
82. To achieve the learning outcomes of every unit, we have to construct **some instructional objectives**.
83. While **writing performance** objectives, we have to use an action word that exactly shows the behavior.
84. In **horizontal level**, planning includes selection of activities, resources, assessment and homework.
85. In **vertical level**, it includes link between standards, benchmarks, learning outcomes and instructional objectives
86. **Intellectual growth** cannot take place unless we do not provide opportunities to our students to think at high level.
87. There are **three** foundations of curriculum: sociological, philosophical and psychological.
88. **"Analysis level** questions are higher-order questions that require students to think critically and in depth.
89. The art of developing logical plan for instructional activities is called '**sequencing**'. Such a plan consists of interlink steps.
90. **The taxonomy** has been widely used in curriculum and test construction. From google
91. **Learn skill of observation** then actually inductive mode of presentation is better than deductive mode of presentation.
92. Sequence helps to make learning more **manageable**.
93. **Comprehension level** of cognitive "Describe two nation theory".
94. **Holistic vision** comes from curriculum planning while detailed implementation comes from lesson planning.
95. **In curriculum planning**, assessment is taken into consideration.
96. Asking question is **a skill**.
97. Questions of students are **more important than the questions** of teachers.
98. **Curriculum documents** are not available in all schools.
99. Individual Education Plans (**IEP**)

100. The common thing in Tyler's model and Bloom's taxonomy is that the teachers observe the behaviors
101. Content knowledge is a very important competency of a teacher.
102. Processes are also very important in teachers' considerations.
103. Sequencing has different principles; these principles are the introduction of simple concepts then concrete examples.
104. Writing Standards and benchmarks in a sequence in Curriculum Planning.
105. Action research is very effective research for teachers, because it aims at improvement.
106. Origination is the highest level of Simpson's hierarchy.
107. Lesson plan starts with the subject.
108. There are different mechanics to do different things.
109. Good textbooks provide a structured sequence of lessons.
110. Working memory is our conscious memory.
111. Sequencing steps are in progression. They start from simple and go to complex.
112. Origination is the level where a child can originate things on his own.
113. Write performance objectives is necessary.
114. In order to teach a sequenced lesson teacher need to add complexity to the lesson.
115. Unit planning is the most important as well as the most time-consuming level of planning for each teacher. gave the idea by Waish
116. Sentence formation is a prerequisite for paragraph writing.
117. We have limited time to teach in a class.
118. Bloom's Taxonomy was knowledge level or recall level, where actually students recall their knowledge.
119. You will organize the experience in such a way that you will ask them to first observe and then record.
120. Teacher must come up with at least one example so that the students can understand the concept easily
121. Content forms are three: Facts, Concepts Generalizations
122. A lot of information can be communicated through a picture.
123. Lesson plan is actually detailed form of unit plan.
124. Abstract thinking is very important
125. Curriculum guides are planned by Ministry of education in Pakistan.
126. Questioning has a lot of significance value.
127. An important thing in inductive mode of presentation is Process.
128. Enabling skills are those skills which are required to achieve a certain goal.
129. The individualized part of IEP means that the plan has to be tailored specifically to your child's special needs.
130. Content and Processes are also very important in teachers' considerations.
131. Whenever we are sequencing, we need to know what a prerequisite for a particular terminal objective is.
132. The focus in IEP will be on the needs of the learners rather on the content to be taught.
133. In debriefing teacher tells the students to reflect what they have learnt through this process.
134. Elements of planning 11.
135. Simulations are done in the virtual environments and are computer based.
136. Discovery learning is a learner-centered method.
137. Group processes and the classroom goal, task, reward and participation structures are more directly under the teachers' control.
138. Classroom structures are the foundations that shape particular lessons and behaviors during those lessons. Three important structures include task, goal, and participation structure.
139. . Synthesis level Summarize the story including its main idea.

140. There are **four** steps in Taylor's model of curriculum
141. Write an appropriate title for the text.. come from **Synthesis level**.
142. We need to sequence our **learning objectives**.
143. Adding on must not be **confusing**.
144. Instructional aims: **Student-oriented**.
145. If a teacher plans to take the students for field trips, then he needs to consider **school resources**.
146. **Abstractions** are something which is not tangible.
147. Lesson is a piece of a unit NOT a **block of time**.
148. **Learning activities** are those where students are actively involved.
149. **Effective individual education plans** (IEP) have key characteristics. They are Individualized and child centered.
150. **Girls** perform poor in mathematics and science.
151. Teacher is a **person** who is making lesson plan, unit plan and term plan.
152. A lesson plan is defined as "a **systematic design** for the development, implementation and evaluation of instruction".
153. . What we do in schools, we never focus on the **higher level** of learning.
154. The common think in Tayler and Bloom taxonomy is that to teacher the **behaviors**.
155. Methods are also identified in **instructional planning**.
156. **In evaluation**, we discuss that there are two things; criteria and method.
157. Where there is silence, there **is no learning**.
158. **Metacognition**: is cognitive about cognition.
159. You have to create a check list for assessing **communication skills**.
160. The other name for Learning by reflection is **Socratic Method**.
161. **Master teacher** communicate their instructional objectives effectively to the students.
162. Linear fashion focus **on goals**.
163. Nonlinear fashion focus on **process**.
164. **Negative reinforcement** occurs when something already present is removed (taken away) as a result of a person's behavior.
165. Gagne expands the steps of introducing and organizing experience to include a sequence of nine particular "**Instructional events**".
166. Teachers have to identify the **methods to monitor** the progress of the students.
167. Whenever we are **planning a unit**, we really need to select these learning activities very carefully. And we need to make a match between processes and learning activities.
168. The interesting thing is that our emphasis is **on working memory**.
169. Lesson plan is part of the **unit plan** while activity schedule is part of the block timetable.
170. **Performance objectives**, there are the three elements present i.e. performance condition and criterion.
171. **Performance objective** we need to align our performance objectives with the curriculum.
172. **Subject/ topic** Unit subject is the title of the whole unit.
173. **Unit planning** is important because we need to know the reasons for dividing the whole thing into components. Most of the times, teachers' complaint for shortage of time.
174. There are **three** levels of plans.
175. **Collegial context** is not restricted to the schools rather now it has become web based
176. There are **6 levels** of Bloom's taxonomy of cognitive domain.
177. **Feeling of efficacy** is very important for the teachers
178. It is our assumption that independent skills are prerequisites, so students know them already.
179. Less planning leads to less learning. **(Walsh, 1992)**.

180. **Collegial context** is something that emphasizes that power and decision-making should be shared among some or all members of the organization (**Bush, 2003**).
181. **Keeping notes** is a very important type of post lesson activity because a teacher can have the record of his/her teaching.
182. Knowledge forms are **Content, Process**.
183. **Mechanism indicates** that a child is independent to do a task by following its mechanics.
184. **Unit planning** is very challenging and time consuming but the most important thing is that good unit planning is a guarantee to effective instruction and effective learning.
185. **Schools' policy** is to cover the content as much as possible.
186. Evaluate your teaching, come up with judgments but provide sufficient evidence to support your statement.
187. **Declarative knowledge**: This is the knowledge that is declared in books, research papers, and newspapers.
188. 124. According to research, the best **recognition** is got from students and not from the government or the school administrators.
189. **Blind and Low Vision** – A condition of partial or total impairment of sight or vision that even with correction affects educational performance adversely.
190. **Active learning**: Active learning is where human mind is actively involved in constructing meaning of the experience.
191. **Freire** was a Brazilian educator and philosopher who was a leading ...
192. **Freire was born on September 19, 1921** to a middle-class family in Recife, Pernambuco, **Brazil**.
193. Teacher is more interested in **covering the syllabus** instead of bringing conceptual change in the students.
194. **Science** is an organized body of knowledge.
195. Answering some key questions to create an image of the classroom teaching and learning."
Reflective practice:
196. **Reflective practice** is very important for a teacher.
197. **Nolan and Francis (1992) believe that**: Knowledge is actively constructed by learners.
198. **Learning is there when teachers try to help learners change their cognitive structures instead of focusing on their own teaching.**
199. "Much human behavior is learnt by observing the behavior of others (**Bandura 1978**)
200. **Zone of Proximal Development (ZPD)**
201. The gap between actual and potential level of a child is **Zone of Proximal Development**
202. **Cognitive perspective** is to develop students' academic and thinking skills from a novice level to a more expert level.
203. Speech is a powerful psychological tool that lays the foundation for basic structures of thinking later in one's development.
204. According to **Vygotsky's theory**, language, learning and environment is a social context.
205. Creativity is also a part of **metacognition**
206. Learning depends on **prior learning**
207. Schools not only teach the students but also raise them. (**Sausa,2003**)
208. What students are taught in schools affects the ways they will thereafter see and treat others. (**Schlesinger, 1993**)
209. **CAP**: Cognitive, Affective and Psychomotor
210. **Psychomotor domain** is the domain where your body movements are involved.
211. Perception means **attending to a stimulus**.
212. Set is a readiness for **action**.
213. **Word 'complex'** shows that here the child can do many things independently.
214. 1Adaptation comes from the word '**Adapt**' which means to set yourself in the given situation.
215. **Hierarchy of affective** domain was developed by Bloom and **Krathwohl in 1964**.

- 216. In organization, you start showing that behavior but that is not a **consistent behavior.**
- 217. “Taxonomies may be used to decide what to teach, how to teach and how to evaluate teaching.” **(Marzano, Pickering, and Pollock 2001)**
- 218. Research shows that learning do not take place if presented in isolated items **(Hohn,1995)**
- 219. Taxonomies provide a **cognitive structure.**

MID TERM

- 220. Who presented the multiple intelligence theory? _____ **Harvard Gardner**
- 221. How many levels Bloom’s taxonomy? _____ **6**
- 222. What is concept map? _____ **Graphic organization**
- 223.formation is a prerequisite for paragraph. _____ **Sentence**
- 224.identifies classroom assessment criteria. _____ **Teacher**
- 225. Art of developing logical plan for instructional activities is called? _____ **“Sequencing”**
- 226. Methods are also identified in... ? _____ **“Instructional planning”**
- 227. Good Textbooks provide sequence? _____ **“Structured sequence of lessons”**
- 228. Knowledge has forms? _____ **“Two”**
- 229. Knowledge is something that is learnt by reflecting, acting on something is called? _ **“Subjective”**
- 230. A child knows about own cogitation is called? _____ **“Metacognitive knowledge”**
- 231. 12. Memorized things in? _____ **“Facts”**
- 232. Task analysis model is a very important model as it helps the teacher to identify __ **prerequisites.**
- 233. The process of setting goals, developing strategies is _____ **planning.**
- 234. We discuss criteria and method in _____ **evaluation.**
- 235. The individualized part of IEP means that the plan has to be tailored specifically to your child's _____ **special needs.**
- 236. A unit plan is aof lesson plans. _____ **hierarchy**
- 237. Methods are also identified in instructional planning _____ **Student-oriented.**
- 238. is basically an extended adaptation of a lesson plan. _____ **IEP**
- 239. We can remember those things which are connected with our _____ **prior learning.**
- 240. **Adolescence** is a time of profound brain growth.
- 241. Advance organizer model is based upon **deductive learning.**
- 242. Nonlinear fashion focus on **process**
- 243. Brainstorming is a common tool to **describe** a thing
- 244. The white hat in the De Bono’s six thinking hats signifies **information known or needed**
- 245. **Teacher** model skill in direct instruction
- 246. **Network** integration is created among group of students
- 247. Teacher role is minimized in **unguided** inquiry
- 248. In United States, pre-school is named as **pre K**
- 249. **Gatekeeper** equalizes participation

250. Generative topics actually make **connections**
251. **Divergent** thinking is outside the box thinking
252. The learning of **core concepts** is lifetime
253. Different countries have different age levels of **formal** education
254. Children can come up with different ideas and teachings must **accept** all ideas
255. **Children** construct their own knowledge
256. Our teachers do not focus on **core concept**
257. Objects must be in the form that it can be **measured**
258. **British** preschool name Nursery School or simply “nursery”
259. **United States** preschool name pre-school and pre K
260. Child is a natural discoverer. **Bruner**
261. By the **three**, a child has TWICE as many brain connections
262. In order to start working, the cells need to **communicate** with each other
263. A research was conducted and it was reported that teachers mostly focus **hemisphere** of children.
264. For creativity **divergent** thinking is very important.
265. Different types of -functions occurs in the left and right hemisphere **Mental**
266. The networked methodology of integration is **Student centered**
267. Asking question is a **Skill**
268. Brain development continues till the age of **8**
269. We can remember those things which are concerned with our **Right side memory**
270. Integration means putting things **Together**
271. Advance organizer model is based upon **Deductive learning**
272. **Case method is** a very good approach to know problem solving.
273. .Pedagogy means how to teach **Students/**
274. Core concepts are **declarative** knowledge
275. Development cannot be separated from the **social** context in which it occurs
276. Development of **gross motor** skills is very important in preschool or early childhood education
277. **Children** construct their own knowledge.
278. John dewy says that there is no such profession where **knowledge** is separable from doing or practice.
279. **Application** of core concepts in new level is important
280. In **left** hemisphere there is logical thinking. Verbal intelligence and convergent thinking
281. Teachers want to teach in **depth** but want to cover the syllabus too
282. **Curriculum** is a dead thing teacher's give life to it.
283. **Researchers** use the word discourse for discussion
284. Teachers must provide the students with opportunities to **discover** things

285. **Performance assessment** can be used to measure student's problem solving potential as well as group
286. Knowledge can be assessed through **written tests**
287. Usually we do not **question** our tradition and authority
288. Wait time is **thinking** time
289. The last level of Maslow's hierarchy of need is **Self-actualization**
290. **Socratic** Method is the example of discussion method
291. **Edison** invented the bulb
292. Projects tend to be **multidimensional**
293. Different types of **mental** functions occur in the left and right hemisphere.
294. Pedagogy means how to teach **children**.
295. Advance organizer model is based upon **Deductive learning**.
296. **Case method** is a very good approach to know problem solving.
297. Andragogy means how _ learn. **Adults**
298. Beyer says that critical thinking has **two** important dimensions.
299. The inquiry learning cannot be **rushed**
300. **Learners** are responsible for planning. Conducting and evaluating their own effort
301. Process of **assimilation** leads to consideration of new options and points of view
302. **Assimilation** leads to consideration of new options and points of view
303. According to Kolb (1984), learning is a process of a combination of grasping **experience** and transforming it.
304. Curious observation is the start of the **inductive process**
305. **Students** love integrated curriculum
306. What type of goodwill message is most likely to use an RSVP? Condolence, **invitation**, appreciation, holiday greeting,
307. Generative topics actually make ___ schemes, **connections**, procedure or assessments
308. Schooling average age.... **4/ 3**
309. we are concerned by student.... achievement. **Team**
310. Understand is in.... Level. **First/ conceptual**
311. focus discussion and disposition.
312. Scientific method.... research. **Roots/Psychology/authentic**
313. **Theory** can be falsified.
314. **Perception** means attending to a stimulus

PAST GRAND QUIZ

We have limited time to teach in a -----.	class
---	-------

----- means problems with reading, writing, spelling, symbols and numbers, because the brain misinterprets what it sees (visual) and hears (auditory).	Dyslexia
To write performance objectives is -----.	necessary
Age is the element of ----- diversity.	physical
Teachers must communicate their ----- to the students.	Experiences
The term ----- is used while explaining multiple diversity among people.	dyslexia
The statement “The student will define the 6 levels of Bloom's taxonomy” is an example of ----- level of cognitive domain.	Knowledge
Who gave this statement: “Having a critical spirit is as important as thinking critically”.	niam
In -----, planning includes selection of activities.	horizontal level
in -----, Bloom developed the taxonomy of cognitive domain.	1956
A teacher needs to know the ----- level of the students.	Motivational
Objectives have a ----- purpose.	Limited
----- is a readiness for action.	Set
----- are intent of teaching.	Objectives
The prescription of a minimally acceptable level of a performance on the part of a learner is called -----.	Criterion measure
Taxonomies provide a ----- structure.	cognitive
While writing performance objectives, we focus on the -----	action words
In performance objectives, all the ----- elements must be present.	three
While writing performance objectives, we have to use an action word that exactly shows the -----.	performance
----- is the highest level of Simpson's hierarchy.	Origination
Curriculum documents are not available in all -----.	schools
----- is the guarantee of effective instruction and effective learning.	Unit planning
While -----, you have to see the curriculum framework.	yearly planning
The statement "Write an appropriate title for the text" comes in the ----- level of cognitive domain.	synthesis
Altering motor activities to meet demands of problematic situation is -----.	Adaptation

A content is consisted of -----.	Facts - Concepts - Generalizations ALL
The ----- focuses on what the learner will experience, rather than what the instructor will share or do.	objective
The term ----- is actually a teacher who has expertise on his subject and he ensures the quality learning of the students.	Master teacher
The last three levels of Bloom’s taxonomy of cognitive domain are called as ---- -----.	Higher level of learning
The statement of an observable behavior on the part of learner is -----.	performance
Methods are also identified in -----.	instructional planning
Every educational activity should have a -----.	goal
The objective “The student will compare and contrast the cognitive and affective domains.” is an example of ----- level of cognitive domain.	Comprehension
The ----- has been widely used in curriculum and test construction.	taxonomy
You must tell the students about the ----- processes they are learning.	thought
The prescription of a minimally acceptable level of a performance on the part of a learner is called -----.	Criterion measure
----- is a disorder in language formation that may be associated with neurological, psychological, sensory or physical factors.	Speech impairment
Who gave this statement: "Schools not only teach the students but also raise them."	Sausa

Who gave this statement" Less planning leads to less learning"	Walsh
"Unit planning is the most important as well as most time consuming level of planning for each teacher" who gave the above statement?	Walsh
Girls are less committed to ---	careers
----- knowledge is a very important competency of a teacher.	Content

_____ plays an important role in child’s learning.	language
Information used as evidence or as part of a report or news article is called _____	fact
Students _____ indicate their learning.	tests
Children construct their own _____.	Knowledge
A teacher is responsible in the _____ development of a child.	cognitive

Lev vygotsky’s was born in _____.	Rusia
Idea of “teaching is an art” was development by _____.	William james
Teacher can manage different _____ in school for ethical development of a child.	Activities
A profession has a body of _____.	techniques
The role of a teacher is a changed from a lecturer to _____.	An agent of transformation
Learning is a _____ process.	social
development/learning cannot be separated from _____ in which it occur.	Social context
Learning is a_____ endeavor.	social
In _____ teachers do not have autonomy or the power of decision making.	pakistan
Who gave the theory of multiple intelligence.	Howard gardner
_____ education has a structure systems of learning.	formal
A view or opinion that is incorrect because based on faulty thinking or understanding is a _____.	misconception

_____ model is an important way of learning.	Observational learning
The role of a teacher is changed from a lecturer to _____.	An agent of transformation
A profession allows_____.	autonomy
Education that is not given in proper schools is _____.	Informal education
_____ greatly influences learning.	Prior knowledge
Different cultures have different perception about _____.	education

___ knowledge is acquired, if a child gets cognition about cognition.	metacognitive
___ are something that is memorized.	Facts
Who gave this statement “knowledge is created when we act and reflect”?	friere
___ is the procedure to gain declarative knowledge.	lecturing
Lev vygotsky died at the age of ___.	37
The first process in modeling is ___.	Alternation
Howard Gardner is very famous because of his ___.	Multiple intelligence theory
___ is very important for a teacher.	Reflection in practice
___ is important but it does require time.	Conceptual change
___ context of school is “characterized by or having power and authority vested equally among colleagues.”	collegial
Paulo freire was born in ____.	1921
The idea of “teaching is an art or science “was developed in __ by william james.	1891
----- activities are different from teaching activities.	Learning activities
---- is a series of small action steps which are needed to achieve desired goals.	Objectives:
"Describe the two nation theory" comes in ----- level of cognitive domain.	Comprehension:

----- means that a behavior becomes part of your life.	Characterization
----- comes from curriculum planning.	Holistic vision
The objects through which light could not past are ----- objects.	opaque
A unit plan is a ----- of lesson plans.	Series
There are ----- steps in Taylor's model of curriculum.	four
It is important for the broader curriculum to identify educational -----.	experiences
----- is the title of the whole unit.	Unit subject

There are ----- necessary elements of planning.	11
A teacher needs to know the ----- level of the students.	motivation level
There are ----- types of communication disability.	2
Master teachers are ----- in their planning.	well-organized
Curriculum is a ----- term.	Broad
----- is essentially a nested process with horizontal and vertical dimension.	Planning
Elements of physical diversity are -----.	3
----- is a planning of one year of a school.	Long term Planning
A teacher needs to know the ----- level of the students.	Motivational
Detailed implementation comes from ----- planning.	lesson planning
Students' ----- must be considered before planning.	feedback
Terms in revised Bloom's taxonomy were changed from noun to -----.	adjectives
----- is the highest level of Simpson's hierarchy.	Origination:

Teachers must communicate their ----- to the students.	Ideas
The prescription of a minimally acceptable level of a performance on the part of a learner is called -----.	Criterion measure:
We have limited time to teach in a -----.	
There are ----- domains of learning.	three
Benchmarks and standards are written in a sequence in -----.	instructional
We have to identify the facts, concepts and generalizations while planning a ---- ----.	a unit
Bloom's taxonomy was revised by -----.	William
Teaching activities are there to teach ----- to the students.	content

----- identifies classroom assessment criteria.	teacher
----- is the gurantee of effective instruction and effective learning.	d unit planning

There are different ----- to do different things.	mechanics
The objective “The student will judge the effectiveness of writing objectives using Bloom's taxonomy” is an example of ----- level of cognitive domain.	Analysis
----- planning is very challenging and time consuming.	unit planning
"Abstract thinking leads to reasoning with symbols" this refers to ----- stage of Piaget's cognitive development.	Formal operational
----- do not have attention span.	Children
If we will use the connections our efficiency of doing any task will -----.	increase
Questions in ----- also includes in essential questions.	induction
In order to start working, the cells need to ----- with each other.	communicate
Teacher must ensure ----- development of child.	holistic I
Brain develop very fast in the ----- year after birth.	first
Learners can learn only ----- chunks of information at a time.	5-9
Remarkable changes occur in the brain during the ----- decade of life.	second
A teacher can teach higher order thinking skills through the ----- process.	
----- is a time of profound brain growth.	Adolescent
----- should be made clear to the students.	Core concepts
A ----- year old child has the vocabulary of 2000 words.	
The average weight gain of 6-12 years children in a year is -----.	5-7

Fragmentation is said to be the ----- level of integration.	primary
Core concepts are ----- knowledge.	declarative
Teaching is very exciting for ----- teachers without integration also.	young
In the context of preschool it includes ----- stages of Piaget's cognitive development.	2
Children can come up with different ideas and teachers must ----- all ideas.	accept
----- have no obvious right answer.	essential Questions
John dewy says that there is no such profession where ----- is separable from doing or practise.	knowledge
Generative topics actually make -----.	connections.
Jumping is the example of -----.	Gross motor
The networked methodology of integration is -----.	student-centered
----- always identify their intent.	Teachers
Teachers want to teach in ----- but want to cover the syllabus too.	depth
Child’s rights convention of 1989 has mentioned that “----- is basic right of every child.”	Education
Form 1 is ----- integration.	
The green hat in the De Bono’s six thinking hats symbolizes -----.	creativity
----- are those things that can be changed.	Variables
Group learning will be more efficient for developing the -----.	idea
Bruner’s first stage is -----.	Enactive”

‘Collecting data’ is the ----- step of Guided Inductive Inquiry.	
According to Kolb (1984), ----- is a process of a combination of grasping experience and transforming it.	), Learning

The word scientific was devised in the -----.	19
The black hat in the De Bono’s six thinking hats symbolizes -----.	judgment
Usually we do not ----- our tradition and authority.	question
----- invented the bulb.	Edison
Bruner’s second stage is -----.	“Iconic
The red hat in the De Bono’s six thinking hats symbolizes -----.	feelings
Problem based learning starts from -----.	Analysis
----- characteristics of critical thinking are presented by Wade (1995).	
Inquiry is NOT about -----.	memorizing facts
During guided inductive inquiry, the ----- plays the key role in asking questions.	teacher p
Problem based learning also starts from -----.	Questions
There are ----- processes of inquiry.	13
The term ‘Six Thinking hats’ was presented by -----	De Bono
The ----- is an educated guess about the relationship between the independent and dependent variables.	Hypothesis
Students will make generalizations that are too -----.	broad
The solutions, responses provided by learners are not found in -----.	textbooks

Children produce their original work after -----.	problem based learning
Inquiry may involve -----, procedure and solution.	Problem
----- are responsible for planning, conducting and evaluating their own efforts.	Learners
Scientific method can be used in ----- also.	social sciences
Roots of the ----- of all social sciences is based on scientific method.	research

In school we do not have much time to deliver information so we must know the -----.	
The most important part of integration is -----.	assessment
----- thinking is a disciplined manner of thought that a person uses to assess the validity of something.	critical thinking
----- talked about logics and he was one of the pioneers.	Aristotle
----- of information is important.	depth
Inquiry is NOT a ----- technique.	Hypothetical
----- love integrated curriculum because it provides the context for learning.	Children
Group learning develops ideas and -----.	
Learners progress from specific observations to -----.	inferences
The brain thrives on -----.	connections
During guided inductive inquiry, the ----- plays the key role in asking questions.	teacher
Inductive inquiry is of ----- types.	2
According to Kolb (1984), Learning is a process of a combination of grasping --- ----- and transforming it.	Experience
Inquiry may involve problem, ----- and solution.	procedure

In ----- , students investigate a teacher-presented question.	Guided inductive
Students must learn to modify their -----.	conclusions
----- is a permanent change in behaviour.	learning
----- are much important in scientific method.	variables
Paper pencil tests can assess the ----- of the students.	
Inquiry method requires the learner to develop ----- associated with inquiry.	various processes
----- inquiry is widely used in our classroom settings.	Information inquiry

Learners progress from ----- observations to inference or generalizations in GII.	specific observations
----- is the domain where our body movements are involved.	Psychomotor
----- is actively constructed by learners.	Knowledge
Idea of "teaching is an art" was developed by-----.	William James
is a learning style in which learning takes place by the student carrying out a physical activity.	Kinesthetic learnin

growth cannot take place unless we do not provide opportunities to our students to think at high level.	Intellectual growth
The theory of Zone of proximal development was given by -----.	Vygotsky
A child is responding in the form of action but this action is not an independent action is a -----.	Guided Response
means the knowledge about how to teach the students.	pedagogical knowledge
There are ----- types of education in our society.	2
Learning is ----- by nature.	social
----- includes all intellectual skills.	Cognativbe domaon
According to research, the best recognition teachers got is from the -----.	students
There are ----- types of intellectual disability.	
Developing questioning skills among students comes in	Higher thinking levels:
means attending to a stimulus	Perception
Who gave this statement: “Knowledge is created when we act and reflect”?	Friere:

----- is the level where a child can originate things on his own.	origination
“Write an appropriate title for the text” is an example of ----- level of cognitive domain.	Synthesis level
Teaching is a ----- profession.	noble

The objective “The student will construct an instructional objective for each level of Bloom's taxonomy” is an example of ----- level of cognitive domain.	
A teacher is a -----.	Change agent
is to teach certain content to the students	METHOD
cannot be separated from the social context in which it occur	Learning
It was ----- century in which perceptions about teaching, learning and education were developed.	16th century
education has a structured system of learning	formal
Knowledge is actively constructed by	learners
A teacher must use ----- resources in a class.	Low cost
An educator must work to stimulate the spirit of ----- among the students.	f inquiry
What we do in schools, we never focus on the ----- level of learning.	higher level
Hierarchical levels of Simpson' Psychomotor domain are	7
The level of ----- to the profession must be to the range of every student.	commitment
is the mean of creating a dialogue	reflection
----- is the knowledge that is declared in books,	Declarative knowledge

research papers or newspapers.	
----- is the level of understanding.	Comprehension
Teachers need to know the ----- level of students.	
We must plan unit before -----.	lessons.
While evaluating teaching or students’ learning, you should always come up with judgements based on -----.	t evidence
Planning serves a guide to -----.	action.
Lesson is a piece of a unit NOT a block of -----.	time

The process of setting goals, developing strategies is -----.	Planning
In evaluation we discuss --- things.	two
Process cannot be isolated from -----.	All of abouve
IEP is basically ----- adaptation of lesson plan.	extended
If a teacher plans to take the students for field trips, then he needs to consider - -----.	schools” resources
Performance objectives must be aligned with -----.	curriculum
----- research is very effective research for teachers because it aims at improvement.	Action
The learning of ----- is lifetime.	core concepts
The average height growth of 6-12 years children in a year is -----.	

Learner can process only about one new idea or concept every ----- second.	ten
In ----- books there is a lot of information than Japanese and German books.	American
A preschool child of 36 months can now hold ----- different emotions in his mind at the same time.	two
----- education is different from other education.	Pre-school and infant educations
Generative topics are generated from -----.	leant information
----- need to be interesting for the teachers as well as for students	Generative topics
----- integration method overlaps concepts as organizer.	shared
"Child is a natural discoverer" who gave this statement.	Bruner
----- are related to the lives of people.	Essential questions
In United States, pre-schooling is named as -----.	Pre-school
Learning depends upon the -----.	environment

The idea in ----- thinking is that no idea is a stupid idea.	divergent
Essential questions are related to the ---- of people.	lives
Brain development continues till the age of -----.	8
----- teacher should integrate two or three subjects so that we can save the time.	Primary school
Core concepts are central to the domain of -----.	knowledge
Integration means putting things -----.	together
Because of integration it will be easier to ask -----.	essential questions

----- are most important persons in the application of curriculum.	Teachers
In British English, pre-schooling is known as -----.	nursery
----- construct their own knowledge.	Children
There are ----- physical developmental milestones used in pre-schooling.	
----- needs to be an integral part of early years of education.	Story time
----- are unique to every individual.	Experiences
Teachers mostly concern about -----.	completion of syllabus
Form 3 focuses on the integration of subject knowledge with -----.	Student's Interest
Bigger ideas are our assumptions and -----.	belief
----- theory is very much applicable in early childhood education.	Vygotsky
The ----- curriculum is a great gift to experienced teachers.	integrated
passive rolesResearch has now determined that remarkable changes occur in the brain during the ----- decade of life.	second
Development cannot be separated from the -----context in which it occurs.	social

By the age -----, a child has TWICE as many brain connections as an adult.	
Gross motor and fine motor development is involved in -----.	Physical development
M. Markus was a ----- who gave the definition of integration.	

Which needs does a primary reinforcer satisfy?	Food oxygen warmth watre
Teachers get little assistance from ----- publishers.	textbook
The brain is not complete at -----.	birth
Essential questions require ----- thinking.	divergent
----- type of integration is related to shared integration.	sequenced
Networked integration is created between the -----.	learners
----- is a dead thing teachers give life to it.	Curriculum
We need to integrate the knowledge with ----- skills.	practical
----- is a conceptual commitment.	Essential question
Through ----- it will be easier for the children to ask essential questions.	integration
Different countries use different names for pre-schooling, but the umbrella term for it is -----.	Early Childhood Education
There are ----- stages of Piaget's cognitive development.	4
Vygotsky's theory includes ----- major ideas.	four
Our teachers do not focus on -----.	core concepts.
----- integration is created among group of students.	
----- integration takes advantage of natural combinations.	Nested integration
Development of ----- skills is very important in preschool or early childhood education.	Gross motor

Forms of integration were presented by Fogarty and Stoehr in -----.	1995
Work on scientific method was started by ----- to Galileo.	Aristotle

Cooperative learning method can help students develop ----- skills.	Communication
Piaget spend actually----- to work on constructivism.	50 years
The cooperative learning model changes the -----.	reward system
----- can be assessed through direct observation.	skills
----- is a model which requires student cooperation and interdependence in its task, goal and reward structure.	Cooperative learning
Cooperative learning methods are those in which more than ----- person work together.	one
Teachers role is minimized in ----- inquiry.	
In cooperative lessons, Students work ----- to master learning goal.	teams
Cooperative learning requires -----.	
Assigning different roles is a good thing in -----.	jigsaw technique
Kagan (1994) roles have been adapted by -----.	Arends
cooperative learning help students make the ----- from whole-class to cooperative learning groups.	transition
In cooperative learning, ----- are oriented to the group as well as the individual.	Reward system
More than ----- of the researches says that cooperative learning helps in the academic achievement of the student.	
A special challenge for cooperative learning teaching is how to ----- for both team and individual efforts.	grade
Rubrics are actually instruments -----.	

In ----- teacher talk time is more than 50% of students talk time.	Recitation
----- functions are image and inform.	Concepts
----- create productive learning communities.	Effective teachers
Extended practice leads to -----.	Overlearning
Teacher control is ----- process.	authoritative
Peer tutoring is -----.	motivational strategy
----- lose their significance after sometime.	External rewards
----- discussion is a teacher-centered discussion.	Monologic
----- is a teacher-centered method.	Presentation
Direct instruction keeps ----- in passive role.	students
Practice that is under the watchful eye of the teacher is called -----.	Guided practice
----- method is the example of discussion method.	
Teachers can obtain better classroom discourse by giving their students opportunities to think before they -----.	respond
Feedback should be appropriate and -----.	constructive
The base level of Maslow's Hierarchy of Needs is -----.	Physiological needs
Recitation is also called -----.	
Presentation is a ----- centered method.	Teacher
----- learning is a learner-centered method.	Discovery
Monologic discussion is ----- centered discussion.	teacher
Dialogic discussion promote ----- thinking.	divergent

Discovery learning is a ----- centered method.	learner

In democratic process ----- are involved.	children
How many categories did Abraham Maslow believe that needs could be classified into?	5
Crossword puzzles is an example of ----- learning.	2. Incidental learning:
----- in classrooms does not flow just from the teacher.	Influence
Direct instruction lessons require the unique classroom -----.	management
Planning, implementation and evaluation comes in -----.	Teaching cycle
In ----- there is paraphrasing.	communication
----- is basically a discussion method.	
For learning activities, ----- centered learning methods must be preferred.	students
----- is very much teacher controlled method.	Direct Instruction
Peer can be great ----- support.	
----- is the adding of an aversive stimulus to decrease a certain behavior or response.	Positive punishment
A ----- learning environment is a setting for learning that includes a controlled and often simplified copy of a real world system to be studied.	Simulation-based learning
The other name for presentation method is -----.	
Lecture only gives ----- knowledge.	declarative
----- are done in the virtual environments and are computer based.	Simulation

Presentation is also known as ----- method.	
The last level of Maslow’s hierarchy of needs is -----.	Self-actualization
A lot of information is not important ----- information is important.	depth of
Measuring is a ----- process.	inquiry

----- has its intellectual roots in the Socratic Method.	Problem Based Learning
Bruner’s final stage is -----.	Symbolic
Life is not divided into little blocks of -----.	subjects
Inquiry may involve problem, procedure and -----.	Solution
Aristotle promoted -----.	deduction
----- is a condition of partial or total impairment of sight or vision that even with correction affects educational performance adversely.	Blind and Low Vision
----- knowledge is acquired, if a child only learns facts and memorizes content.	Procedural
Kinesthetic learning is also known as -----.	tactile learning
Teacher needs to have some perceptions and ideas if -----.	political activity
----- means the knowledge about how to teach the students.	Pedagogical knowledge
Where there is silence, there is no -----.	learning
Lev Vygotsky died at the age of -----.	37

----- are something that is memorized.	Procedures
Teaching is about bringing change in -----.	society
----- knowledge is acquired, if a child gets cognition about cognition.	Metacognition
Holistic development means -----.	complete development
----- means that professionals are ethically bound to follow some norms.	Self-Disciplined
Master teachers ----- instructional objectives to the students.	communicate
There are ----- stages of Zone of Proximal Development.	
----- means that students may get any change in their behavior.	Behaviour prosecutive
Learners need ----- on everything they do.	feedback
There are ----- categories of exceptionality.	27

----- is something that emphasizes that power and decision-making should be shared among some or all members of the organization.	Collegial context
----- is the procedure to gain declarative knowledge.	lecturing
Every student has different ----- of learning.	Potential
----- is also a conceptual change.	Teacher growth
----- means social interaction among the students or the other people as well.	
There are ----- types of instructional planning that are commonly used in schools.	

Vygotsky was a ----- psychologist.	Rushinan
----- is the mean of creating a dialogue.	reflection
----- are thoes objectives which need to be achieve by the end of lesson.	Instructional objective
----- is a way of studying your own experiences to improve the way you work.	Reflective practis
There are ----- kinds of diversity.	3
Teacher is more interested in ----- instead of conceptual change.	Covering sylabur
Which educationist gave the below statement; "What students are taught in schools affects the ways they will thereafter see and treat others"	sausa
----- means that students may get any change in their behavior.	Direct instrucation
----- knowledge is a step ahead of declarative knowledge.	Procedural knwliedge
Gender diversity means ---- in gender.	Difference
In -----, the student must be dissatisfied with the current understanding.	
----- is the name of degree that a person must get to join teaching profession.	B ed M ed
In ----- teachers do not have autonomy or the power of decision making.	Pakistan

----- context of school is “Characterized by or having power and authority vested equally among colleagues:"	collegial
According to Gagne, ----- knowledge is “knowing that....”	Metacognition
The gap between actual and potential level of a child is -----.	Zone orf prox dev
Theory of multiple intelligences was presented by Howard Gardener in -----.	1983
----- knowledge comes in psychomotor domain.	procedural
Different cultures have different perceptions about -----.	eduucation
Declarative knowledge is more or less equivalent to Bloom’s ----- category of learning outcomes.	
----- is very famous because of his theory of multiple intelligences.	hHoward gardner
The ----- of our colleagues is the foundation of power.	esteem
At second stage of zone of proximal development, a child gets assistance from -----.	Direct instr
----- is where human mind is actively involved in constructing meaning of the experience.	Active learning
----- perform poor in mathematics and science.	girls
-----	method
Teachers must give ----- to the students	Constructive feedback

to maximize learning.	
----- is a fixed capacity.	intellangence
The ‘basics’ of the ----- curriculum are mathematics, natural science, history, foreign language & literature.	
----- plan is actually detailed form of unit plan.	lesson
You have to create a check list for assessing----- skills.	Communication skill

Being aware of or sensitive to the existence of certain ideas or phenomena and being willing to tolerate them is called -----.	receiving
Teachers rarely plan in ----- as encouraged in textbooks.	Linear plan
Mechanism indicates that a child is ----- to do a task by following its mechanics.	independent
Precise statement means ----- statement.	An exact
There are ----- elements of performnce objectives.	3
Lesson plan starts with the -----.	subject
When teacher provides guidance to the students, then there is -----.	semantic
This is not true that if the learning cannot be ----- then there is no learning.	accessed
You will organize the ----- in such a way that you will ask them to first observe and then record.	accessment
Curriculum guides are planned by -----.	Ministray of edu
----- is one of the famous models of curriculum development.	Tyler
In curriculum planning ----- is taken into consideration.	assessment

The second name of performance objectives is -----.	behaviour
Curriculum guidelines are consists of -----.	
----- is defined as "a systematic design for the development, implementation and evaluation of instruction".	Lesson plan
In ----- level of cognitive domain, students recall their knowledge.	synthesis
While planning a unit a teacher needs to identify -----.	all
Curriculum guides actually give us a guide line about what to be taught in different -----.	Grad level
The first three levels of cognitive domain are called as -----.	lower
----- policy is to cover the content.	school

The common thing in Tyler's model and Bloom's taxonomy is that the teachers observe the -----.	
The focus in IEP will be on the ----- of the learners rather on the content to be taught.	need
To write ----- is necessary, especially when we are going to start teaching.	performance
----- is basically an extended adaptation of a lesson plan.	IEP
----- are usually assessed through analysis method or through observation.	process
----- changes were made while revising Bloom’s taxonomy.	
Good textbooks provide ----- sequence of lessons.	structured
----- means that the disposition or learning you are talking about, you must value that disposition.	valuing

IEP is the abbreviation of -----.	Indiv edu plan
Lesson plan is a part of ----- plan.	unit
The best teachers apply planning -----.	flax
The individualized part of IEP means that the plan has to be tailored specifically to your child's special -----.	need
----- is something which indicates division of time.	all
Post lesson activities are related to -----.	evelatiton
We can do classifying in ----- children also.	
Learning is a permanent change in -----.	Behaviour
In ----- inquiry, students investigate topic-related questions that are student formulated through student designed/selected procedures.	
Historical drawings and paintings are used in ----- inquiry to stimulate questions.	historical
Andragogy means how ----- learns.	Children

----- inquiry involves the processes of searching for information and applying information to answer questions.	Designing instruction
Different countries have different age levels of ----- education.	informal
The important thing in ----- is what we know we must share it with others.	Problem solving method
Pedagogy means how to teach -----.	children
By the -----, a child has TWICE as many brain connections as an adult.	three
The solutions, alternatives or responses provided by learners are not found in -- -----.	textbook
----- are those which are linked with core	
concepts.	
Piaget spend ----- years to work on constructivism.	50
Most classroom ----- proceeds at too rapid a pace.	discourse
----- keeps students in passive roles.	Direct instruction method
If projects are ----- , they allow the learners to be immersed in one big idea.	Structured
In ----- the most important thing is assigning the tasks.	management
Roots of problem based learning are in -----.	Dialogue
Inquiry is a ----- technique.	
----- is very useful learner centered teaching and learning strategy.	Problem solveing
Aristotle talks about -----.	2
In project learning, performance is assessed on ----- basis.	indivial
----- is overall pattern.	
In ----- inquiry, teachers role is minimized.	Unguided
In cooperative lessons, ----- are oriented to the group as well as the individual.	
Inquiry may involve -----, procedure and solution.	

Students work in teams to master learning -----.	
Vygotsky was a----- Psychologist.	russian
The most important thing in thinking skills is to provide the -----.	information

FINAL TERM

1. **Discourse** is overall pattern.
2. Teacher must give his **feedback** before moving on to the next student or question.
3. **Scientific** method is often used in research.
4. In **cooperative learning** teachers have to be careful about their reward structure.
5. **Question** should be directive to the whole class.
6. **Gatekeeper**: equalizes participation
7. **Cooperative learning** teaching is how to grade for both team and individual efforts.
8. We must be able to exhibit our **feeling** in the classroom.
9. **Bruner** did not clearly divide these stages he kept them merged.
10. Cooperative learning should have cooperative tasks, cooperative **goals** and cooperative rewards.
11. Piaget spend actually **50 years** to work on constructivism.
12. Burner's first stage is **enactive**.
13. In **guided inquiry**, students investigate a teacher-presented question.
14. In **pre schools** pictures and model are not sufficient way of learning.
15. Andragogy means how **adults** learn.
16. **Performance assessment** can be used to measure students' problem solving potential as well as group work.
17. **Competitive goal structure**: It occurs when students perceive that they can obtain their goal if, and only if, the other students with whom they work fail to obtain their goals.
18. The most important thing in inquiry is **evidence**.
19. The focus of project learning is **product**.
20. **Group skills** are the skills with which students participate effectively in a group. E.g. readiness for action, sequencing a task, managing tasks, negotiation skills, communication skills, assessing skills or managing skills etc.
21. **Guided inquiry** involves the processes of searching for information and applying information to answer questions.
22. Having a critical spirit is as important as thinking critically. **Norris**
23. **Problem Based Learning** has its intellectual roots in the Socratic Method

24. Inquiry may involve problem, **procedure** and solution.
25. The **hypothesis** is an educated guess about the relationship between the independent and dependent variables.
26. The blue hat in the De Bono's six thinking hats symbolizes **thinking process**.
27. The green hat in the De Bono's six thinking hats symbolizes **creativity**.
28. According to Kolb (1984), Learning is a process of a combination of grasping **experience** and transforming it.
29. **Assimilation** leads to consideration of new options and points of view.
30. In **project learning** the focus is on ultimate outcome and product.
31. Students investigate topic-related questions that are student formulated through student designed/selected procedures. **Unguided inquiry**
32. In cooperative learning, **Reward systems** are oriented to the group as well as the individual.
33. The biggest limitation of cooperative learning is the **mindset**.
34. **Objective** type of items can be scored soon after.
35. Discussion is the exchange of **ideas**.
36. U-shaped seating arrangements facilitates **classroom discussions**.
37. Adventure projects may last for **weeks**.
38. The most important thing in thinking skills is to provide the **wait time**.
39. **Researchers** use word discourse with discussion method.
40. Recitation is **teacher centered** script.
41. If projects **are structured** properly, they allow the learner or groups of learners to be immersed in one big idea,
42. Teams are made up of **high, average and low achieving students**.
43. Students work in teams to master learning **goal**.
44. Learning is a **permanent** change in behavior.
45. Learners progress from specific observations to **inferences or generalizations**.
46. **Student Teams Achievement Division (STAD):** a cooperative learning classroom technique.
47. Knowledge can be assessed through **written tests**.
48. **Generative topics** are those which are linked with core concepts.
49. Whenever a particular behaviour is __ after a behaviour and the behaviour increases as a result, positive reinforcement has occurred.
50. Assigning different roles is a good thing in **jigsaw technique**
51. **Children** do not have attention span
52. Detailed implementation comes from **lesson planning**.
53. The last three level of Bloom taxonomy cognitive domain are called as.... **higher level of learning**

54. ... is a learning style in which learning takes place by the student carrying out physical activity. **Kinesthetic learning**
55. Mechanism indicate that child a....to do task by the following its mechanism. **Independent**
56. Who gave the theory of multiple intelligence **Harvard Gardner's**
57. Is the knowledge that is declared in books, research paper or newspaper **Declarative knowledge**
58. The term Is used while explaining multiple diversity among people **dyslexia**
59. The objective students will compare and contrast the cognitive and affective domain is an example of...is the level of cognitive domain **analysis level**
60. In education no formal certification is given at the end. **Informal**
61. means problems with reading, writing spelling symbols and numbers because the brain misinteruupts what it sees (visual) and hears **Dyslexia means**
62. Teaching is aprofession. _____ **Noble**
63. There aretypes of instructional planning that are commonly used in school. _____ **Six**
64. ."Write an appropriate tile for the text is an example ofcognitive domain. _____ **Synthesis level**
65. Delecrative knowledge is more or less equivalent to Bloom category of learning outcome. _____ **compehension**
66. Teacher is more interested in.... instead of conceptual change _____ **covering the syllabus**
67. A teacher must useresources in a class _____ **low cast**
68. Is knowledge is a step ahead of declarative knowledge _____ **Procedural knowledge:**

1. social constructivism is present by _____ **Lev Vygotsky**
2. The domain encompasses objectivities that deal with recall or recognition of knowledge. _____ **cognitive**
3. Which of the following is not metaphor for teacher? _____ **teacher Is a guider**
4.is not appropriate, if both sides of brain are not working appropriately. _____ **Learning**
5. Learning is there when teachers try to help learners change their -----instead of focusing on their own teaching. _____ **cognitive structures**
6. - is to teach certain content to the students. _____ **METHOD**
7. Teachers' complaint for shortage of time can be resolved through ----- . _____ **Unit planning**
8.are much economical and take less space in our working memory _____ **Images**
9. ----- is a short term planning. _____ **Lesson plan**
10. Holistic development means _____ **Complete development**
11. In this state of functioning, a teacher does not invite people to give you suggestions. There is no sharing of ideas _____ **Intentionally Disinviting**
12. A person with ----- need not have specialized knowledge of his trade. _____ **occupation**
13. How many key context are there in schooling? _____ **3**
14. Teaching is an activity to ___ knowledge. _____ **Impart**
15. teachers want _____ **career growth**
16. complete formula for teacher growth . **Knowledge ++ Reflection = Growth** _____ **Experience**
17. Schools follow a certain ----- . _____ **curriculum**
18. _____ means that students may get any change in their behavior. **behavioral perspective**
19. "Society for Pakistani English Language Teachers" organize different workshops for ----- . _____ **teachers**
20. ----- education has no regular curriculum. _____ **Informal**
21. Reflective Practice was introduced by ----- . _____ **Jean piaget**
22. Teaching has a ----- function. _____ **social**
23. What is the highest level of teaching development ? _____ **Intentionally Inviting**
24. Pedagogy is a study of _____ **teaching methods**
25.can lead development _____ **Learning**
26. Learning can lead ----- . _____ **development**
27. Vygotsky's theory about prior learning and social context included ___ major ideas. _____ **4**
28. Who believe that knowledge is actively constructed by learners? _____ **Nolan and francis**
29. ----- is not restricted to the schools. _____ **Collegial context**
30. Knowledge about different facts is ----- . _____ **stratified knowledge**
31. The warmth, respect and appreciation in the eyes of the ----- for the teacher are the actual recognition. _____ **students**
32. _____ is an ability to recall or recognize what has been learned or experienced _____ **Retention**
33. In this state of functioning teacher realize that you didn't know everything and they need development. help and advice from your colleagues _____ **Intentionally inviting**
34. Paulo freire was born in _____ **Brazil**
35. Teaching is a way of development certain ___ behaviors among students. _____ **desirable**
36. _____ is an organized body of knowledge. _____ **Science**
37. Teacher must give _____ for every students. _____ **feedback**
38. Schooling is not about a single person, it is a ----- . _____ **Group orientation**
39. stratified knowledge is the Knowledge about _____ **facts**
40. Knowledge is something that is learnt by reflecting, acting on something is called? _____ **"Subjective knowledge"**

41. Educators work to stimulate _____. **Spirit of inquiry**
42. To ----- is to change. **Learn**
43. Teacher must give _____ given from the teachers maximizes students learning. **Constructive feedback**
44. performance objectives are also known as objectives **behavioral**
45. A is worth a thousand words **picture**
46. Teacher has the autonomy of how to teach in a _____ **class**
47. A ----- needs extensive training and specialized knowledge. **profession**
48. The level of to the profession must be to the range of every student **commitment**
49. Teacher must share ideas with the students so that they can work for a change in --- **society**
50. ----- is created when we act and reflect. **knowledge**
51. Teacher is more interested in instead of conceptual change **covering the syllabus**
52. Reflection is of ----- types. **2**
53. At second stage of zone of proximal development, a child gets assistance from ----- **self**
54. The reflection on every action at the same moment when the action is being taken is ----- **reflection in action**
55. A ----- education comprises of a basic education that a person receives at school. **formal**
56. Different cultures have different perceptions about ----- **education**
57. Precise statements written in the lesson plans about expectations from students are called **Performance objectives**
58. If teacher play role like a gardener, and use the teaching strategies as a fertilizer than students grows like a: **Seed**
59. Where there is silence, there is no ----- **learning**
60. At ----- stage of zone of proximal development, a child gets assistance from more knowledgeable other. _____
61. A teacher make education attractive for students by using teacher learning strategies _____
62. One will have more chance of being successful as a teacher if _____
63. Which of the following competency should be the most focused by Good teachers? _____
64. Which of the following is responsible for curriculum planning? _____
65. Curriculum guides actually give us a guideline about what to be taught in different --- **grade levels**

66. Educators work to stimulate the spirit of **inquiry** and acquisition of knowledge.
67. **Facts or principles** that he has memorized by learning.
68. Every student has different **potential** of learning.
69. **Reflective practice** is a way of studying your own experiences to improve the way you work.
70. Zone of proximal concept was also established by **Vygotsky**.
71. This professional standard demands from us to create a climate that promotes the **Professional judgment**.
72. Teacher has the autonomy of how to teach in a **class**.
73. **Task analysis** model is a very important model of learning.
74. Idea of "Teaching is an Art", was developed by **William James in 1891**.
75. Knowledge about different facts is **stratified knowledge**.
76. Teaching has a very important **social function**.
77. Planning is important as there are three characteristics of **master teachers**.
78. **Intentionally inviting**: This is the highest level of your teaching development.
79. Knowledge is created, when we **act and reflect**.
80. Modes of presentation are **two** i.e. Inductive and deductive.
81. Nothing is learnt unless it is in **long term memory**.
82. To achieve the learning outcomes of every unit, we have to construct **some instructional objectives**.
83. While **writing performance** objectives, we have to use an action word that exactly shows the behavior.

84. In **horizontal level**, planning includes selection of activities, resources, assessment and homework.
85. In **vertical level**, it includes link between standards, benchmarks, learning outcomes and instructional objectives
86. **Intellectual growth** cannot take place unless we do not provide opportunities to our students to think at high level.
87. There are **three** foundations of curriculum: sociological, philosophical and psychological.
88. "**Analysis level** questions are higher-order questions that require students to think critically and in depth.
89. The art of developing logical plan for instructional activities is called '**sequencing**'. Such a plan consists of interlink steps.
90. The **taxonomy** has been widely used in curriculum and test construction. From google
91. **Learn skill of observation** then actually inductive mode of presentation is better than deductive mode of presentation.
92. Sequence helps to make learning more **manageable**.
93. **Comprehension level** of cognitive "Describe two nation theory".
94. **Holistic vision** comes from curriculum planning while detailed implementation comes from lesson planning.
95. In **curriculum planning**, assessment is taken into consideration.
96. Asking question is **a skill**.
97. Questions of students are **more important than the questions** of teachers.
98. **Curriculum documents** are not available in all schools.
99. Individual Education Plans (**IEP**)
100. The common thing in Tyler's model and Bloom's taxonomy is that the teachers observe the behaviors
101. **Content knowledge** is a very important competency of a teacher.
102. **Processes** are also very important in teachers' considerations.
103. **Sequencing** has different principles; these principles are the introduction of simple concepts then concrete examples.
104. Writing Standards and benchmarks in a sequence in **Curriculum Planning**.
105. Action research is very effective research for teachers, **because it aims at improvement**.
106. **Origination** is the highest level of Simpson's hierarchy.
107. **Lesson plan** starts with the subject.
108. There are different **mechanics** to do different things.
109. **Good textbooks** provide a structured sequence of lessons.
110. Working memory is our **conscious memory**.
111. Sequencing steps are in **progression**. They start from simple and go to complex.
112. **Origination** is the level where a child can originate things on his own.
113. Write performance objectives is **necessary**.
114. In order to teach a sequenced lesson teacher need to **add complexity** to the lesson.
115. **Unit planning** is the most important as well as the most time-consuming level of planning for each teacher. gave the idea by **Waish**
116. **Sentence formation** is a prerequisite for paragraph writing.
117. We have limited time to teach in a **class**.
118. **Bloom's Taxonomy** was knowledge level or recall level, where actually students recall their knowledge.
119. You will organize the experience in such a way that you will ask them **to first observe** and then record.
120. Teacher must come up with at least one example so that the students can **understand the concept easily**
121. **Content forms are three**: Facts, Concepts Generalizations 57. A lot of information can be communicated through a **picture**.
122. **Lesson plan** is actually detailed form of unit plan.
123. **Abstract** thinking is very important
124. Curriculum guides are planned by **Ministry of education** in Pakistan.
125. **Questioning** has a lot of significance value.
126. An important thing in inductive mode of presentation is **Process**.
127. **Enabling skills** are those skills which are required to achieve a certain goal.

128. The individualized part of IEP means that the plan has to be tailored specifically to your child's **special needs**.
129. **Content and Processes** are also very important in teachers' considerations.
130. Whenever we are **sequencing**, we need to know what a prerequisite for a particular terminal objective is.
131. **The focus in IEP** will be on the needs of the learners rather on the content to be taught.
132. In **debriefing teacher** tells the students to reflect what they have learnt through this process.
133. Elements of planning **11**.
134. **Simulations** are done in the virtual environments and are computer based.
135. **Discovery learning** is a learner-centered method.
136. **Group processes** and the classroom goal, task, reward and participation structures are more directly under the teachers' control.
137. **Classroom structures** are the foundations that shape particular lessons and behaviors during those lessons. Three important structures include task, goal, and participation structure.
138. . **Synthesis level** Summarize the story including its main idea.
139. There are **four** steps in Taylor's model of curriculum
140. Write an appropriate title for the text.. come from **Synthesis level**.
141. We need to sequence our **learning objectives**.
142. Adding on must not be **confusing**.
143. Instructional aims: **Student-oriented**.
144. If a teacher plans to take the students for field trips, then he needs to consider **school resources**.
145. **Abstractions** are something which is not tangible.
146. Lesson is a piece of a unit NOT a **block of time**.
147. **Learning activities** are those where students are actively involved.
148. **Effective individual education plans** (IEP) have key characteristics. They are Individualized and child centered.
149. **Girls** perform poor in mathematics and science.
150. Teacher is a **person** who is making lesson plan, unit plan and term plan.
151. A lesson plan is defined as "a **systematic design** for the development, implementation and evaluation of instruction".
152. . What we do in schools, we never focus on the **higher level** of learning.
153. The common think in Tayler and Bloom taxonomy is that to teacher the **behaviors**.
154. Methods are also identified in **instructional planning**.
155. **In evaluation**, we discuss that there are two things; criteria and method.
156. Where there is silence, there **is no learning**.
157. **Metacognition**: is cognitive about cognition.
158. You have to create a check list for assessing **communication skills**.
159. The other name for Learning by reflection is **Socratic Method**.
160. **Master teacher** communicate their instructional objectives effectively to the students.
161. Linear fashion focus **on goals**.
162. Nonlinear fashion focus on **process**.
163. **Negative reinforcement** occurs when something already present is removed (taken away) as a result of a person's behavior.
164. Gagne expands the steps of introducing and organizing experience to include a sequence of nine particular "**Instructional events**".
165. Teachers have to identify the **methods to monitor** the progress of the students.
166. Whenever we are **planning a unit**, we really need to select these learning activities very carefully. And we need to make a match between processes and learning activities.
167. The interesting thing is that our emphasis is **on working memory**.
168. Lesson plan is part of the **unit plan** while activity schedule is part of the block timetable.
169. **Performance objectives**, there are the three elements present i.e. performance condition and criterion.
170. **Performance objective** we need to align our performance objectives with the curriculum.
 - 1) **Subject/ topic** Unit subject is the title of the whole unit.

171. **Unit planning** is important because we need to know the reasons for dividing the whole thing into components. Most of the times, teachers' complaint for shortage of time.
172. There are **three** levels of plans.
173. **Collegial context** is not restricted to the schools rather now it has become web based
174. There are **6 levels** of Bloom's taxonomy of cognitive domain.
175. **Feeling of efficacy** is very important for the teachers
176. It is our assumption that independent skills are prerequisites, so students know them already.
177. Less planning leads to less learning. **(Walsh, 1992).**
178. **Collegial context** is something that emphasizes that power and decision-making should be shared among some or all members of the organization **(Bush, 2003).**
179. **Keeping notes** is a very important type of post lesson activity because a teacher can have the record of his/her teaching.
180. Knowledge forms are **Content, Process.**
181. **Mechanism indicates** that a child is independent to do a task by following its mechanics.
182. **Unit planning** is very challenging and time consuming but the most important thing is that good unit planning is a guarantee to effective instruction and effective learning.
183. **Schools' policy** is to cover the content as much as possible.
184. Evaluate your teaching, come up with judgments but provide sufficient evidence to support your statement.
185. **Declarative knowledge:** This is the knowledge that is declared in books, research papers, and newspapers.
186. 124. According to research, the best **recognition** is got from students and not from the government or the school administrators.
187. **Blind and Low Vision** – A condition of partial or total impairment of sight or vision that even with correction affects educational performance adversely.
188. **Active learning:** Active learning is where human mind is actively involved in constructing meaning of the experience.
189. **Freire** was a Brazilian educator and philosopher who was a leading ...
190. **Freire was born on September 19, 1921** to a middle-class family in Recife, Pernambuco, Brazil.
191. Teacher is more interested in **covering the syllabus** instead of bringing conceptual change in the students.
192. **Science** is an organized body of knowledge.
193. Answering some key questions to create an image of the classroom teaching and learning."
Reflective practice:
194. **Reflective practice** is very important for a teacher.
195. **Nolan and Francis (1992) believe that:** Knowledge is actively constructed by learners.
196. **Learning is there when teachers try to help learners change their cognitive structures instead of focusing on their own teaching.**
197. "Much human behavior is learnt by observing the behavior of others **(Bandura 1978)**
198. **Zone of Proximal Development (ZPD)**
199. The gap between actual and potential level of a child is **Zone of Proximal Development**
200. **Cognitive perspective** is to develop students' academic and thinking skills from a novice level to a more expert level.
201. **Speech is a powerful psychological tool that lays the foundation for basic structures of thinking later in one's development.**
202. According to **Vygotsky's theory**, language, learning and environment is a social context.
203. Creativity is also a part of **metacognition**
204. Learning depends on **prior learning**
205. Schools not only teach the students but also raise them. **(Sausa,2003)**
206. What students are taught in schools affects the ways they will thereafter see and treat others. **(Schlesinger, 1993)**
207. **CAP:** Cognitive, Affective and Psychomotor
208. **Psychomotor domain** is the domain where your body movements are involved.
209. Perception means **attending to a stimulus.**
210. Set is a readiness for **action.**

211. Word **'complex'** shows that here the child can do many things independently.
212. 1Adaptation comes from the word **'Adapt'** which means to set yourself in the given situation.
213. **Hierarchy of affective** domain was developed by Bloom and **Krathwohl in 1964**.
214. In organization, you start showing that behavior but that is not a **consistent behavior**.
215. **"Taxonomies may be used to decide what to teach, how to teach and how to evaluate teaching."** (Marzano, Pickering, and Pollock 2001)
216. Research shows that learning do not take place if presented in isolated items (**Hohn,1995**)
217. Taxonomies provide a **cognitive structure**.
218. Who presented the multiple intelligence theory? _____ **Harvard Gardner**
219. How many levels Bloom's taxonomy? _____ **6**
220. What is concept map? _____ **Graphic organization**
221.formation is a prerequisite for paragraph. _____ **Sentence**
222.identifies classroom assessment criteria. _____ **Teacher**
223. Art of developing logical plan for instructional activities is called? _____ **"Sequencing"**
224. Methods are also identified in... ? _____ **"Instructional planning"**
225. Good Textbooks provide sequence? _____ **"Structured sequence of lessons"**
226. Knowledge has forms? _____ **"Two"**
227. Knowledge is something that is learnt by reflecting, acting on something is called? _ **"Subjective"**
228. A child knows about own cogitation is called? _____ **"Metacognitive knowledge"**
229. 12. Memorized things in? _____ **"Facts"**
230. Task analysis model is a very important model as it helps the teacher to identify __ **prerequisites**.
231. The process of setting goals, developing strategies is _____ **planning**.
232. We discuss criteria and method in _____ **evaluation**.
233. The individualized part of IEP means that the plan has to be tailored specifically to your child's __ **special needs**.
234. A unit plan is aof lesson plans. _____ **hierarchy**
235. Methods are also identified in instructional planning _____ **Student-oriented**.
236. is basically an extended adaptation of a lesson plan. _____ **IEP**
237. We can remember those things which are connected with our _____ **prior learning**.
238. **Adolescence** is a time of profound brain growth.
239. Advance organizer model is based upon **deductive learning**.
240. Nonlinear fashion focus on **process**
241. Brainstorming is a common tool to **describe** a thing
242. The white hat in the De Bono's six thinking hats signifies **information known or needed**
243. **Teacher** model skill in direct instruction
244. **Network** integration is created among group of students
245. Teacher role is minimized in **unguided** inquiry
246. In United States, pre-school is named as **pre K**
247. **Gatekeeper** equalizes participation
248. Generative topics actually make **connections**
249. **Divergent** thinking is outside the box thinking

250. The learning of **core concepts** is lifetime
251. Different countries have different age levels of **formal** education
252. Children can come up with different ideas and teachings must **accept** all ideas
253. **Children** construct their own knowledge
254. Our teachers do not focus on **core concept**
255. Objects must be in the form that it can be **measured**
256. **British** preschool name Nursery School or simply “nursery”
257. **United States** preschool name pre-school and pre K
258. Child is a natural discoverer. **Bruner**
259. By the **three**, a child has TWICE as many brain connections
260. In order to start working, the cells need to **communicate** with each other
261. A research was conducted and it was reported that teachers mostly focus **hemisphere** of children.
262. For creativity **divergent** thinking is very important.
263. Different types of -functions occurs in the left and right hemisphere **Mental**
264. The networked methodology of integration is **Student centered**
265. Asking question is a **Skill**
266. Brain development continues till the age of **8**
267. We can remember those things which are concerned with our **Right side memory**
268. Integration means putting things **Together**
269. Advance organizer model is based upon **Deductive learning**
270. **Case method is** a very good approach to know problem solving.
271. .Pedagogy means how to teach **Students/**
272. Core concepts are **declarative** knowledge
273. Development cannot be separated from the **social** context in which it occurs
274. Development of **gross motor** skills is very important in preschool or early childhood education
275. **Children** construct their own knowledge.
276. John dewy says that there is no such profession where **knowledge** is separable from doing or practice.
277. **Application** of core concepts in new level is important
278. In **left** hemisphere there is logical thinking. Verbal intelligence and convergent thinking
279. Teachers want to teach in **depth** but want to cover the syllabus too
280. **Curriculum** is a dead thing teacher’s give life to it.
281. **Researchers** use the word discourse for discussion
282. Teachers must provide the students with opportunities to **discover** things
283. **Performance assessment** can be used to measure student’s problem solving potential as well as group
284. Knowledge can be assessed through **written tests**
285. Usually we do not **question** our tradition and authority

286. Wait time is **thinking** time
287. The last level of Maslow’s hierarchy of need is **Self-actualization**
288. **Socratic** Method is the example of discussion method
289. **Edison** invented the bulb
290. Projects tend to be **multidimensional**
291. Different types of **mental** functions occur in the left and right hemisphere.
292. Pedagogy means how to teach **children**.
293. Advance organizer model is based upon **Deductive learning**.
294. **Case method** is a very good approach to know problem solving.
295. Andragogy means how _ learn. **Adults**
296. Beyer says that critical thinking has **two** important dimensions.
297. The inquiry learning cannot be **rushed**
298. **Learners**_are responsible for planning. Conducting and evaluating their own effort
299. Process of **assimilation** leads to consideration of new options and points of view
300. **Assimilation** leads to consideration of new options and points of view
301. According to Kolb (1984), learning is a process of a combination of grasping **experience**_and transforming it.
302. Curious observation is the start of the **inductive_process**
303. **Students**_love integrated curriculum
304. What type of goodwill message is most likely to use an RSVP? Condolence, **invitation**, appreciation, holiday greeting,
305. Generative topics actually make ___schemes, **connections**, procedure or assessments
306. Schooling average age.... **4/ 3**
307. we are concerned by student.... achievement. **Team**
308. Understand is in.... Level. **First/ conceptual**
309. focus discussion and disposition.
310. Scientific method.... research. **Roots/Psychology/authentic**
311. **Theory** can be falsified.
312. **Perception** means attending to a stimulus

We have limited time to teach in a -----.	class
----- means problems with reading, writing, spelling, symbols and numbers, because the brain misinterprets what it sees (visual) and hears (auditory).	Dyslexia
To write performance objectives is -----.	necessary
Age is the element of ----- diversity.	physical
Teachers must communicate their ----- to the students.	Experiences

The term ----- is used while explaining multiple diversity among people.	dyslexia
The statement “The student will define the 6 levels of Bloom's taxonomy” is an example of ----- level of cognitive domain.	Knowledge
Who gave this statement: “Having a critical spirit is as important as thinking critically”.	niam
In -----, planning includes selection of activities.	horizontal level
in -----, Bloom developed the taxonomy of cognitive domain.	1956
A teacher needs to know the ----- level of the students.	Motivational
Objectives have a ----- purpose.	Limited
----- is a readiness for action.	Set
----- are intent of teaching.	Objectives
The prescription of a minimally acceptable level of a performance on the part of a learner is called -----.	Criterion measure
Taxonomies provide a ----- structure.	cognitive
While writing performance objectives, we focus on the -----	action words
In performance objectives, all the ----- elements must be present.	three
While writing performance objectives, we have to use an action word that exactly shows the -----.	performance
----- is the highest level of Simpson's hierarchy.	Origination
Curriculum documents are not available in all -----.	schools
----- is the guarantee of effective instruction and effective learning.	Unit planning
While -----, you have to see the curriculum framework.	yearly planning
The statement "Write an appropriate title for the text" comes in the ----- level of cognitive domain.	synthesis
Altering motor activities to meet demands of problematic situation is -----.	Adaptation
A content is consisted of -----.	Facts - Concepts - Generalizations ALL
The ----- focuses on what the learner will experience, rather than what the instructor will share or do.	objective

The term ----- is actually a teacher who has expertise on his subject and he ensures the quality learning of the students.	Master teacher
The last three levels of Bloom’s taxonomy of cognitive domain are called as ---- -----.	Higher level of learning
The statement of an observable behavior on the part of learner is -----.	performance
Methods are also identified in -----.	instructional planning
Every educational activity should have a -----.	goal
The objective “The student will compare and contrast the cognitive and affective domains.” is an example of ----- level of cognitive domain.	Comprehension
The ----- has been widely used in curriculum and test construction.	taxonomy
You must tell the students about the ----- processes they are learning.	thought
The prescription of a minimally acceptable level of a performance on the part of a learner is called -----.	Criterion measure
----- is a disorder in language formation that may be associated with neurological, psychological, sensory or physical factors.	Speech impairment
Who gave this statement: "Schools not only teach the students but also raise them."	Sausa

Who gave this statement" Less planning leads to less learning"	Walsh
"Unit planning is the most important as well as most time consuming level of planning for each teacher" who gave the above statement?	Walsh
Girls are less committed to ---	careers
----- knowledge is a very important competency of a teacher.	Content
____ plays an important role in child’s learning.	language
Information used as evidence or as part of a report or news article is called ____	fact
Students ____ indicate their learning.	tests
Children construct their own ____.	Knowledge

A teacher is responsible in the ____ development of a child.	cognitive
--	-----------

Lev vygotsky’s was born in ____.	Rusia
Idea of “teaching is an art” was development by ____.	William james
Teacher can manage different ____ in school for ethical development of a child.	Activities
A profession has a body of ____.	techniques
The role of a teacher is a changed from a lecturer to ____.	An agent of transformation
Learning is a ____ process.	social
development/learning cannot be separated from ____ in which it occur.	Social context
Learning is a ____ endeavor.	social
In ____ teachers do not have autonomy or the power of decision making.	pakistan
Who gave the theory of multiple intelligence.	Howard gardner
____ education has a structure systems of learning.	formal
A view or opinion that is incorrect because based on faulty thinking or understanding is a ____.	misconception

____ model is an important way of learning.	Observational learning
The role of a teacher is changed from a lecturer to ____.	An agent of transformation
A profession allows ____.	autonomy
Education that is not given in proper schools is ____.	Informal education
____ greatly influences learning.	Prior knowledge
Different cultures have different perception about ____.	education
____ knowledge is acquired, if a child gets cognition about cognition.	metacognitive
____ are something that is memorized.	Facts
Who gave this statement “knowledge is created when we act and reflect”?	friere
____ is the procedure to gain declarative knowledge.	lecturing

Lev vygotsky died at the age of ____.	37
The first process in modeling is ____.	Alternation
Howard Gardner is very famous because of his ____.	Multiple intelligence theory
_____ is very important for a teacher.	Reflection in practice
_____ is important but it does require time.	Conceptual change
_____ context of school is “characterized by or having power and authority vested equally among colleagues.”	collegial
Paulo freire was born in _____.	1921
The idea of “teaching is an art or science “was developed in ____ by william james.	1891
----- activities are different from teaching activities.	Learning activities
---- is a series of small action steps which are needed to achieve desired goals.	Objectives:
"Describe the two nation theory" comes in ----- level of cognitive domain.	Comprehension:

----- means that a behavior becomes part of your life.	Characterization
----- comes from curriculum planning.	Holistic vision
The objects through which light could not past are ----- objects.	opaque
A unit plan is a ----- of lesson plans.	Series
There are ----- steps in Taylor's model of curriculum.	four
It is important for the broader curriculum to identify educational -----.	experiences
----- is the title of the whole unit.	Unit subject
There are ----- necessary elements of planning.	11
A teacher needs to know the ----- level of the students.	motivation level
There are ----- types of communication disability.	2
Master teachers are ----- in their planning.	well-organized

Curriculum is a ----- term.	Broad
----- is essentially a nested process with horizontal and vertical dimension.	Planning
Elements of physical diversity are -----.	3
----- is a planning of one year of a school.	Long term Planning
A teacher needs to know the ----- level of the students.	Motivational
Detailed implementation comes from ----- planning.	lesson planning
Students' ----- must be considered before planning.	feedback
Terms in revised Bloom's taxonomy were changed from noun to -----.	adjectives
----- is the highest level of Simpson's hierarchy.	Origination:

Teachers must communicate their ----- to the students.	Ideas
The prescription of a minimally acceptable level of a performance on the part of a learner is called -----.	Criterion measure:
We have limited time to teach in a -----.	
There are ----- domains of learning.	three
Benchmarks and standards are written in a sequence in -----.	instructional
We have to identify the facts, concepts and generalizations while planning a -----.	a unit
Bloom's taxonomy was revised by -----.	William
Teaching activities are there to teach ----- to the students.	content
----- identifies classroom assessment criteria.	teacher
----- is the gurantee of effective instruction and effective learning.	d unit planning

There are different ----- to do different things.	mechanics
The objective “The student will judge the effectiveness of writing objectives using Bloom's taxonomy” is an example of ----- level of cognitive domain.	Analysis
----- planning is very challenging and time consuming.	unit planning
"Abstract thinking leads to reasoning with symbols" this refers to ----- - stage of Piaget's cognitive development.	Formal operational
----- do not have attention span.	Children
If we will use the connections our efficiency of doing any task will ----- --.	increase
Questions in ----- also includes in essential questions.	induction
In order to start working, the cells need to ----- with each other.	communicate
Teacher must ensure ----- development of child.	holistic I
Brain develop very fast in the ----- year after birth.	first
Learners can learn only ----- chunks of information at a time.	5-9
Remarkable changes occur in the brain during the ----- decade of life.	second
A teacher can teach higher order thinking skills through the ----- process.	
----- is a time of profound brain growth.	Adolescent
----- should be made clear to the students.	Core concepts
A ----- year old child has the vocabulary of 2000 words.	
The average weight gain of 6-12 years children in a year is ----- --.	5-7

Fragmentation is said to be the ----- level of integration.	primary
Core concepts are ----- knowledge.	declarative
Teaching is very exciting for ----- teachers without integration also.	young

In the context of preschool it includes ----- stages of Piaget's cognitive development.	2
Children can come up with different ideas and teachers must ----- all ideas.	accept
----- have no obvious right answer.	essential Questions
John dewy says that there is no such profession where ----- is separable from doing or practise.	knowledge
Generative topics actually make -----.	connections.
Jumping is the example of -----.	Gross motor
The networked methodology of integration is -----.	student-centered
----- always identify their intent.	Teachers
Teachers want to teach in ----- but want to cover the syllabus too.	depth
Child's rights convention of 1989 has mentioned that “----- is basic right of every child.”	Education
Form 1 is ----- integration.	
The green hat in the De Bono’s six thinking hats symbolizes -----.	creativity
----- are those things that can be changed.	Variables
Group learning will be more efficient for developing the -----.	idea
Bruner’s first stage is -----.	Enactive”

	‘Collecting data’ is the ----- step of Guided Inductive Inquiry.	
	According to Kolb (1984), ----- is a process of a combination of grasping experience and transforming it.	), Learning
	The word scientific was devised in the -----.	19
	The black hat in the De Bono’s six thinking hats symbolizes -----.	judgment
	Usually we do not ----- our tradition and authority.	question

	----- invented the bulb.	Edison
	Bruner’s second stage is -----.	“Iconic
	The red hat in the De Bono’s six thinking hats symbolizes -----.	feelings
	Problem based learning starts from -----.	Analysis
	----- characteristics of critical thinking are presented by Wade (1995).	
	Inquiry is NOT about -----.	memorizing facts
	During guided inductive inquiry, the ----- plays the key role in asking questions.	teacher p
	Problem based learning also starts from -----.	Questions
	There are ----- processes of inquiry.	13
	The term ‘Six Thinking hats’ was presented by -----	De Bono
	The ----- is an educated guess about the relationship between the independent and dependent variables.	Hypothesis
	Students will make generalizations that are too -----.	broad
	The solutions, responses provided by learners are not found in -----.	textbooks

	Children produce their original work after -----.	problem based learning
	Inquiry may involve -----, procedure and solution.	Problem
	----- are responsible for planning, conducting and evaluating their own efforts.	Learners
	Scientific method can be used in ----- also.	social sciences
	Roots of the ----- of all social sciences is based on scientific method.	research
	In school we do not have much time to deliver information so we must know the -----.	
	The most important part of integration is -----.	assessment
	----- thinking is a disciplined manner of thought that a person uses to assess the validity of something.	critical thinking

	----- talked about logics and he was one of the pioneers.	Aristotle
	----- of information is important.	depth
	Inquiry is NOT a ----- technique.	Hypothetical
	----- love integrated curriculum because it provides the context for learning.	Children
	Group learning develops ideas and -----.	
	Learners progress from specific observations to -----.	inferences
	The brain thrives on -----.	connections
	During guided inductive inquiry, the ----- plays the key role in asking questions.	teacher
	Inductive inquiry is of ----- types.	2
	According to Kolb (1984), Learning is a process of a combination of grasping ----- and transforming it.	Experience
	Inquiry may involve problem, ----- and solution.	procedure

	In ----- , students investigate a teacher-presented question.	Guided inductive
	Students must learn to modify their -----.	conclusions
	----- is a permanent change in behaviour.	learning
	----- are much important in scientific method.	variables
	Paper pencil tests can assess the ----- of the students.	
	Inquiry method requires the learner to develop ----- associated with inquiry.	various processes
	----- inquiry is widely used in our classroom settings.	Information inquiry
	Learners progress from ----- observations to inference or generalizations in GII.	specific observations
	----- is the domain where our body movements are involved.	Psychomotor
	----- is actively constructed by learners.	Knowledge

	Idea of "teaching is an art" was developed by-----.	William James
	is a learning style in which learning takes place by the student carrying out a physical activity.	Kinesthetic learnin

	growth cannot take place unless we do not provide opportunities to our students to think at high level.	Intellectual growth
	The theory of Zone of proximal development was given by -----.	Vygotsky
	A child is responding in the form of action but this action is not an independent action is a -----.	Guided Response
	means the knowledge about how to teach the students.	pedagogical knowledge
	There are ----- types of education in our society.	2
	Learning is ----- by nature.	social
	----- includes all intellectual skills.	Cognativbe domaon
	According to research, the best recognition teachers got is from the -----.	students
	There are ----- types of intellectual disability.	
	Developing questioning skills among students comes in	Higher thinking levels:
	means attending to a stimulus	Perception
	Who gave this statement: “Knowledge is created when we act and reflect”?	Friere:

	----- is the level where a child can originate things on his own.	origination
	“Write an appropriate title for the text” is an example of ----- level of cognitive domain.	Synthesis level
	Teaching is a ----- profession.	noble
	The objective “The student will construct an instructional objective for each level of Bloom's taxonomy” is an example of ----- level of cognitive domain.	
	A teacher is a -----.	Change agent

	is to teach certain content to the students	METHOD
	cannot be separated from the social context in which it occur	Learning
	It was ----- century in which perceptions about teaching, learning and education were developed.	16th century
	education has a structured system of learning	formal
	Knowledge is actively constructed by	learners
	A teacher must use ----- resources in a class.	Low cost
	An educator must work to stimulate the spirit of ----- among the students.	f inquiry
	What we do in schools, we never focus on the ----- level of learning.	higher level
	Hierarchical levels of Simpson' Psychomotor domain are	7
	The level of ----- to the profession must be to the range of every student.	commitment
	is the mean of creating a dialogue	reflection
	----- is the knowledge that is declared in books,	Declarative knowledge

	research papers or newspapers.	
	----- is the level of understanding.	Comprehension
	Teachers need to know the ----- level of students.	
	We must plan unit before -----.	lessons.
	While evaluating teaching or students' learning, you should always come up with judgements based on -----.	t evidence
	Planning serves a guide to -----.	action.
	Lesson is a piece of a unit NOT a block of -----.	time
	The process of setting goals, developing strategies is -----.	Planning
	In evaluation we discuss --- things.	two
	Process cannot be isolated from -----.	All of abouve

	IEP is basically ----- adaptation of lesson plan.	extended
	If a teacher plans to take the students for field trips, then he needs to consider ----- --.	schools" resources
	Performance objectives must be alligned with -----.	curriculum
	----- research is very effective research for teachers because it aims at improvement.	Action
	The learning of ----- is lifetime.	core concepts
	The average height growth of 6-12 years children in a year is -----.	

	Learner can process only about one new idea or concept every ----- second.	ten
	In ----- books there is a lot of information than Japanese and German books.	American
	A preschool child of 36 months can now hold ----- different emotions in his mind at the same time.	two
	----- education is different from other education.	Pre-school and infant educations
	Generative topics are generated from ----- -..	leant information
	----- need to be interesting for the teachers as well as for students	Generative topics
	----- integration method overlaps concepts as organizer.	shared
	"Child is a natural discoverer" who gave this statement.	Bruner
	----- are related to the lives of people.	Essential questions
	In United States, pre-schooling is named as -----.	Pre-school
	Learning depends upon the -----.	environment
	The idea in ----- thinking is that no idea is a stupid idea.	divergent
	Essential questions are related to the ---- of people.	lives

	Brain development continues till the age of ---.	8
	----- teacher should integrate two or three subjects so that we can save the time.	Primary school
	Core concepts are central to the domain of -----.	knowledge
	Integration means putting things -----.	together
	Because of integration it will be easier to ask -----.	essential questions

	----- are most important persons in the application of curriculum.	Teachers
	In British English, pre-schooling is known as -----.	nursery
	----- construct their own knowledge.	Children
	There are ----- physical developmental milestones used in pre-schooling.	
	----- needs to be an integral part of early years of education.	Story time
	----- are unique to every individual.	Experiences
	Teachers mostly concern about -----.	completion of syllabus
	Form 3 focuses on the integration of subject knowledge with -----.	Student's Interest
	Bigger ideas are our assumptions and -----.	belief
	----- theory is very much applicable in early childhood education.	Vygotsky
	The ----- curriculum is a great gift to experienced teachers.	integrated
	passive rolesResearch has now determined that remarkable changes occur in the brain during the ----- decade of life.	second
	Development cannot be separated from the -----context in which it occurs.	social
	By the age -----, a child has TWICE as many brain connections as an adult.	
	Gross motor and fine motor development is involved in -----.	Physical development

	M. Markus was a ----- who gave the definition of integration.	
--	---	--

	Which needs does a primary reinforcer satisfy?	Food oxygen warmth watre
	Teachers get little assistance from ----- publishers.	textbook
	The brain is not complete at -----.	birth
	Essential questions require ----- thinking.	divergent
	----- type of integration is related to shared integration.	sequenced
	Networked integration is created between the -----.	learners
	----- is a dead thing teachers give life to it.	Curriculum
	We need to integrate the knowledge with --- ----- skills.	practical
	----- is a conceptual commitment.	Essential question
	Through ----- it will be easier for the children to ask essential questions.	integration
	Different countries use different names for pre-schooling, but the umbrella term for it is -----.	Early Childhood Education
	There are ----- stages of Piaget's cognitive development.	4
	Vygotsky's theory includes ----- major ideas.	four
	Our teachers do not focus on -----.	core concepts.
	----- integration is created among group of students.	
	----- integration takes advantage of natural combinations.	Nested integration
	Development of ----- skills is very important in preschool or early childhood education.	Gross motor
	Forms of integration were presented by Fogarty and Stoehr in -----.	1995
	Work on scientific method was started by --- ----- to Galileo.	Aristotle

	Cooperative learning method can help students develop ----- skills.	Communication
	Piaget spend actually----- to work on constructivism.	50 years
	The cooperative learning model changes the -----.	reward system
	----- can be assessed through direct observation.	skills
	----- is a model which requires student cooperation and interdependence in its task, goal and reward structure.	Cooperative learning
	Cooperative learning methods are those in which more than ----- person work together.	one
	Teachers role is minimized in ----- inquiry.	
	In cooperative lessons, Students work ----- - to master learning goal.	teams
	Cooperative learning requires -----.	
	Assigning different roles is a good thing in -----.	jigsaw technique
	Kagan (1994) roles have been adapted by -----.	Arends
	cooperative learning help students make the ----- from whole-class to cooperative learning groups.	transition
	In cooperative learning, ----- are oriented to the group as well as the individual.	Reward system
	More than ----- of the researches says that cooperative learning helps in the academic achievement of the student.	
	A special challenge for cooperative learning teaching is how to ----- for both team and individual efforts.	grade
	Rubrics are actually instruments -----.	

	In ----- teacher talk time is more than 50% of students talk time.	Recitation
	----- functions are image and inform.	Concepts
	----- create productive learning communities.	Effective teachers

	Extended practice leads to -----.	Overlearning
	Teacher control is ----- process.	authoritative
	Peer tutoring is -----.	motivational strategy
	----- lose their significance after sometime.	External rewards
	----- discussion is a teacher-centered discussion.	Monologic
	----- is a teacher-centered method.	Presentation
	Direct instruction keeps ----- in passive role.	students
	Practice that is under the watchful eye of the teacher is called -----.	Guided practice
	----- method is the example of discussion method.	
	Teachers can obtain better classroom discourse by giving their students opportunities to think before they -----.	respond
	Feedback should be appropriate and ----- -.	constructive
	The base level of Maslow's Hierarchy of Needs is -----.	Physiological needs
	Recitation is also called -----.	
	Presentation is a ----- centered method.	Teacher
	----- learning is a learner-centered method.	Discovery
	Monologic discussion is ----- centered discussion.	teacher
	Dialogic discussion promote ----- thinking.	divergent

	Discovery learning is a ----- centered method.	learner
	In democratic process ----- are involved.	children
	How many categories did Abraham Maslow believe that needs could be classified into?	5
	Crossword puzzles is an example of ----- --- learning.	2. Incidental learning:

	----- in classrooms does not flow just from the teacher.	Influence
	Direct instruction lessons require the unique classroom -----.	management
	Planning, implementation and evaluation comes in -----.	Teaching cycle
	In ----- there is paraphrasing.	communication
	----- is basically a discussion method.	
	For learning activities, ----- centered learning methods must be preferred.	students
	----- is very much teacher controlled method.	Direct Instruction
	Peer can be great ----- support.	
	----- is the adding of an aversive stimulus to decrease a certain behavior or response.	Positive punishment
	A ----- learning environment is a setting for learning that includes a controlled and often simplified copy of a real world system to be studied.	Simulation-based learning
	The other name for presentation method is -----.	
	Lecture only gives ----- knowledge.	declarative
	----- are done in the virtual environments and are computer based.	Simulation

	Presentation is also known as ----- method.	
	The last level of Maslow’s hierarchy of needs is -----.	Self-actualization
	A lot of information is not important ----- information is important.	depth of
	Measuring is a ----- process.	inquiry
	----- has its intellectual roots in the Socratic Method.	Problem Based Learning
	Bruner’s final stage is -----.	Symbolic
	Life is not divided into little blocks of -----.	subjects

	Inquiry may involve problem, procedure and -----.	Solution
	Aristotle promoted -----.	deduction
	----- is a condition of partial or total impairment of sight or vision that even with correction affects educational performance adversely.	Blind and Low Vision
	----- knowledge is acquired, if a child only learns facts and memorizes content.	Procedural
	Kinesthetic learning is also known as ----- ---.	tactile learning
	Teacher needs to have some perceptions and ideas if -----.	political activity
	----- means the knowledge about how to teach the students.	Pedagogical knowledge
	Where there is silence, there is no -----.	learning
	Lev Vygotsky died at the age of -----.	37

	----- are something that is memorized.	Procedures
	Teaching is about bringing change in ----- -.	society
	----- knowledge is acquired, if a child gets cognition about cognition.	Metacognition
	Holistic development means -----.	complete development
	----- means that professionals are ethically bound to follow some norms.	Self-Disciplined
	Master teachers ----- instructional objectives to the students.	communicate
	There are ----- stages of Zone of Proximal Development.	
	----- means that students may get any change in their behavior.	Behaviour prospective
	Learners need ----- on everything they do.	feedback
	There are ----- categories of exceptionality.	27
	----- is something that emphasizes that power and decision-making should be shared among some or all members of the organization.	Collegial context

	----- is the procedure to gain declarative knowledge.	lecturing
	Every student has different ----- of learning.	Potential
	----- is also a conceptual change.	Teacher growth
	----- means social interaction among the students or the other people as well.	
	There are ----- types of instructional planning that are commonly used in schools.	

	Vygotsky was a ----- psychologist.	Rushinan
	----- is the mean of creating a dialogue.	reflection
	----- are thoes objectives which need to be achieve by the end of lesson.	Instructional objective
	----- is a way of studying your own experiences to improve the way you work.	Reflective practis
	There are ----- kinds of diversity.	3
	Teacher is more interested in ----- instead of conceptual change.	Covering sylabur
	Which educationist gave the below statement; "What students are taught in schools affects the ways they will thereafter see and treat others"	sausa
	----- means that students may get any change in their behavior.	Direct instrucation
	----- knowledge is a step ahead of declarative knowledge.	Procedural knwledge
	Gender diversity means ---- in gender.	Difference
	In -----, the student must be dissatisfied with the current understanding.	
	----- is the name of degree that a person must get to join teaching profession.	B ed M ed
	In ----- teachers do not have autonomy or the power of decision making.	Pakistan

	----- context of school is “Characterized by or having power and authority vested equally among colleagues:"	collegial
--	--	-----------

	According to Gagne, ----- knowledge is “knowing that....”	Metacognition
	The gap between actual and potential level of a child is -----.	Zone orf prox dev
	Theory of multiple intelligences was presented by Howard Gardener in -----.	1983
	----- knowledge comes in psychomotor domain.	procedural
	Different cultures have different perceptions about -----.	eduucation
	Declarative knowledge is more or less equivalent to Bloom’s ----- category of learning outcomes.	
	----- is very famous because of his theory of multiple intelligences.	hHoward gardner
	The ----- of our colleagues is the foundation of power.	esteam
	At second stage of zone of proximal development, a child gets assistance from -----.	Direct instr
	----- is where human mind is actively involved in constructing meaning of the experience.	Active learning
	----- perform poor in mathematics and science.	girls
	-----	method
	Teachers must give ----- to the students	Constructive feedback

	to maximize learning.	
	----- is a fixed capacity.	intellangence
	The ‘basics’ of the ----- curriculum are mathematics, natural science, history, foreign language & literature.	
	----- plan is actually detailed form of unit plan.	lesson
	You have to create a check list for assessing----- skills.	Communication skill

	Being aware of or sensitive to the existence of certain ideas or phenomena and being willing to tolerate them is called -----.	receiving
	Teachers rarely plan in ----- as encouraged in textbooks.	Linear plan
	Mechanism indicates that a child is ----- to do a task by following its mechanics.	independent
	Precise statement means ----- statement.	An exact
	There are ----- elements of performnce objectives.	3
	Lesson plan starts with the -----.	subject
	When teacher provides guidance to the students, then there is -----.	semantic
	This is not true that if the learning cannot be ----- then there is no learning.	accessed
	You will organize the ----- in such a way that you will ask them to first observe and then record.	accessment
	Curriculum guides are planned by -----.	Ministray of edu
	----- is one of the famous models of curriculum development.	Tyler
	In curriculum planning ----- is taken into consideration.	assessment

	The second name of performance objectives is -----.	behaviour
	Curriculum guidelines are consists of -----.	
	----- is defined as "a systematic design for the development, implementation and evaluation of instruction".	Lesson plan
	In ----- level of cognitive domain, students recall their knowledge.	synthesis
	While planning a unit a teacher needs to identify -----.	all
	Curriculum guides actually give us a guide line about what to be taught in different -----.	Grad level
	The first three levels of cognitive domain are called as -----.	lower

	----- policy is to cover the content.	school
	The common thing in Tyler's model and Bloom's taxonomy is that the teachers observe the -----.	
	The focus in IEP will be on the ----- of the learners rather on the content to be taught.	need
	To write ----- is necessary, especially when we are going to start teaching.	performance
	----- is basically an extended adaptation of a lesson plan.	IEP
	----- are usually assessed through analysis method or through observation.	process
	----- changes were made while revising Bloom's taxonomy.	
	Good textbooks provide ----- sequence of lessons.	structured
	----- means that the disposition or learning you are talking about, you must value that disposition.	valuing

	IEP is the abbreviation of -----.	Indiv edu plan
	Lesson plan is a part of ----- plan.	unit
	The best teachers apply planning -----.	flax
	The individualized part of IEP means that the plan has to be tailored specifically to your child's special -----.	need
	----- is something which indicates division of time.	all
	Post lesson activities are related to ----- --.	evelatiton
	We can do classifying in ----- children also.	
	Learning is a permanent change in -----.	Behaviour
	In ----- inquiry, students investigate topic-related questions that are student formulated through student designed/selected procedures.	
	Historical drawings and paintings are used in ----- inquiry to stimulate questions.	historical

	Andragogy means how ----- learns.	Children
	----- inquiry involves the processes of searching for information and applying information to answer questions.	Designing instruction
	Different countries have different age levels of ----- education.	informal
	The important thing in ----- is what we know we must share it with others.	Problem solving method
	Pedagogy means how to teach -----.	children
	By the -----, a child has TWICE as many brain connections as an adult.	three
	The solutions, alternatives or responses provided by learners are not found in -----.	textbook
	----- are those which are linked with core	
	concepts.	
	Piaget spend ----- years to work on constructivism.	50
	Most classroom ----- proceeds at too rapid a pace.	discourse
	----- keeps students in passive roles.	Direct instruction method
	If projects are ----- , they allow the learners to be immersed in one big idea.	Structured
	In ----- the most important thing is assigning the tasks.	management
	Roots of problem based learning are in ----- ---.	Dialogue
	Inquiry is a ----- technique.	
	----- is very useful learner centered teaching and learning strategy.	Problem solveing
	Aristotle talks about -----.	2
	In project learning, performance is assessed on ----- basis.	indivial
	----- is overall pattern.	
	In ----- inquiry, teachers role is minimized.	Unguided
	In cooperative lessons, ----- are oriented to the group as well as the individual.	

	Inquiry may involve -----, procedure and solution.	
	Students work in teams to master learning -----.	
	Vygotsky was a----- Psychologist.	russian
	The most important thing in thinking skills is to provide the -----.	information

1. Dyslexia does not affect the ----- of a person.....**intelligence**
2. ----- is also a conceptual change..... **Teacher growth**
3. A teacher is responsible in the ----- development of a child..... **cognitive**
4. ----- is a disorder in language formation that may be associated with neurological, psychological, sensory or physical factors.....**speech impairment**
5. Teaching is a way of development certain ____ behaviors among students.....**desirable**
6. ----- means that students may get any change in their behavior.....**Behavioural perspective**
7. Where there is silence, there is no -----.....**Learning**
8. Teacher must give _____ for every students.....**feedback**
9. Which of the following is reflection on every action at the same moment when the action is being taken is -----.....**reflection in action**
10. To the profession which of the following level must be to the range of every student.....**commitment**
11. Which of the following degree that a person must get to join teaching profession.....**B.ED/M.ED**
12. There are ----- domains of learning.....**Three**
13. We are living in which of the following type of society?..... **Social stratified**
14. Which of the following level of functioning refers to, teachers intentionally don't want to share their ideas and don't ask for advice?..... **Intentionally Disinviting**
15. Which of the following is responsible for curriculum planning.....**Planning wing**
16. According to whom "knowledge is created, when we act and reflect"?..... **Friere**
17. Educational equity would be more common if we promote:.....**Diversity**
18. Learning is a ----- Process.".....**Social**

19. Learning to learn is.....**Metacognition**
20. Metacognition is cognition about:.....**Cognition**
21. Why teaching is a social activity?..... **Teaching cannot be done in isolation**
22. How many types of reflection are there?.....**Two**
23. The theory of Zone of proximal development was given by..... **Vygotsky**
24. What is the highest level of teaching development?..... **Intentionally Inviting**
25. _____ means that all students are treated equally well.....**Equity**
26. Teachers want -----.....**career growth**
27. In ----- education, no formal certification is given at the end.....**Informal**
28. _____ plays an important role in child's learning.....**language**
29. At first stage of zone of proximal development, a child gets assistance from.....**more knowledge other**
30. Master teachers ----- instructional objectives to the students.....**Communicate**
31. A ----- education comprises of a basic education that a person receives at school.....**formal**
32. A profession has a body of**techniques**
33. Paulo Freire was born in.....**1921**
34. complete formula for teacher growth . Knowledge ++ Reflection = Growth.....**Experience**
35. which of the following is not the characteristic of formal education.....**No age and time limit**
36. ----- cannot be separated from the social context in which it occurs..... **Learning**
37. How many stages in Piaget's theory.....**Four**
38. Students' ----- must be considered before planning.....**Feedback**
39. _____ is a method which helps to achieve the objective.....**strategy**
40. Developing questioning skills among students comes in which of the following.....**Higher thinking level**
41. Schools not only teach the students but also _____ them. (Sausa, 2003)..... **raise**
42. Recognition from which of the following is actually motivating for teachers.....**Students**

43. Dissection of frog comes in _____ knowledge.....**procedural**
44. The _____ knowledge and social context of learning as essential conditions of learning. **prior**
45. If you make people more independent; there will be more educational **Equity**
46. Which of the following is the major incentive, teachers like to have..... **Self esteem**
47. Teacher must share ideas with the students so that they can work for a change
in..... **society**
48. Which of the following is created, when we act and reflect' **knowledge**
49. The ----- of our colleagues is the foundation of power..... **esteem**
50. Which of the following of speech describing figure something with implied
terms..... **metaphor**
51. A learning disorder that is characterized by rate of educational disturbances **Autism**
52. Who gave the theory of multiple intelligence..... **Howard gardner**
53. A _____ education comprises of a basic education that a person receives at
school..... **formal**
54. Kinesthetic learning is also known as **tactile learning**
55. Age is the element of ----- diversity..... **physical**
56. In which of the following state of functioning, teachers realize that you didn't know
everything and you need development..... **Intentionally inviting**
57. In which state of functioning, a teacher does not invite people to give you suggestions.
There is no sharing of ideas..... **Intentionally Disinviting**
58. How many key contexts are there in schooling..... **3**
59. Which of the following education has a structured system of learning..... **formal**
60. What is meant by professionals are ethically bound to follow some
norms..... **Self-Disciplined**
61. Learning can lead..... **development**
62. A teacher is responsible in the ----- development of a child..... **cognitive**
63. ----- knowledge is a step ahead of declarative knowledge..... **Procedural knowledge**
64. Which of the following competency should be the most focused by Good
teachers?..... **subject content**

1. Demonstration method is a very good method forlearners_____ **visual**
2. Knowledge may be simply divided intoforms_____ **two**
3. Nolan and Francis (1992) says Knowledge is actively by learners _____ **constructed**
4. Which of the following is based on Gagne's model. _____ **Hunter's model**
5. it means that whatever you teach the students, the students get it well _____ **Literal level**
6. When teacher provide feedback, the studentstheir learning in mind _____ **reinforce**
7.are those which are prerequisite actually _____ **Independent enabling skills**
8. Holistic vision and detailed implementation are two main important component of which type of planning _____ **instructional**
9. Initial level of Psychomotor domain is _____ **Perception**
10. Gagne's plan include a sequence ofparticular "Instructional events". _____ **nine**
11. Which of the following is a commonly used teaching strategy which helps in developing space in working memory _____ **elaboration**
12. Students' tests indicate their _____ **learning.**
13. When teacher provides guidance to the students, this process is called _ **semantic encoding.**
14. an inferential statement that expresses a relationship between two or more concepts. _ **Generalization**
15. is a learning disorder that is characterized by a disturbances in rate of educational development _____ **Autism**
16. which domain is concerned with physical and motor domain _____ **Psychomotor**
17.is basically intuition _____ **Guessing**
18. ----- means that the disposition or learning you are talking about, you must value that disposition. _____ **valuing**
19. ----- policy is to cover the content. _____ **school**
20. Schools not only teach the students but alsothem. (Sausa,2003) _____ **raise**
21. Educators work to stimulate the _____ **spirit of inquiry**
22.is actually detailed form of unit plan. _____ **Lesson plan**
23. The objects through which light could not past are ----- objects. _____ **opaque**
24.helps to make learning more manageable. _____ **Sequence**
25. ____ means that students may get any change in their behavior. ____ **behavioral perspective**
26. The ----- focuses on what the learner will experience, rather than what the instructor will share or do. _____ **objective**
27. The statement "Write an appropriate title for the text" comes in the ----- level of cognitive domain. _____ **synthesis**
28. Every educational activity should have a ----- . _____ **goal**
29.is the gurantee of effective instruction and effective learning _____ **unit planning**
30. ____ is an organized body of knowledge. _____ **Science**
31. Much human behavior is learnt by observing the behavior of others _____ **Bandura**
32. There are ----- types of education in our society. _____ **two**
33. Every student has different ----- of learning. _____ **Potential**
34. ----- is a condition of partial or total impairment of sight or vision that even with correction affects educational performance adversely. _____ **Blind and Low Vision**
35. A ----- education comprises of a basic education that a person receives at school. _____ **formal**
36. There are ----- modeling processes. _____ **Four**

37. The statement " Summarize the story including its main idea" comes in ----- level of cognitive domain. _____ **Synthesis**
38. ----- cannot be separated from the social context in which it occur. _____ **Learning**
39. ----- are skill oriented things where our motor muscles are involved. _____ **Psychomotor domain**
40. Mechanism indicates that a child is -- to do a task by following its mechanics ____ **independent**
41. ----- is a readiness for action. _____ **Set**
42. At ----- stage of zone of proximal development, a child gets assistance from more knowledgeable other. _____ **second**
43. Research shows that teachers mostly focus on -----hemisphere. _____ **left**
44. A teacher is responsible in the ----- development of a child. _____ **cognitive**
45. ----- thinking is outside the box thinking. _____ **Divergent**
46. ----- is also a conceptual change. _____ **Teacher growth**
47. In ----- education, no formal certification is given at the end. _____ **non-formal**
48. Dyslexia does not affect the ----- of a person. _____ **intelligence**
49. ----- activities are different from teaching activities. _____ **Learning**
50. The ----- domain encompasses objectives that deal with the recall or recognition of knowledge. _____ **cognitive**
51. ----- perform poor in mathematics and science. _____ **Girls**
52. Teaching is a ----- . _____ **profession**
53. Which type of diversity is related to Parental education, occupation and social status in the community? _____ **Socio economic**
54. Girls are less committed to ----. _____ **careers**
55. Learning that changes an existing conception is called ---- _____ **conceptual change**
56. The fast and foremost is consideration of a teacher being an/aof change. _____ **Agent**
57. Which is the broader term? _____ **curriculum**
58. Altering motor activities to meet demands of problematic situation is - _____ **Adaptation**
59. Objectives that represent the purposes of instruction of a teacher are called: _____ **Instructional Objective**
60. Different cultures have different perceptions about ----- . _____ **education**
61. Affective domain was developed by Bloom and Krathwohl in ----- . _____ **1964**
62. Schools follow a certain ----- . _____ **curriculum**
63. Lev Vygotsky's was born in ----- . _____ **Russia**
64. ----- is the name of degree that a person must get to join teaching profession. _ **B.ED/ M.ED**
65. You will organize the ----- in such a way that you will ask them to first observe and then record. _____ **assessment**
66. The objective "The student will judge the effectiveness of writing objectives using Bloom's taxonomy" is an example of ----- level of cognitive domain. _____ **Analysis**
67. Good curriculum planning has two major components holistic vision and _____ **Detailed implementation**
68. ----- is not restricted to the schools. _____ **Collegial context**
69. IEP is the abbreviation of ----- . _____ **Individual Education Plan**
70. ----- is the domain where our body movements are involved. _____ **Psychomotor**
71. Teaching has a ----- function. _____ **social**
72. The term ----- is used while explaining multiple diversity among people. _____ **dyslexia**
73. ----- is the title of the whole unit. _____ **Unit/ subject**
74. The best teachers apply planning ----- . _____ **flexibly**
75. ----- plays an important role in child's learning. _____ **Language**
76. Vygotsky's theory of social constructivism includes ----- major ideas. _____ **Three**
77. Methods are also identified in ----- . _____ **instructional planning**
78. What we do in schools, we never focus on the ----- level of learning. _____ **higher**
79. To write performance objectives is ----- . _____ **necessary**
80. The process of sequencing of concept should be from: _____ **Simple to complex**

81. In this state of functioning, a teacher does not invite people to give you suggestions. There is no sharing of ideas. _____ **Intentionally Disinviting**
82. The action verbs that used for evaluation level questions are: _____ **Judge, verify, conclude**
83. _____ is basically an extended adaptation of a lesson plan. _____ **IEP**
84. The interesting thing is that our emphasis is on _____. _____ **working memory**
85. It is important for the broader curriculum to identify educational _____. _____ **experiences**
86. _____ is a fixed capacity. _____ **Intelligence**
87. Master teachers are _____ in their planning. _____ **well-organize**
88. You have to create a check list for assessing _____ skills. _____ **communication**
89. _____ is not appropriate, if both sides of brain are not working appropriately. _____ **Learning**
90. You must tell the students about the _____ processes they are learning. _____ **thought**
91. _____ is one of the famous models of curriculum development. _____ **Tyler's model**
92. Teacher must come up with at least _____ so that the students can understand the concept easily. _____ **one example**
93. Vygotsky was a _____ psychologist. _____ **Russian**
94. _____ is an ability to recall or recognize what has been learned or experienced. **Retention**
95. The warmth, respect and appreciation in the eyes of the _____ for the teacher are the actual recognition. _____ **students**
96. in _____, Bloom developed the taxonomy of cognitive domain. _____ **1956**
97. Individual educational plans are usually opposite to which of the following? _____ **Inclusion**
98. Detailed implementation comes from _____ planning. _____ **lesson**
99. The _____ of our colleagues is the foundation of power. _____ **esteem**
100. "Write an appropriate title for the text" is an example of _____ level of cognitive domain. _____ **Synthesis**
101. The concept of "Teaching is an Art", was developed byin 1891. ____ **William James**
102. At second stage of zone of proximal development, a child gets assistance from _____ . _____ **more knowledgeable other**
103. Which of the following is the art of developing logical plan for instructional activities and has integrated steps? _____ **Sequencing**
104. Learning is a _____ process. _____ **social**
105. Age is the element of _____ diversity. _____ **physical**
106. _____ is change in behavior. _____ **Learning**
107. _____ is a teaching method where a teacher presents concepts and procedures. _____ **Presentation**
108. Teacher should remain relaxed while doing _____. _____ **brainstorming**
109. Paulo Friere was born in _____. _____ **1921**
110. Children construct their own _____. _____ **knowledge**
111. First level of Affective Domain is _____. _____ **Receiving**
112. Post lesson activities are related to _____. _____ **evaluation**
113. Deductive and inductive are not only the modes of presentation but modes of _____ also. _____ **experiments**
114. It was _____ century in which perceptions about teaching, learning and education were developed. _____ **16th**
115. Curriculum guidelines are consists of _____. _____ **Learning outcomes**
116. _____ are those skills which are required to achieve a certain goal. _____ **Enabling skills**
117. Idea of "teaching is an art" was developed by _____. _____ **William James**
118. Sequencing steps are in progression, they start from simple to _____. _____ **Complex**
119. Ministry of education has planned curriculum document till grade level: _____ **12**
120. The individualized part of IEP means that the plan has to be tailored specifically to your child's _____. _____ **special needs**
121. Immersion model was developed for _____ diversity. _____ **Language**
122. Procedural knowledge is gained through _____. _____ **direct instruction**

123. Learning is there when teachers try to help learners change their -----instead of focusing on their own teaching._____ **cognitive structures**
124. In ----- level of cognitive domain, students recall their knowledge._____ **Synthesis**
125. Hierarchy of Affective domain was developed by Bloom and Krathwohl in ----- ._____ **1964**
126. Who gave this statement" Less planning leads to less learning" _____ **Walsh**
127. While writing performance objectives, we have to use an action word that exactly shows the --- ----- ._____ **Behavior**
128. In information processing theory working memory is also termed as which type of memory? _____ **Short term**
129. Teachers have to identify the ----- to monitor the progress of the students. _____ **methods**
130. ----- is also known as concept map. _____ **Graphic organizer**
131. instructional objective arethan goal _____
132. Which of the following is the focus of the Individual Educational Plan (IEP)? _____
133. The knowledge that consists of facts, concepts and generalization is termed as _____
134. In art class a student paints a new and original painting. Which will be cognitive level of this outcome according to Bloom's taxonomy? _____ -
135. Whenever there is evaluation, there must be ----- . _____
136. A ----- is a figure of speech describing something with implied terms. _____ -
137. The thinking process which requires focused attention as compared to others: _____
- 138.

Edu 301 Finnal Files past paper verified

1. Child's rights convention of 1989 has mentioned that "Education is basic right of every child."

2. Shared integration overlaps concepts as the organizer.
 3. Teacher must ensure holistic development of children.
 4. Vygotsky's theory is very much applicable in early childhood education
 5. All conclusions must be considered relative or tentative, not final.
 6. Students LOVE a integrated curriculum and thrive on its challenges.
 7. Forms of integration (Fogarty & Stoehr's 1995)
 8. The integrated curriculum is a great gift to experienced teachers. 9.
- Child is a natural discoverer. (Bruner)
10. Piaget have 4 stages.
 11. Learning is defined as a permanent change in behavior.
 12. There are 3 physical development milestones use in pre-schooling.
 13. Child is a natural discoverer.
 14. By the age three, a child has TWICE as many brain connections as an adult.
 15. Bruner's work was very much influenced by Piaget's work.

16. Drawing conclusions based on observations come in **Inferring**.
17. **Curriculum** is a dead thing teacher's give life to it.
18. Learners can learn only **5-9** chunks of information at a time.
19. In school we do not have much time to deliver information so we must know the **core concept**.
20. Measuring is an **inquiry** process.
21. According to Kolb (1984), **Learning is a process** of a combination of grasping experience and transforming it.
22. In British English, pre-schooling is known as **Nursery**
23. **In pre-schools** pictures and model are not sufficient way of learning
24. Teachers want to teach in **depth** but want to cover the syllabus too.
25. Inductive inquiry is **of two** types.
26. Paper pencil tests can assess **skill** of the students.

27. Remarkable changes occur in the brain during the second decade of life.

28. Learning is the permanent change in behavior

29. If we will use the connections our efficiency of doing any task will increase

30. A 5 year old child has the vocabulary of 2000 words.

31. Through integration it will be easier for the children to ask essential questions.

32. Inquiry is not about memorizing facts.

33. Networks are created between the learners.

34. The Red Hat signifies feelings, hunches and intuition.

35. Inquiry method requires the learner to develop various processes associated with inquiry.

36. Teams are made up of high, average and low achieving students.

37. We do not teach personal skills in schools.

38. **Cooperative** goal structure: It occurs when students perceive that they can obtain their goal if, and only if, the other students with whom they work also obtain their goals. E.g. group games.

39. We can remember those things which are connected with our **prior learning**.

40. **Assimilation** leads to consideration of new options and points of view.

41. Roots of **the research** of all social sciences are based on scientific method.

42. Problem base learning is done on **groups**.

43. The brain thrives on **connections**

44. **Infusion**: The process of planning, assessing and monitoring one's own thinking

45. In **enactive** stage child makes relationships with concrete objects and learns from them.

46. **Reward systems** are oriented to the group as well as the individual

47. Cooperative learning methods are those in which more than **one** person work together.

48. The solutions, alternatives or responses provided by learners are not found in **textbooks**.

49. Knowledge can be assessed through **written tests**.

50. Vygotsky was a **Russian** psychologist.

51. In problem based learning **students** try to clarify the problem.

52. Learners progress from specific observations **to inferences or generalizations**.

53. In **inductive method** we move from specific to general.

54. **Generative** topics are those which are linked with core concepts.

55. **Variables** are much important in scientific method.

56. **Problem solving** is very useful learner centered teaching and learning strategy.

57. Problem based learning also starts from **questions**.
58. Word scientific was devised in the **19th century**.
59. Originally the **scientific method** was called the experimental method.
60. Life is not divided into little blocks of **subjects**.
61. **Cooperative learning** it is a model which requires student cooperation and interdependence in its task, goal and reward structure.
62. **Beyer** says that “critical thinking has two important dimensions.
63. Beyer says that “critical thinking has **two** important dimensions.
64. **John Dewey** said that classroom is just like a laboratory.
65. It is said that **Galileo** is the father of scientific method.
66. Core concepts are **declarative knowledge**.
67. **Norris** (1985) agrees, stating that: Having a critical spirit is as important as thinking critically.
68. **Bruner** did not clearly divide these stages he kept them merged.
69. Inquiry May involve a Problem **Procedure** and Solution

70. The important thing in **jigsaw reading** is what we know we must share it with others.
71. It is common experience that poor children have more **problem solving** skill than other children.
72. Essential questions are related to the **lives of people**.
73. Integration means putting things **together**.
74. John dewy says that there is no such profession where **knowledge** is separable from doing or practice.
75. **Generative topics** need to be interesting for the teachers as well as for students.
76. A lot of information is not important **depth** of information is important.
77. We make the groups of students of **same interest**.
78. **Students** at all ages and levels have a genuine interest in discovering something new.
79. Inquiry May involve **a Problem**, Procedure and Solution.

80. In order to start working, the cells need to **communicate** with each other.

81. **Critical thinking** is a disciplined manner of thought that a person uses to assess the validity of something.

82. Fragmentation is said to be the very **primary level** of integration.

83. Different countries have different age levels of **formal** education.

84. Teachers get little assistance from **textbook** publishers.

85. **De Bono** present term “Six Thinking Hats”.

86. All children are unique they have their own **developmental** milestones.

87. The average weight gain of 6-12years children in a year is 5-7 pound.

88. we need to integrate knowledge with **practical skills**.

89. Brain develop very fast in the **first year** after birth.

90. **Children** construct their own knowledge.

91. Inquiry is actually investigation and it starts with questioning. 92.

Experiences are unique to every individual.

93. **Primary school** teacher should integrate two or three subjects so that we can save the time.

94. **Art** should be an essential component in pre-school education because it is directly related to physical development.

95. Learning depends upon the **environment**.

96. Our teachers do not focus on **core concepts**

97. Drawing conclusions based on observations In **Inferring**.

98. Teacher mostly concern about the **completion** of syllabus.

99. **Inquiry learning** complicates and expands the teacher's work

100. According to Kolb (1984), Learning is a process of a combination of grasping **experience** and transforming it.

101. **Unguided inductive** inquiry teacher's role is minimized, the students' activity increases
102. Development of **Gross motor** skills is very important in preschool or early childhood education.
103. Ensure **holistic** development of children
104. The solutions, alternatives or responses provided by learners are not found in **textbooks**.
105. **Children** love integrated curriculum because it provides the context for learning.
106. We can do classifying **in preschool** children also.
107. In **American** books there is a lot of information than Japanese and German books.
108. **Teachers** are most important persons in the application of curriculum.
109. **essential Questions** Have no obvious right answer.
110. Developmental milestones of pre-school education are different from those of **formal education**.

111. Generative topics are generated from the years children in a year is 5-7 pound.

leant information.

112. core concept of Application in new level is important

113. The Green Hat focuses on **creativity**: the possibilities, alternatives and new ideas.

114. Generative topics actually make **connections**.

115. In **Symbolic** stage child can think abstractly

116. In the context of preschool it includes **two stages** of Piaget's stages of cognitive development

117. Children are very good **problem solvers**.

118. Vygotsky's theory included **four major ideas**.

119. A lot of information is not **important depth** of information is important

120. Students must learn to modify their **conclusions** as new data are discovered.

121. Essential questions definitely ask for **divergent thinking**.

122. The most important part of integration is **assessment**

123. Through integration, teaching becomes **excited** of the experienced teachers.

124. Inquiry is about **investigating** things.

125. In our Pakistani schools we focus on only on the stage of **preoperational**

126. A fully integrated curriculum combines disciplines in a synergistic manner that makes the knowledge of one subject **inseparable** from that of another subject.

127. Jumping is the example of **gross motor**.

128. bruner first stage he termed “ **Enactive**”.

129. **Story time** needs to be an integral part of early years of education.

130. **Learners** are responsible for planning, conducting and evaluating their own efforts.

131. All conclusions must be considered relative or tentative, not final in **inquiry teaching**.

132. Teaching is very exciting for **young and new teachers** because whenever we are going to do something new.

QUIZ 4 EDU301

133. **Task analysis** model is used under the domain of direct instruction.

134. Curious observation is the start of the **inductive process**.

135. Teacher must give his **feedback** before moving on to the next student or question.

136. Teams are made up of **high, average and low** achieving students.

137. During guided inductive inquiry, **the teacher plays** the key role in asking questions, prompting responses and structuring the material and situations.

138. **Problem solving** is very useful learner centered teaching and learning strategy.

139. **Individualistic goal structure** occurs when achievement of the goal by one student is unrelated to the achievement of the goal by other students.

140. In **Enactive** stage child makes relationships with concrete objects and learns from them.

141. Kagan (1994) roles have been adapted by **Arends**.

142. To study a phenomenon is example of **Research Projects**.

143. Use **historical** drawings and painting to stimulate questions.

144. Children produce their original work after **problem based learning**.

145. The cooperative learning model changes the **reward system** and

consequently, requires a different approach to evaluation and recognition of achievement.

146. The primary goal of cooperative learning is **social skill** development.

147. **The hypothesis** is an educated guess about the relationship between the independent and dependent variables.

148. Cooperative learning help students make the **transition** from whole-class to cooperative learning groups.

149. Learners progress from **specific** observations to inferences or generalizations in GII.

150. **Coach**: helps members with lesson content.

151. **In IRE or Recitation** Script Teacher's talk time is more than 50% of students talk time.

152. Last step of scientific method is **communicating** results.

153. Direct instruction lessons require the unique classroom **management skill** of gaining students.

154. **Performance assessment** can be used to measure students' problem solving potential as well as group work.

155. **Heterogeneous** groups are spirit of cooperative learning.

156. Recitation is also called **monologic** discourse pattern.

157. **Dialogic** discussion also called as interactive discussion.

158. Test item on these quizzes must be of an **objective type**, so they can be scored in class or soon after.

159. Group learning develops ideas and **social skills of the learners**.

160. The word scientific was devised in the **19th century**.

161. If the topic is **divergent** then the teacher must have less talk time. 162

The **reward** structure should be individualistic as well as group oriented.

163. **Guided inductive inquiry** Students investigate a teacher-presented question using student designed/selected procedures.

164. The objective of **inquiry teaching** is often as process.

165. The most important thing in thinking skills is to provide the wait time

166. Piaget spend actually **50 years** to work on constructivism.
167. Children produce their original work after **problem based learning**.
168. **Gatekeeper** equalizes participation.
169. **Information** inquiry is very widely used in our school settings.
170. The objective is to learn (or reinforce) the processes of **examining** events, objects, and data and then to arrive at appropriate sets of generalizations.
171. Usually problem base learning is done on **groups**.
172. **Limitations** Keeps students in passive roles.
173. **Group skills** are the skills with which students participate effectively in a group.
174. **Edison** invented the bulb.
175. The biggest limitation of Cooperative Learning is the **mindset**.
176. Projects tend to be **multidimensional**.
177. Most classroom **discourse** proceeds at too rapid a pace.
178. Heterogeneous groups are **spirit** of cooperative learning.

179. Collecting data is the **3rd step** of guided inductive inquiry.

180. Students work in teams to master learning **goal**.

181. U-shaped seating arrangements facilitates **classroom discussions**. 182

If more than **80%** of the researches say that cooperative learning helps in academic achievement of a student than essentially cooperative learning tasks must be provided to them.

183. **Students** at all ages and levels have a genuine interest in discovering something new.

184. Daily drill of anything is **distributed practice**.

185. Monologic discussion is teacher **centered discussion**.

quiz Final Paper

1. **Discourse** is overall pattern.

2. Teacher must give his **feedback** before moving on to the next student or question.

3. **Scientific** method is often used in research.

4. In **cooperative learning** teachers have to be careful about their reward structure.
5. **Question** should be directive to the whole class.
6. **Gatekeeper:** equalizes participation
7. **Cooperative learning** teaching is how to grade for both team and individual efforts.
8. We must be able to exhibit our **feeling** in the classroom.
9. **Bruner** did not clearly divide these stages he kept them merged.
10. Cooperative learning should have cooperative tasks, cooperative **goals** and cooperative rewards.

11. Piaget spend actually **50 years** to work on constructivism.

12. Burner's first stage **is enactive.**

13. In **guided inquiry**, students investigate a teacher-presented question.
14. **In pre schools** pictures and model are not sufficient way of learning.
15. Andragogy means how **adults** learn.

16. **Performance assessment** can be used to measure students' problem solving potential as well as group work.

17. **Competitive goal structure:** It occurs when students perceive that they can obtain their goal if, and only if, the other students with whom they work fail to obtain their goals.

18. The most important thing in inquiry is **evidence**.

19. The focus of project learning is **product.**

20. **Group skills** are the skills with which students participate effectively in a group. E.g. readiness for action, sequencing a task, managing tasks, negotiation skills, communication skills, assessing skills or managing skills etc.

21. **Guided inquiry** involves the processes of searching for information and applying information to answer questions.

22. Having a critical spirit **Norris**

is as important as thinking critically.

23. **Problem Based Learning** has its intellectual roots in the Socratic Method

24. Inquiry may involve problem, **procedure** and solution.

25. The **hypothesis** is an educated guess about the relationship between the independent and dependent variables.

26. The blue hat in the De Bono's six thinking hats symbolizes **thinking process.**

27. The green hat in the De Bono's six thinking hats symbolizes **creativity**

28. According to Kolb (1984), Learning is a process of a combination of grasping **experience** and transforming it.

29. **Assimilation** leads to consideration of new options and points of view.

30. In **project learning** the focus is on ultimate outcome and product.

31. Students investigate topic-related questions that are student formulated through student designed/selected procedures. **Unguided inquiry**

32. In cooperative learning, **Reward systems** are oriented to the group as well as the individual.

33. The biggest limitation of cooperative learning is the **mindset**.

Objective type of items can be scored soon after.

35. Discussion is the exchange of **ideas**.

36. U-shaped seating arrangements facilitates **classroom discussions**.

37. Adventure projects may last for **weeks.**

38. The most important thing in thinking skills is to provide the **wait time**.

39. **Researchers** use word discourse with discussion method.

40. Recitation is **teacher centered** script.

41. If projects **are structured** properly, they allow the learner or groups of learners to be immersed in one big idea,
42. Teams are made up of **high, average and low achieving** students.
43. Students work in teams to master learning **goal**.
44. Learning is a **permanent** change in behavior.
45. Learners progress from specific observations to **inferences or generalizations**.
46. **Student Teams Achievement Division (STAD)**: a cooperative learning classroom technique.
47. Knowledge can be assessed through **written tests**.
48. **Generative topics** are those which are linked with core concepts.
49. Whenever a particular behaviour is after a behaviour and the behaviour increases as a result, positive **reinforcement** has occurred.
50. Assigning different roles is a good thing in **jigsaw technique**

51. **Children** do not have attention span

52. Detailed implementation comes from **lesson planning**.

1. Who presented the multiple intelligence theory? **Harvard Gardner**

2. How many levels Bloom's taxonomy? **6**

3. What is concept map? **Graphic organization**

4. **Sentence** formation is a prerequisite for paragraph.

5. **Teacher** identifies classroom assessment criteria.

6. Art of developing logical plan for instructional activities is called?

“Sequencing”

7. Methods are also identified in... ? **“Instructional planning”**

8. Good Textbooks provide sequence? **“Structured sequence of lessons”**

9. Knowledge has forms? **“Two”**

10. Knowledge is something that is learnt by reflecting, acting on something is called? **“Subjective”**

11. A child knows about own cogitation is called? “**Metacognitive knowledge**”

12. Memorized things in? “**Facts**”

13. Task analysis model is a very important model as it helps the teacher to identify **prerequisites**.

14. The process of setting goals, developing strategies is **planning**.

15. We discuss criteria and method in **evaluation**.

16.The individualized part of IEP means that the plan has to be tailored specifically to your child's **special needs**.

17.A unit plan is a **hierarchy** of lesson plans.

18.Methods are also identified in instructional planning **Student-oriented**.

19.**IEP** is basically an extended adaptation of a lesson plan.

20.We can remember those things which are connected with our **prior learning**.

21.**Adolescence** is a time of profound brain growth.

22.Advance organizer model is based upon **deductive learning**.

23. Nonlinear fashion focus on **process**

24. Brainstorming is a common tool **to describe** a thing

25. The white hat in the De Bono's six thinking hats signifies **information known or needed**

26. **Teacher** model skill in direct instruction

27. **Network** integration is created among group of students

28. Teacher role is minimized in **unguided** inquiry

29. In United States, pre-school is named as **pre K**

30. **Gatekeeper** equalizes participation

31. Generative topics actually make **connections**

32. **Divergent** thinking is outside the box thinking

33. The learning of core **concepts** is lifetime

34. Different countries have different age levels of **formal** education

35. Children can come up with different ideas and teachings must **accept** all ideas

36. **Children** construct their own knowledge

37. Our teachers do not focus on **core concept**

38. Objects must be in the form that it can be **measured**

39. **British** preschool name Nursery School or simply “nursery”

40. **United States** preschool name pre-school and pre K

41. Child is a natural discoverer. **Bruner**

42. By the **three**, a child has TWICE as many brain connections

43. In order to start working, the cells need to **communicate** with each other

44. A research was conducted and it was reported that teachers mostly focus **hemisphere** of children.

45. For creativity **divergent** thinking is very important.

46. Different types of -functions occurs in the left and right hemisphere.

Mental (Lec22)

47. The networked methodology of integration is **Student centered** (Lec 27)

48. Asking question is a **Skill** (Lec 20)

49. Brain development continues till the age of **8** (Lec 23)

50. We can remember those things which are concerned with our **Right side memory** (Lec 22)

Best of Luck for FInnal

Mid term mcqs

- 1.
2. Educators work to stimulate the spirit of **inquiry** and acquisition of knowledge.
3. **Facts or principles** that he has memorized by learning.
4. Every student has different **potential** of learning.
5. **Reflective practice** is a way of studying your own experiences to improve the way you work.
6. Zone of proximal concept was also established by **Vygotsky**.
7. This professional standard demands from us to create a climate that promotes the **Professional judgment**.
8. Teacher has the autonomy of how to teach in a **class**.
9. **Task analysis** model is a very important model of learning.
10. Idea of "Teaching is an Art", was developed by **William James** in 1891.
11. Knowledge about different facts is **stratified knowledge**.
12. Teaching has a very important **social** function.
13. Planning is important as there are **three** characteristics of master teachers.
14. **Intentionally inviting**: This is the highest level of your teaching development.
15. **Knowledge** is created, when we act and reflect.
16. Modes of presentation are **two** i.e. Inductive and deductive.
17. Nothing is learnt unless it is in **long term memory**.
18. To achieve the learning outcomes of every **unit**, we have to construct some instructional objectives.
19. While writing performance objectives, we have to use an action word that exactly shows the **behavior**.
20. **In horizontal level**, planning includes selection of activities, resources, assessment and homework.
21. **In vertical level**, it includes link between standards, benchmarks, learning outcomes and instructional objectives
22. **Intellectual** growth cannot take place unless we do not provide opportunities to our students to think at high level.
23. There are **three** foundations of curriculum: sociological, philosophical and psychological.
24. "**Analysis** level questions are higher-order questions that require students to think critically and in depth.
25. **The art of developing logical plan for instructional activities is called 'sequencing'. Such a plan consists of interlink steps.**
26. The **taxonomy** has been widely used in curriculum and test construction.
From google
27. Learn skill of observation then actually **inductive mode** of presentation is better than deductive mode of presentation.
28. **Sequence** helps to make learning more manageable.
29. **Comprehension level** of cognitive "Describe two nation theory".
30. **Holistic vision** comes from curriculum planning while detailed implementation comes from **lesson planning**.
31. In curriculum planning, **assessment** is taken into consideration.
32. Asking question is a **skill**.
33. Questions of **students** are more important than the questions of teachers.

34. Curriculum documents are not available in all **schools**.
35. **Individual Education Plans** (IEP)
36. The common thing in Tyler's model and Bloom's taxonomy is that the teachers observe the....
37. **Content** knowledge is a very important competency of a teacher.
38. **Processes** are also very important in teachers' considerations.
39. **Sequencing** has different principles; these principles are the introduction of simple concepts then concrete examples.
40. Writing Standards and benchmarks in a sequence in **Curriculum Planning**.
41. **Action** research is very effective research for teachers, because it aims at improvement.
42. **Origination** is the highest level of Simpson's hierarchy.
43. Lesson plan starts with the **subject**.
44. There are different **mechanics** to do different things.
45. **Good textbooks** provide a **structured** sequence of lessons.
46. Working memory is our **conscious** memory.
47. **Sequencing** steps are in progression. They start from simple and go to **complex**.
48. **Origination** is the level where a child can originate things on his own.
49. Write performance objectives is **necessary**.
50. In order to teach a sequenced lesson teacher need to add **complexity** to the lesson.
51. **Unit planning** is the most important as well as the most time-consuming level of planning for each teacher. gave the idea by **Waish**
52. **Sentence formation** is a prerequisite for paragraph writing.
53. We have limited time to teach in a **class**.
54. Bloom's Taxonomy was **knowledge** level or recall level, where actually students recall their knowledge.
55. You will organize the experience in such a way that you will ask them **to first observe** and then record.
56. Teacher must come up with at least **one example** so that the students can understand the concept easily
57. Content forms are **three**: Facts, Concepts Generalizations
58. A lot of information can be communicated through a **picture**.
59. **Lesson plan** is actually detailed form of unit plan.
60. **Abstract** thinking is very important
61. Curriculum guides are planned by **Ministry of education** in Pakistan.
62. **Questioning** has a lot of significance value.
63. An important thing in inductive mode of presentation is **Process**.
64. **Enabling skills** are those skills which are required to achieve a certain goal.
65. The individualized part of IEP means that the plan has to be tailored specifically to your child's **special needs**.
66. **Content and Processes** are also very important in teachers' considerations.
67. Whenever we are sequencing, we need to know what a **prerequisite** for a particular terminal objective is.
68. The focus in IEP will be on the **needs** of the learners rather on the content to be taught.
69. In **debriefing teacher** tells the students to reflect what they have learnt through this process.
70. Elements of planning **11**.

71. **Simulations** are done in the virtual environments and are computer based.
72. **Discovery learning** is a learner-centered method.
73. Group processes and the **classroom goal**, task, reward and participation structures are more directly under the teachers' control.
74. **Classroom structures** are the foundations that shape particular lessons and behaviors during those lessons. Three important structures include task, goal, and participation structure.
75. **Synthesis level** Summarize the story including its main idea.
76. There are **four** steps in Taylor's model of curriculum
77. Write an appropriate title for the text.. come from **Synthesis level**.
78. We need to sequence our **learning objectives**.
79. **Adding on** must not be confusing.
80. Instructional aims: **Student-oriented**.
81. If a teacher plans to take the students for **field trips**, then he needs to consider school resources.
82. **Abstractions** are something which is not tangible.
83. **Lesson** is a piece of a unit NOT a block of time.
84. Learning activities are those where **students** are actively involved.
85. Effective individual education plans (IEP) have key characteristics. They are Individualized and **child centered**.
86. **Girls** perform poor in mathematics and science.
87. **Teacher** is a person who is making lesson plan, unit plan and term plan.
88. A **lesson plan** is defined as "a systematic design for the development, implementation and evaluation of instruction".
89. What we do in schools, we never focus on the **higher level** of learning.
90. The common think in Tayler and Bloom taxonomy is that to teacher **the behaviors**.
91. Methods are also identified in **instructional planning**.
92. In evaluation, we discuss that there are **two** things; criteria and method.
93. Where there is silence, there is no **learning**.
94. **Metacognition**: is cognitive about cognition.
95. You have to create a check list for assessing **communication skills**.
96. The other name for Learning by reflection is **Socratic method**.
97. Master teacher **communicate** their instructional objectives effectively to the students.
98. Linear fashion focus on **goals**.
99. Nonlinear fashion focus on **process**.
100. **Negative reinforcement** occurs when something already present is removed (taken away) as a result of a person's behavior.
101. Gagne expand the steps of introducing and organizing experience to include a sequence of **nine** particular "Instructional events".
102. Teachers have to identify the **methods** to monitor the progress of the students.
103. whenever we are planning a unit, we really need to select these learning activities very carefully. And we need to make a match between **processes and learning activities**.
104. The interesting thing is that our emphasis is on **working memory**.
105. Lesson plan is part of the **unit plan** while activity schedule is part of the block timetable.

106. performance objectives, there are the **three** elements present i.e. performance condition and criterion.
107. **performance objective** we need to align our performance objectives with the curriculum.
108. **Subject/ topic** Unit subject is the title of the whole unit.
109. **Unit planning** is important because we need to know the reasons for dividing the whole thing into components. Most of the times, teachers' complaint for shortage of time.
110. **There are three levels of plans.**
111. Collegial context is not restricted to the schools rather now it has become **web based**
112. There are **6 levels** of Bloom's taxonomy of cognitive domain.
113. Feeling of **efficacy** is very important for the teachers
114. It is our assumption that **independent skills** are prerequisites, so students know them already.
115. Less planning leads to less learning. (Walsh, 1992.
116. Collegial context is something that emphasizes that power and decision-making should be shared among some or all members of the organization (Bush, 2003).
117. **Keeping notes** is a very important type of post lesson activity because a teacher can have the record of his/her teaching.
118. Knowledge forms are **Content, Process.**
119. Mechanism indicates that a child **is independent** to do a task by following its mechanics.
120. **unit planning** is very challenging and time consuming but the most important thing is that good unit planning is a guarantee to effective instruction and effective learning.
121. **schools'** policy is to cover the content as much as possible.
122. evaluate your teaching, come up with a judgement but provide sufficient **evidence** to support your statement.
123. **Declarative knowledge:** This is the knowledge that is declared in books, research papers, newspapers.
124. According to research, the best recognition is got from **students** and not from the government or the school administrators.
125. **Blind and Low Vision** – A condition of partial or total impairment of sight or vision that even with correction affects educational performance adversely.
126. **Active learning:** Active learning is where human mind is actively involved in constructing meaning of the experience.
127. **Freire** was a Brazilian educator and philosopher who was a leading ... **Freire was born on September 19, 1921** to a middle-class family in Recife, Pernambuco, **Brazil.**
128. Teacher is more interested in **covering the syllabus** instead of bringing conceptual change in the students.
129. **Science** is an organized body of knowledge.
130. Answering some key questions to create an image of the classroom teaching and learning.” **Reflective practice:**
131. **Reflective practice** is very important for a teacher.
132. **Nolan and Francis (1992) believe that: Knowledge is actively constructed by learners.**

133. Learning is there when teachers try to help learners change **their cognitive structures** instead of focusing on their own teaching.
134. “Much human behavior is learnt by observing the behavior of others (Bandura 1978
135. **Zone of Proximal Development (ZPD)**
136. The gap between actual and potential level of a child is **Zone of Proximal Development**
137. Cognitive perspective is to develop **students’ academic and thinking** skills from a novice level to a more expert level.
138. **Speech** is a powerful psychological tool that lays the foundation for basic structures of thinking later in one’s development.
139. According to Vygotsky’s theory, language, learning and environment is a **social context**.
140. Creativity is also a part of **metacognition**
141. Learning depends **on prior learning**
142. Schools not only teach the students but also raise them. (Sausa,2003)
143. What students are taught in schools affects the ways they will thereafter see and treat others. (Schlesinger, 1993)
144. **CAP**: Cognitive, Affective and Psychomotor
145. **Psychomotor domain** is the domain where your body movements are involved.
146. Perception means attending to a **stimulus**.
147. Set is a readiness for **action**.
148. Word ‘complex’ shows that here the child can do many things **independently**.
149. Adaptation comes from the word ‘Adapt’ which means to set **yourself** in the given situation.
150. Hierarchy of affective domain was developed by **Bloom and Krathwohl in 1964**.
151. In organization, you start showing that behavior but that is not a **consistent** behavior.
152. “Taxonomies may be used to decide what to teach, how to teach and how to evaluate teaching.” (Marzano, Pickering, and Pollock 2001)
153. Research shows that learning do not take place if presented in isolated items (Hohn,1995)
154. Taxonomies provide a **cognitive structure**.

Edu301 Quiz #3 Final term

1. Child’s rights convention of 1989 has mentioned that “**Education** is basic right of every child.”
2. **Shared** integration overlaps concepts as the organizer.
3. Teacher must ensure **holistic** development of children.
4. **Vygotsky’s** theory is very much applicable in early childhood education.
5. All **conclusions** must be considered relative or tentative, not final.
6. **Students** LOVE a integrated curriculum and thrive on its challenges.
7. Forms of integration (Fogarty & Stoehr’s 1995)
8. The **integrated** curriculum is a great gift to experienced teachers.

9. Child is a natural discoverer. (Bruner)
10. Piaget have 4 stages.
11. Learning is defined as a permanent change in behavior.
12. There are 3 physical development milestones use in pre-schooling.
13. Child is a natural discoverer.
14. By the age three, a child has TWICE as many brain connections as an adult.
15. Bruner's work was very much influenced by Piaget's work.
16. Drawing conclusions based on observations come in Inferring.
17. Curriculum is a dead thing teacher's give life to it.
18. Learners can learn only 5-9 chunks of information at a time.
19. In school we do not have much time to deliver information so we must know the core concept.
20. Measuring is an inquiry process.
21. According to Kolb (1984), Learning is a process of a combination of grasping experience and transforming it.
22. In British English, pre-schooling is known as Nursery.
23. In pre-schools pictures and model are not sufficient way of learning.
24. Teachers want to teach in depth but want to cover the syllabus too.
25. Inductive inquiry is of two types.
26. Paper pencil tests can assess skill of the students.
27. Remarkable changes occur in the brain during the second decade of life.
28. Learning is the permanent change in behavior.
29. If we will use the connections our efficiency of doing any task will increase.
30. A 5 year old child has the vocabulary of 2000 words.
31. Through integration it will be easier for the children to ask essential questions.
32. Inquiry is not about memorizing facts.
33. Networked are created between the learners.
34. The Red Hat signifies feelings, hunches and intuition.
35. Inquiry method requires the learner to develop various processes associated with inquiry.
36. Teams are made up of high, average and low achieving students.
37. We do not teach personal skills in schools.
38. Cooperative goal structure: It occurs when students perceive that they can obtain their goal if, and only if, the other students with whom they work also obtain their goals. E.g. group games.
39. We can remember those things which are connected with our prior learning.
40. Assimilation leads to consideration of new options and points of view.
41. Roots of the research of all social sciences are based on scientific method.
42. Problem base learning is done on groups.
43. The brain thrives on connections.
44. Infusion: The process of planning, assessing and monitoring one's own thinking
45. In enactive stage child makes relationships with concrete objects and learns from them.
46. Reward systems are oriented to the group as well as the individual.
47. Cooperative learning methods are those in which more than one person work together.
48. The solutions, alternatives or responses provided by learners are not found in textbooks.
49. Knowledge can be assessed through written tests.
50. Vygotsky was a Russian psychologist.

51. In problem based learning **students** try to clarify the problem.
52. Learners progress from specific observations to **inferences or generalizations**.
53. In **inductive method** we move from specific to general.
54. **Generative** topics are those which are linked with core concepts.
55. **Variables** are much important in scientific method.
56. **Problem solving** is very useful learner centered teaching and learning strategy.
57. Problem based learning also starts from **questions**.
58. Word scientific was devised in the **19th century**.
59. Originally the **scientific method** was called the experimental method.
60. Life is not divided into little blocks of **subjects**.
61. **Cooperative learning** it is a model which requires student cooperation and interdependence in its task, goal and reward structure.
62. **Beyer** says that “critical thinking has two important dimensions.
63. Beyer says that “critical thinking has **two** important dimensions.
64. **John Dewey** said that classroom is just like a laboratory.
65. It is said that **Galileo** is the father of scientific method.
66. Core concepts are **declarative knowledge**.
67. **Norris** (1985) agrees, stating that: Having a critical spirit is as important as thinking critically.
68. **Bruner** did not clearly divide these stages he kept them merged.
69. Inquiry May involve a Problem **Procedure** and Solution
70. The important thing in **jigsaw reading** is what we know we must share it with others.
71. It is common experience that poor children have more **problem solving skill** than other children.
72. Essential questions are related to the **lives** of people.
73. Integration means putting things **together**.
74. John dewy says that there is no such profession where **knowledge** is separable from doing or practice.
75. **Generative topics** need to be interesting for the teachers as well as for students.
76. A lot of information is not important **depth of** information is important.
77. We make the groups of students of **same interest**.
78. **Students** at all ages and levels have a genuine interest in discovering something new.
79. Inquiry May involve a **Problem**, Procedure and Solution.
80. In order to start working, the cells need to **communicate** with each other.
81. **Critical** thinking is a disciplined manner of thought that a person uses to assess the validity of something.
82. Fragmentation is said to be the very **primary** level of integration.
83. Different countries have different age levels of **formal** education.
84. Teachers get little assistance from **textbook** publishers.
85. **De Bono** present term “Six Thinking Hats”.
86. All children are **unique** they have their own **developmental** milestones.
87. The average weight gain of 6-12 years children in a year is **5-7 pound**.
88. we need to integrate knowledge with **practical** skills.
89. Brain develop very fast in the **first** year after birth.
90. **Children** construct their own knowledge.
91. Inquiry is actually **investigation** and it starts with questioning.

92. **Experiences** are unique to every individual.
93. **Primary school** teacher should integrate two or three subjects so that we can save the time.
94. **Art** should be an essential component in pre-school education because it is directly related to physical development.
95. Learning depends upon the **environment**.
96. Our teachers do not focus on **core concepts**
97. Drawing conclusions based on observations **In Inferring**.
98. Teacher mostly concern about **the completion of syllabus**.
99. **Inquiry learning** complicates and expands the teacher's work.
100. According to Kolb (1984), Learning is a process of a combination of grasping **experience** and transforming it.
101. **Unguided inductive inquiry** teacher's role is minimized, the students' activity increases
102. Development of **Gross motor** skills is very important in preschool or early childhood education.
103. Ensure **holistic** development of children
104. The solutions, alternatives or responses provided by learners are not found in **textbooks**.
105. **Children** love integrated curriculum because it provides the context for learning.
106. We can do classifying in **preschool** children also.
107. In **American** books there is a lot of information than Japanese and German books.
108. **Teachers** are most important persons in the application of curriculum.
109. **essential Questions** Have no obvious right answer.
110. Developmental milestones of pre-school education are different from those of **formal education**.
111. Generative topics are generated from the **leant information**.
112. **core concept of Application in** new level is important
113. The Green Hat focuses on **creativity**: the possibilities, alternatives and new ideas.
114. Generative topics actually make **connections**.
115. In **Symbolic** stage child can think abstractly
116. In the context of preschool it includes **two** stages of Piaget's stages of cognitive development
117. Children are very good **problem solvers**.
118. Vygotsky's theory included **four** major ideas.
119. A lot of information is not important **depth** of information is important
120. Students must learn to modify their **conclusions** as new data are discovered.
121. Essential questions definitely ask for **divergent thinking**.
122. The most important part of integration is **assessment**
123. Through integration, teaching becomes **excited** of the experienced teachers.
124. Inquiry is about **investigating** things.
125. In our Pakistani schools we focus on only on the stage of **preoperational**
126. A fully integrated curriculum combines disciplines in a synergistic manner that makes the knowledge of one subject **inseparable** from that of another subject.

- 127. Jumping is the example of **gross motor**.
- 128. **bruner first stage he termed “ Enactive”**.
- 129. **Story time** needs to be an integral part of early years of education.
- 130. **Learners** are responsible for planning, conducting and evaluating their own efforts.
- 131. All conclusions must be considered relative or tentative, not final **in inquiry teaching**.
- 132. Teaching is very exciting for **young and new teachers** because whenever we are going to do something new, so we are excited about that

QUIZ 4 EDU301

- 133. **Task analysis** model is used under the domain of direct instruction.
- 134. Curious observation is the start of the **inductive process**.
- 135. Teacher must give his **feedback** before moving on to the next student or question.
- 136. Teams are made up of **high, average and low** achieving students.
- 137. During guided inductive inquiry, the **teacher** plays the key role in asking questions, prompting responses and structuring the material and situations.
- 138. **Problem solving** is very useful learner centered teaching and learning strategy.
- 139. **Individualistic goal structure** occurs when achievement of the goal by one student is unrelated to the achievement of the goal by other students.
- 140. In **Enactive** stage child makes relationships with concrete objects and learns from them.
- 141. Kagan (1994) roles have been adapted by **Arends**.
- 142. To study a phenomenon is example of **Research Projects**.
- 143. Use **historical** drawings and painting to stimulate questions.
- 144. **Graphic** Use historical drawings and painting to stimulate questions.
- 145. Children produce their original work after **problem based learning**.
- 146. The cooperative learning model changes the **reward system** and consequently, requires a different approach to evaluation and recognition of achievement.
- 147. The primary goal of cooperative learning is **social** skill development.
- 148. The **hypothesis** is an educated guess about the relationship between the independent and dependent variables.
- 149. Cooperative learning help students make the **transition** from whole-class to cooperative learning groups.
- 150. Learners progress from **specific observations** to inferences or generalizations in GII.
- 151. **Coach**: helps members with lesson content.
- 152. **In IRE or Recitation Script** Teacher’s talk time is more than 50% of students talk time.
- 153. Last step of scientific method is **communicating results**.
- 154. Direct instruction lessons require the unique classroom **management skill** of gaining students.
- 155. **Performance assessment** can be used to measure students’ problem solving potential as well as group work.
- 156. **Heterogeneous** groups are spirit of cooperative learning.
- 157. Recitation is also called **monologic discourse pattern**.

158. **Dialogic** discussion also called as interactive discussion.
159. Test item on these quizzes must be of an **objective type**, so they can be scored in class or soon after.
160. Group learning develops ideas and **social skills of the learners**.
161. The word scientific was devised in the **19th century**.
162. If the topic is **divergent** then the teacher must have less talk time.
163. The **reward structure** should be individualistic as well as group oriented.
164. **Guided inductive inquiry** Students investigate a teacher-presented question using student designed/selected procedures.
165. The objective of **inquiry teaching** is often as process.
166. The most important thing in thinking skills is to provide the **wait time**.
167. Piaget spend actually **50** years to work on constructivism.
168. Children produce their original work after **problem based learning**.
169. **Gatekeeper** equalizes participation.
170. **Information** inquiry is very widely used in our school settings.
171. The objective is to learn (or reinforce) the processes of **examining** events, objects, and data and then to arrive at appropriate sets of generalizations.
172. Usually problem base learning is done on **groups**.
173. **Limitations** Keeps students in passive roles.
174. **Group skills** are the skills with which students participate effectively in a group.
175. **Edison** invented the bulb.
176. The biggest limitation of Cooperative Learning is the **mindset**.
177. Projects tend to be **multidimensional**.
178. Most classroom **discourse** proceeds at too rapid a pace.
179. Heterogeneous groups are **spirit** of cooperative learning.
180. Collecting data is the **3rd** step of guided inductive inquiry.
181. Students work in teams to master learning **goal**.
182. U-shaped seating arrangements facilitates **classroom discussions**.
183. If more than **80%** of the researches say that cooperative learning helps in academic achievement of a student than essentially cooperative learning tasks must be provided to them.
184. **Students** at all ages and levels have a genuine interest in discovering something new.
185. Daily drill of anything is **distributed practice**.
186. Monologist discussion is **teacher** centered discussion.
187. **Neuroanatomical evidence** suggests that learning and positive experiences help build complex, adaptive brains.
188. Problem-solving skills will increase in complexity with patience, and practice will strengthen **neural connections**.
189. Dramatic changes occur within **10 to 15 year** old children as well.
190. Cooperative learning environment requires **attention**
191. The inquiry learning cannot be **rushed**.
192. Inquiry is not only **questioning**.
193. Making a classroom cookbook, is an example of **project learning**.
194. Learners progress from specific observations to **inferences or generalizations**.
195. Group learning will be more efficient for developing **the ideas**.

196. Wait time is **thinking** time.
197. Aristotle talked about **logics** and he was one of the pioneers.
198. The **hypothesis** is an educated guess about the relationship between the independent and dependent variables.
199. In **communication** there is paraphrasing.
200. Identifying a problem' is the **1st** step of guided inductive inquiry.
201. Preparing a statement of research objects' is the **2rd** step of guided inductive inquiry.
202. Collecting data' is the **3rd** step of guided inductive inquiry.
203. Interpreting data' is the **4th** step of guided inductive inquiry.
204. Development tentative conclusion' is the **5th** step of guided inductive inquiry.
205. Replication' is the **6th** step of guided inductive inquiry.
206. Projects tend to be **multidimensional**.
207. Projects are product focused i.e. **product** at the end of the project.
208. Exploratory projects are those where children **explore** something.
209. Work on scientific method was started by **Aristotle** to Galileo.
210. Rubrics are **of two** types.
211. if projects are **structured properly**, they allow the learner or groups of learners to be immersed in one big idea, or to work towards one common goal.
212. Inquiry is not a **theoretical** technique.
213. Adventure projects may last for **weeks**.
214. Cooperative learning method can help students develop **leadership** skills.
215. If **errors** exist in the student's logics or inferences, teacher needs to point them out.
216. Project Based Learning allows **students** to reflect upon their own ideas and opinions.
217. **Skills** can be assessed through direct observation.
218. **Generalization** consists of two or more concepts.
219. A special challenge for cooperative learning teaching is how to **grade** for both team and individual efforts.
220. Classroom is a **learning** laboratory.
221. Aristotle promoted **deduction**.
222. problem base learning is done on **groups**.
223. Usually we do not **question** our tradition and authority.
224. Project Based Learning teaches students 21st century **skills** as well as content.
225. **Socratic method** is basically a discussion method.
226. A teacher is a classroom clarifier, guiding students to develop **logical** thinking skills.
227. Dialogic discussion promote **divergent thinking**.
228. **Discourse** is overall pattern.
229. 2. Teacher must give his **feedback** before moving on to the next student or question.
230. 3. **Scientific** method is often used in research.
231. 4. In **cooperative learning** teachers have to be careful about their reward structure.

232. 5. **Question** should be directive to the whole class.
233. 6. **Gatekeeper**: equalizes participation
234. 7. **Cooperative learning** teaching is how to grade for both team and individual efforts.
235. 8. We must be able to exhibit our **feeling** in the classroom.
236. 9. **Bruner** did not clearly divide these stages he kept them merged.
237. 10. Cooperative learning should have cooperative tasks, cooperative **goals** and cooperative rewards.
238. 11. Piaget spend actually **50 years** to work on constructivism.
239. 12. Burner's first stage is **enactive**.
240. 13. In **guided inquiry**, students investigate a teacher-presented question.
241. 14. In **pre schools** pictures and model are not sufficient way of learning.
242. 15. Andragogy means how **adults** learn.
243. 16. **Performance assessment** can be used to measure students' problem solving potential as well as group work.
244. 17. **Competitive goal structure**: It occurs when students perceive that they can obtain their goal if, and only if, the other students with whom they work fail to obtain their goals.
245. 18. The most important thing in inquiry is **evidence**.
246. **19**. The focus of project learning is **product**.
247. 20. **Group skills** are the skills with which students participate effectively in a group. E.g. readiness for action, sequencing a task, managing tasks, negotiation skills, communication skills, assessing skills or managing skills etc.
248. Edu301 (MCQs for Final Term)
249. 2

250. 21. **Guided inquiry** involves the processes of searching for information and applying information to answer questions.
251. 22. Having a critical spirit is as important as thinking critically. **Norris**
252. 23. **Problem Based Learning** has its intellectual roots in the Socratic Method
253. 24. Inquiry may involve problem, **procedure** and solution.
254. 25. The **hypothesis** is an educated guess about the relationship between the independent and dependent variables.
255. 26. The blue hat in the De Bono's six thinking hats symbolizes **thinking process**.
256. 27. The green hat in the De Bono's six thinking hats symbolizes **creativity**.
257. 28. According to Kolb (1984), Learning is a process of a combination of grasping **experience** and transforming it.
258. 29. **Assimilation** leads to consideration of new options and points of view.
259. 30. In **project learning** the focus is on ultimate outcome and product.
260. 31. Students investigate topic-related questions that are student formulated through student designed/selected procedures. **Unguided inquiry**
261. 32. In cooperative learning, **Reward systems** are oriented to the group as well as the individual.
262. 33. The biggest limitation of cooperative learning is the **mindset**.
263. 34. **Objective** type of items can be scored soon after.
264. 35. Discussion is the exchange of **ideas**.
265. 36. U-shaped seating arrangements facilitates **classroom discussions**.
266. 37. Adventure projects may last for **weeks**.
267. 38. The most important thing in thinking skills is to provide the **wait time**.
268. 39. **Researchers** use word discourse with discussion method.
269. 40. Recitation is **teacher centered** script.
270. 41. If projects **are structured** properly, they allow the learner or groups of learners to be immersed in one big idea,
271. 42. Teams are made up of **high, average and low achieving students**.
272. 43. Students work **in teams** to master learning **goal**.
273. 44. Learning is a **permanent** change in behavior.

- 274. Learners progress from **specification** observations to **inferences or generalizations**.
- 275. **Student Teams Achievement Division (STAD):** a **cooperative** learning classroom technique.
- 276. . Knowledge can be assessed through **written tests**.
- 277. . **Generative topics** are those which are linked with core concepts.
- 278. . Whenever a particular behaviour is __after a behaviour and the behaviour increases as a result, positive reinforcement has occurred.
- 279. . Assigning different roles is a good thing in **jigsaw technique**
- 280. **Children** do not have attention span
- 281. Detailed implementation comes from **lesson planning**.
- 282. Assigning different roles is a good thing in jigsaw technique

EDU301

Who presented the multiple intelligence theory? **Harvard Gardner**

How many levels Bloom's taxonomy? **6**

What is concept map? **Graphic organization**

Sentence formation is a prerequisite for paragraph.

Teacher identifies classroom assessment criteria.

Art of developing logical plan for instructional activities is called? **"Sequencing"**

Methods are also identified in... ? **"Instructional planning"**

Good Textbooks provide sequence? **"Structured sequence of lessons"**

Knowledge has forms? **"Two"**

Knowledge is something that is learnt by reflecting, acting on something is called? **"Subjective"**

A child knows about own cognition is called? **"Metacognitive knowledge"**

Memorized things in? **"Facts"**

Task analysis model is a very important model as it helps the teacher to identify **prerequisites**.

The process of setting goals, developing strategies is **planning**.

We discuss criteria and method in **evaluation**.

The individualized part of IEP means that the plan has to be tailored specifically to your child's **special needs**.

A unit plan is a **hierarchy** of lesson plans.

Methods are also identified in instructional planning **Student-oriented**.

IEP is basically an extended adaptation of a lesson plan.

We can remember those things which are connected with our **prior learning**.

Adolescence is a time of profound brain growth.

Advance organizer model is based upon **deductive learning**.

Nonlinear fashion focus on **process**

Brainstorming is a common tool to **describe** a thing

The white hat in the De Bono's six thinking hats signifies **information known or needed**

Teacher model skill in direct instruction

Network integration is created among group of students

Teacher role is minimized in **unguided** inquiry

In United States, pre-school is named as **pre K**

Gatekeeper equalizes participation

Generative topics actually make **connections**

Divergent thinking is outside the box thinking

The learning of **core concepts** is lifetime

Different countries have different age levels of **formal** education

Children can come up with different ideas and teachings must **accept** all ideas

Children construct their own knowledge

Our teachers do not focus on **core concept**

Objects must be in the form that it can be **measured**

British preschool name Nursery School or simply "nursery"

United States preschool name pre-school and pre K

Child is a natural discoverer. **Bruner**

By the **three**, a child has TWICE as many brain connections

In order to start working, the cells need to **communicate** with each other

A research was conducted and it was reported that teachers mostly focus **hemisphere** of children.

For creativity **divergent** thinking is very important.

Different types of -functions occurs in the left and right hemisphere. **Mental** (Lec22)

The networked methodology of integration is **Student centered** (Lec 27)

Asking question is a **Skill** (Lec 20)

Brain development continues till the age of **8** (Lec 23)

We can remember those things which are concerned with our **Right side memory** (Lec 22)

Adolescence is a time of profound brain growth. (Lec 26)

Integration means putting things **Together** (Lec 27)

Advance organizer model is based upon **Deductive learning** (Lec 21)

Case method is a very good approach to know problem solving. (Lec 28)

Pedagogy means how to teach **Students**/

Core concepts are **declarative** knowledge

Development cannot be separated from the **social** context in which it occurs

Development of **gross motor** skills is very important in preschool or early childhood education

Children construct their own knowledge.

John dewy says that there is no such profession where **knowledge** is separable from doing or practice.

Application of core concepts in new level is important

In **left** hemisphere there is logical thinking. Verbal intelligence and convergent thinking

Teachers want to teach in **depth** but want to cover the syllabus too

Curriculum is a dead thing teacher's give life to it.

Researchers use the word discourse for discussion

Teachers must provide the students with opportunities to **discover** things

Performance assessment can be used to measure student's problem solving potential as well as group

Knowledge can be assessed through **written tests**

Usually we do not **question** our tradition and authority

Wait time is **thinking** time

The last level of Maslow's hierarchy of need is **Self-actualization**

Socratic Method is the example of discussion method

Edison invented the bulb

Projects tend to be **multidimensional**

Different types of **mental** functions occur in the left and right hemisphere. (Lec22)

Pedagogy means how to teach **children**.

Adolescence is a time of profound brain growth. (Lec 26)

Advance organizer model is based upon **Deductive learning**. (Lec 21)

Case method is a very good approach to know problem solving. (Lec 28)

Andragogy means how _ learn. **Adults**

Beyer says that critical thinking has **two** important dimensions.

The inquiry learning cannot be **rushed**

Learners are responsible for planning. Conducting and evaluating their own effort

Process of **assimilation** leads to consideration of new options and points of view

Assimilation leads to consideration of new options and points of view

According to Kolb (1984), learning is a process of a combination of grasping **experience** and transforming it.

Curious observation is the start of the **inductive process**

Students love integrated curriculum

What type of goodwill message is most likely to use an RSVP? Condolence, **invitation**, appreciation, holiday greeting,

Generative topics actually make ___schemes, **connections**, procedure or assessments

Schooling average age.... **4/3**

we are concerned by student.... achievement. **Team**

Understand is in.... Level. **First/ conceptual**

..... focus discussion and disposition.

Scientific method.... research. **Roots/Psychology/authentic**

Theory can be falsified.

EDU301:Quiz No 2

Quiz

Question # 1 of 10 (Start time: 09:47:46 PM, 06 December 2016)

The last three levels of Bloom's taxonomy of cognitive domain are called as -----.

Select correct option

☐	lower level of learning
☒	higher level of learning
☐	moderate level of learning
☐	initial level of learning

EDU301:Quiz No 2

Question # 2 of 10 (Start time: 09:49:17 PM, 06 December 2016)

There are different ----- to do different things.

Select correct option

☐	methods
☒	mechanics
☐	process
☐	views

EDU301:Quiz No 2

Question # 3 of 10 (Start time: 09:50:14 PM, 06 December 2016)

----- is the title of the whole unit.

Select correct option

☒	Unit/ subject
☐	Rationale
☐	Content
☐	Process

EDU301:Quiz No 2

Question # 4 of 10 (Start time: 09:51:01 PM, 06 December 2016)

----- comes from curriculum planning.

Select correct option

☒	Holistic vision
☐	Detailed implementation
☐	Term plan
☐	Unit plan

EDU301:Quiz No 2

Question # 5 of 10 (Start time: 09:51:36 PM, 06 December 2016)

There are ----- foundations of curriculum.

Select correct option

☐	Two
☒	Three
☐	Four
☐	Five

EDU301:Quiz No 2

Question # 6 of 10 (Start time: 09:52:46 PM, 06 December 2016)

----- is the level of understanding.

Select correct option

☐	application
☒	Comprehension
☐	Evaluation
☐	Analysis

EDU301:Quiz No 2

Quiz Start Time:

Question # 7 of 10 (Start time: 09:53:29 PM, 06 December 2016)

The ----- domain encompasses objectives that deal with the recall or recognition of knowledge.

Select correct option

☐	Psychomotor
☒	cognitive
☐	affective
☐	educational

EDU301:Quiz No 2

Quiz Start Time: 09:47 PM,

Question # 8 of 10 (Start time: 09:55:07 PM, 06 December 2016)

In -----, it includes link between standards, benchmarks, learning outcomes and instructional objectives.

Select correct option

☐	horizontal level
☐	primary level
☒	vertical level
☐	vertical level

EDU301:Quiz No 2

Question # 9 of 10 (Start time: 09:56:09 PM, 06 December 2016)

The first three levels of cognitive domain are called as -----.

Select correct option

☒	Lower level of learning
☐	Higher level of learning
☐	Moderate level of learning
☐	All of the above

EDU301:Quiz No 2

Question # 10 of 10 (Start time: 09:57:39 PM, 06 December 2016)

Hierarchy of Affective domain was developed by Bloom and Krathwohl in -----.

Select correct option

☐	1980
☐	1975
☒	1964
☐	1958

**"Dream is meant to be original.
There is no honor in trying to be
a copy of someone else's dream
life."**

1st semester B.Ed. 2020

General Methods of Teaching (EDU 301)

IMPORTANT MCQS 301

1. Educators work to stimulate the spirit of **inquiry** and acquisition of knowledge.
2. **Facts or principles** that he has memorized by learning.
3. Every student has different **potential** of learning.
4. **Reflective practice** is a way of studying your own experiences to improve the way you work.
5. Zone of proximal concept was also established by **Vygotsky**.
6. This professional standard demands from us to create a climate that promotes the **Professional judgment**.
7. Teacher has the autonomy of how to teach in a **class**.
8. **Task analysis** model is a very important model of learning.
9. Idea of "Teaching is an Art", was developed by **William James in 1891**.
10. Knowledge about different facts is **stratified knowledge**.
11. Teaching has a very important **social function**.
12. Planning is important as there are three characteristics of **master teachers**.
13. **Intentionally inviting**: This is the highest level of your teaching development.
14. Knowledge is created, when we **act and reflect**.
15. Modes of presentation are **two** i.e. Inductive and deductive.
16. Nothing is learnt unless it is in **long term memory**.
17. To achieve the learning outcomes of every unit, we have to construct **some instructional objectives**.
18. While **writing performance** objectives, we have to use an action word that exactly shows the behavior.
19. In **horizontal level**, planning includes selection of activities, resources, assessment and homework.
20. In **vertical level**, it includes link between standards, benchmarks, learning outcomes and instructional objectives
21. **Intellectual growth** cannot take place unless we do not provide opportunities to our students to think at high level.
22. There are **three** foundations of curriculum: sociological, philosophical and psychological.
23. **"Analysis level** questions are higher-order questions that require students to think critically and in depth.
24. The art of developing logical plan for instructional activities is called '**sequencing**'. Such a plan consists of interlink steps.
25. The **taxonomy** has been widely used in curriculum and test construction. From google
26. **Learn skill of observation** then actually inductive mode of presentation is better than deductive mode of presentation.
27. Sequence helps to make learning more **manageable**.
28. **Comprehension level** of cognitive "Describe two nation theory".
29. **Holistic vision** comes from curriculum planning while detailed implementation comes from lesson planning.

30. **In curriculum planning**, assessment is taken into consideration.
31. Asking question is **a skill**.
32. Questions of students are **more important than the questions** of teachers.
33. **Curriculum documents** are not available in all schools.
34. Individual Education Plans (**IEP**)
35. **The common thing in Tyler's model and Bloom's taxonomy is that the teachers observe the behaviors**
36. **Content knowledge** is a very important competency of a teacher.
37. **Processes** are also very important in teachers' considerations.
38. **Sequencing** has different principles; these principles are the introduction of simple concepts then concrete examples.
39. Writing Standards and benchmarks in a sequence in **Curriculum Planning**.
40. Action research is very effective research for teachers, **because it aims at improvement**.
41. **Origination** is the highest level of Simpson's hierarchy.
42. **Lesson plan** starts with the subject.
43. There are different **mechanics** to do different things.
44. **Good textbooks** provide a structured sequence of lessons.
45. Working memory is our **conscious memory**.
46. Sequencing steps are in **progression**. They start from simple and go to complex.
47. **Origination** is the level where a child can originate things on his own.
48. Write performance objectives is **necessary**.
49. In order to teach a sequenced lesson teacher need to **add complexity** to the lesson.
50. **Unit planning** is the most important as well as the most time-consuming level of planning for each teacher. gave the idea by **Waish**
51. **Sentence formation** is a prerequisite for paragraph writing.
52. We have limited time to teach in a **class**.
53. **Bloom's Taxonomy** was knowledge level or recall level, where actually students recall their knowledge.
54. You will organize the experience in such a way that you will ask them **to first observe** and then record.
55. Teacher must come up with at least one example so that the students can **understand the concept easily**
56. **Content forms are three**: Facts, Concepts Generalizations
57. A lot of information can be communicated through a **picture**.
58. **Lesson plan** is actually detailed form of unit plan.
59. **Abstract** thinking is very important
60. Curriculum guides are planned by **Ministry of education** in Pakistan.
61. **Questioning** has a lot of significance value.
62. An important thing in inductive mode of presentation is **Process**.
63. **Enabling skills** are those skills which are required to achieve a certain goal.
64. The individualized part of IEP means that the plan has to be tailored specifically to your child's **special needs**.

65. **Content and Processes** are also very important in teachers' considerations.
66. Whenever we are **sequencing**, we need to know what a prerequisite for a particular terminal objective is.
67. **The focus in IEP** will be on the needs of the learners rather on the content to be taught.
68. In **debriefing teacher** tells the students to reflect what they have learnt through this process.
69. Elements of planning **11**.
70. **Simulations** are done in the virtual environments and are computer based.
71. **Discovery learning** is a learner-centered method.
72. **Group processes** and the classroom goal, task, reward and participation structures are more directly under the teachers' control.
73. **Classroom structures** are the foundations that shape particular lessons and behaviors during those lessons. Three important structures include task, goal, and participation structure.
74. **Synthesis level** Summarize the story including its main idea.
75. There are **four** steps in Taylor's model of curriculum
76. Write an appropriate title for the text.. come from **Synthesis level**.
77. We need to sequence our **learning objectives**.
78. Adding on must not be **confusing**.
79. Instructional aims: **Student-oriented**.
80. If a teacher plans to take the students for field trips, then he needs to consider **school resources**.
81. **Abstractions** are something which is not tangible.
82. Lesson is a piece of a unit NOT a **block of time**.
83. **Learning activities** are those where students are actively involved.
84. **Effective individual education plans** (IEP) have key characteristics. They are Individualized and child centered.
85. **Girls** perform poor in mathematics and science.
86. Teacher is a **person** who is making lesson plan, unit plan and term plan.
87. A lesson plan is defined as "a **systematic design** for the development, implementation and evaluation of instruction".
88. What we do in schools, we never focus on the **higher level** of learning.
89. The common think in Tayler and Bloom taxonomy is that to teacher the **behaviors**.
90. Methods are also identified in **instructional planning**.
91. **In evaluation**, we discuss that there are two things; criteria and method.
92. Where there is silence, there **is no learning**.
93. **Metacognition**: is cognitive about cognition.
94. You have to create a check list for assessing **communication skills**.
95. The other name for Learning by reflection is **Socratic Method**.
96. **Master teacher** communicate their instructional objectives effectively to the students.
97. Linear fashion focus **on goals**.
98. Nonlinear fashion focus on **process**.
99. **Negative reinforcement** occurs when something already present is removed (taken away) as a result of a person's behavior.

100. Gagne expands the steps of introducing and organizing experience to include a sequence of nine particular “**Instructional events**”.
101. Teachers have to identify the **methods to monitor** the progress of the students.
102. Whenever we are **planning a unit**, we really need to select these learning activities very carefully. And we need to make a match between processes and learning activities.
103. The interesting thing is that our emphasis is **on working memory**.
104. Lesson plan is part of the **unit plan** while activity schedule is part of the block timetable.
105. **Performance objectives**, there are the three elements present i.e. performance condition and criterion.
106. **Performance objective** we need to align our performance objectives with the curriculum.
107. **Subject/ topic** Unit subject is the title of the whole unit.
108. **Unit planning** is important because we need to know the reasons for dividing the whole thing into components. Most of the times, teachers’ complaint for shortage of time.
109. There are **three** levels of plans.
110. **Collegial context** is not restricted to the schools rather now it has become web based
111. There are **6 levels** of Bloom’s taxonomy of cognitive domain.
112. **Feeling of efficacy** is very important for the teachers
113. It is our assumption that independent skills are prerequisites, so students know them already.
114. Less planning leads to less learning. **(Walsh, 1992.**
115. **Collegial context** is something that emphasizes that power and decision-making should be shared among some or all members of the organization **(Bush, 2003).**
116. **Keeping notes** is a very important type of post lesson activity because a teacher can have the record of his/her teaching.
117. Knowledge forms are **Content, Process.**
118. **Mechanism indicates** that a child is independent to do a task by following its mechanics.
119. **Unit planning** is very challenging and time consuming but the most important thing is that good unit planning is a guarantee to effective instruction and effective learning.
120. **Schools’ policy** is to cover the content as much as possible.
121. Evaluate your teaching, come up with judgments but provide sufficient evidence to support your statement.
122. **Declarative knowledge:** This is the knowledge that is declared in books, research papers, and newspapers.
123. 124. According to research, the best **recognition** is got from students and not from the government or the school administrators.
124. **Blind and Low Vision** – A condition of partial or total impairment of sight or vision that even with correction affects educational performance adversely.
125. **Active learning:** Active learning is where human mind is actively involved in constructing meaning of the experience.
126. **Freire** was a Brazilian educator and philosopher who was a leading ...
127. **Freire was born on September 19, 1921** to a middle-class family in Recife, Pernambuco, Brazil.

128. Teacher is more interested in **covering the syllabus** instead of bringing conceptual change in the students.
129. **Science** is an organized body of knowledge.
130. Answering some key questions to create an image of the classroom teaching and learning.”
Reflective practice:
131. **Reflective practice** is very important for a teacher.
132. **Nolan and Francis (1992) believe that:** Knowledge is actively constructed by learners.
133. **Learning is there when teachers try to help learners change their cognitive structures instead of focusing on their own teaching.**
134. “Much human behavior is learnt by observing the behavior of others (**Bandura 1978**)
135. **Zone of Proximal Development (ZPD)**
136. The gap between actual and potential level of a child is **Zone of Proximal Development**
137. **Cognitive perspective** is to develop students’ academic and thinking skills from a novice level to a more expert level.
138. **Speech is a powerful psychological tool that lays the foundation for basic structures of thinking later in one’s development.**
139. According to **Vygotsky’s theory**, language, learning and environment is a social context.
140. Creativity is also a part of **metacognition**
141. Learning depends on **prior learning**
142. Schools not only teach the students but also raise them. (**Sausa,2003**)
143. What students are taught in schools affects the ways they will thereafter see and treat others. (**Schlesinger, 1993**)
144. **CAP:** Cognitive, Affective and Psychomotor
145. **Psychomotor domain** is the domain where your body movements are involved.
146. Perception means **attending to a stimulus**.
147. Set is a readiness for **action**.
148. **Word ‘complex’** shows that here the child can do many things independently.
149. 1Adaptation comes from the word ‘**Adapt**’ which means to set yourself in the given situation.
150. **Hierarchy of affective** domain was developed by Bloom and **Krathwohl in 1964**.
151. In organization, you start showing that behavior but that is not a **consistent behavior**.
152. “**Taxonomies may be used to decide what to teach, how to teach and how to evaluate teaching.**” (**Marzano, Pickering, and Pollock 2001**)
153. Research shows that learning do not take place if presented in isolated items (**Hohn,1995**)
154. Taxonomies provide a **cognitive structure**.

Current Quiz 1... 2020

Students indicate their leaning. Select the correct option

results

tests

assignments

home work

Knowledge about different facts is-

stratified knowledge.

subjective knowledge

objective knowledge

factual knowledge

A teacher is responsible in the development of a child. Select the correct option

physical

moral

emotional

cognitive

In -- - level of functioning, teachers intentionally don't want to share their ideas and don't ask for advice. Select the correct option

Unintentionally Disinviting

Unintentionally Inviting

Intentionally Disinviting

Intentionally Inviting

means the knowledge about how to teach the students. Select the correct option

Objective knowledge

Subjective knowledge

Pedagogical knowledge

Stratified knowledge

According to Gagne, knowledge is "knowing that.." Select the correct option

Procedural

Metacognition

Stratified

Declarative

Verbal information or factual information are the other names for knowledge, Select the correct option

Procedural

Metacognition

Declarative

Stratified

According to research, the best recognition teachers got is from the Select the correct option Colleagues

Administrators

Students

Parents ...

There are types of communication disability. Select the correct option

two

Three

Four

five

There are necessary elements of planning. Select the correct option

10

9

11

12

The level of to the profession must be to the range of every student. Select the correct option

obligation

commitment

word

assurance

In current understanding, the student must be dissatisfied with the Select the correct option modeling process

modeling effect

Conceptual change

feedback

A profession allows Select the correct option

autonomy

no autonomy

practice

no practice

The term is used while explaining multiple diversity among people.

dyslexia

autism

giftedness

exceptionality

are skill oriented things where our motor muscles are involved. Ep Select the correct option Cognitive domain

Affective domain

Psychomotor domain

all of the above

is method which helps to achieve the objective. Select the correct option

Strategy

Approach

Technique

Scheme

is the mean of creating a dialogue.

Reflection

Action

Reflection in action

Reflection on action

Kinesthetic learning is also known as Select the oreet optien

Visual learning

Auditory learning

Learning by doing

Tactile learning

There are ----- kinds of diversity. Select the correct option

2

3

4

is very famous because of his theory of multiple intelligences. Select the correct option

William James

Howard Gardner

Jean Piaget

Donald Schön

Vygotsky was a psychologist.

German

Russian

Japanese

Armerican

Schools follow a certain -. Select the coerect option

criteria

evaluation

curriculum

norms

Is the knowledge that is declared in books, research papers or newspapers.

Procedural knowledge

Declarative knowledge

Meta-cognition Knowledge

Factual knowledge

Teachers want -. Select the correct option

self esteem

ethics

self motivation

career growth

In what state of functioning, a teacher is functioning at a low level of commitment and motivation. Select the correct option

Intentionally Disinviting

Unintentionally Disinviting

Unintentionally Inviting

Intentionally Inviting

Robert Mills Gagne was - psychologist. Select the correct option

American

German

Russian

Indian

Learners need --- on everything they do. Select the correct option

feedback

reinforcement.

punishment

Commitment

At. Stage assistance from more knowledgeable other. stage of zone of proximal development, a child
Select the oomeet option

first

second

Third

fourth

Recognition from --- is actually motivating for teachers. Select the correct option parents

students

administrators

School

managers ...

A view or opinion that is incorrect because based on faulty thinking or understanding is a -. Select the
coreet option

myth

misconception

Who presented the multiple intelligence theory? **Harvard Gardner**

How many levels Bloom's taxonomy? **6**

What is concept map? **Graphic organization**

Sentence formation is a prerequisite for paragraph. Teacher identifies classroom assessment criteria. Art of developing logical plan for instructional activities is called? "**Sequencing**"

Methods are also identified in... ? "**Instructional planning**"

Good Textbooks provide sequence? "**Structured sequence of lessons**"

Knowledge has forms? "**Two**"

Knowledge is something that is learnt by reflecting, acting on something is called? "**Subjective**"

A child knows about own cogitation is called? "**Metacognitive knowledge**"

Memorized things in? "**Facts**"

Task analysis model is a very important model as it helps the teacher to identify **prerequisites**. The process of setting goals, developing strategies is **planning**.

We discuss criteria and method in **evaluation**.

The individualized part of IEP means that the plan has to be tailored specifically to your child's **special needs**

. A unit plan is a **hierarchy** of lesson plans.

Methods are also identified in instructional planning **Student-oriented**.

IEP is basically an extended adaptation of a lesson plan. We can remember those things which are connected without **prior learning**.

Adolescence is a time of profound brain growth.

Advance organizer model is based upon **deductive learning**.

Nonlinear fashion focus on **process**

Brainstorming is a common tool to **describe** a thing

The white hat in the De Bono's six thinking hats signifies **information known or needed**

Teacher model skill in direct instruction

Network integration is created among group of students

Teacher role is minimized in **unguided** inquiry

In United States, pre-school is named as **pre K Gatekeeper** equalizes participation

Generative topics actually make **connections**

Divergent thinking is outside the box thinking

The learning of **core concepts** is lifetime

Different countries have different age levels of **formal** education

Children can come up with different ideas and teachings must **accept** all ideas

Children construct their own knowledge

Our teachers do not focus on **core concept**

Objects must be in the form that it can be **measured**

British preschool name Nursery School or simply “**nursery**”

United States preschool name pre-school and pre K Child is a natural discoverer. **Bruner**

By the **three**, a child has TWICE as many brain connections

In order to start working, the cells need to **communicate** with each other

A research was conducted and it was reported that teachers

mostly focus **hemisphere** of children.

For creativity **divergent** thinking is very important.

Different types of -functions occurs in the left and right hemisphere. **Mental** (Lec22)

The networked methodology of integration is **Student centered** (Lec 27)

Asking question is a **Skill** (Lec 20)

Brain development continues till the age of **8** (Lec 23)

We can remember those things which are concerned with our **Right side memory** (Lec 22)

Adolescence is a time of profound brain growth. (Lec 26)

Integration means putting things **Together** (Lec 27)

Advance organizer model is based upon **Deductive learning** (Lec 21)

Case method is a very good approach to know problem solving. (Lec 28)

Pedagogy means how to teach **Students**/

Core concepts are **declarative** knowledge

Development cannot be separated from the **social context** in which it occurs

Development of **gross motor** skills is very important in preschool or early childhood education

Children construct their own knowledge.

John dewy says that there is no such profession where **knowledge** is separable from doing or practice.

Application of core concepts in new level is important

In **left** hemisphere there is logical thinking. Verbal intelligence and convergent thinking
Teachers want to teach in **depth** but want to cover the syllabus too

Curriculum is a dead thing teacher's give life to it.

Researchers use the word discourse for discussion

Teachers must provide the students with opportunities to
discover things

Performance assessment can be used to measure student's problem solving potential as

Knowledge can be assessed through **written tests**

Usually we do not **question** our tradition and authority Wait time is **thinking** time

The last level of Maslow's hierarchy of need is **Self- actualization**

Socratic Method is the example of discussion method

Edison invented the bulb

Projects tend to be **multidimensional**

Different types of **mental** functions occur in the left and right
hemisphere. (Lec22)

Pedagogy means how to teach **children**.

Adolescence is a time of profound brain growth. (Lec 26)

Advance organizer model is based upon **Deductive learning**. (Lec 21)

Case method is a very good approach to know problem solving. (Lec 28)

Andragogy means how _ learn. **Adults**

Beyer says that critical thinking has **two** important dimensions.

The inquiry learning cannot be **rushed**

Learners are responsible for planning. Conducting and
evaluating their own effort

Process of **assimilation** leads to consideration of new options
and points of view

According to Kolb (1984), learning is a process of a combination of grasping **experience** and transforming
it. Curious observation is the start of the inductive process

Students love integrated curriculum

What type of goodwill message is most likely to use an RSVP? Condolence, **invitation**, appreciation,
holiday greeting,

Generative topics actually make __ schemes, **connections**, procedure or assessments

Schooling average age.... **4/ 3**

model is an important way of leaning. Select the correct option

Information processsing model

Task analysis model

observational learning

Apprentice ship model

The educators need to exert every effort to --- professional standards. Select the correct option lower

Raise

promote

neglect

is a learning disorder that is characterized by a disturbance in rate of educational development. Select the correct option

Intellectual disability

Mild intellectual disability

Giftedness

Austim

Quizzes EDU#301

1. Element of physical diversity are.....
 - a. 6
 - b. 8
 - c. 1
 - d. 3
2. Learning that change an existing conception is called.....
 - a. Conceptual change
 - b. Modeling process
 - c. Modeling effect
 - d. Teacher growth
3. Which is the highest level of teaching development?
 - a. Unintentionally inviting
 - b. Unintentionally disinviting
 - c. Intentionally inviting
 - d. Intentionally disinviting
4. Who believe that knowledge is actively constructed by learners?
 - a. Nolan and Francis
 - b. Piaget and Vygotsky
 - c. Ainsworth
 - d. Bruner

5. means problems with reading, writing, spelling, symbols and numbers, because the brain misinterprets what it sees (visual) and hears auditory.

a. Dyslexia

b. Giftedness

c. Autism

d. Speech impairment

6. An educator must work to stimulate the spirit of.....among the students.

a. Inquiry

b. Answering

c. Responding

d. Retorting

7. Atstage of zone of proximal development, a child gets assistance from more knowledge other.

a. First

b. Second

c. Third

d. Fourth

8. Vygotsky's theory about prior learning and social context included Major ideas.

a. 2

b. 3

c. 4

d. 5

9. is a way of studying your own experiences to improve the way you work.

- a. Reflection
 - b. Reflective practice
 - c. Career growth
 - d. Feedback
10. Recognition from..... Is actually motivating for teachers.
- a. Parents
 - b. Student
 - c. Administrators
 - d. School managers
11. is a learning style in which learning take place by the student among a physical activity
- a. Auditory learning
 - b. Kinesthetic learning
 - c. Visual learning
 - d. All of the above
12. Who gave the theory of multiple intelligence?
- a. Jean Paget
 - b. Vygotsky
 - c. William James
 - d. Howard Gardener
13. is the name of degree that a person must get to join teaching profession.
- a. B.com/M.com
 - b. B.A/M.A
 - c. BSC/MSC
 - d. B.ED/M.ED

14. Gender diversity means..... in gender.
- a. Difference
 - b. Equality
 - c. Equity
 - d. Quality
15. We are living in.....
- a. Isolation
 - b. Society of self motivated people
 - c. Unethical society
 - d. Social stratified society
16. is a fixed capacity.
- a. Interpersonal skill
 - b. Prior learning
 - c. Intelligence
 - d. Emotion
17. Society for Pakistani English language “teacher” organizes different workshops for.....
- a. Student
 - b. Teachers
 - c. School administrators
 - d. Educators
18. Dyslexia does not affect the.... Of a person
- a. Intelligence
 - b. Physical condition
 - c. Emotional health
 - d. Social contact

EDU301:Quiz No 2

Question # 10 of 10 (Start time: 09:57:39 PM, 06 December 2016)

Hierarchy of Affective domain was developed by Bloom and Krathwohl in -----.

Select correct option

☐	1980
☐	1975
☒	1964
☐	1958

EDU301:Quiz No 2

Question # 9 of 10 (Start time: 09:56:09 PM, 06 December 2016)

The first three levels of cognitive domain are called as -----.

Select correct option

☒	Lower level of learning
☐	Higher level of learning
☐	Moderate level of learning
☐	All of the above

Question # 8 of 10 (Start time: 09:55:07 PM, 06 December 2016)

In -----, it includes link between standards, benchmarks, learning outcomes and instructional objectives.

Select correct option

☐	horizontal level
☐	primary level
☒	vertical level
☐	vertical level

Question # 7 of 10 (Start time: 09:53:29 PM, 06 December 2016)

The ----- domain encompasses objectives that deal with the recall or recognition of knowledge.

Select correct option

☐	Psychomotor
☒	cognitive
☐	affective
☐	educational

EDU301:Quiz No 2

Question # 6 of 10 (Start time: 09:52:46 PM, 06 December 2016)

----- is the level of understanding.

Select correct option

☐	application
☒	Comprehension
☐	Evaluation
☐	Analysis

EDU301:Quiz No 2

Question # 4 of 10 (Start time: 09:51:01 PM, 06 December 2016)

----- comes from curriculum planning.

Select correct option

☒	Holistic vision
☐	Detailed implementation
☐	Term plan
☐	Unit plan

EDU301:Quiz No 2

Question # 3 of 10 (Start time: 09:50:14 PM, 06 December 2016)

----- is the title of the whole unit.

Select correct option

☒	Unit/ subject
☐	Rationale
☐	Content
☐	Process

EDU301:Quiz No 2

Question # 2 of 10 (Start time: 09:49:17 PM, 06 December 2016)

There are different ----- to do different things.

Select correct option

☐	methods
☒	mechanics
☐	process
☐	views

EDU301:Quiz No 2

Quiz

Question # 1 of 10 (Start time: 09:47:46 PM, 06 December 2016)

The last three levels of Bloom's taxonomy of cognitive domain are called as -----.

Select correct option

☐	lower level of learning
☒	higher level of learning
☐	moderate level of learning
☐	initial level of learning

EDU301:Quiz No 2

Question # 2 of 10 (Start time: 09:49:17 PM, 06 December 2016)

There are different ----- to do different things.

Select correct option

☐	methods
☒	mechanics
☐	process
☐	views

In United States, pre-school is named as **pre K**

Gatekeeper equalizes participation

Generative topics actually make **connections**

Divergent thinking is outside the box thinking

The learning of **core concepts** is lifetime

Different countries have different age levels of **formal** education

Children can come up with different ideas and teachings must **accept** all ideas

Children construct their own knowledge

Our teachers do not focus on **core concept**

Objects must be in the form that it can be **measured**

British preschool name Nursery School or simply “nursery”

United States preschool name pre-school and pre K

Child is a natural discoverer. **Bruner**

By the **three**, a child has TWICE as many brain connections

In order to start working, the cells need to **communicate** with each other

A research was conducted and it was reported that teachers mostly focus **hemisphere** of children.

For creativity **divergent** thinking is very important.

Different types of -functions occurs in the left and right hemisphere. **Mental** (Lec22)

The networked methodology of integration is **Student centered** (Lec 27)

Asking question is a **Skill** (Lec 20)

Brain development continues till the age of **8** (Lec 23)

We can remember those things which are concerned with our **Right side memory** (Lec 22)

Adolescence is a time of profound brain growth. (Lec 26)

Integration means putting things **Together** (Lec 27)

Advance organizer model is based upon **Deductive learning** (Lec 21)

Case method is a very good approach to know problem solving. (Lec 28)

Pedagogy means how to teach **Students**/

Core concepts are **declarative** knowledge

Development cannot be separated from the **social** context in which it occurs

Development of **gross motor** skills is very important in preschool or early childhood education

Children construct their own knowledge.

John dewy says that there is no such profession where **knowledge** is separable from doing or practice.

Application of core concepts in new level is important

In **left** hemisphere there is logical thinking. Verbal intelligence and convergent thinking

Teachers want to teach in **depth** but want to cover the syllabus too

Curriculum is a dead thing teacher's give life to it.

Researchers use the word discourse for discussion

Teachers must provide the students with opportunities to **discover** things

Performance assessment can be used to measure student's problem solving potential as well as group

Knowledge can be assessed through written tests

Usually we do not question our tradition and authority

Wait time is thinking time

The last level of Maslow's hierarchy of need is Self-actualization

Socratic Method is the example of discussion method

Edison invented the bulb

Projects tend to be multidimensional

Different types of mental functions occur in the left and right hemisphere. (Lec22)

Pedagogy means how to teach children.

Adolescence is a time of profound brain growth. (Lec 26)

Advance organizer model is based upon Deductive learning. (Lec 21)

Case method is a very good approach to know problem solving. (Lec 28)

Andragogy means how _ learn. Adults

Beyer says that critical thinking has two important dimensions.

The inquiry learning cannot be rushed

Learners are responsible for planning. Conducting and evaluating their own effort

Process of **assimilation** leads to consideration of new options and points of view

Assimilation leads to consideration of new options and points of view

According to Kolb (1984), learning is a process of a combination of grasping **experience** and transforming it.

Curious observation is the start of the **inductive process**

Students love integrated curriculum

What type of goodwill message is most likely to use an RSVP? Condolence, **invitation**, appreciation, holiday greeting,

Generative topics actually make __schemes, **connections**, procedure or assessments

Schooling average age.... **4/ 3**

we are concerned by student.... achievement. **Team**

Understand is in.... Level. **First/ conceptual**

..... focus discussion and disposition.

Scientific method.... research. **Roots/Psychology/authentic Theory** can be falsified.

1. Who presented the multiple intelligence theory? **Harvard Gardner**

2. How many levels Bloom's taxonomy? **6**

3. What is concept map? **Graphic organization**

4. **Sentence** formation is a prerequisite for paragraph.

5. **Teacher** identifies classroom assessment criteria.

6. Art of developing logical plan for instructional activities is called? **"Sequencing"**

7. Methods are also identified in... ? **"Instructional planning"**

8. Good Textbooks provide sequence? **"Structured sequence of lessons"**

9. Knowledge has forms? **"Two"**

10. Knowledge is something that is learnt by reflecting, acting on something is called? **"Subjective"**

11. A child knows about own cogitation is called? **"Met cognitive knowledge"**

12. Memorized things in? **"Facts"**

13. Task analysis model is a very important model as it helps the teacher to identify **prerequisites**.

14. The process of setting goals, developing strategies is **planning**.

15. We discuss criteria and method in **evaluation**.

16. The individualized part of IEP means that the plan has to be tailored specifically to your child's **special needs**.

17. A unit plan is a **hierarchy** of lesson plans.

18. Methods are also identified in instructional planning **Student-oriented**.

19. IEP is basically an extended adaptation of a lesson plan.

20. We can remember those things which are connected with our **prior learning**.

21. Adolescence is a time of profound brain growth.

22. Advance organizer model is based upon **deductive learning**.

23. Nonlinear fashion focus on **process**

24. Brainstorming is a common tool to describe a thing

25. The white hat in the De Bono's six thinking hats signifies information known or needed

26. Teacher model skill in direct instruction

27. Network integration is created among group of students

28. Teacher role is minimized in unguided inquiry

29. In United States, pre-school is named as pre K

30. Gatekeeper equalizes participation

31. Generative topics actually make connections

32. Divergent thinking is outside the box thinking

33. The learning of core concepts is lifetime

34. Different countries have different age levels of formal education

35. Children can come up with different ideas and teachings must accept all ideas

36. Children construct their own knowledge

37. Our teachers do not focus on core concept

38. Objects must be in the form that it can be measured

39. British preschool name Nursery School or simply “nursery”

40. United States preschool name pre-school and pre K

41. Child is a natural discoverer. Bruner

42. By the three, a child has TWICE as many brain connections

43. In order to start working, the cells need to communicate with each other

44. A research was conducted and it was reported that teachers mostly focus hemisphere of children.

45. For creativity divergent thinking is very important.

46. Different types of -functions occurs in the left and right hemisphere. Mental (Lec22)

47. The networked methodology of integration is Student centered (Lech 27)

48. Asking question is a Skill (Lech 20)

49. Brain development continues till the age of 8 (Lech 23)

50. We can remember those things which are concerned with our Right side memory (Lech 22)

51. Adolescence is a time of profound brain growth. (Lech 26)

52. Integration means putting things Together (Lech 27)

53. Advance organizer model is based upon Deductive learning (Lech 21)

54. Case method is a very good approach to know problem solving. (Lec 28)

55. Pedagogy means how to teach Students/

56. Core concepts are declarative knowledge

57. Development cannot be separated from the social context in which it occurs

58. Development of gross motor skills is very important in preschool or early childhood education

59. Children construct their own knowledge.

60. John dewy says that there is no such profession where knowledge is separable from doing or practice.

61. Application of core concepts in new level is important

62. in left hemisphere there is logical thinking. Verbal intelligence and convergent thinking

63. Teachers want to teach in depth but want to cover the syllabus too

64. Curriculum is a dead thing teacher's give life to it.

65. Researchers use the word discourse for discussion

66. Teachers must provide the students with opportunities to discover things

67. Performance assessment can be used to measure student's problem solving potential as well as group

68. Knowledge can be accessed through written tests

69. Usually we do not question our tradition and authority

70. Wait time is thinking time

71. The last level of Maslow's hierarchy of need is Self-actualization

72. Socratic Method is the example of discussion method

73Edison invented the bulb

74. Projects tend to be multidimensional

75. Different types of mental functions occur in the left and right hemisphere. (Lec22)

76. Pedagogy means how to teach children.

77. Adolescence is a time of profound brain growth. (Lec 26)

78. Advance organizer model is based upon Deductive learning. (Lec 21)

79. Case method is a very good approach to know problem solving. (Lec 28)

80. Andragogy means how _ learn. Adults

81. Beyer says that critical thinking has two important dimensions.

82. The inquiry learning cannot be rushed

83. Learners are responsible for planning. Conducting and evaluating their own effort

84. Process of assimilation leads to consideration of new options and points of view

85. Assimilation leads to consideration of new options and points of view

86. According to Kolb (1984), learning is a process of a combination of grasping experience and transforming it.

87. Curious observation is the start of the inductive process

88. Students love integrated curriculum

89. What type of goodwill message is most likely to use an RSVP? Condolence, invitation, appreciation, holiday greeting,

90. Generative topics actually make ___schemes, connections, procedure or assessments

91. Schooling average age.... 4/ 3

92. we are concerned by student.... achievement. Team

93. Understand is in.... Level. First/ conceptual

94..... focus discussion and disposition.

95. Scientific method.... research. Roots/Psychology/authentic

96. Theory can be falsified.

97. Art of developing logical plan for instructional activities is called? “Sequencing”

98. Methods are also identified in... ? “Instructional planning”

99. Good Textbooks provide sequence? “Structured”

100. Knowledge has forms? “Two”

101. Knowledge is something that is learnt by reflecting, acting on something is called? “Subjective”

102. A child knows about own cogitation is called? “Metacognitive knowledge”

103. Memorized things in? “Facts”

104. Give a theory of multiple intelligence? “Howard Gardner”

Quiz 2

105. There are different..... To do different things.

Mechanics (page 77)

**106.....is the title of the whole unit. Unit Subject
(page 102)**

**107..... comes from curriculum planning. Holistic vision
(page 89)**

**108...There are Foundation of curriculum. Three
(page 89)**

**109..... is the level of understanding. Comprehension
(page 67)**

**110...The domain encompasses objectives that deal with
recall or recognition of knowledge. Cognitive**

**111. Init include link between standard benchmarks
learning outcomes and instructional objectives. Vertical
(page 88)**

**112. Hierchy of affective domain was developed BT Bloom
and karthwohl in... 1964 (page74)**

113. The first three level of cognitive domain are called as ... lower level of learning (page 75)

114. The last three level of Bloom taxonomy cognitive domain are called as....higher level of learning (page 75)

115... is a learning style in which learning takes place by the student carrying out physical activity.

Kinesthetic learning

116. Mechanism indicate that child a....to do task by the following its mechanism. Independent

117. Who gave the theory of multiple intelligence Harvard Gardner's

118. Terms in revised Bloom taxonomy were changed from noun to....

119.... Is the knowledge that is declared in books, research paper or newspaper Declarative **knowledge**

120. The term Is used while explaining multiple diversity among people **dyslexia**

121..... Is the knowledge is more or less equivalent to Bloom knowledge category of learning outcomes **procedural**
Declarative

122. The objective students will compare and contrast the cognitive and affective domain is an example of...is the level of cognitive domain **analysis level**

123. Ineducation no formal certification is given at the end. **Informal**

124..... Means problems with reading, writing spelling symbols and numbers because the brain misinteruupts what it sees (visiual) and hears Dyslexia **means**

125. Teaching is aprofession. Noble

126. Students test indicate their Learning

127. Learning isa by nature Social

128. There istypes of instructional planning that is commonly used in school. Six

129.”Write an appropriate tile for the text is an example ofcognitive domain. Synthesis level

130. Delecrative knowledge is more or less equivalent to **Bloom category of learning outcome.compehension**

131. Teacher is more interested in.....instead of conceptual change **covering the syllabus**

132. A teacher must useresources in a class low cast

133.... Is knowledge is a step ahead of declarative knowledge

Question # 4 of 10 (Start time: 08:08:25 PM, 10 December 2019)

— means attending to a stimulus

Select the correct option

- ☐ Set
- ☒ Perception
- ☐ Mechanism
- ☐ Adaptation

Inquiry may involve -----, procedure and solution. **Problem**

Equalizes participation is the task of -----. **Gatekeeper**

A teacher is a classroom clarifier, guiding students to develop ----- thinking skills.
Logical

In democratic process ----- are involved. **Children**

In cooperative lessons, teams are made up of ----- students. **All**

Learners progress from specific observations to -----, Inferences or generalizations

Aristotle talked about ----- and he was one of the pioneers. logics

Jigsaw technique has ----- parts. **Two**

Sometimes people tend to use word ----- learning for activity based learning. **Discovery**

Inquiry is NOT about -----, **memorizing facts**

Project Based Learning allows ----- to reflect upon their own ideas and opinions. Students

Cooperative learning should have cooperative tasks, cooperative ----- and cooperative rewards. Goals

Inquiry may involve problem, procedure and -----, Solution

Bruner's first stage is -----, **Enactive**

Projects tend to be -----, Multidimensional

Some classroom features can be altered by the -----; others cannot. teachers

'Collecting data' is the ----- step of Guided Inductive Inquiry. **3rd**

Extended practice leads to -----, **Overlearning**

----- is the adding of an aversive stimulus to decrease a certain behavior or response.	Positive punishment
----- helps members with lesson content.	Coach
Peer tutoring is -----.	motivational strategy
For learning activities, ----- centered learning methods must be preferred.	Students
----- model skills in direct instruction.	????
Most classroom ----- proceeds at too rapid a pace.	Discourse
Roots of problem based learning are in -----.	Dialogue
----- did not clearly divide these stages he kept them merged.	Bruner
Recitation is also called -----.	monologic discourse

----- is very useful learner centered teaching and learning strategy.	Problem solving
If projects are -----, they allow the learners to be immersed in one big idea.	Structured
----- should be directive to the whole class.	Question
Teacher must give his ----- before moving on to the next student or question.	Feedback
cooperative learning help students make the ----- from whole-class to cooperative learning groups.	transition
Inductive inquiry is of ----- types.	Two
The biggest limitation of cooperative learning is the -----.	Mindset
In problem based learning ----- try to clarify the problem.	Students
----- has its intellectual roots in the Socratic Method.	Problem Based Learning
----- are much important in scientific method.	variables
----- used the word discourse for discussion method.	Researcher
The solutions, alternatives or responses provided by learners are not found in -----.	Textbooks
Rubrics are actually instruments -----.	to assess
----- lose their significance after sometime.	External rewards
Learning is a ----- change in behaviour.	Permanent
----- leads to consideration of new options and points of view.	Assimilation
----- learning is a learner-centered method.	Discovery
Learning is of vital importance because so many problems that face society involve -----.	Behavior
U-shaped seating arrangements facilitates -----.	classroom discussions
----- is a permanent change in behaviour.	Learning
In ----- we move from specific to general.	inductive method
Rubrics are of ----- types.	Two
More than ----- of the researches says that cooperative learning helps in the academic achievement of the student.	80%
The green hat in the De Bono's six thinking hats symbolizes -----.	Creativity
Learning is a permanent change in -----.	Behaviour
