

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

PSY504 Quiz 3 File by Tanveer Online Academy

Attention is not just	Orientation
Which of the following is True about object perception?	Minor details and variations do not matter
The problem of how various elements are organized into wholes was the central theme for:	Gestalt psychology
Which one of the following is NOT a Gestalt law of perceptual organization?	Parsing
Who proposed that there are three stages in recognition of an object as a configuration of simpler components?	Biederman
Gestalt psychologists study how the visual system makes meaning from_____.	The overall patterns of stimuli
Which of the following is NOT presented in neural networks?	Chemicals
Gestalt is a word of:	German language

The principle of continuity is otherwise known as:	Principle of direction
Recognition of language is related with it's_____.	Features
Gestalt principles can be used to segment an outline representation of:	An object into sub-objects
We can recognize a word more accurately with context as compared to a letter alone, this is called:	Word superiority effect
Nodes are represented by _____ in the interactive activation model.	Features, letters and words
Voice is actually a/an:	Human sound
The computation proposed by McClelland and Rumelhart's interactive activation model is extremely:	Complex
Constructing a new thing is:	Pattern recognition
Which of the following connections make other nodes relax and switch off?	Inhibitory connections
Eimas & Corbit (1973) conducted an experiment that is called:	Adaptation paradigm
In unvoiced consonants such as [p], the release occurs _____ before the vibration begins.	60 ms
We fill in the gaps and perceive them in a complete form, rather than disconnected lines. This represents Gestalt principle of:	Good form
Word superiority effect is a phenomenon that can be understood by the experiment of:	Reicher and Wheeler (1970)
Closure is the tendency:	To complete figures that are incomplete
VOT is an abbreviation of which one of the following?	Voice-Onset Time
"We need a template for each possible sound." This is the idea of which of the following?	Template matching
Which of the following is the central idea of gestalt principles?	The unified whole is different from the sum of its parts
Which of following model better explains speech pattern recognition phenomenon?	Feature analysis
Identify the principles that can be used to segment an outline representation of an object into sub-objects.	Gestalt principles
Which of the following stage is not proposed by Biederman in recognition of an object as a configuration of simpler components?	Fan effect of segmentation
Gestalt psychology is a German school founded by:	Max Wertheimer
When context or general world knowledge guides perception, we refer the processing as:	Top-down processing

Which of the following means that our surroundings have effect on our perception?	Contextual effect
Marr & Nishihara purposed that familiar objects can be seen as configuration of simple _____ components.	Pipe-like
Which of the following principles by Max Wertheimer are regarded basically as principles of perception?	Gestalt principals
Who among the following conducted experiments on sub-object categories?	Biederman
Accordint to McClelland and Rumelhart, which word will support the activation of its component letters, and later these letters will repress the activation of alternatives letters?	Dominant
Who gave the idea that unified whole is different from its parts?	Gestalt theory of perception
