Trawling is a method of:

Select the correct option

○	Collection of Caterpillars
○	Insect Collection
●	Fishing
○	Collection of Larva

Mid Exam 2022 Objectives of Zoo103
By Muhammad Faryad

1. CarolusLinnaeus, father of modern taxonomy. Three kingdoms were: • ***Animals•Plantsand•Minerals***
2. **Aristotle-Father of Biological Classification**
3. According to Simpson(1961) taxon is a group of real organisms recognized as formal unit at any level of hierarchic classification
4. Elton(1947) acknowledged the progress in ecology depends upon accurate identifications of species.
5. During WorldWar II (OnNovember3, 1944),**Japan** released **balloonbombs**,In to the Pacificjetstream
6. Viruses are DNA and RNA shielded by protein coat called capsid.
7. E-Chatton in 1937 introduced the term“Procariotique”to describebacteriaand “Eucariotique”todescribe animalsandplantcells.
8. Five kingdom classification was proposed by Robert Whitta ker in 1967.
9. Morgulis and Schwatz in1988 modified R.Whittaker classification.
10. Native tribes used to call the species on the basis of their morphological characters
11. Simpson in1961 published extensively on the taxonomy of fossil and extinct mammals.
12. Thomas E.Mittler was an Austrian entomologist.
13. Frederick Smith work edin the zoology department of British Museumfrom1849. he describe 25genera,702 species
14. Mayr in1982 provided a details of various periods of History of Taxonomy
15. Buffon prepared the way for the biological species concept,
16. Anderson 1763 (Botanist) applied this design for the classification of plants
17. Cuvier recognized five phyla
18. Van Baer,Owen divided all species in to limited no. of groups each representing a distinct type
19. By 1955 taxonomy reach such a status that it was called taxonomic explosion
20. The species which are found in a particular region,called endemic species.
21. A cline is the gradual change in the phenotypes and genotypes
22. A clade is a group of organisms that evolved from a common ancestor
23. Typological species concept This concept was proposed by Aristotle and Plato
24. Electrophoretic This method determine the in the isozyme and allozyme.
25. Process to determine that which character is more reliable is called weighting.
26. Long-life in some species up to 30 years.
27. When newly hatched nymphs of locust are reared under crowded conditions Gregarious phase
28. Less crowded conditions transitional phase
29. Separate rearing Solitary phase
30. These phases differ in anatomy,colour and behavioral characteristics distinct species
31. A curator is a person Curation is process
32. When the holotype of the species is the only specimen known to science, it is known as monotype.
33. Specimens collected at type locality are called Topotypes.

34. Population that occurs at the type locality is called Topotypical population.
35. Conservation can may be avoided in Zoology as these names fall in formal category of Nomen oblitum.
36. A name published without satisfying the condition of availability is called nomen nudum
37. First phylogenetic tree based on molecular data 1967 Fitch and Margoliash.
38. These most commonly published keys were first published by Jean B.Lamark 1778
39. Spiders have two body segments Front segment is called Cephalothorax 2nd part is abdomen
40. 99% of all spiders have 8 eyes
41. Pedipalps are the second pair of appendages of chelicerates
42. epigyne or epigynum is the external genital structure of female spiders
43. **Asian citrus psylid is *Tamarixia radiata,***
44. Two or more than two closely related species which are morphologically alike ***Sibling Species***
45. ***Peripatric speciation*** is a mode of speciation in which a new species is formed from an isolated peripheral population.
46. ***Karyology*** is description of size, shape and number of chromosomes
47. Geographic characters are important at two levels ***Microtaxonomy ,Macrotaxonomy***
48. Feed at night Family ***Lycosidae***
49. Singa are ***about 2 mm*** in length while some of the Nephila can grow to ***over 50 mm,***
50. Family Salticidae Largest family of spider ***13%*** of all species
51. Based on computer program ***Polyclave Key***
52. There are an estimated ***14M*** mainly unpublished species.
53. First phylogenetic tree based on molecular data 1967 ***Fitch and Margoliash.***
54. The first Scientific name applied to the leopard shark was ***Triakis californica***
55. A ***curator*** is a person who manages, administers or organizes a collection for exhibition.
56. When newly hatched nymphs of locust are reared under crowded conditions ***Gregarious phase***
57. European Starling In spring whole bird is glossy ***black*** without the mold of single feather
