Papers year 2018

alluvial dam 2 mangrove swamp 2 types of swaps 5
harmful algal bloom 5 Nitrogen cycle 10
cyanobacteria 3 non points source of pollution 2
differences between Ammonification and nitrification

short questions Reynold no of water flow
non point pollution wd example
cyanobacteria and its 3 examples diff b/w
ammonification and denitrification long
questions harmful algal bloom and effcts(5)

swamp and its types(5) factor influence the thermal stratification(5) nitrogen cycle (10)

Total Solid dissolve and Hardness difference 2

Cynobacteria and 3 example 3

Lotic erosin and Lotic 3 deposition

Ammonification and 3 Denitrification

Ectogenic meromixis 2 swarmp and its types 5 Harmful Agal bloom 5

Nitrogen cycle 5

Importance of water 5

Papers year 2017

Point source of pollution 2.

Mangrove swamp 2.

Difference between lotic erotional and lotoc devotional 3.

Explain cynobacteria 3.

Note on tidal swamp 5.

Algal bloom 5.

Non tidal swamp and its types 10. Nitrogen cycle 10.

(This is the only paper that was given to all students in final term examination of year 2017. No other question was given except these)

Final term 2018

Types of swamps(10)
Lakes formation(5)
Evaporation(5)
Hypertrophic lak(5)
Producers(3)
Bio pamp(3)
Eutrophication(2)
Morphometry(3)
Division of monomictic lakes(2)

Q1:inverse stratification.2
Q2:pond scum.2
Q3:human disease potato scab name agents. 2
Q4:three component of brarior river model.3
Q5:stream discharge.3
Q6:fresh waater pollutants.5
Q7:note on meromictic lakes.5 Q8:types
of swamps.10marks. Q9:condensation.3

1) Reduction of nitrogen gas to organic nitrogen and ..... By microorganism...
Ans.. Ammonia
2) CO2 is used by plants during photosynthesis to make food the food of plants is.... Ans.. Gulucose
3) PH of rain water is... Ans 5-6
4) water under rocks and ground is.. Ans ground water
5) ... Is used in munciple wastewater.. Ans..hyacinth
6) ... Are often near the bogs and over time most fens become bogs.. Ans...
Fens
7) sparkling white sand beeches of the cribbean and many othrr areas in the word are eroded ..... Remains of green algae.... Ans.. Calcium carbonate
8) Major group of cilliated algae are... Ans.. 3 9) cladoceran range in size from .. Ans...0.2-3
10) ...% of energy us transferd to nxt trophic level.. Ans.. 10%

11) energy flow is unidirectional based on .... Energy input.. Ans.. Solar
12) lakes are are variabl in... Ans physical chemical and biological charactrs
13) part of limnetic zone that absorbs sunlight... Ans.. Euphotic
14) mississopi is ... Order stream... Ans.. 10th
15) .. Percent water in cell.... Ans..Greater then a0
16) water on earth... a1%
17.. Of stream is difficult to find.... Ans .. Velocity
18) ... Wavelength penetrate deepest .. Ans.. Blue 19)
oligotrophic have ... Supply of nutrients... Ans... Small Long..
Evaporation.. 5
Factrs that effect lakes chemical and biological characters...5
Swaps types...10
Oxbows...3
Consumers...2
Braded streams..3
Monomictic lake types... 2
Siltation...2
Submegents.. 3
Extrusive vocanic plains.. 2
