OBJECTIVE-ZOO405

ZOO405 – ECOLOGY 100% GUESS

Final-Term File 2023 By

SULMAN ALI (BS-ZOOLOGY)

(0341-7547044)

1. ***Parasitism*** is a symbiotic relationship in which one Species ***(the parasite)*** benefits while the other species ***(the host)*** is harmed.
2. The most common form of weather modification is ***Cloud seeding,***
3. Aspects of applied ecology include: Ecosystem restoration, Environmental engineering, Environmental technology, Habitat management ***all of these***
4. IAEA stands for_____ ***(International Atomic Energy Agency)***
5. Desertification, also called ***desertization,*** ____the process by Which natural or human causes reduce the biological Productivity of dry lands.
6. Exotic species harmless while invasive species ***Harmful to the ecosystem***,
7. Soil pollution is a form of land pollution in which the Soil's ***upper layer*** is harmed.
8. Ozone absorb around ***97-99%*** of the harmful ultraviolet radiations
9. ***Greenhouse Gases*** ___absorb the energy radiated out by the Earth and reflect a part of it back to Earth.
10. ***Competition*** is a relationship between organisms in which one is harmed when both are trying to use the same resource related to growth, reproduction, or Survivability.
11. Community's interactions include _&Competition, Predation, Herbivory, Symbiosis and disease. ***All of these***
12. Carbon present in the atmosphere is absorbed by plants for ***photosynthesis.***
13. Nimb desert found in ***Africa***
14. ***Wetlands*** act as nature kidney.

15. An ***Ecotone*** is an area that acts as a boundary or a transition between two ecosystems.
16. Carrying capacity __***maximum*** __number of organism exist.
17. Abiotic factors acquired from atmosphere, lithosphere, hydrosphere, ____***all of these***
18. Desert cover area____ ***one third***
19. Lake not freeze having ____ ***highest density.***
20. ***Tundra ecosystem*** has long ***cold winter***.
21. Number of organisms per unit area is called___ ***population density***
22. Invasive species are ___ ***harmful to ecosystem.***
23. Which ecosystem act like kidney_____ ***wetland.***
24. Conversion of NH3 into gaseous is called as ____ ***denitrification***
25. Suppression of noise at source is way to control _____ ***noise pollution.***
26. ***BOD*** is rapid depletion of oxygen in ocean.
27. Percentage of phosphorus in teeth is ___***80%***
28. ***Applied ecology*** is a sub field within ecology that considers the application of the science of ecology to real world questions.
29. Cloud seeding is is a common technique to enhance ____ ***precipitation.***
30. ***Pesticides*** are chemical poisons used to kill weeds and insects seep into water ways and harm wildlife.
31. In force since ***2005,*** the protocol called for reducing the emission of six greenhouse gases.
32. Control at receiver's end is related to___ ***noise pollution***
33. Fungi are ____ ***heterotroph.***
34. SO2 is ____ ***primary pollutant.***
35. ***Population***____ do not exist in isolation
36. There are ___ ***3***__ types of symbiosis.
37. The denser a population the ___ ***greater***___ its mortality rate.
38. Density independent factors are Drought, fire, flood ___ ***all of these***
39. A __***predator***__ is an organism that consumes all parts of the body of another.
40. Marine ecosystem covers more than ___ ***70%***
41. Ecologist name ___ ***Charles Elton***
42. Main factors that decrease population ___ ***death and emigration.***
43. Grassland occupy about __ ***20%*** of land on earth surface.
44. Agricultural ecosystem occupies __***30%***__ of earth surface.
45. A ***population*** is the total number of individuals of a given biological species found in one place at one time.
46. ***Communities*** differ in their species richness, the number of species they contain, and the relative abundance of different species.
47. Types of Population regulation are ***2***
48. ***Predation*** is a biological interaction where one organism, the **predator**, kills and eats another organism, its ***prey.***
49. ***BOD*** affects the amount of dissolved oxygen (DO) in streams and rivers.
50. The ***First*** Law of Thermodynamics, also known as the law of conservation of energy.
51. Any waterbody having a low salt concentration usually less than ***1%*** is called a ***freshwater body.***
52. Cyanobacteria are ***photoautotrophs***

53. Lotic aquatic systems are the fresh water bodies with flowing waters. ***Rivers and streams***

54. entropy increase or decrease with energy flow--- ***increase***

55. ***Noise*** is the unpleasant and undesirable sound which leads to discomfort in human beings.
56. ***Restoration ecology*** is a particularly prominent strategy in the discipline.
57. Density dependent are ***biological*** Factors.
58. One ***third*** of earth surface is covered with deserts.
59. A ***lentic ecosystem*** entails a body of standing water, ranging from ditches, seeps, ponds, seasonal pools and lakes.
60. **Wetlands** are some of the most valuable ecosystems on Earth.

61. The study of physical, chemical, geological and biological aspects of freshwaters is called ***limnology.***

62. ***Sublimation*** occurs when snow or ice changes directly Into water vapors without becoming water.
63. ***Ecology*** is the study of the interactions between organisms and their environments
64. ***Herbivory*** is the consumption of ***plant*** material by animals, and herbivores are animals adapted to eat plants.
65. Forests can be divided into ***5*** main categories.
66. ***Weather modification*** (also known as weather control) is the act of intentionally manipulating or altering the weather.

67. Lentic ecosystem consist of ***ponds, lakes***

If it is helpful for you then remember me in your prayers.

Thanks
