MUHAMMAD IMRAN

ZOO504 - Wildlife MCQs FINAL TERM (PAST PAPERS)

1. Bones of Leopard cat are used in some traditional __ medicine _____**Asian**

2. Wild life is natural _____ with a great importance_____ **Renewable resources**

3. Reason of death identify on the basis of _____**Post mortem**

4. In brown bear sexual maturity is from _____ of age_____**4.5-7 years**

5. Ayubia national park support _____ species of mammals_____**31**

6. Barking deer is little dainty creature and weights weighs _____**22-25kg**

7. Capra body length is _____ **52 inches 4.4 feet**

8. Body color of jungal cat_____ **Sandy grey**

9. Hog deer protected in _____**Bangladesh**

10. The name of argoli is a_____ for sheep_____ **Mongolian word**

11. Sexes in koklass is _____**Dimorphic**

12. Egg of chukor hatched in 23 to _____ days_____**25**

13. Woolly flying squirrel native to _____ **Pakistan**

14. The deliberate movement of organisms from one site for _____in another_____ **Release**

15. Coat of panther is_____ **Tawny or light yellow**

17. Hazargangi chiltan park establish in_____**1978**

18. Largest park at sindh_____ **kirthar national park**

19. Pinecanes_____ **conferous tree**

20. Criteria declared for wet land is_____**9**

21. Conservation purpose of zoo_____**fauna**

22. In zoo full time officer_____**1**

23. Endamic species_____ **Gela pagos fauna**

25. In conservation Translocation deliberate movement provide site for_____ **Release**

26. Bones of leopard cat used_____ **Asian medicine**

27. Urial subspecies locally called_____ **Punjabi dunba**

28. Foxes are_____ **Omnivorous mammals**

29. Civelts are related to_____ **Cats**

30. _____ throated marten larger size_____ **yellow**

31. kong fishers long term decline chemical and_____ **Biochemical**

32. Maintenance of hygienic condition by_____ **graveyards**

33. A master plan should be made for the next_____ **5 to 25 years**

34. snow leopard_____ **thick fur**

36. Paulter coat ranges from tawny or light_____ **yellow**

37. In wild ass poaching for meal_____ **Medicinal purpose**

38. Musk deer refer any one of all_____ **Seven**

39. Indus dolphin navigation_____ **Echolocation system**

40. Hog deer fully protected in Bangladesh and_____ **India**

41. IUCN recognize_____ game reserve in Pakistan_____ **66**

42. Chashma and tonsha barrage dolphin sanctuary was declared open to the public_____ **in 1972**

43. _____ projects in more than 60 nations around the world that are intended to help protocol both wild life and the wild place in which live_____ **500**

44. Rosy periwinkly leaves extracted as_____ **Anticancer**

45. Elephant eat up to_____ of food per day_____ **450kg**

46. _____wild elephant preservation act_____ **1873**

47. The ssc is governed by a steering committee which is headed by the_____ chair_____ **Commission**

48. Schedule iii wild birds and animals protected through out the_____ **year**

49. _____determine any wild life species found in any ever_____ **Habitat**

50. Indus dolphin resereve is natural wet land situated in the_____ **Sukkar**

51. Gir Forest National Park is a wildlife sanctuary in Gujarat, western India. It was established to protect _____ **AsiaticLions**

52. largest National Park in Pakistan _____**Hingol National Park.**
53. Second largest National Park in Pakistan _____**kirthar national park.**
54. Conifer trees (pine, spruce, fur, etc.) use their _____**pinecones**
55. There are …….. criteria for identifying Wetlands of International Importance._____**9**
56. The yellow throated marten is considerably ….in size than the stone marten_____ **larger**
57. For the maintenance of hygienic conditions, each zoo shall have the …where carcasses of dead animals can be buried._____ **graveyard**
58. Death of the animals in the zoo with reason of death identified on the basis of _____ **• Post-mortem reports • Diagnostic tests**.
59. Snow leopards ….patterned with markings is the perfect camouflage for their rocky habitat, allowing them to stalk their prey. _____**Thick fur**
60. Panther Coat ranges from **tawny or light yellow** in warm, dry habitats to reddish-orange in dense forests.
61. Wild ass Poaching for meat, hides and fat, is believed to have apparent **medicinal** properties.
62. The name 'Argali' is the **Mongolian** word for wild sheep.
63. Musk deer can refer to any one, or all **seven**, of the species that make up Moschus, the only extant genus of the family Moschidae.
64. Indus Dolphin Navigation, by **echolocation** system
65. Hog Deer is fully protected in_____ **Bangladesh • India**
66. Wild life is natural **renewable resource** with a great importance throughout world.
67. In Pakistan presently there are **99** Wildlife Sanctuaries. IUCN recognized number of Wildlife Sanctuaries in Pakistan **66.**
68. Kilik/Mintaka Game Reserve lies along the border with_____ **China**.
69. Astore Wildlife Sanctuary id located in Gilgit– Baltistan,_____ **Pakistan**
70. Data Deficient is therefore not a category of _____**threat or Lower Risk.**
71. **Sakers** have sharp, curved talons, used primarily for grasping prey.
72. **Translocation** is the human-mediated movement of living organisms from one area, with release in another.
73. The **leopard cat** looks like a miniature, longlegged and more slender version of a leopard.
74. ….has been an important component of traditional medicine in Eastern Asia for millennia. _____**Bear bile**
75. Yield of the musk is only about **25** grams.
76. If any animal is found sick, injured or unduly stressed the matter shall be reported to the **veterinary** officer.
77. **Tragopans** are commonly called "**horned pheasants**".
78. **Kingfisher** have a **cosmopolitan** distribution.
79. Pakistan has **29** Protected Areas known as National Parks.
80. klilmintaka._____.. **china boarder**
81. Astore wildlife sanctuary.._____. **Baltistan**

82. Not a scavenger..._____ **Eagle**
83. Data Deficient is therefore _____**not a category of threat or Lower Risk**
84. **Sakers** have sharp, curved talons, used primarily for grasping prey.
85. **Translocation** is the human-mediated movement of living organisms from one area, with release in another.
86. miniature, long-legged and more slender version of a leopard...._____. **Leopard Cat**
87. Musk deer can refer to any one, or all **seven**, of the species that make up Moschus,
88. Yield of the musk is only about _____**25 grams**
89. yellow throated marten is considerably_____ larger in size
90. If any animal is found sick, injured or unduly stressed the matter shall be reported to the_____ **veterinary**
91. Argali' is the_____ Mongolian word
92. Navigation, by _____echolocation system
93. wild life sancutiries in pak_____99
94. Tragopans are commonly called "_____horned pheasants
95. Kingfisher They have a_____ cosmopolitan distribution
96. national park in pakistan—_____29
97. Kilik/Mintaka Game Reserve lies along the border with _____China
98. Astore wildlife sanctuary contiguous to _____Baltistan
99. normal work of wild life _____
100. Wild life is natural _____ with a great importance : _____(according to me renewable resource)
101. reason of death identify on the basis of _____ _____:(post mortem)
102. IUCN recognized _____ _____game reserves in Pakistan
103. hog deer protected in _____-:(Bangladesh)
104. the name of argoli is a_____ (Mongolian word) for sheep
105. Coat of panther is_____- (tawny or light yellow)
106. About ---------- % of domestic food crops now cultivated are descendants of wild plants _____ **90%**
107. ---------- determine any wild life species found in any are _____ **Habitat**
108. Wild birds and animal preservation act was presented in _____ **1912**
109. The penalty of breaking wild life act is imprisonment which may extend to a period of _____-_____**One year**
110. The primary objective of habitat specie management area is to maintain, conserve and restore specie and-------- ----------_____ **Habitat**
111. National Parks belong to category _____ **Category II**
112. Chinji National Park is located close salt range about ---------- km from Islamabad in the south ___ **130**
113. IUCN recognized ---------- game / hunting reserve in Pakistan _____ **66**
114. ---------- is a common wetland plant and is a staple diet of more than half of humanity _____ **Rice**
115. ---------- created 1st wild animal menagerie in Britain _____ **King Henry I**

Q13: There are as few as ---------- approximately snow leopard in the wild_____**6000**

Q14: Poaching for meat, hides, and fat is believed to have apparent ---------- properties_____ **Medicinal**

Q15: Navigation is done by ---------- system in the Indus Dolphin_____ **Echolocation**

Q16: The anti-inflammatory drug ---- has been identified as a cause of mortality of Indian Vultures_____ **Diclofenac**

Q17: Urial is locally called as Punjabi_____-**Dunba**

Q18: The ---------- throated Marton is considerably larger in size than the stone marten_____-**Yellow**

Q21: Long term declines of Kingfisher are thought to be due to chemical and ----------_____ **River pollution**

_____**Biological**

Q23: Civets are related to -------- but distinguished by the long head and jaws_____ **Cats**

Q26: Musk deer can refer to anyone or all ---------- of the species that make up mouschus_____ **Seven**

Q31: Hog deer is fully protected in Bangladesh and ----------_____-__ **India**

Q33: The name is argali is the ---------- word for wild sheep_____ **Mongolian**

Q34: Coat of panther ranges from Tawny or light ---------- on warm_____ **Yellow**

Q36: Eagle, Hawks, and their feathers are great cultural, spiritual value native --------- as religious objects___ **Americans**

Q37: A master plan should made for the next 5 to ---------- years_____**25**

Q38: Madras wild elephant preservation act was presented in_____ **1873**

Q39: Wild animals that can be hunted on an ordinary --------- with the details of everything is mentioned_____ **Permit**

Q40: A protected area where the interaction of people and nature overtime produced an area of distinct character with significant ecological, biological, cultural and scenic value is called_____ **Seascape**

Q1: ----------determine any wildlife species found in any area_____ **Habitat**

Q2: In some forested area in Latin America wildlife acts as an animal -------- source_____ **Protein**

Q3: In Pakistan ---------- is the only sports_____ **Fishing**

Q4: ---------- in South Africa attack young cattles_____ **Baboons**

Q5: A wild bird and animal protection act was presented in_____ **1912**

Q6: --------- projects in more than 60 nations around the world that are intended to help wild life and wild places in which they live_____ **500**

Q7: There are currently--------- specialist groups_____ **112**

Q8: A penalty of breaking wildlife act is imprisonment which may extend to period of -------year with the fine

_____ **One Year**

Q9: In category Ib some wilderness areas includes --------- by nomadic people and distinctions may need to make between intensive and non intensive grazing_____ **Livestock grazing**

Q10: A protected area where the interaction of people and nature over time has produced and area of distinct character with significance Ecological, cultural and scenic value_____ **Seascape**

Q11: National parks belong to category_____ **II (two)**

Q13: In wildlife sanctuary public access is ----------_____ **Prohibited**

Q14: Cholistan Wildlife sanctuary is part of Cholistan ----------_____ **Desert**

Q15: Tooshi game reserve covers ---------- hectors_____**1000**

Q16: ---------- is common wetland plant and is a staple diet of more than half of the humanity_____ **Rice**

Q17: ---------- pose major threat to wetland despite their value and importance_____ **Unmanaged Activities**

Q18: ---------- are susceptible to degradation if subjected to hydrological change_____ **Wetland plants**

Q19: Each zoo shall has wall at least ---------- high from ground level_____ **2 meter**

Q20: Which of the following is known as the game bird**?**_____ **Houbara Bustard**

Q21: ---------- on wildlife and necessity for the conservation should be screened even to the

remotest villages and to all classes of students, so that they develop love and affection towards wildlife

_____**Cinematography**

Q22: In Pakistan Lal Suhanra at Bahawalpur conserves ---------_____ **Black Buck**

Q23: In schedule III wildlife bird and animal protected throughout the ----------_____ **Year**

Q24: Protected areas are particularly adapted to the applications of --------_____ **Landscape**

Q25: Lal Suhanra Park located in_____ **Bahawalpur**

Q26: “Gol” means_____ **Valley**

Q27: ---------- is used in skin care_____ **Salix Alba**

Q29: Worldwide there are now over ------- dams which alter the natural flow and impact on existing ecosystems _____**40,000**

Q30: Zoos reinforce the notion of -------- domination over non human animals, which is never beneficial to animals _____**Human**

Q31: Which of the following is endemic specie?_____ **Galapagos Fauna**

Q32: Eagle, Hawks and their feathers have great cultural and spiritual value to native -------- as religious objective _____ **Americans**

Q33: Elephants eat up to ---------- kg of food_____ **450**

Q34: ---------- is indentified as main threat to 85% of all species described in the IUCN red list___ **Habitat Destruction**

Q35: Honorary officials hold office for a period of ---------- years where appointment is revoked earlier___ **Three year**

Q36: Wild animals that can be hunted on an ordinary ---------- with the details of everything is mentioned_____ **Permit**

Q37: In national park the composition structure of function of Biodiversity should be to a great degree in a ---------- state_____**Natural**

Q38: Margalla Hill National Park rich in Biodiversity with --------- plant species_____**600**

Q39: ---------- Sanctuaries give new home to abandoned animals_____ **Animal**

Q40: Baltistan wildlife sanctuary was established in_____ **1975**

Q41: In an estimate that walking ---------- km to water is not unnatural for animal_____ **6**

Q42: ---------- are among the most diverse and productive ecosystem_____ **Wetlands**

Q43: The objectives of zoo is to complement and strengthen the national effort is conservation of the rich biodiversity of the country particularly ----------_____ **The Fauna**

Q44: Wild life is ---------- resource with a great importance throughout world_____ **Natural renewable**

Q45: Madras Wild Elephant Preservation Act-------_____ **1873**

Q46: IUCN was founded in_____ **1948**

Q47: The SSC is governed by a Steering Committee, which is headed by the -------- Chair._____ **Commission**

Q48: IWC is stand for_____ **International Whaling Commission or IS short form of (I.W.C)**

Q49: The Ministry of -------- is the responsible authority for National Parks._____ **Interior**

Q50: Chinji National Park is located close to Salt Range, about ------ from Islamabad in the south_____**130 km**

Q51: Astore Wildlife Sanctuary is located at_____ **Gilgit– Baltistan, Pakistan**

Q52: ---------- created the first wild animal menagerie in Britain_____ **King Henry I**

Q53: Every zoo shall have ---------- full-time officer in charge of the zoo._____ **One**

Q54: Coniferous trees have_____**Pinecones**

Q55: National Parks in Pakistan_____**29**

Q56: IUCN recognized ---------- game reserve_____**66**

The enclosures housing the endangered mammalian species shall have feeding and retiring cubicle/cell of: _____**minimum dimensions**

If any animal is found sick, injured or unduly stressed the matter shall be reported to the _____ for providing treatment expeditiously. _____**veterinary officer**

The zoo operators shall arrange for medical check-ups for the staff responsible for upkeep of animals at least once in every: _____**six months**

Any animal that dies in a zoo shall be subjected to a detailed: _____**post-mortem**

The findings recorded and maintained for a period of at least: _____**six years**

animal should not be kept without a mate for period exceeding: _____ _____**one year**

Every large and medium zoo shall make arrangements in the form of _____ **Recording, Writings**

_____ are documents that are meant to guide decisions and to achieve certain goals._____ _____**Policies**

a safety policy which describes in detail what to do in case of animal escapes, fire, or other emergencies. _____**Acquisition & Disposition policy**

A _____ creates a vision that is supported by policies, guidelines, and priorities. _____**master plan**

The Director, Curators, Architects, Veterinarians, Staff from keeper and Education departments are a part of: _____**planning team**

_____ gives details for the proposal and activities of development for next six years._____ **Management plan**

Term used When there is no reasonable doubt that the last individual has died _____**Extinct (EX)**

When a taxon is known only to survive in Cultivation, Captivity, Naturalized population (or populations) well outside the past range. _____**Extinct in the Wild (EW)**

When a taxon is facing an extremely high risk of extinction in the wild in the immediate future _____**Critically Endangered (CR)**

Those which are abundant in their range but are gradually declining in total numbers. _____**Endangered (EN)**

When a taxon is not Critically Endangered or Endangered but is facing a high risk of extinction in the wild in the medium-term future. _____**Vulnerable (VU)**

When a taxon has not yet been evaluated against the criteria. _____**Not Evaluated (NE)**

The IUCN Red List of threatened species lists _____ of internationally threatened animals occurring in Pakistan. _____**45 species**

Out of these 45 threatened species, ____ are of mammals_____ **18**

Snow leopards have tails up to ____ in length which help the leopards to balance on steep and rocky slopes _____**1 m**

Unlike other large cats, snow leopards cannot:_____ **roar**

Body size of snow leopards can be up to _____ length Weight up to around_____ **1.3m, 70kg**

The gestation period of snow leopard is _____ days _____**98 - 104**

Snow leopard generally inhabits elevations between:_____ **2000-4000m**

Estimated population of the snow leopard is between: _____**3,920-6,390**

There are as few as _____ approximately snow leopards in the wild. _____**6000**

Hyenaʾs are large sized _____ carnivores _____**dog like**

The ears of hyenaʾs lack any _____ on their outer margin_____ **bursa or pouch-like fold**

In Pakistan, hyena is distributed in Hilly tracks of: _____**Baluchistan & Sindh**

The _____ is a true desert dweller. _____**Sand Cat**

Breeding (sand cat) in the wild is seasonal with births born: _____**January-April**

Sexual maturity in sand cats is reached at about _____ months. _____**9-14**

in Pakistan, sand cats are reported in _____ only_____ **Baluchistan**

IUCN status of Panther is:_____ **Critically Endangered (CE)**

Leopards are sexually dimorphic as males tend to be _____ than females_____ **larger**

Typical lifespan oh panther in wild is _____ years _____ **10to 12**

Typically, panther females stop reproducing around _____ years old. _____**8.5**

The primary threats to Leopards are: _____**anthropogenic**

The Indian wild asses are significantly _____ than donkeys_____ **larger**

The belly, buttocks and muzzle of asses are: _____**white**

The _____ gives birth to one foal. _____**mare**

The Asiatic wild ass is included in CITES:_____ **Appendix I**

_____ is one of the nine Argali subspecies. _____**Marco polo sheep**

The name ‘Argali' is the Mongolian word for:_____ **wild sheep**

_____ of wild sheep have two large corkscrew shaped horns _____**Males**

Females of wild sheep are sexually mature at: _____**2 years**

Males wild sheep may not sexually mature until:_____ **5 years**

Argali are included on Appendix _____ of CITES. _____**I&II**

The bustard is included in _____ of CITES _____**Appendix I**

In_____, dolphins were protected under the Wildlife Act of Sindh._____ **1972**

In 1974 the government of Sindh declared the _____ between the Sukkur and Guddu Barrages a dolphin reserve. _____**Indus River**

The government of Punjab prohibited deliberate killing of dolphins in the Punjab Wildlife Protection Act in:_____ **1974**

Since 2000, _____ has been working in collaboration with the Sindh Wildlife Department on the conservation of the Indus River Dolphins. _____**WWF-Pakistan**

Male falcons usually have weight from: _____**730 to 990g**

Range lifespan of falcons is:_____ **10 years**

Falcons are Included in _____ of CITES. _____**Appendix II**

_____ is the English name of Indian pangolin._____ **Scaly Ant eater**

_____ are considered to be the most traded wild animal in the world _____**Pangolins**

Para is the common name of: _____**Hog Deer**

Egyptian fruit bat is Sometimes mistakenly called the: _____**“Flying Fox”**

The Egyptian Fruit Bat is a smaller type of bat, length of about: _____**six inches**

The snout area of Egyptian fruit bats looks very similar to that of a:_____ **canine**

Egyptian fruit bats can create very large colonies with often more than _____ members._____ **1,000**

The anti-inflammatory drug _____ has been identified as the cause of mortality of Indian vulture. ___**diclofenac**

SAVE stands for: _____**Saving Asia’s Vultures from Extinction**

_____ is the act of placing organisms into conditions that differ significantly from those experienced by these organisms in their natural habitats._____ **Release**

_____ is the human-mediated movement of living organisms from one area, with release in another. **Translocation**

The intentional movement and release of an organism inside its indigenous range from which it has disappeared. _____**Reintroduction**

The leopard cat looks like a miniature, long-legged and more slender version of a: _____**leopard**

In the tropics, leopard cat Fur is _____ with white underparts _____**yellowish-brown**

Jungle cat has tail about _____ of head and body length. _____ **1/3**

Jungle Cats feed mainly on prey that weighs less than: _____ _____**one kilogram**

The bobcat is crepuscular, and is active mostly during: _____**twilight**

The biggest threat to Bobcat is its:_____ **fur**

The Fishing Cat is largely: **nocturnal** each individual fishing cat eats between _____ rodents per year _____**365and730**

The Fishing Cat is killed for consumption as part of a: _____**cultural practice**

The Asiatic Black Bear has been included on CITES Appendix I since: _____**1979**

The _____ is valued for its cosmetic and pharmaceutical properties. _____**Musk deer**

Yield of the musk is only about: _____**25 grams**

Each antler of stag consists of ____ tines. _____ **Five**

stag lives in groups of ____ individuals in dense riverine forests and high valleys_____ **2 to 18**

The true wild sheep are included in the genus: _____ **Ovis**

Gestation Period of wild sheep: _____**150-180 days**

An antelope is a member of a number of _____ ungulate species_____ _____**even-toed**

Nilgai means: _____**blue cow**

Breeding populations of nilgai exist only in _____ plantations._____ **changa manga and Lal suhanra**

The young nilgai spend most of the _____ lying down and standing up only to Suckle. _____**-10 days**

The black buck gets their name from the _____ attained on maturity at three years of age. _____**black pelage of males**

civets secrete from their anal glands, a greasy substance called ‘civet’ which is used in making:_____**perfumes**

Otters are _____ carnivores. _____ **aquatic**

Indian otter is found throughout the lower Indus riverine system of: _____ **Punjab and Sindh**

Male peafowls are known as _____ which are members of the pheasant family. _____ **Peacocks**

The Peacock is the National bird of: _____**India**

Pheasant is a large long-tailed _____ bird. _____**game**

The bird “koklass” is having a long central and two lateral crests on the head called also:_____ **pucras**

Tragopans are commonly called: _____**"horned pheasants"**

The word “tragos” means:_____ **goat**

Houbara Butard is a large sized:_____ **running bird**
