ZOO505 - Cell and Molecular Biology (Quiz No. 1)

Question # 10 of 10 (Start time: 08:32:34 PM, 05 July 2023)

In _____, transcription factors help polymerase in binding to promoter and also help in melting of DNA.

Select the correct option

- ○ elongation of RNA
- ◉ pre-initiation complex
- ○ replication initiation
- ○ translation termination

Solved by M.Kashif(03064963933)

ZOO505 - Cell and Molecular Biology (Quiz No. 1)

Question # 9 of 10 (Start time: 08:31:46 PM, 05 July 2023)

The binding between the TFB-TATA and TFIIB is _____.

Select the correct option

- ○ linear
- ○ regular
- ○ symentric
- ◉ asymmetric

Solved by M.Kashif(03064963933)

8:31 vulms.vu.edu.pk/Qu 2

ZOO505 - Cell and Molecular Biology (Quiz No. 1)

Question # 8 of 10 (Start time: 08:31:31 PM, 05 July 2023)

_____ is recruited to polymerase by transcriptional activators.

Select the correct option

- ○ helicase
- ○ isomerase
- ○ reductase
- ◉ kinase

Solved by M.Kashif(03064963933)

8:31 vulms.vu.edu.pk/Qu 2

ZOO505 - Cell and Molecular Biology (Quiz No. 1)

Question # 7 of 10 (Start time: 08:31:17 PM, 05 July 2023)

In bacteria, transcription is initiated at ____ point on circular DNA.

Select the correct option

- specific
- origin of replication
- any
- antibiotic resistance gene

Solved by M.Kashif(03064963933)

8:31 vulms.vu.edu.pk/Qu 2

ZOO505 - Cell and Molecular Biology (Quiz No. 1)

Question # 6 of 10 (Start time: 08:28:18 PM, 05 July 2023)

During elongation of RNA, the length of transcription bubble is _____.

Select the correct option

- changing
- decreasing
- increasing
- constant

DNA Replication > Translation

Model: GPT-4

AL

Is Replication of DNA more accurate than Translation??

Yes, the replication of DNA is typically more accurate than the process of translation.

Solved by M.Kashif(03064963933)

DNA replication has various error-checking mechanisms and proofreading capabilities, which contribute to a very low error rate. For instance, DNA polymerases, the enzymes responsible for DNA replication, have proofreading mechanisms that can correct mispaired nucleotides immediately.
