Q21:- A car moving with a constant acceleration of 3 ms^{-2} pass point A with speed of 6 ms^{-1} . Find distance traveled after 8 second.

(22) - If mass of body 2 kg , find gravitational force acting on a body in the earth's gravitational field.

(23) - Partical moving line simple harmonic motion. amplitude of motion is 0.5 m and center of oscillation O with speed 2 ms^{-1} . Calculate the speed of P when $OP = 0.2 \text{ m}$. (0310-0060185)

(24) - A Partical mass m moves under the force F in xy Plain such that any time t its Polar coordinates (r, θ) , Find the transverse components of force.

(25) - Vector and scalar quantities
Force, mass, velocity, density, speed, momentum.

26 - A body of mass 2 kg , horizontal force of magnitude $\frac{1}{2v+1} \text{ N}$, where v is the velocity of the body ($v > 0$). Find the time at which velocity is 1 ms^{-1}
