- Schizophrenia and other psychotic disorders
- Communication disorders
- Autism
- Mood disorders **Answer:** Schizophrenia and other psychotic disorders

Question 2:

In schizophrenia, the course specifiers are only used after a duration of how many months?

- 3 months
- 1.5 years
- 1 year
- 6 months **Answer:** 1.5 years

Question 3:

Which of the following disorders requires specifying the type, such as bipolar type or depressive type?

- Schizoaffective disorder
- Delusional disorder
- Schizophreniform disorder
- Brief psychotic disorder **Answer:** Schizoaffective disorder

Question 4:

Inattention and disorganization are characterized by which of the following disorders?

- Autism

- Communication disorders
- Attention Deficit Hyperactivity Disorder
- Language disorders **Answer:** Attention Deficit Hyperactivity Disorder

Question 5:

"Delusions developed during or soon after substance intoxication or withdrawal or after exposure to a medication" is one of the diagnostic criteria of:

- Brief psychotic disorder
- Schizophreniform disorder
- Substance/medication-induced psychotic disorder
- Delusional disorder **Answer:** Substance/medication-induced psychotic disorder

Question 6:

"Difficulties understanding what is not explicitly stated" is one of the features of:

- Stuttering
- Language disorders
- Communication disorders
- Social communication disorder **Answer:** Social communication disorder

Question 7:

Which of the following disorders was initially known as affective disorder and mood disorder?

- Depressive disorders
- Psychotic disorders
- Neurotic disorders
- Schizophrenia **Answer:** Depressive disorders

Question 8:

Inattention and disorganization, and hyperactivity-impulsivity are the two main salient features of which disorder?

- Attention Deficit Hyperactivity Disorder
- Communication disorder
- Social communication disorder
- Autism **Answer:** Attention Deficit Hyperactivity Disorder

Question 9:

Which of the following is the most significant specifier that needs to be identified in multiple episodes of schizophrenia?

- Currently acute, continuous, remission
- Currently acute, partial remission, full remission
- Unspecified, acute, partial remission
- Currently in remission, chronic, full remission **Answer:** Currently acute, continuous, remission

1. Which of the following is considered as one of the hereditary reasons in the Depressive disorders?

- Transferred from the mother
- Transferred from the father
- O
- **Higher concordance among identical twins than fraternal ✓**
- It runs in the generations

2. Which of the following is a type of speech sound disorder?

- Reading disorder
- Learning disorder
- Language disorder
- **Communication disorder ✓**

3. A sudden, rapid, recurrent, non-rhythmic motor moment or vocalization refers to which of the following disorders?

- **Tourette's disorder ✓**
- Developmental coordination disorder
- Stereotypic movement disorder
- Tic disorder

4. Learning disorders are characterized by which of the following?

- **Deficits in perception and information processing ✓**
- A deficiency in cognitive abilities

- Learning in the classroom and retrieving in exams
 - Poor memory and retrieval
5. Which disorder involves low mood, lack of pleasure in activities, and suicidal ideation?
- **Major depression disorder ✓**
 - Persistence depressive disorder
 - Disruptive mood dysregulation disorder
 - Other specified depressive disorder
6. History, laboratory findings, and physical examination, refer to depressive symptoms due to substance intoxication in which disorder?
- Persistence depressive disorder
 - Disruptive mood dysregulation disorder
 - **Substance/medication induced depressive disorder ✓**
 - Major depressive disorder
7. The presence of both, multiple motor and one or more vocal tics at times during the illness, although not necessarily appears at the same time, is a criteria of:
- Tic disorder
 - **Tourette's disorder ✓**
 - Developmental coordination disorder
 - Stereotypic movement disorder
8. In brief psychotic disorder, what is the most important to specify?
- What correlation
 - **What duration ✓**
 - What intensity
 - With marked stressor(s)
9. Identify one of the significant specifier of the diagnostic criteria of Attention Deficit Hyperactivity Disorder.
- **Whether Combined presentation, inattentive, or hyperactive ✓**
 - Settings in which symptoms shown
 - Duration of the symptoms

- Age and gender

10. How many types Motor Disorders have?

- 5 types
- 4 types
- 2 types
- 3 types ✓

1. How many types Motor Disorders have?

- A) 3 types ✓
- B) 2 types
- C) 5 types
- D) A types

2. 'Delusions developed during or soon after substance intoxication or withdrawal or after exposure to a medication' is one of the diagnostic criteria of:

- A) Delusion disorder
- B) Substance/medication-induced psychotic disorder ✓
- C) Schizophrenia form disorder
- D) Brief psychotic disorder

3. Which of the following disorder requires specifying the type like, bipolar type or depressive type?

- A) Delusion disorder
- B) Brief psychotic disorder
- C) Schizophreniform disorder
- D) Schizoaffective disorder ✓

4. Diagnosis of which of the following can be made without using the severity specifier?

- A) Delusion disorder ✓
- B) Catatonia disorder due to another medical condition
- C) Schizoaffective disorder

- ☐ D) Schizophrenia
- 5. **The presence of both, multiple motor and one or more vocal tics at times during the illness, although not necessarily appears at the same time, is a criteria of:**
 - ☐ A) Stereotypic movement disorder
 - ☐ B) Tic disorder
 - ☐ C) Developmental coordination disorder
 - ☐ D) Tourette's disorder ✓
- 6. **A patient has catatonic position but has enough flexibility that allows you to move the body but again sustain the typical position, is termed to have which of the following?**
 - ☐ A) Negativism
 - ☐ B) Posturing
 - ☐ C) Mutism
 - ☐ D) Waxy flexibility ✓
- 7. **Which of the following disorder is initially known as affect disorder and mood disorder?**
 - ☐ A) Schizophrenia
 - ☐ B) Depressive disorders ✓
 - ☐ C) Psychotic disorders
 - ☐ D) Neurotic disorders
- 8. **The disorder in which psychotic symptoms become visible but due to any other medical condition is called:**
 - ☐ A) Psychotic disorder due to another medical condition ✓
 - ☐ B) Brief psychotic disorder
 - ☐ C) Delusion disorder
 - ☐ D) Schizophreniaform disorder
- 9. **In schizophrenia, the course of specifiers is only used after the duration of how many months?**
 - ☐ A) 1 year
 - ☐ B) 6 months ✓
 - ☐ C) 3 months
 - ☐ D) 1.5 years

10. Which disorder involves low mood, lack of pleasure in activities, and suicidal ideation?

- A) Other specified depressive disorder
- B) Major depression disorder ✓
- C) Persistent depressive disorder
- D) Disruptive mood dysregulation disorder

1. Which of the following is the most significant specifier which needs to identify in multiple episodes of schizophrenia?

- Currently in remission, chronic, full remission
- Currently acute, partial remission, a full remission
- Unspecified, acute, partial remission
- **Currently acute, continuous, remission ✓**

2. Which of the following disorder involves a sudden, rapid, recurrent and non-rhythmic motor moment or vocalization?

- Stereotypic movement disorder
- Developmental coordination disorder
- **Tic disorder ✓**
- Tourette's disorder

3. Repetitive motor movements interfere with social academic or other activities and may result in self injury in which of the following disorder?

- **Stereotypic movement disorder ✓**
- Developmental coordination disorder
- Motor disorder
- Tic disorder

4. Which of the following disorder requires specifying the type like, bipolar type or depressive type?

- Delusion disorder

- **Schizoaffective disorder ✓**
- Brief psychotic disorder
- Schizophreniform disorder

5. The symptoms of stupor, catalepsy, waxy flexibility, mutism, negativism, posturing, mannerism, stereotype, agitation, not influenced by external stimuli is the diagnostic criteria of which of the following?

- **Catatonia associated with another mental disorder ✓**
- Delusion disorder
- Brief psychotic disorder
- Schizophrenia

6. Zoya is showing depressive symptoms with no psychological reasons but there is prevalence of some medical conditions so, she would be diagnosed with which disorder?

- Other specified depressive disorder
- Disruptive mood dysregulation disorder
- Major depression disorder
- **Depressive disorder due to another medical condition ✓**

7. Severe recurrent temper outbursts manifested verbally, inconsistent with developmental level, and occurs three or more times per week, are salient features of which disorder?

- Major depressive disorder
- Substance/medication induced depressive disorder
- **Disruptive mood dysregulation disorder ✓**
- Persistent depressive disorder

8. Which of the following contains the mixed features of mood disorders and schizophrenia?

- Delusion disorder
- Brief psychotic disorder

- Schizophreniform disorder
- Schizoaffective disorder ✓

9. Which of the following cause anxiety about speaking limits effective communication, social participation or academic or occupational performance?

- Stuttering ✓
- Language disorder
- Autism
- Social communication disorder

10. The patient's unresponsiveness towards the routine things in catatonia associated with another mental disorder is termed as:

- Catalepsy
- Stupor ✓
- Mutism
- Waxy flexibility

❓ Rational Emotive Behavior Therapy was presented by:

- B. F Skinner
- Alfred Adler
- Carl Jung
- Albert Ellis ✓

❓ Tarantism was a concept in Europe during the:

- Stone
- Middle ✓
- Renaissance

❓ ASR likes a girl. People noticed that when ASR is with that girl, he is often throwing demeaning comments at her. ASR is using defense mechanism.

- Displacement
- **Reaction Formation ✓**
- Sublimation
- Rationalization

? Genuineness is a quality of which of the following?

- Word Association
- Dream Analysis
- Behavior Modification
- **Client Centered Therapy ✓**

? Electroconvulsive therapy is also known as:

- Psychosurgery
- Psychotropic Medication
- Psychotherapy
- **Brain Stimulation ✓**

? Assessment of Thought Pattern in Mental Status Examination does NOT include:

- **Orientation ✓**
- Clarity
- Flow
- Relevance

? If a person is _____ from normal, he is said to be abnormal.

- Distressing
- Dysfunctional
- **Deviating ✓**
- Danger

? Positive and Negative Symptoms Scale (PANAS) is administered for the diagnosis of:

- Depression
- Anxiety
- Obsession

- Schizophrenia ✓

❑ Impaired thinking is a characteristic of a child with Autism Spectrum Disorder.

- True ✓
- False

❑ Can provide a therapy to the client.

- Psychologist ✓
- Psychiatrist
- Social Worker

1. Intellectual Disability was earlier known as:

- Asperger's Disorder
- Autism Disorder
- Learning Disorder
- Mental Retardation ✓

2. ALM crossed a red light while driving a car. He did not stop at the signal because he had to reach home early; therefore, he thought that what he did was not wrong. ALM adopted:

- Rationalization ✓
- Sublimation
- Displacement
- Reaction Formation

3. A psychology found that JKL is a 12-year-old boy belonging to a very poor family. His father is suffering from OCD for the past 10 years. He experienced trauma when he was 3 years old and has recently been diagnosed with OCD as well. Which of the following models of Psychology best explains JKL's condition?

- Psychoanalytical
- Sociocultural
- Biopsychosocial ✓
- Humanistic

4. If a person has a belief that people are always looking to ridicule him, which of the following is likely linked to this?
- ☐ Learned Response
 - ☐ Sociocultural Factor
 - ☐ Intrapsychic Conflict
 - ☒ Irrational Cognition ✓
5. In ____ defense mechanism, the person leads to an infantile stage.
- ☒ Regression ✓
 - ☐ Displacement
 - ☐ Sublimation
 - ☐ Repression
6. Memory Assessment Scales (MAS) is a type of ____ test.
- ☐ Self-Report Inventory
 - ☐ Intelligence
 - ☒ Neuropsychological ✓
7. Hyper reactivity to sensory information is a characteristic of:
- ☐ Mood Disorder
 - ☐ Intellectual Disability
 - ☒ Autism Spectrum Disorder ✓
 - ☐ Global Developmental Delay
8. Tarantism was used by:
- ☐ Greeks
 - ☒ Europeans ✓
 - ☐ Romans
9. Which of the following neurotransmitter is linked with Anxiety?
- ☐ Dopamine
 - ☒ GABA ✓
 - ☐ Serotonin

- Norepinephrine

10. Intellectual disability is not linked to which of the following?

- Genetic Factors
- Anatomy of Brain
- Viral Infections
- **Imbalanced Hormones ✓**

1. ASR likes a girl. People noticed that when ASR is with that girl, he is often throwing demeaning comments at her. ASR is using defense mechanism. Select the correct option

- Displacement
- **Reaction Formation ✓**
- Sublimation
- Rationalization

2. Hyper reactivity to sensory information is a characteristic of: Select the correct option

- Intellectual Disability
- Mood Disorder
- Global Developmental Delay
- **Autism Spectrum Disorder ✓**

3. REBT is a technique used in which of the following modality? Select the correct option

- Biological
- Dispositional
- Behavioral
- **Cognitive ✓**

4. Which of the following is an example of deviance in our society? Select the correct option

- Not being able to work efficiently
- **Denying Religious Teachings ✓**
- Over eating or being Obese
- Feeling Anxious in Presentation

5. Which of the following is NOT a criteria of Autism Spectrum Disorder? Select the correct option
- ☐ Deficits in Social Communication
 - ☒ Deficits in Independent Living ✓
 - ☐ Deficits in Understand Relationships
 - ☐ Deficits in Non Verbal Communication
6. Pharmacological Treatment is best linked with which of the following modality? Select the correct option
- ☒ Biological ✓
 - ☐ Psychoanalytical
 - ☐ Behavioral
 - ☐ Humanistic
7. Which of the following provides the personal details about the client? Select the correct option
- ☐ Social Worker
 - ☒ Informant ✓
 - ☐ Psychologist
 - ☐ Psychiatrist
8. Rational Emotive Behavior Therapy was presented by: Select the correct option
- ☒ Albert Ellis ✓
 - ☐ B. F Skinner
 - ☐ Alfred Adler
 - ☐ Carl Jung
9. Which of the following is NOT linked with Carl Rogers? Select the correct option
- ☒ Individual Psychology ✓
 - ☐ Unconditional Positive Regard
 - ☐ Genuineness
 - ☐ Accurate Empathy
10. Intellectual disability is not linked to which of the following? Select the correct option
- ☐ Genetic Factors

- Imbalanced Hormones ✓
- Viral Infections
- Anatomy of Brain
