

100. Which of the following refers to procedure in which reinforcement is used to guide a response closer and closer to a desired response?

Shaping

Note: Please Subscribe my channel and share it with your friends.

97. Whenever huma's students behave well, she reduces their amount of homework for that night. This is an example of what aspect of operant conditioning?

Positive reinforcement

98. Ali forgot to take out the trash as part of his weekly chores, so his parents took away his video game privileges for the rest of the week. All's parents are using which of the following?

Negative punishment

99. BF. Skinner studied operant conditioning through the use of an operant conditioning box which is also known as what?

Skinner box

93. Explicit memory is.....while implicit memory is.....

Conscious, unconscious

94. Which of the following tasks is not an example of implicit memory

Free recall

95. Which of the following refers to the process of providing assistance or cues to encourage the use of a specific skill?

Prompting

96. Who among the following gave three components model of working memory?

Baddley

97. Whenever huma's students behave well, she reduces their amount of homework for that night. This is an example of what aspect of operant conditioning?

Positive reinforcement

98. Ali forgot to take out the trash as part of his weekly chores. so his parents took

88. Which one of the following is the most predominant method used for studying?

Chunking

89. Which of the following refers to the process of providing assistance or cues to encourage the use of a specific skill?

Prompting

90. Edward C. Tolman pioneered the study of.....processes in learning.

Cognitive

91. All of the followings are components of working memory

The phonological loop

The central executive

92. Memorizing Information is to.....while replicating observed behavior is to.....

Attention, reproduction

Episodic memory

85. Aima knows that elephant and giraffes are both mammals. Her knowledge would be related to which of the following memory?

Semantic memory

86. Which one of the following is the most studied function of concepts?

Categorization

87. To teach your dog to roll over on command, which of the following techniques would you use?

Shaping

81. In Endel Tulving and Zena Pearlstone's (1966) experiment on cued recall, which one of the following percentages of words were correctly recalled by the cued recall group?

75%

82. The response in classical conditioning is.....while it is.....in operant conditioning

Involuntary, voluntary

83. A systematic process of reinforcing successive approximations to a target behavior is called:

Shaping

84. What term is applied to vivid snapshots of the circumstances in which we heard consequential or traumatic information?

Episodic memory

77. Remembering telephone number over a brief interval would be best example of which of the following memory?

Short-term

78. The process of adding small behaviors together to create a more sophisticated behavior is called:

Chaining

79. Which of the following is not an example of autobiographical memory?

Memories about events in infancy

80. The other name of explicit memory is:

Episodic memory

81. In Endel Tulving and Zena Pearlstone's (1966) experiment on cued recall, which one of the following percentages of words were correctly recalled by the cued recall group?

74. Which of the following type of reinforcement is used to strengthen a response by presenting a stimulus?

Positive reinforcement

75. Participants take part in an experiment where they learn a number of words and are told that they will be tested later on what they have learned. This is a test of

Interference

76. One of the characteristics of explicit memory is that it operates:

Consciously

Procedural memory

70. Furniture would be an example of which one of the following mental representations

Prototypes

71. Which of the following refers to procedure in which reinforcement is used to guide a response closer and closer to a desired response?

Shaping

72. Aima knows that elephant and giraffes are both mammals. Her knowledge would be related to which of the following memory?

Semantic memory

73. Which structure of the working memory model is responsible for higher-level thought processes and has a limited attentional capacity?

Episodic buffer

66. Which of the following components activates when we acquire new vocabulary words in our first-language and in a foreign language?

Phonological loop

67. Formation of picture in mind and doing puzzle solving tasks would be an example of which of the following components?

Visuospatial sketchpad

68. The accurate working of cognitive maps in real world situations refer to which one of the following concepts

Face validity

69. The other name of explicit memory is:

Procedural memory

70. Furniture would be an example of which one of the following mental

63. The process of retaining retrieving and using information is called

Memory

64. Which of the following refers to the process of providing assistance or cues to encourage the use of a specific skill?

Prompting

65. The phonological loop consists of which of the following two components?

Phonological store, articulatory rehearsal process

59. Recalling that April 1564 is the date on which Shakespeare was born would be an example of which of the following memory?

Episodic memory

60. Which one of the following numbers of words are known by an average English language speaker?

20,000 to 40,000

61. The phonological loop consists of which of the following two components?

Phonological store, articulatory rehearsal process

62. Repeating a phone number mentally, or aloud until the number is entered into the phone to make the call, would be related to which of the following?

Maintenance rehearsal

63. The process of retaining retrieving and using information is called

Memory

11:58

Shaping

53. Learning a list of 10 words and then recalling them five minutes later would be an example of

Retrospective memory

54. The other name of explicit memory is:

Procedural memory

5

THE STUDENT'S PLATFORM

49. Memorizing information is to.....while replicating observed behavior is to.....

Retention, reproduction

50. A judge asking you questions like "Did you see the white car during the accident" can give rise to which one of the following effects?

The misinformation effect

51. Who among the following pioneered the study of cognitive processes in learning by inventing experimental circumstances?

Edward Tolman

52. Which of the following refers to procedure in which reinforcement is used to guide a response closer and closer to a desired response?

Shaping

53. Learning a list of 10 words and then recalling them five minutes later would be an

45. One of the characteristics of explicit memory is that it operates:

Consciously

46. Remembering to take medicine at night before going to bed would be an example of

Prospective memory

47. Which one of the following features of memory helps us in filling in the gaps where information is missing?

Constructive nature of memory

48. Which structure of the working memory model is responsible for acting as an interface between the other slave systems and the structure regulating these?

Episodic buffer

49. Memorizing information is to.....while replicating observed behavior is

11:57

34

43. The process of adding small behaviors together to create a more sophisticated behavior is called:

4

THE STUDENT'S PLATFORM

Chaining

44. Which one of the following is the most studied function of concepts?

Categorization

4:25 / 10:12

43. The process of adding small behaviors together to create a more sophisticated behavior is called:

4

THE STUDENT'S PLATFORM

Chaining

44. Which one of the following is the most studied function of concepts?

Categorization

41. Which of the following refers to procedure in which reinforcement is used to guide a response closer and closer to a desired response?

Shaping

42. Repeating a phone number mentally, or aloud until the number is entered into the phone to make the call would be related to which of the following?

Maintenance rehearsal

43. The process of adding small behaviors together to create a more sophisticated behavior is called:

38. Whenever huma's students behave well, she reduces their amount of homework for that night. This is an example of what aspect of operant conditioning?

Positive reinforcement

39. Ali forgot to take out the trash as part of his weekly chores, so his parents took away his video game privileges for the rest of the week. All's parents are using which of the following?

Negative punishment

40. BF. Skinner studied operant conditioning through the use of an operant conditioning box which is also known as what?

Skinner box

41. Which of the following refers to procedure in which reinforcement is used to guide a response closer and closer to a desired response?

Shaping

55. A conditioning in which responses operates on the environment is called:

Operant conditioning

56. B.F. Skinner studied operant conditioning through the use of an operant conditioning box, which is also known as what?

Skinner box

57. Formation of picture in mind and doing puzzle solving tasks would be an example of which of the following components?

Visuospatial sketchpad

58. A student sometimes got A's on his midterm exams last year when he used his green pen to write the exams. Now he always takes his lucky green pens to exams. How did the student's superstitious behavior arise?

Classical conditioning

33. Memorizing Information is to.....while replicating observed behavior is to.....

Attention, reproduction

34. Explicit memory is.....while implicit memory is.....

Conscious, unconscious

35. Which of the following tasks is not an example of implicit memory

Free recall

36. Which of the following refers to the process of providing assistance or cues to encourage the use of a specific skill?

Prompting

37. Who among the following gave three components model of working memory?

Baddley

38. Whenever huma's students behave well, she reduces their amount of homework for that night. This is an example of what concept of operant conditioning?

11:56

32. All of the followings are components of working memory

McQs+Definitions

THE STUDENT'S PLATFORM

1. In our lives much of social learning is occur due to which of the following?
Observation
2. Which of the following tasks is not an example of implicit memory?
Free recall
3. Which of the following refers to the process of providing assistance or cues to encourage the use of a specific skill?
Prompting
4. A systematic process of reinforcing successive approximations to a target

Cognitive

96. Memory about your first day at a new job would be an example of?

Semantic memory

97. Who among the following is founder of behaviorism school of psychology?

John Watson

**Note: Please Subscribe my channel and
share it with your friends.**

92. Attendants must observe teacher to learn how to dance in dancing classes. This example would best relate to which of the following stages of learning?

Attention

93. The phonological loop consists of which of the following two components?

Visuospatial sketchpad, central executive

94. Which of the following comprises of the thalamus (which is the junction and the gateway for all sensory-motor and association pathways) and the hypothalamus (which is the primitive survival centre)?

Diencephalon

95. Edward C. Tolman pioneered the study of processes in learning?

Cognitive

96. Memory about your first day at a new job would be an example of?

Semantic memory

87. Memory about your first day at a new job would be an example of?

Episodic memory

88. The process of adding small behaviors together to create a more sophisticated behavior is called?

Chaining

89. Talha's parents give him a dollar every time he cleans his room. Which kind of reinforcement schedule are the parents implementing?

Continuous

90. Which of the following is a central theme of behaviorism?

Majority of behavior is learnt and not innate

91. Explicit memory is while implicit memory is?

Conscious, unconscious

83. Learning may be defined as a change in behavior that occurs as the result of experience?

Relatively consistent

84. The process of retaining, retrieving and using information is called?

memory

85. The response in classical conditioning is while it is in operant conditioning?

Voluntary, involuntary

86. According to Skinner, a reinforcer is any event that?

Increases a behavior

79. Repeating a phone number mentally, or aloud until the number is entered into the phone to make the call, would be related to which of the following?

Elaborative rehearsal

80. According to Skinner, a reinforcer is any event that?

Increases a behavior

81. It holds memory of about 30 seconds and also called working memory. This best relates to?

Short-term memory

82. Which of the following refers to the process of providing assistance or cues to encourage the use of a specific skill?

Prompting

83. Learning may be defined as a change in behavior that occurs as the result of experience?

74. What is the tendency to respond to a new stimulus as if it's the original conditioned stimulus?

Stimulus generalization

75. Observational leaning involves all of the following steps?

Retention

76. Observational leaning involves all of the following steps?

Reproduction

77. Observational leaning involves all of the following steps?

Attention

78. Priming is related to which of the following memories?

Implicit

79. Repeating a phone number mentally, or aloud until the number is entered into the

71. When one individual imitates another has occurred?

Modeling

72. Which of the following is not a type of human memory system?

Syntax

73. Baddeley and Hitch (1974) devised which model of memory?

Working memory model

66. What is the tendency to respond to a new stimulus as if it's the original conditioned stimulus?

Stimulus generalization

67. Which of the following is an example of a fixed-interval reinforcement schedule?

Hassan gets a piece of candy for every other homework assignment he completes

68. Participants take part in an experiment where they learn a number of words and are told that they will be tested later on what they have learned. This is a test of?

Recognition

69. Which of the following is a central theme of behaviorism?

Majority of behavior is learnt and not innate

70. Who among the following is founder of behaviorism school of psychology?

John Watson

61. Which psychologist is most famous for his Law of Effect?

Edward Thorndike

62. BoBo doll experiment is BEST example of which of the following type of learning?

Observational

63. Which of the following is a central theme of behaviorism?

Majority of behavior is learnt and not innate

64. Which of the following is not a type of human memory system?

Syntax

65. Which structure of the working memory model is responsible for higher-level thought processes and has a limited attentional capacity?

Visuo-spatial sketchpad

66. What is the tendency to respond to a new stimulus as if it's the original

58. Who among the following is the founder of operant conditioning?

B. F. Skinner

59. Which of the following refers to the process of providing assistance or cues to encourage the use of a specific skill?

Prompting

60. Which of the following refers to procedure in which reinforcement is used to guide a response closer and closer to a desired response?

Shaping

54. A systematic process of reinforcing successive approximations to a target behavior is called?

Shaping

55. In which of the following technique of neuroanatomical tracing, the monoamine group of NT's is exposed to formalin fixative glow under a flourecent light?

Receptor Binding Autoradiography

56. Participants take part in an experiment where they learn a number of words and are told that they will be tested later on what they have learned. This is a test of?

Recognition

57. Edward C. Tolman pioneered the study of processes in learning?

Cognitive

58. Who among the following is the founder of operant conditioning?

B. F. Skinner

50. Which of the following is an example of a fixed-interval reinforcement schedule?

Hassan gets a piece of candy for every other homework O assignment he completes

51. Which of the following is not a type of human memory system?

Syntax

52. BoBo doll experiment is BEST example of which of the following type of learning?

Observational

53. Who among the following pioneered the study of cognitive processes in learning by inventing experimental circumstances?

Albert Bandura

54. A systematic process of reinforcing successive approximations to a target

behavior is called

46. A conditioning in which responses operates on the environment is called?

Operant conditioning

47. Who among the following pioneered the study of cognitive processes in learning by inventing experimental circumstances?

Edward Tolman

48. A response is reduced if it is no longer strengthened, this phenomenon is known as?

Extinction

49. One of the characteristics of explicit memory is that it operates?

Consciously

43. Ali forgot to take out the trash as part of his weekly chores, so his parents took away his video game privileges for the rest of the week. Ali's parents are using which of the following?

Negative punishment

44. In Pavlov's experiments, the meat acted as a(an)?

Unconditioned stimulus

45. Which of the following sequences best reflects the order in which memory processes occur, from first to last?

Encoding storage-retrieval

46. A conditioning in which responses operates on the environment is called?

Operant conditioning

47. Who among the following pioneered the study of cognitive processes in learning

38. Which structure of working memory is responsible for holding limited number of sounds for limited time?

Phonological loop

39. The other name of explicit memory is?

Episodic memory

40. Which of the following is an example of a fixed-interval reinforcement schedule?

Hassan gets a piece of candy for every other homework assignment he completes

41. Operant conditioning is also referred as?

Instrumental conditioning

42. Classical conditioning is based on the work of which person?

Pavlov

43. Ali forgot to take out the trash as part of his weekly chores, so his parents took

36. Memory about your first day at a new job would be an example of?

Semantic memory

37. Who among the following is founder of behaviorism school of psychology?

John Watson

31. Explicit memory is while implicit memory is?

Conscious, unconscious

32. Attendants must observe teacher to learn how to dance in dancing classes. This example would best relate to which of the following stages of learning?

Attention

33. The phonological loop consists of which of the following two components?

Visuospatial sketchpad, central executive

34. Which of the following comprises of the thalamus (which is the junction and the gateway for all sensory-motor and association pathways) and the hypothalamus (which is the primitive survival centre)?

Diencephalon

35. Edward C. Tolman pioneered the study of processes in learning?

Cognitive

26. According to Skinner, a reinforcer is any event that?

Increases a behavior

27. Memory about your first day at a new job would be an example of?

Episodic memory

28. The process of adding small behaviors together to create a more sophisticated behavior is called?

Chaining

29. Talha's parents give him a dollar every time he cleans his room. Which kind of reinforcement schedule are the parents implementing?

Continuous

30. Which of the following is a central theme of behaviorism?

Majority of behavior is learnt and not innate

31. Explicit memory is while implicit memory is?

22. Which of the following refers to the process of providing assistance or cues to encourage the use of a specific skill?

Prompting

23. Learning may be defined as a change in behavior that occurs as the result of experience?

Relatively consistent

24. The process of retaining, retrieving and using information is called?

memory

25. The response in classical conditioning is while it is in operant conditioning?

Voluntary, involuntary

17. Observational learning involves all of the following steps?

Attention

18. Priming is related to which of the following memories?

Implicit

19. Repeating a phone number mentally, or aloud until the number is entered into the phone to make the call, would be related to which of the following?

Elaborative rehearsal

20. According to Skinner, a reinforcer is any event that?

Increases a behavior

21. It holds memory of about 30 seconds and also called working memory. This best relates to?

Short-term memory

22. Which of the following refers to the process of providing assistance or cues to

13. Baddeley and Hitch (1974) devised which model of memory?

Working memory model

14. What is the tendency to respond to a new stimulus as if it's the original conditioned stimulus?

Stimulus generalization

15. Observational learning involves all of the following steps?

Retention

16. Observational learning involves all of the following steps?

Reproduction

17. Observational learning involves all of the following steps?

Attention

18. Priming is related to which of the following memories?

Implicit

10. B.F. Skinner studied operant conditioning through the use of an operant conditioning box, which is also known as what?

Skinner box

11. When one individual imitates another has occurred?

Modeling

12. Which of the following is not a type of human memory system?

Syntax

6. Who among the following gave three components model of working memory?

Baddeley

7. which of the followings are components of working memory?

The central executive

8. which of the followings are components of working memory?

The visuospatial sketch pad

9. which of the followings are components of working memory?

The phonological loop

10. B.F. Skinner studied operant conditioning through the use of an operant conditioning box, which is also known as what?

Skinner box

11. When one individual imitates another has occurred?

Modeling

1. What term is applied to the random reappearance of a behavior after extinction?

Spontaneous recovery

2. What is entailed by a fixed-ratio schedule?

Responses are reinforced continuously

3. Recalling that April 1564 is the date on which Shakespeare was born would be an example of which of the following memory?

Semantic memory

4. Hydrochloric acid is found in which of the following type of taste?

Sour

5. Component of quinine forms which of the following taste?

Bitter

6. Who among the following gave three components model of working memory?

PSY 402 (Final Term Preparation)

McQs+Definitions

1. What term is applied to the random reappearance of a behavior after extinction?
Spontaneous recovery
2. What is entailed by a fixed-ratio schedule?
Responses are reinforced continuously
3. Recalling that April 1564 is the date on which Shakespeare was born would be an example of which of the following memory?
Semantic memory
4. Hydrochloric acid is found in which of the following type of taste?
